KEY HISTORICAL EVENTS

Conquered by Spain in 1526, El Salvador remained under Spanish rule until freeing itself in 1821. Thereafter, El Salvador was a member of the Central American Federation comprising the states of El Salvador, Guatemala, Honduras, Nicaragua and Costa Rica until this federation was dissolved in 1839. In 1841 El Salvador declared itself an independent republic.

The country's history has been marked by much political violence and a number of enforced changes of rulers. The repressive dictatorship of President Maximiliano Hernandez Martinez lasted from 1931 to 1944 when he was deposed as were his successors in 1948 and 1960. The military junta that followed gave way to more secure presidential succession although there were charges of corruption at the election. Left-wing guerrilla groups became increasingly large and strong and were engaged in constant fighting with government troops in the late 1970s. Many reports circulated of the violation of human rights and in 1980 the Roman Catholic Archbishop of San Salvador, Oscar Romero y Galdames, an acknowledged advocate of human rights by government and army, was assassinated. As the guerrillas grew stronger and gained control over a part of the country, the USA sent economic aid and advisers to El Salvador and assisted in the training of Salvadorean troops. A new constitution was enacted in Dec. 1983 under which Agostín Duarte was elected president in May 1984 but it did nothing to pacify the situation. The presidential election was boycotted as a fraud by the main left-wing organization, the Favabundo Marti National Liberation Front (FMLN).

Talks between the government and the FMLN in April 1991 led to constitutional reforms in May, envisaging the establishment of civilian control over the armed forces and a reduction in their size. In May the UN Security Council sent a mission to observe the government-FMLN negotiations, initially for one year. An agreement reached in Sept. 1991 permitted the FMLN to participate in a newly created police force under civilian authority. On 16 Jan. 1992 the government and the FMLN signed a peace agreement and a ceasefire began on 1 Feb.

KEY HISTORICAL EVENTS

Equatorial Guinea consists of the island of Bioko, for centuries called Fernando Po; other smaller islands, notably Annobón, formerly Pagalu; and the mainland territory of Rio Muni. The main ethnic group in Rio Muni is the Fang (or Pahouin), members of which also live in neighbouring Gabon; the Bubis, the original inhabitants of Fernando Po, still constitute the majority on Bioko. Fernando Po was called after the Portuguese navigator Fernão do Po, who in 1471-72 became the first European visitor to the island; it was then ruled for 3 centuries by Portugal, but was in 1778 ceded to Spain, along with Annobon and a mainland area, out of which Spain eventually retained a small area, Rio Muni, whose boundaries were recognized by other European countries in 1856.

For some decades after taking possession of Fernando Po, Spain did not effectively occupy it and allowed Britain to establish an important consulate and naval base at Clarence (later Santa Isabel), which dominated the island and were important for the suppression of slave trading over a wide area in the 19th century. Spain asserted its rule from the 1840s. Fernando Po and Rio Muni were together called the Spanish Possessions in the Gulf of Guinea, or simply Spanish Guinea. African resistance to Spanish occupation of the interior of Rio Muni continued for a long time. In Rio Muni timber became the major export; on Fernando Po the Spanish developed cocoa cultivation on European-owned plantations, for which African labour was imported from the early 20th century. This labour traffic led to an international scandal in 1930 when Liberians were found to be sold to virtual slavery. Later many Nigerians were employed, often in poor conditions, and a large Nigerian community came to live on the island.

For much of Spanish rule Africans were kept in a subordinate position under the system called *patronato de indigenas* (patronage over natives). On 30 July 1959 it was announced that Spanish Guinea was to be a part of Spain and its people Spanish citizens. It became 2 provinces, represented in the *Cortes* in Madrid.

African nationalist movements began in the 1950s and 1960s. Internal self-government was granted in 1963, with a joint legislative assembly for the 2 provinces. Bonifacio Ondo Edu, leader of the *Movimiento de Unión Nacional de Guinea Ecuatorial* (MUNGE), became head of government. Other parties included the *Idea Popular de Guinea Ecuatorial* (IPGE), of which Francisco Macías Nguema became the leader. In 1969 Spain briefly suspended the constitution after rivalry among the parties but then, under pressure to grant independence, agreed on condition of its approval by a referendum, which was given on 11 Aug. 1969. The two parts of Equatorial Guinea were united in a state which became independent on 12 Oct. 1968 with Macías Nguema as president.

President Macías established the rule of a single party, the *Partido Unico Nacional de los Trabajadores* (PUNT), in 1970. Under his dictatorship a third of the population was killed or else left the country. He was declared President-for-Life on 14 July 1972 but was overthrown by a military coup on 3 Aug. 1979, led by a relative of his, Col. Teodoro Obiang Nguema. The military régime ended the excesses of the rule of Macías who was executed.

A constitution approved by a referendum on 3 Aug. 1982 restored some political institutions, but left the military régime in power, to stay until economic and social reconstruction was completed. A Supreme Military Council then created was the sole political body until constitutional rule was resumed on 12 Oct. 1982, and opposition parties legalized.

TERRITORY AND POPULATION

The mainland part of Equatorial Guinea is bounded in the north by Cameroon, east and south by Gabon, and west by the Gulf of Guinea, in which lie the islands of Bioko (formerly Macías Nguema, formerly Fernando Póo) and Annobón (called Pagalu from 1973 to 1979). The total area is 28,051 sq. km (10,831 sq. miles) and the population at the 1983 census was 304,000. Estimate (July 1997), 443,000; density, 16 per sq. km. Another 110,000 are estimated to remain in exile abroad.

The UN gives a projected population for 2000 of 452,000.

In 1995 an estimated 57·8% of the population were rural.

The 7 provinces are grouped into 2 regions—Continental (C), chief town Bata; and Insular (I), chief town Malabo—with areas and populations as follows:

	Sq. km	*Census 1983*	*Chief town*
Annobón (I)	17	2,006	San Antonio de Palea
Bioko Norte (I)	776	46,221	Malabo
Bioko Sur (I)	1,241	10,969	Luba
Centro Sur (C)	9,931	52,393	Evinayong
Kié-Ntem (C)	3,943	70,202	Ebebiyin
Litoral (C)	6,665[1]	66,370	Bata
Wele-Nzas (C)	5,478	51,839	Mongomo

[1]Including the adjacent islets of Corisco, Elobey Grande and Elobey Chico (17 sq. km).

In 1986 the largest towns were Bata (17,000) and the capital, Malabo (10,000).

The main ethnic group on the mainland is the Fang, which comprises 85% of the total population; there are several minority groups along the coast and adjacent islets. On Bioko the indigenous inhabitants (Bubis) constitute 60% of the population there, the balance being mainly Fang and coast people. On Annobón the indigenous inhabitants are the descendants of Portuguese slaves and still speak a Portuguese patois. The official language is Spanish.

The President appointed and leads a Council of Ministers.

On 12 Oct. 1987 a single new political party was formed as the *Partido Democrático de Guinea Ecuatorial.*

A referendum on 17 Nov. 1991 approved the institution of multi-party democracy, and a law to this effect was passed in Jan. 1992. ERITREA

Capital: Asmara
Population estimate, 2000: 3·81m.
Estimated GDP: $2bn.
HDI/world rank: 0·275/168

KEY HISTORICAL EVENTS

Italy was the colonial ruler of Eritrea from 1890 until 1941, when it fell to British forces in the Second World War, and a British protectorate was set up. This ended in 1952 when the UN sanctioned its federation with Ethiopia. In 1962 Ethiopia became a unitary state and Eritrea was incorporated as a province.

Eritreans began an armed struggle for independence under the leadership of the Eritrean People's Liberation Front (EPLF) which culminated successfully in the capture of Asmara on 24 May 1991. Thereafter the EPLF maintained a *de facto* independent administration recognized by the Ethiopian government. At a referendum on 23–25 April 1993 there was a 99·8% majority in favour of independence. Sovereignty was proclaimed on 24 May 1993. In 1999 fighting broke out along the border with Ethiopia.

TERRITORY AND POPULATION

Eritrea is bounded in the north-east by the Red Sea, south-east by Djibouti, south by Ethiopia and west by Sudan. Some 300 islands form the Dahlak Archipelago, most of them uninhabited. For the dispute with Yemen over the islands of Greater and Lesser Hanish *see* YEMEN: Territory and Population. Its area is 93,679 sq. km (36,171 sq. miles). Population, 1995 estimate, 3,531,000 (17·1% urban); density, 38 per sq. km.

The UN gives a projected population for 2000 of 3·81m.

1m. Eritreans lived abroad in 1995, 0·5m. as refugees in Sudan. A UN Programme for Refugee Reintegration and Rehabilitation of Resettlement Areas in Eritrea (PROFERI) is in operation.

There are 10 provinces: Akele Guzai, Asmara, Barka, Denkel, Gash-Setir, Hamasien, Sahel, Semhar, Senhit and Seraye. The capital is Asmara (1991 population, 367,300). Other large towns (with 1989 populations) are Assab (39,569), Keren (32,110) and Massawa (19,404). An agreement of July 1993 gives Ethiopia rights to use the ports of Assab and Massawa.

48% of the population speak Tigrinya and 31% Tigré, and there are 7 other indigenous languages. Arabic is spoken on the coast and along the Sudanese border, and English is used in secondary schools. Arabic and Tigrinya are the official languages.

The latter consists of the members of the People's Front for Democracy and Justice (PFDJ; until Feb. 1994 EPLF) Central Committee and 60 other deputies (including 11 seats reserved for women). It elects the President, who in turn appoints the *State Council* made up of 14 ministers and the

Sporadic fighting between Ethiopia and Eritrea continues along the border.

ESTONIA

Eesti Vabariik

(Republic of Estonia)

Capital: Tallinn
Population estimate, 2000: 1·42m.
GNP per capita: (PPP$) 4,660
HDI/world rank: 0·758/77

KEY HISTORICAL EVENTS

The disunity of the early Estonians made them subject to Viking incursions. In 1346 the Danes relinquished Estonia to German rule. It became part of the Holy Roman Empire and then a Swedish possession in the middle of the 17th century. On Sweden's defeat by Peter the Great, Estonia passed to the Russian Empire in 1721.

The workers' and soldiers' Soviets in Estonia took over power on 8 Nov. 1917, were overthrown by the German occupying forces in March 1918 and were restored to power as the Germans withdrew in Nov. 1918, establishing the 'Estland Labour Commune'. It was overthrown with the assistance of British naval forces in May 1919 and a democratic republic proclaimed. In March 1934 this régime was, in turn, overthrown by a fascist *coup*.

The secret protocol of the Soviet-German agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR. On 21 July the Estonian parliament proclaimed the establishment of an Estonian Soviet Socialist Republic and applied to join the USSR; on 6 Aug. the Supreme Soviet of the USSR accepted the application.

On 30 March 1990 the Estonian Supreme Soviet proclaimed that the Soviet occupation of Estonia on 17 June 1940 had not disrupted the continuity of the former republic and adopted, by 73 votes to nil with 3 abstentions, a declaration calling for the eventual re-establishment of full sovereignty. At a referendum in March 1991, 77·8% of votes cast were in favour of independence. While an attempted coup was taking place in the USSR, parliament declared independence on 20 Aug. 1991. A fully independent status was conceded by the USSR State Council on 6 Sept. 1991.

TERRITORY AND POPULATION

Estonia is bounded in the west and north by the Baltic Sea, east by Russia and south by Latvia. There are 1,541 offshore islands, of which the largest are Saaremaa and Hiiumaa, but only 14 are permanently inhabited. Area, 45,227 sq. km (17,462 sq. miles); population, 1,462,100 (1997 estimate), giving a density of 32 per sq. km.

The UN gives a projected population for 2000 of 1·42m.

In 1995 an estimated 73·0% of the population lived in urban areas. The 1989 census population was 1,565,662, of whom Estonians accounted for 61·5%, Russians 30·3%, Ukrainians 3·1%, Belorussians 1·8% and Finns 1·1%. A census is scheduled for Jan. 2000. The capital is Tallinn (1997 population, 420,470). Other large towns are Tartu (101,901), Narva (75,211), Kohtla-Järve (53,485) and Pärnu (51,807). There are 15 districts, 33 towns and 26 urban settlements.

The official language is Estonian.

SOCIAL STATISTICS

1996 births, 13,000; deaths, 19,000. Rates (1996, per 1,000 population): Birth, 9·05, death, 12·95; infant mortality (per 1,000 live births), 10·4. There were 19,464 induced abortions in 1996 (25,587 in 1993). Expectation of life was 69·98 years in 1996. Annual growth rate, 1990–95, –0·5%. Fertility rate, 1990–95, 1·6 births per woman.

CLIMATE

Because of its maritime location Estonia has a moderate climate, with cool summers and mild winters. Average daily temperatures in 1996: Jan. –7°C; July 15°C. Rainfall is heavy, 500–700 mm per year, and evaporation low.

CONSTITUTION AND GOVERNMENT

A draft constitution drawn up by a constitutional assembly was approved by 91·1% of votes cast at a referendum on 28 June 1992. Turn-out was 66·6%. The constitution came into effect on 4 July 1992. It defines Estonia as a 'democratic state guided by the rule of law, where universally recognized norms of international law are an inseparable part of the legal system.' It provides for a 101-member national assembly (*Riigikogu*) elected for 4-year terms. There are 11 electoral districts with 8 to 11 mandates each. Candidates may be elected: a) by gaining more than 'quota', i.e. the number of votes cast in a district divided by the number of its mandates; b) by standing for a party which attracts for all of its candidates more than the quota, in order of listing; c) by being listed nationally for parties which clear a 5% threshold and eligible for the seats remaining according to position on the lists. The head of state is the *President*, elected by the Riigikogu for 5-year terms. Presidential candidates must gain the nominations of at least 20% of parliamentary deputies. If no candidate wins a two-thirds majority in any of 3 rounds, the Speaker convenes an electoral college, composed of parliamentary deputies and local councillors. At this stage any 21 electors may nominate an additional candidate. The electoral college elects the President by a simple majority.

Citizenship requirements are 2 years residence and competence in Estonian for existing residents. For residents immigrating after 1 April 1995, 5 years qualifying residence is required.

National Anthem. 'Mu isamaa, mu õnn ja rõõm' ('My native land, my pride and joy'); words by J. V. Jannsen, tune by F. Pacius (same as Finland).

RECENT ELECTIONS

Presidential elections were held in 3 rounds on 26–27 Aug. 1996. There were 2 candidates. No candidate gained sufficient votes to be elected. On 20 Sept. 1996 President Meri was re-elected by an electoral college against 4 opponents.

Parliamentary elections were held on 7 March 1999. The electorate numbered 857,270, turn-out was 57·43%. Of the 101 seats, the Estonian Centre Party (K) won 28 seats (with 23·4% of the total votes); Pro Patria Union (I), 18 seats (16·1%); Estonian Reform Party (RE), 18 seats (15·9%); Mõõdukad (M), 17 seats (15·2%); Estonian Coalition Party (KE), 7 seats (7·6%); the Country People's Party (EME), 7 seats (7·3%); Estonian United People's Party (EÜRP), 6 seats (6·1%).

KEY HISTORICAL EVENTS

The ancient empire of Ethiopia has its legendary origin in the meeting of King Solomon and the Queen of Sheba. Historically, the empire developed at Askum in the north in the centuries before and after the birth of Christ as a result of Semitic immigration from South Arabia. The immigrants imposed their language and culture on the indigenous Hamitic people. Ethiopia's subsequent history is one of sporadic expansion southwards and eastwards, checked from the 16th to early 19th centuries by devastating wars with Moslems and Gallas. Modern Ethiopia dates from the reign of the Emperor Theodore (1855-68).

Menelik II (1889-1913) defeated the Italians in 1896 and thereby safeguarded the empire's independence in the scramble for Africa. By successful campaigns in neighbouring kingdoms within Ethiopia (Jimma, Kaffa, Harar, etc.) he united the country under his rule and created the empire as it is today.

In 1923 the heir to the throne, Ras Tafari (crowned Emperor Haile Selassie five years later), succeeded in getting Ethiopia admitted as an independent country to the League of Nations. However, the League was ineffective in preventing a second Italian invasion in 1936. The emperor fled the country, only returning when the Allied forces defeated the Italians in 1941.

In accordance with a resolution of the General Assembly of the UN, dated 2 Dec. 1950, the former Italian colony of Eritrea, from 1941 under British military administration, was handed over to Ethiopia on 15 Sept. 1952. Thereafter, a secessionist movement fought a guerrilla war for independence under the Eritrean Peoples' Liberation Front (EPLF). Another guerrilla campaign was waged in neighbouring Tigray, led by the Tigray Peoples' Liberation Front (TPLF). A provisional military government, known as the Dirgue, assumed power in Ethiopia on 12 Sept. 1974 under the leadership of Lieut. Col. Mengistu Haile Miriam. It deposed the emperor, abolished the monarchy and as a means of abolishing rural feudalism mounted an agricultural collectivization programme.

In 1977 Somalia invaded Ethiopia and took control of the Ogaden region. After an offensive mounted with strong Soviet and Cuban support the area was recaptured and in March 1978 Somalia withdrew all troops from the area. Control was re-established by Ethiopia later in 1978 and nationalist guerrillas were pushed back. Sporadic fighting continued in the Ogaden and along the border. Talks about the normalization of relations between Ethiopia and Somalia commenced in 1986.

The Workers Party of Ethiopia (WPE), set up by the Dirgue in 1984, drew up a constitution for a Peoples' Democratic Republic of Ethiopia which was approved by referendum in 1987. Elections took place in June and all central committee members were returned to office, including Mengistu who was elected President.

Following ever-increasing territorial gains by the insurgent Ethiopian People's Revolutionary Democratic Front (EPRDF) and the Eritrean People's Liberation Front (EPLF), Mengistu stepped down as president and fled the country. An interim EPRDF government led by Meles Zenawi took over after the flight of President Mengistu. In July 1991 a conference of 24 political groups, called to appoint a transitional government, agreed a democratic charter guaranteeing freedom of expression and association and the right to self-determination for ethnic groups. An 87-member Council of Representatives was formed which unanimously elected Meles Zenawi President. Eritrea seceded, and became independent, on 24 May 1993.

In 1999 fighting broke out along Ethiopia's border with Eritrea.

TERRITORY AND POPULATION

Ethiopia is bounded in the north-east by Eritrea, east by Djibouti and Somalia, south by Kenya and west by Sudan. It has a total area of 1,104,300 sq. km. The secession

of Eritrea in 1993 left Ethiopia without a coastline. An Eritrean-Ethiopian agreement of July 1993 gives Ethiopia rights to use the Eritrean ports of Assab and Massawa.

The first census was carried out in 1984: Population, 42,019,418 (without Eritrea, 39,570,266). Estimate (1995), 56·68m. (15·4% urban); density, 51 per sq. km.

The UN gives a projected population for 2000 of 66·18m.

The 1994 Constitution provides for a federation of 9 regions: Afar, Amhara, Benshangi, Gambella, Harar, Oromia, The Peoples of the South, Somalia and Tigre.

The population of the capital, Addis Ababa, was estimated at 1·7m. in 1990. Other large towns (population, May 1984): Dire Dawa, in Hararge, 98,104; Nazret, in Shoa, 76,284; Bahr Dar, 54,800; Debre Zeit, 51,143.

There are 6 major ethnic groups (in % of total population in 1996): Oromo, 31%; Amhara, 30%; Tigrinya, 7%; Gurage, 4·7%; Somali, 4·1%; Sidamo, 3·2%. There are also some 60 minor ethnic groups and 286 languages are spoken. The *de facto* official language is Amharic, though Oromo-speakers form the largest group.

SOCIAL STATISTICS

Births, 1995, 2,741,000; deaths, 965,000. Rates per 1,000 population, 1995: Births, 48·6; deaths, 17·1. The increase compared to the period 1980–85, when life expectancy was 38·4 years for males and 41·6 years for females, was the largest of any country in the world. Infant mortality, 1990–95, 119 per 1,000 live births; fertility rate, 7·0 births per woman.

CLIMATE

The wide range of latitude produces many climatic variations between the high, temperate plateaus and the hot, humid lowlands. The main rainy season lasts from June to Aug., with light rains from Feb. to April, but the country is very vulnerable to drought. Addis Ababa, Jan. 59°F (15°C), July 59°F (15°C). Annual rainfall 50" (1,237 mm). Harar, Jan. 65°F (18·3°C), July 64°F (17·8°C). Annual rainfall 35" (897 mm). Massawa, Jan. 78°F (25·6°C), July 94°F (34·4°C). Annual rainfall 8" (193 mm).

CONSTITUTION AND GOVERNMENT

A 548-member constituent assembly was elected on 5 June 1994; turn-out was 55%. The EPRDF gained 484 seats. On 8 Dec. 1994 it unanimously adopted a new federal Constitution which provides for the creation of a federation of 9 regions based (except the capital and the southern region) on a predominant ethnic group. These regions have the right of secession after a referendum. The *President*, a largely ceremonial post, is elected by parliament, the 548-member *Council of People's Representatives*. There is also an upper house, the 117-member *Federal Council*.

A border dispute between Ethiopia and Eritrea broke out in May 1998. Eritrean troops took over the border town of Badame after a skirmish between Ethiopian police units and armed men from Eritrea. Ethiopia maintained that Badame and Sheraro, a nearby town, had always been part of Ethiopia and called Eritrea's action an invasion. Sporadic fighting between Ethiopia and Eritrea continues along the border.

Ethiopia is a member of the UN, OAU and is an ACP state of the EU.

ECONOMY

Policy. Following a long period of stagnation, the Ethiopian economy came to a turning point in 1991 when peace was restored. An Economic Reform Programme was instituted in 1992 aimed at stabilizing the economy and deregulating economic activities to prepare the ground for a free-market economy. Also in 1992, a government agency, the Ethiopian Investment Authority, was created to promote, facilitate and co-ordinate foreign investment in the country. An Economic Rehabilitation and Reconstruction Programme (ERRP), launched in 1991–92, eased foreign exchange regulations to allow for imports of raw materials and capital equipment.

A privatization programme began in 1995, since when more than 150 companies have been privatized, yielding some US$340m. for the state. Around 300 companies are to be privatized altogether.

KEY HISTORICAL EVENTS

The Fiji Islands were discovered by Tasman in 1643 and visited by Capt. Cook in 1774, but first recorded in detail by Capt. Bligh after the mutiny of the Bounty (1789). In the 19th century the search for sandalwood, in which enormous profits were made, brought many ships. Deserters and shipwrecked men stayed on; firearms salvaged from wrecks were used in native wars, new diseases swept the islands, and rum and muskets became regular articles of trade. Tribal wars became bloody and general until Fiji was ceded to Britain on 10 Oct. 1874, after a previous offer of cession had been refused. Fiji gained independent status on 10 Oct. 1970.

Fiji remained an independent state within the Commonwealth with a Governor-General appointed by the Queen until 1987. In the general election of 12 April 1987 a left-wing coalition headed by Dr Timoci Bavadra defeated the ruling Alliance Party of Ratu Sir Kamisese Mara. The new government had the support of the Indian population who outnumbered the indigenous Fijians by 50% to 44%. It was, however, overthrown in a military coup on 14 May led by Lieut.-Col. Sitiveni Rabuka.

After a period of uncertainty in which civil government was largely restored, Brigadier Rabuka led a second coup on 25 Sept. On 7 Oct. Fiji declared itself a Republic and Fiji's Commonwealth membership lapsed.

In 1990 a new coalition restored civilian rule but made it impossible for Fijian Indians to hold power. However, a rapprochement with Indian leaders led to an agreement to restore multi-racial government in 1998. Fiji rejoined the Commonwealth in 1997. On 27 July 1998 a new constitution came into effect, whereby the country's name was changed from Fiji to Fiji Islands.

TERRITORY AND POPULATION

The Fiji Islands comprise 332 islands and islets (about one-third are inhabited) lying between 15° and 22° S. lat. and 174° E. and 177° W. long. The largest is Viti Levu, area 10,429 sq. km (4,027 sq. miles); next is Vanua Levu, area 5,556 sq. km (2,145 sq. miles). The island of Rotuma (47 sq. km, 18 sq. miles), about 12° 30' S. lat., 178° E. long., was added to the colony in 1881. Total area, 7,078 sq. miles (18,333 sq. km). Total population (1996), 772,655; density, 42 per sq. km.

The UN gives a projected population for 2000 of 848,000.

Of the Fiji Islands' current population some 60% live in rural areas. Population statistics for urban centres indicate that about 167,421 people live in the two major cities, Suva and Lautoka.

A new Constitution unanimously passed by Parliament and assented to by H.E. the President came into force on 27 July 1998. KEY HISTORICAL EVENTS

Finland was part of Sweden until the 18th century when the south-east territory was conquered by Russia. The rest of the country was ceded to Russia by the treaty of Hamina in 1809 when Finland became an autonomous grand-duchy retaining its laws and institutions under a grand duke, the Emperor of Russia. The Diet, elected since 1906 on universal suffrage, produced in 1916 a social democrat majority, the first in Europe. After the Russian revolution Finland declared itself independent but civil war broke out in Jan. 1918 between the 'whites' and 'reds', the latter supported by Russian Bolshevik troops. The defeat of the red guards in May 1918 freed the country from Russian troops. A peace treaty with Soviet Russia was signed in 1920.

On 30 Nov. 1939 Soviet troops invaded in what became known as the Winter War. The subsequent peace treaty of 12 March 1940 compelled Finland to cede 32,806 sq. km including the Carelian Isthmus, Viipuri and the shores of Lake Ladoga.

When the German attack on the USSR was launched in June 1941 Finland again became involved in war against the USSR. On 19 Sept. 1944 an armistice was signed in Moscow. Finland agreed to cede to the USSR the Petsamo area in addition to the cessions made in 1940 (total 42,934 sq. km), to lease to the USSR for 50 years the Porkkala headland as a military base, and to pay 300m. gold dollars in reparations within six years (later extended to eight years). The peace treaty was signed in Paris on 10 Feb. 1947. The payment of reparations was completed on 19 Sept. 1952. The military base at Porkkala was returned to Finland on 26 Jan. 1956. To pacify the USSR, the post-war premier and later president Juho Passikivi pursued a policy of neutralism favourable to the Russians. This policy, known as Finlandization, was continued under Presidents Urho Kekkonen (1956-81) and Mauno Koivisto (1981-94).

With the collapse of the Soviet Union, Finland was able to adopt an independent foreign policy which led to EU admission in 1995.

Parliament consists of one chamber of 200 members chosen by direct and proportional election by all citizens of 18 or over. The country is divided into 15 electoral districts, with a representation proportional to their population. Every citizen over the age of 18 is eligible for Parliament, which is elected for 4 years, but can be dissolved sooner by the President.

The *President* is elected for 6 years by direct popular vote. In the event of no candidate winning an absolute majority, a second round is held between the 2 most successful candidates.

National Anthem. 'Maamme'/'Vårt land' ('Our land'); words by J. L. Runeberg, tune by F. Pacius (same as Estonia).

Local Government. Finland is divided into 6 provinces (*lääni*, Sw.: *län*). In 1997 the number of local districts was 88.

The unit of local government is the municipality (*kunta*, Sw.: *kommun*). Main fields of municipal activities are local planning, roads and harbours, sanitary services, education, health services and social aid. The municipalities raise taxes independent from state taxation. Two categories of municipalities are distinguished by names: Towns (*kaupunki*, Sw.: *stad*), and other municipalities. In 1997 there were altogether 452 municipalities of which 107 were towns. In all municipalities, municipal councils are elected for terms of 4 years; all inhabitants (men and women) of the municipality who have reached their 18th year are entitled to vote and eligible. The executive power is in each municipality vested in a board which consists of members elected by the council. Several municipalities regularly form associations for the administration of common institutions, *e.g.*, a hospital or a vocational school, as well as for regional development and planning. Elections were held on 20 Oct. 1996. The SDP gained 24·5% of votes cast, the Centre Party, 21·8%.

The semi-autonomous province of **Åland Islands** occupies a special position as a demilitarized area. **Åland** elects a 30-member Legislature (*Lagting*), which in turn elects the provincial Executive Board. The capital is Mariehamn (Maarianhamina). It is 95% Swedish-speaking. At a referendum on 20 Nov. 1994 Åland voted to join the EU along with the rest of Finland.

ECONOMY

Policy. The Finnish economy not only saw rapid growth in the late 1990s but also redressed a number of imbalances in the economy. Owing to these developments, employment has risen substantially, aided by reductions in taxes and indirect labour costs as well as by structural reforms that have improved the functioning of the labour markets. Finnish public finances have been brought into balance and state debt into decline, as targeted by the government.

Performance. Real GDP growth was 6·0% in 1997 and was forecast to be 5·5% in 1998.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 15·70m. kW in 1997. Production was (in 1m. kWh) 66,357 in 1996 (17·6% hydro-electric) and 66,149 in 1997 (18·1%). Consumption per capita in 1997 was an estimated 14,338 kWh. In 1998 there were 4 nuclear power stations, which contributed 30·3% of production in 1997. Parliament has rejected the construction of a fifth. Supply: 220 volts; 50 Hz.

Oil and Gas. There is no oil and gas production.

Water. Finland has abundant surface water and groundwater resources relative to its population and level of consumption. The total groundwater yield is estimated to be 10–30bn. cu. metres a day, of which some 6m. is suitable for water supplies. Approximately 15% of this latter figure is made use of at the present time. A total of 2–4% of Finland's exploitable water resources are utilized each year.

Minerals. Notable of the mines are Pyhäsalmi (zinc–copper), Orivesi (gold ore), Vammala (nickel) and Keminmaa (chromium). In 1996 the metal content (in tonnes) of the output of copper ore was 9,261; of zinc ore, 26,924; of nickel ore, 2,136; and of chromium, 228,100.

Agriculture. The cultivated area covers only 7% of the land, and of the economically active population 7% were employed in agriculture and forestry in 1997. The arable area was divided in 1996 into 155,337 farms, and the distribution of this area by the size of the farms was: Less than 5 ha cultivated, 48,484 farms; 5–20 ha, 64,248 farms; 20–50 ha, 35,319 farms; 50–100 ha, 6,355 farms; over 100 ha, 931 farms.

Agriculture accounts for 1·1% of GDP, 7·8% of exports and 8·6% of imports.

The principal crops (area in 1,000 ha, yield in 1,000 tonnes) were in 1997:

The total area under cultivation in 1997 was 1,968,100 ha, about three-quarters of the entire country. Production of dairy butter in 1997 was 56,598 tonnes, and of cheese, 82,946 tonnes.

Livestock (1997): Horses, 53,100 (including trotting and riding horses, and ponies); cattle, 1,142,400; pigs, 1,467,000; poultry, 5,439,300; reindeer (1995), 333,000.

Forestry. The total forest land amounts to 23·0m. ha. The productive forest land covered 20·1m. ha in 1995. Timber production in 1995 was 50·22m. cu. metres. Finland is the second largest producer of roundwood in Europe behind Sweden, but in 1995 it was the second largest importer of industrial roundwood in the world after Japan. Finland's per capita consumption of roundwood is the highest in the world, at 11·6m. cu. metres per person in 1995.

Fisheries. The catch in 1995 was 184,829 tonnes, of which 132,971 tonnes came from sea fishing. In 1997 there were 287 food fish production farms in operation, of which 87 were fresh-water farms. Their total production amounted to 16,426 tonnes. In addition there were 134 fry-farms and 322 natural food rearers, most of these in freshwater.

INDUSTRY

Finland originally became industrialized by harnessing its forest resources. Over a century later, forests are still Finland's most crucial raw material resource, although the metal and engineering industry has long been Finland's leading branch of manufacturing, both in terms of value added and as an employer. Today Finland is a typical advanced industrial economy: two-thirds of its total output is generated in the service sector.

In 1996 there were 26,375 establishments in industry (of which 25,095 were manufacturing concerns) with 415,708 personnel (of whom 397,398 were in manufacturing). Gross value of industrial production in 1996 was 436,319m. marks, of which manufacturing accounted for 397,514m. marks

Labour. In 1996 the labour force was 2,603,000 (52% males). In 1995, 32% of the economically active population worked in community, social and personal services, and 21% in manufacturing. In 1998 unemployment was 10·5%, against 3·5% in 1990, but down from 20·0% in 1993.

Trade Unions. According to an incomes policy agreement reached by the central labour market organizations in Dec. 1997, which is in force until Jan. 2000, wages and salaries were raised by 1·6% in Jan. 1998 and by 1·6% in Jan. 1999. The Government has undertaken to cut taxes on wages and salaries to support moderate pay increases.

INTERNATIONAL TRADE

At the start of the 1990s a collapse in trade with Russia led to the worst recession in the country's recent history. Today, exports to Russia are less than 7% of the total.

The product pattern of exports has also changed dramatically over the last 40 years. In 1960 wood and paper industry dominated exports with their 69% contribution. By 1995, the metal and engineering industry was the largest export sector. But as capital goods for the forest industry form a large proportion of machinery exports, 'the forest cluster' can still be considered the dominant exporter.

In 1995 the Finnish State Railways was transformed into a joint-stock company. Operations continue under the VR Group, the largest transport services group in Finland.

Civil Aviation. The main international airport is at Helsinki (Vantaa), and there are also international airports at Turku, Tampere, Rovaniemi and Oulu. The national carrier is Finnair, which in 1998 operated 4 MD11s, 4 Boeing 757s, 22 MD82/83s and 27 other aircraft. Its scheduled traffic covered 92·0m. km in 1997. The number of passengers was 6·9m. and the number of passenger-km 11,924,000 in 1997; the air transport of freight and mail amounted to 312·6m. tonne-km. In 1998 services were also provided by Aer Lingus, Aeroflot, Air Baltic, Air Botnia, Air Canada, Air China, Air Express, Air France, Alitalia, Austrian Airlines, Balkan, British Airways, Continental Airlines, Czech Airlines, Delta Air Lines, Deutsche BA, El Al, Estonian Air, Iberia, Icelandair, KLM, Lithuanian Airlines, LOT, Lufthansa, Malév, SABENA, SAS, Skyways, Swissair, Thai Airways International, Tyrolean Airways and United Airlines. Helsinki-Vantaa handled 7,689,218 passengers in 1996 (5,423,408 on international flights) and 82,813 tonnes of freight.

Telecommunications. In 1997 there were 2,861,000 telephone main lines in use. 2,162,574 mobile telephones were in use in 1997. The sales of mobile phones are increasing rapidly; according to a survey conducted in May 1998 around 46% of Finns owned a mobile phone—the highest density of users in the world. The rate among 18- and 19-year-olds is almost 100%. The biggest operator is Sonera (formerly Telecom Finland). Approximately 50% of all voice and data traffic streams through the company's networks, and around 70% of all mobile users are Sonera customers. In 1995 there were 930,000 PCs in use (182 per 1,000 persons) and 132,000 fax machines. There were 1·43m. Internet users in Aug. 1998.

Postal Services. In 1997 there were 585 primary post offices and 1,034 agents providing postal services in Finland. Finland Post Group is now exposed to competition in its business operations, with the exception of addressed letter mail for which it holds a licence for nationwide delivery.

SOCIAL INSTITUTIONS

Justice. The lowest court of justice is the District Court. In most civil cases a District Court has a quorum with 3 legally qualified members present. In criminal cases as well as in some cases related to family law the District Court has a quorum with a chair and 3 lay judges present. In the preliminary preparation of a civil case and in a criminal case concerning a minor offence, a District Court is composed of the chair only. From the District Court an appeal lies to the courts of appeal in Turku, Vaasa, Kuopio, Helsinki, Kouvola and Rovaniemi. The Supreme Court sits in Helsinki. Appeals from the decisions of administrative authorities are in the final instance decided by the Supreme Administrative Court, also in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the Chancellor of Justice and the Ombudsman or Solicitor-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; the latter is appointed by Parliament.

At the end of 1997 the prison population numbered 2,830 men and 144 women; the number of convictions in 1997 was 307,314, of which 249,460 were for minor offences with a maximum penalty of fines, and 22,448 with penalty of imprisonment. 9,501 of the prison sentences were unconditional.

Religion. Liberty of conscience is guaranteed to members of all religions. National churches are the Lutheran National Church and the Greek Orthodox Church of Finland. The Lutheran Church is divided into 8 bishoprics (Turku being the archiepiscopal see), 80 provostships and 595 parishes. The Greek Orthodox Church is divided into 3 bishoprics (Kuopio being the archiepiscopal see) and 27 parishes, in addition to which there are a monastery and a convent.

An additional system of compulsory old-age pensions paid for by the employers is in force and works through the Central Pension Security Institute. Systems for other public aid are administered by the communes and supervised by the National Social Board and the Ministry of Social Affairs and Health.

(43·3%) on old-age and disability, 31,731m. (17·1%) on family allowances and child welfare, and 9,883m. (5·4%) on general welfare purposes and administration. Out of the total expenditure, 28·5% was financed by the State, 16·2% by local authorities, 35·5% by employers, 13% by the insured and 6·7% by property income.

CULTURE

Helsinki is one of nine European Cities of Culture in the year 2000, with the theme of 'Knowledge, Technology and the Future'. 2000 also marks the 450th anniversary of the founding of Helsinki. The other Cities of Culture are Avignon (France), Bergen (Norway), Bologna (Italy), Brussels (Belgium), Kraków (Poland), Prague (Czech Republic), Reykjavík (Iceland) and Santiago de Compostela (Spain). The title attracts large European Union grants.

Broadcasting. The Finnish Broadcasting Company, YLE, is the biggest national radio and television service provider. YLE operates two television channels with full national coverage. The second biggest television broadcaster, the privately owned Commercial MTV3, has one nationwide channel. A new private TV channel, Ruutunelonen, started in 1997. Television programmes from TV Sweden are transmitted over YLE's channel 4. There are some 30 local TV stations that mainly relay foreign and domestic programmes over cable and radio waves, in addition to locally produced material. The only radio broadcaster with full nationwide coverage is YLE. It transmits 3 national channels in Finnish and one in Swedish, as well as various regional channels, including 1 in Sami in Lapland. In 1997 there were 58 local radio stations. Two of them, the news and music stations, Nova and Classic, cover almost 60% of the population. In 1995 there were 2,650,000 TV receivers and 5,150,000 radio receivers. On 31 Dec. 1997 the number of television licences was 1,947,400.

Press. Finland has 56 newspapers that are published 4 to 7 times a week, 9 of which are in Swedish, and 167 with 1 to 3 issues per week. The total circulation of all newspapers is 3·4m. In terms of total circulation of dailies relative to population, Finland ranks second in Europe after Norway. Most newspapers are bought on subscription rather than from newsstands. Only two newspapers depend entirely on newsstand sales. There are 5,015 registered periodicals with a total circulation of over 20m. The five bestselling newspapers in 1997 were: *Helsingin Sanomat* (circulation, 472,056 copies), *Ilta-Sanomat* (218,185), *Aamulehti* (131,444), *Turun Sanomat* (113,284) and *Iltalehti* (110,597). Major international tourist attractions include Santa Park on the Polar Circle, the Kemi Snow Castle, and the Bomba House and Carelian Village in Nurmes.

Festivals. Helsinki's Festival of Light will have spectacular displays for 1999 and 2000. Other major festivals include: The Helsinki Festival Week, the Savonlinna Opera Festival, the Kuhmo Chamber Music Festival, Pori Jazz, Kaustinen Folk Music Festival, Tampere Theatre Festival, Kuopio Dance Festival and the Sodankylä Film Festival.

Libraries. The Helsinki University Library doubles as a National Library. The collections of the university libraries and major research libraries include altogether 43·1m. volumes (of which the university libraries have 19·0m.). They issued 8·6m. loans in total (university libraries 7·6m.).

The revised Public Library Act, which came into force on 1 Jan. 1999, requires each municipality to provide basic library services free of charge. The public library network is comprehensive with 992 libraries altogether. These are complemented by 210 mobile units with over 18,000 service stops. The Helsinki City Library doubles as a Central Library in this sector. Additionally the country is divided into 19 regions with a Regional Central Library providing supplementary services. In 1997 there were over 2·5m. registered borrowers, who represent 49·3% of the population. The number of loans issued totalled 102·3m.

National Theatre and Opera. There is (1999) a new Opera House and a new 14,000-seat Arena Show Hall in Helsinki. The city hosts both the National Theatre and the National Opera. KEY HISTORICAL EVENTS

Gaul, the area that is now France, was conquered by Julius Caesar in the 1st century BC and became a part of the Roman Empire. In the 3rd and 4th centuries it was overrun by Germanic tribes and in the 10th century Norsemen invaded. There was a long period of conflict with England, typified by the Hundred Years' War (1337-1453); and this was followed by rivalry with Spain in the latter part of the 15th and in the 16th century. The Reformation caused a long religious civil war between 1562 and 1598, at the end of which the Huguenot leader Henry of Navarre was converted to Catholicism and reigned as the first Bourbon king, Henry IV. The two powerful ministers of the 17th century, Cardinal Richelieu and Mazarin, successively ensured that France, and not Spain, established itself as the dominant country in Europe. Militarily, this was achieved by the treaties of Westphalia (which ended the Thirty Years' War in 1648) and of the Pyrenees (1659). There followed the brilliant reign of Louis XIV, the 'Sun King' (1643-1715).

The second half of the 18th century saw France defeated by England in the Seven Years' War (1756-63). The French Revolution began in 1789 when the 'Third Estate' assumed power as a National Assembly and overthrew the government. Riots and the storming of the Bastille were followed by the proclamation of a republic (1792) and the execution of the king, Louis XVI (1793). A Reign of Terror followed during which thousands were guillotined. After these excesses the Directory ruled from 1795 until 1799 when it was overthrown by Napoleon Bonaparte, who became First Consul and then Emperor (1804) of the first French Empire. Napoleon went on to gain control of most of Europe until he was finally defeated at the Battle of Waterloo in 1815. The monarchy was restored, with the Bourbon family reigning (officially from 1814). A revolution in 1830 brought Louis Philippe, son of the Duke of Orleans, to the throne as a constitutional monarch. This 'July Monarchy' was overthrown in 1848 and superseded by the Second Republic, with Louis Napoleon (nephew of Napoleon I) elected president. In 1852 he took the title of Emperor Napoleon III, and hence began the Second Empire. However, the early military failures of France in the Franco-Prussian War (1870-71) led to Napoleon being deposed and the proclamation of the Third Republic in 1870. This survived both the First World War, which was fought chiefly on French soil, and also 44 successive governments from the end of the war in 1918 until 1940. In 1940 German troops invaded France, the French government capitulated, and a pro-German government was established at Vichy. Gen. Charles de Gaulle headed a Free French government in London, while in France the Resistance continued to harass the German Army of Occupation and give secret aid to the Allies.

When France was liberated in 1944 a provisional government under de Gaulle ruled the country until the Fourth Republic was established in 1946 and de Gaulle retired. The country now faced problems in Algeria and in Indo-China. There were changes of government up to 1958. In that year de Gaulle was recalled to be prime minister and then president as the Fifth Republic began in 1958. He granted independence to Algeria (1962) and was successful in establishing a firm and stable government until rioting and strikes by students and workers led to his resignation in 1969. He was succeeded by Georges Pompidou, who died in 1974 and was in turn succeeded by Giscard d'Estaing. Both presidents tended to continue Gaullist policies but in 1981 François Mitterrand, a socialist candidate, was elected to the presidency. For a time he had to govern in an uneasy relationship with a right-wing premier, Jacques Chirac. Mitterrand's period of office was clouded by charges of corruption. In 1995 Chirac was elected President in succession to the ailing Mitterrand.

TERRITORY AND POPULATION

France is bounded in the north by the English Channel *(La Manche)*, north-east by Belgium and Luxembourg, east by Germany, Switzerland and Italy, south by the Mediterranean (with Monaco as a coastal enclave), south-west by Spain and Andorra, and west by the Atlantic Ocean. The total area is 549,090 sq. km. Paris is the most populous agglomeration in Europe, with a population of over 9·3m. More than 14% of the population of Paris are foreign and 19% are foreign born.

Population (1990 census), 56·6m. Estimate (1996), 58·2m.

The UN gives a projected population for 2000 of 59·06m.; projection (2025), 61·2m. Density (1996), 106 persons per sq. km. In 1995 an estimated 74·7% of the population lived in urban areas.

The growth of the population has been as follows:

Census	*Population*	*Census*	*Population*	*Census*	*Population*
1801	27,349,003	1931	41,834,923	1968	49,778,540
1861	37,386,313	1946	40,506,639	1975	52,655,802
1901	38,961,945	1954	42,777,174	1982	54,334,871
1921	39,209,518	1962	46,519,997	1990	56,615,100

According to the 1990 census, there were 3·5m. people of foreign extraction in France (7·4% of the population). The largest groups of foreign residents (1992) were: Portuguese (649,714), Algerians (614,207) and Moroccans (572,652). 92,410 persons were naturalized in 1995 (126,337 in 1994).

Controls on illegal immigration were tightened in July 1991. Automatic right to citizenship for those born on French soil was restored in 1997 by the new left-wing coalition government. New immigration legislation, which was due to come into force in 1998, brought in harsher penalties for organized traffic in illegal immigrants and extended asylum laws to include people whose lives are at risk from non-state as well as state groups. It also extended nationality at the age of 18 to those born in France of non-French parents, provided they have lived a minimum of 5 years in France since the age of 11.

The areas, populations and chief towns of the 22 metropolitan regions at the 1990 census were as follows:

Languages. The official language is French. Breton and Basque are spoken in their regions. The *Toubon* legislation of 1994 seeks to restrict the use of foreign words in official communications, broadcasting and advertisements (a previous such decree dated from 1975). The Constitutional Court has since ruled that imposing such restrictions on private citizens would infringe their freedom of expression.

CONSTITUTION AND GOVERNMENT

The Constitution of the Fifth Republic, superseding that of 1946, came into force on 4 Oct. 1958. It consists of a preamble, dealing with the Rights of Man, and 92 articles.

France is a republic, indivisible, secular, democratic and social; all citizens are equal before the law (Art. 1). National sovereignty resides with the people, who exercise it through their representatives and by referendums (Art. 3). Constitutional reforms of July 1995 widened the range of issues on which referendums may be called. Political parties carry out their activities freely, but must respect the principles of national sovereignty and democracy (Art. 4).

A constitutional amendment of 4 Aug. 1995 deleted all references to the 'community' (*communauté*) between France and her overseas possessions, representing an important step towards the constitutional dismantling of the former French colonial empire.

The head of state is the President, who sees that the Constitution is respected; ensures the regular functioning of the public authorities, as well as the continuity of the state; is the protector of national independence and territorial integrity (Art. 5). The President is elected for 7 years by direct universal suffrage (Art. 6). The President appoints (and dismisses) a Prime Minister and, on the latter's advice, appoints and dismisses the other members of the Government (*Council of Ministers*) (Art. 8); presides over the Council of Ministers (Art. 9); may dissolve the National Assembly, after consultation with the Prime Minister and the Presidents of the two Houses (Art. 12); appoints to the civil and military offices of the state (Art. 13). In times of crisis, the President may take such emergency powers as the circumstances demand; the National Assembly cannot be dissolved during such a period (Art. 16).

Parliament consists of the National Assembly and the Senate. The National Assembly is elected by direct suffrage by the second ballot system (by which candidates winning 50% or more of the vote in their constituencies are elected, candidates winning less than 12·5% are eliminated and other candidates go on to a second round of voting); the Senate is elected by indirect suffrage (Art. 24). Since 1996 the National Assembly has convened for an annual 9-month session. It comprises 577 deputies, elected by a two-ballot system for a 5-year term from single-member constituencies (555 in Metropolitan France, 22 in the overseas departments and dependencies); and may be dissolved by the President.

The *Senate* comprises 321 senators elected for 9-year terms (one-third every 3 years) by an electoral college in each Department or overseas dependency, made up of all members of the Departmental Council or its equivalent in overseas dependencies, together with all members of Municipal Councils within that area. The *Speaker* of the Senate deputizes for the President of the Republic in the event of the latter's incapacity. Senate elections were last held on 27 Sept. 1998.

The *Constitutional Council* is composed of 9 members whose term of office is 9 years (non-renewable), one-third every 3 years; 3 are appointed by the President of the Republic, 3 by the President of the National Assembly, 3 by the President of the Senate; in addition, former Presidents of the Republic are, by right, life members of the Constitutional Council (Art. 56). It oversees the fairness of the elections of the President (Art. 58) and Parliament (Art. 59), and of referendums (Art. 60), and acts as a guardian of the Constitution (Art. 61). Its *President* is Roland Dumas (app. 1995).

The *Economic and Social Council* advises on Government and Private Members' Bills (Art. 69). It comprises representatives of employers', workers' and farmers' organizations in each Department and Overseas Territory.

RECENT ELECTIONS

At the first round of presidential elections on 23 April 1995, Lionel Jospin gained the largest number of votes (23·31% of those cast) against 8 opponents. At the second round on 7 May 1995, the electorate was 39,976,944; turn-out was 79·77%. Jacques Chirac was elected President against Jospin by 52·64% of votes cast.

At the elections of 25 May and 1 June 1997 to the National Assembly, there were 6,361 candidates; the electorate was 38,968,660. In the first round, turn-out was 68·93%. The Socialist Party (PS) and allies won 253 seats; the Rassemblement pour la République (RPR; Gaullists), 134; the Union for French Democracy (UDF), 108; the Communist Party (PCF), 38; Greens, 7; other left parties, 21; other right parties, 15; National Front, 1.

Following the election held on 27 Sept. 1998, the Senate was composed of (by group, including affiliates): RPR, 99; PS, 78; Union Centriste (UC), 52; Républicains et Indépendants (RI), 47; Rassemblement Démocratique et Europeén Social (RDES), 22; Républicain, Communiste et Citoyen (RCC), 16; Unattached, 7. In Oct. 1998 Christian Poncelet (RPR) was elected *Speaker* for a 3-year term.

European Parliament. France has 87 representatives. At the June 1994 elections turn-out was 53·5%. The RPR-UDF won 29 seats with 25·5% of votes cast (political affiliation in European Parliament: European Liberal, Democratic and Reformist Group; European People's Party); the PS, 16 with 14·5% (European Socialist Party); the Other Europe group, 13 with 12·3%; the Radical Energy group, 13 with 12%; the National Front, 10 with 10·5% (European Group of Nations); the Communist Party, 6 with 6·9%.

Local Government. France is divided into 22 regions for national development, planning and budgetary policy. Many of these regions are broadly comparable with the provinces of pre-revolutionary France, and give a measure of recognition to the distinctive personalities of peripheral areas such as Alsace and Brittany.

By a law of 13 May 1991 Corsica became a territorial collectivity. After the regional elections of March 1992 it had an assembly which elects an executive council. Since Feb. 1995 the Pays Basque, which formed part of the department Pyrénées-Atlantique, has had an elected 65-member council, bringing together parliamentary deputies, regional and general councillors and representatives of mayors.

There are 96 departments within the 22 regions, each governed by a directly elected General Council. In March 1982 state-appointed Regional Prefects were abolished and their executive powers transferred from the state to the presidents of the regional councils. Legislation of 1993 provides for the election every 3 years of half the members of the councils. Elections for 2,009 seats in the General Councils were held in 2 rounds on 20 and 27 March 1994. The electorate was 18,563,056; turn-out was 60·39% at the first round and 58·78% at the second. The PS gained 532 seats, the UDF 446, the RPR 382, various right-wing groups 309, various left-wing groups 171, the Communist Party 145, Greens 7, the National Front 3, others 12.

Elections for the country's 22 regional councils were held on 15 March 1998 and over the next couple of weeks. The vote for the main parties in government (Socialists, Communists and Greens) was 38% and for the moderate right-wing parties (RPR and UDF) 36%. The National Front won 15%. In order to deprive the Left of an overall victory, the Right forged local alliances with the National Front in 5 regions, so as to keep control.

The unit of local government is the *commune*, the size and population of which vary considerably. There were, in 1995, in the 96 metropolitan departments, 36,763 communes (30,919 with fewer than 1,500 inhabitants). The local affairs of the commune are under a Municipal Council, composed of between 9 and 36 members elected by universal suffrage for 6 years. At the last municipal elections in 1995, there were 512,850 municipal councillors. Each municipal council elects a mayor who is both the representative of the commune and agent of the central government. Communes are associated in the *Assemblée des Districts et des Communautés de France*, and also co-operate in inter-commune public enterprise projects, of which there were some 1,200 in 1995.

In Paris the local council *(Conseil de Paris)* is composed of 109 members elected from the 20 *arrondissements*. It combines the functions of departmental General and Municipal Council.

In 1995 the *Pasqua* Law on Guidance for Territorial Management created a new territorial entity, the *pays*. These do not replace administrative divisions, but group regions, departments or communes according to historical, geographical or employment area criteria, with a view to their economic development. Some 200 *pays* had been formed by 1996.

Local revenue is raised from residence, business and property taxes, and amounted to 262,700m. francs in 1995 (250,000m. in 1994).

DEFENCE

The President of the Republic is the supreme head of defence policy and exercises command over the Armed Forces. He is the only person empowered to give the order to use nuclear weapons. He is assisted by the Council of Ministers, which studies defence problems, and by the Defence Council and the Restricted Defence Committee, which formulate directives. The Prime Minister is responsible for national defence, exercising his military responsibilities and co-ordinating inter-ministry defence activities through the General Secretariat of National Defence (SGDN). Under the Prime Minister's authority, the Minister of Defence is responsible for the execution of military policy, in particular the organization and administration of the Armed Forces.

The Ministry of Defence has overall responsibility for defence. The preparation and control of the Armed Forces is exercised by the Chief of Staff of the Armed Forces, the Chiefs of Staff of the 3 services—Army, Navy and Air—and the head of the *Gendarmerie*.

Legislation of 1996 inaugurated a wide-ranging reform of the defence system over 1997–2002, with regard to the professionalization of the armed forces (brought about by the ending of military conscription and consequent switch to an all-volunteer defence force), the modification and modernization of equipment and the restructuring of the defence industry. Defence was reported to be the main casualty of the Jospin administration's first budget. In 1997 defence expenditure totalled US$41,545m. (US$708 per capita). 1998 spending was due to fall by 4·5% in real terms from the 1997 level, with spending on equipment particularly affected. It is estimated under current plans that by 2002 the Army will have been reduced by more than 30% from 1997 levels, the Navy by about 16%, the Air Force by almost

20%. Defence spending as a proportion of GDP has fallen from just below 4% in 1988 to 3% in 1997 (compared with more than 4% of GDP in 1988 to 2·8% in 1997 in the UK).

French forces are not formally under the NATO command structure, although France signed the NATO strategic document on Eastern Europe in Nov. 1991. The Minister of Defence attends informal NATO meetings which have an agenda of French interest, but not the formal twice-yearly meetings. Since Dec. 1995 France has taken a seat on the NATO Military Committee. In 1996, 16,143 service personnel were stationed in Germany, 24,395 in the overseas departments and territories, 7,708 on UN peacekeeping missions and 1,336 constituted the 'French Maritime Presence' abroad.

The General Directorate for Armament (DGA) is responsible for all aspects of the procurement of defence equipment. It employs 48,800 personnel, and co-ordinates another 200,000 others employed in the defence industry. A reform programme for the GDA designed to modernize equipment and reduce costs was initiated in 1996.

Conscription is for 10 months, but as a result of a law of 28 Oct. 1997, males born after 31 Dec. 1978 are no longer compelled to perform national service.

Nuclear weapons. Having carried out its first test in 1961, there have been 210 tests in all. The nuclear arsenal consisted of approximately 450 warheads in Jan. 1998 according to the Stockholm International Peace Research Institute.

Army. The Army comprises the Land Force Command (CFAT) which is a single command over all forces. Actions assets are represented by battalions grouped into brigades built up around a speciality function (armour, mechanized, light armour, infantry airmobility, logisitics). Apart from the Franco-German brigade, there will be 8 brigades, each made up of between 4 and 7 battalions (infantry, MBTS, artillery, engineer), 1 airmobile brigade and 2 logistics brigades.

Specialized combat support or service support battalions are grouped centrally and organized in specialized support brigades: signal, artillery, engineer and intelligence.

In 2002 operational units in the French Army will be fielded with the following major modern equipment: 426 heavy tanks (Leclerc and AMX 30 B2), 350 light tanks (AMX10 RC), 600 armoured combat infantry vehicles, 260 155-mm guns, 48 multiple rocket launchers and 292 helicopters of all types.

The 1997–2002 Programming Act will provide for the following force at the end of the transitional period: 16,000 officers, 50,000 NCOs, 66,500 army enlistees, 5,500 volunteers, 34,000 civilians and 30,000 reservists.

Gendarmerie. The paramilitary police force exists to ensure public security and maintain law and order, as well as participate in the operational defence of French territory as part of the armed forces. It consisted in 1998 of 99,000 personnel including 12,000 conscripts, 2,600 women and 1,500 civilians. It comprises a territorial force of 57,000 personnel in 3,607 brigades throughout the country, a mobile force of 17,000 personnel in 128 squadrons and specialized formations including the Republican Guard, the Air Force and Naval Gendarmeries, and an anti-terrorist unit. It is equipped with 28 VBC-90 armoured gun-carriers, 121 light-armoured cars, 155 armoured vehicles and 3,010 tactical vehicles, as well as 42 helicopters.

Navy. The missions of the Navy are to provide the prime element of the French independent nuclear deterrent through its force of strategic submarines; to assure the security of the French offshore zones; to contribute to NATO's missions; and to provide on-station and deployment forces overseas in support of French territorial interests and UN commitments.

French territorial seas and economic zones are organized into 3 maritime regions, each under the authority of a Maritime Prefect (with headquarters in Cherbourg, Brest and Toulon). Offshore, the seas and oceans are divided into 5 zones: Atlantic, Mediterranean, Indian Ocean, Pacific and Antilles-Guiana. Home-based forces are commanded by Commanders-in-Chief based in Brest and Toulon; those in the Indian Ocean and Pacific by Flag Officers based afloat in the Indian Ocean, and at Nouméa (in New Caledonia). Naval forces in the Caribbean come under a joint force commander based at Cayenne.

Pressures on public expenditure have dictated a phased reduction in fleet strength over 1997–2015, but the following is a summary of the strength of the fleet at the end of selected years:

	1996	*1999*[1]	*2015*[1]
Aircraft carriers	2	1	2
Strategic-missile submarines	5	4	4
Other submarines	12	8	6
Transport vessels of landing troops	. . .	4	4
Frigates	35	39	32

[1]Provisional forecast.

The strategic deterrent force comprises 4 nuclear-powered strategic-missile submarines, including 2 of 4 new-generation ships of a new, much larger, class, *Le Triomphant* and *Le Téméraire*, which entered service in 1997 and 1999, displacing 14,200 tonnes and deploying 16 M-45 missiles. The others comprise *Le Tonnant* and *L'Inflexible*, 9,100 tonnes each, completed in 1980 and 1985, now converted to the same standard, and deploying 16 M-4 missiles. There are also 6 2,700-tonne nuclear-powered submarines.

The principal surface ship is the aircraft carrier *Foch* of 33,000 tonnes, completed in 1963. The operational carrier embarks an air group typically comprising 15 Super-Etendard strike aircraft, 4 Etendard reconnaissance, 8 F-8P Crusader fighters, 8 Alize anti-submarine and warning, and a flight of 4 utility helicopters. *Foch* is to be withdrawn from service in 2000, when the nuclear-powered replacement *Charles de Gaulle*, which was launched at Brest in 1994, is expected to commission. There is 1 cruiser, the helicopter cruiser *Jeanne d'Arc*, of 13,000 tonnes, completed in 1964 and used in peacetime as a training vessel. She could perform amphibious or anti-submarine tasks in war. In these roles she could accommodate up to 8 Lynx helicopters and 700 personnel. Her armament comprises 6 Exocet and 4 100-mm guns.

Other surface combatants include 4 guided-missile destroyers and 35 frigates of which 23 carry helicopters. A modern mine countermeasure force consists of 14 tripartite coastal minehunters and 4 diver support vessels. The amphibious force includes 4 dock-landing ships and 5 medium-landing ships. The Navy deploys a substantial support force which includes 4 large tankers. There are numerous other minor auxiliaries.

A large proportion of warships' weapons are produced by the government armaments service, of which the naval element, *Direction des Constructions Navales* (DCN), operates the shipbuilding yards as well as dockyards. Building takes place at Cherbourg, Brest and Lorient.

The naval air arm, *Aviation Navale*, numbers some 3,500 personnel. Operational aircraft include 52 Super-Etendard nuclear-capable strike aircraft, 5 Etendard reconnaissance aircraft, 10 US-built Crusader F-8P all-weather fighters, 9 Alize turboprop anti-submarine aircraft, 28 Atlantique and 5 Gardian maritime reconnaissance aircraft. The Crusaders' life has been extended to keep a carrier squadron operational until 1999, when the maritime Rafale combat aircraft will enter service on board the *Charles de Gaulle*. Rotary-wing strength includes 16 commando Super Frelon, and 33 anti-submarine and search-and-rescue Lynx helicopters. Other training, utility and transport aircraft bring the total strength to 173 comprising 109 fixed-wing aircraft and 64 helicopters. A small Marine force of 2,900 *Fusiliers Marins* provides 4 assault groups, an attack swimmer section as well as numerous naval base protection units.

Personnel in 1999 numbered 62,600, including 8,158 conscripts and 3,150 women.

Air Force. Created in 1934, the Air Force was reorganized in June 1994. France is divided into 3 air regions corresponding to the 3 military defence regions and 2 air defence zones. There are 2 operational commands (Strategic Air Forces Command—CFAS; Air Defence and Air Operations Command—CDAOA) and 5 organizational commands (Combat Air Force Command—CFAC; Projection Air Force Command—CFAP; Air Observation System, Information and Communication Command—CASSIC; Training Command—CEAA; Air Base

Protection Infantry Command—CFCA). The CFAS is responsible for nuclear weapons; all other combat aircraft are operated by the CFAC which is responsible for maintaining the operational readiness of its units.

The Conventional Forces in Europe (CFE) Agreement imposes a ceiling of 450 combat aircraft. Equipment summary (main types only), Combat: 115 Mirage 2000 B/C, 60 Mirage 2000 N, 43 Mirage 2000 D, 5 Mirage IV P, 35 Mirage F1 B/C, 40 Mirage F1 CT, 40 Mirage F1 CR, 60 Jaguar A/E. INTERNATIONAL RELATIONS

France is a member of the UN, the Council of Europe, NATO, WEU, EU, OSCE, OECD and the Pacific Community, and is a signatory to the Schengen Accord (*see* EUROPEAN UNION *under* MAJOR POLICY AREAS).

At a referendum in Sept. 1992 to approve the ratification of the Maastricht treaty on European union of 7 Feb. 1992, 12,967,498 votes (50·81%) were cast for and 12,550,651 (49·18%) against.

France is the focus of the *Communauté Francophone* (French-speaking Community) which formally links France with many of its former colonies in Africa. A wide range of agreements, both with members of the Community and with

other French-speaking countries, extend to economic and technical matters, and in particular to the disbursement of overseas aid.

ECONOMY

Performance. Real GDP growth was estimated at 2·3% in 1997 (1·5% in 1996); a rate of 2·7% was forecast for 1998. Contributory factors to economic growth in 1997 were a strong export market and weaker franc. Total GDP (1996, in US$): 1,539,000m. (1997 forecast: 1,358,300m.).

A second phase of privatization (the first being in 1986–87) involving some 20 state enterprises was initiated by legislation of May 1993, by which the state retained the right to acquire a 'golden share' to give itself veto powers in the national interest. In 1997 the sale of state assets included nearly a quarter of France Télécom and a majority stake in the CIC banking network. Other sell-offs in the pipeline (in 1998) included Air France (49%) and a controlling stake in the defence electronics giant Thomson-CSF.

Budget. In 1997 public spending was cut by an extra 10,000m. francs when the new government came to power in June. The budget for 1998 envisaged no further cuts in public spending (but an increase in line with inflation forecast at 1·5%); and a reduction in the public deficit from 3·1% of GDP in 1997 (dramatically reduced in June from an estimated 3·5% and rising by the acquisition of 22,000m. francs in emergency corporate taxes) to 3% of GDP, which is the uppermost limit of the Maastricht criteria on budget deficits.

Receipts and expenditure in 1m. francs:

Expenditure	1,410,129	1,436,333	1,595,700	1,551,969	1,480,800

In Nov. 1997 receipts were up by 18,700m. francs on the previous year; expenditure was up by 16,500m. The budget deficit at 30 Nov. 1997 was some 325,300m. francs (4,100m. francs less than at 31 Dec. 1996).

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in France and the *franc* became a subdivision of it; irrevocable conversion rate 6·55957 francs to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both

euros and francs until the franc is withdrawn from circulation—which must be by 1 July 2002.

The franc (FRF) is made up of 100 centimes. Notes in circulation at 29 Jan. 1998: 261,338m. francs. In Feb. 1998 foreign exchange reserves were US$28,035m. and gold reserves were 81·89m. troy oz. The annualized rate of inflation in 1997 was 1·2% (2% in 1996), with a projected fall to 0·9% in 1998.

Franc Zone. 13 former French colonies (Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, the Republic of the Congo, Côte d'Ivoire, Gabon, Mali, Niger, Senegal and Togo), the former Spanish colony of Equatorial Guinea and the former Portuguese colony of Guinea-Bissau are members of a Franc Zone, the CFA (*Communauté Financière Africaine*). Comoros uses the Comorian franc. From 1948 to 1994, 1 French franc equalled 50 francs CFA. The franc CFA was devalued by 50% on 11 Jan. 1994 and the Comorian franc by 25%. The franc CFP *(Comptoirs Français du Pacifique)* is the common currency of the French dependencies of French Polynesia, New Caledonia and Wallis and Futuna. It has a parity of CFP francs 18·18 to the French franc.

Banking and Finance. The central bank and bank of issue is the *Banque de France* (*Governor*: Jean-Claude Trichet, appointed 1993), founded in 1800, and nationalized on 2 Dec. 1945. In 1993 it received greater autonomy in line with EU conditions. The Governor is appointed for a 6-year term (renewable once) and heads the 9-member Council of Monetary Policy.

The National Credit Council, formed in 1945 to regulate banking activity and consulted in all political decisions on monetary policy, comprises 45 members nominated by the Government; its president is the Minister for the Economy; its Vice-President is the Governor of the Banque de France.

In 1996 there were 1,445 banks and other credit institutions, including 400 shareholder-owned banks and 342 mutual or savings banks. 4 principal deposit banks were nationalized in 1945, the remainder in 1982; the latter were privatized in 1987. The banking and insurance sectors underwent a flurry of mergers, privatizations, foreign investment, corporate restructuring and consolidation in 1997, in both the national and international fields. Further flotations planned included the sale of the state-owned insurance company GAN (1998) and Crédit Lyonnais (by 2000).

The state savings organization *Caisse Nationale d'Epargne* is administered by the post office on a giro system. There are also commercial savings banks (*caisses d'epargne et de prévoyance*). Deposited funds are centralized by a non-banking body, the *Caisse de Dépôts et Consignations*, which finances a large number of local authorities and state-aided housing projects, and carries an important portfolio of transferable securities.

There is a stock exchange (Bourse) in Paris.

Weights and Measures. The metric system is in general use.

ENERGY AND NATURAL RESOURCES

Electricity. The state-owned monopoly Electricité de France is responsible for power generation and supply under the Ministry of Industry. Installed capacity was 102·94m. kW in 1994. Electricity production (1995, in 1m. kWh): 470,974, of which 358,600 (76·14%) was nuclear. Hydro-electric power contributes about 20% of total electricity output (80,606m. kWh in 1994). Consumption per capita in 1995 was estimated to be 6,278 kWh. In 1997 it was the European Union's biggest exporter of electricity with 71·4bn. kWh.

France, not rich in natural energy resources, is at the centre of Europe's nuclear energy industry. In 1997 there were 56 nuclear reactors in operation, with a capacity of 58·4m. kW, providing some 72·9% of the electricity output. Nuclear reactors accounted for 38% of total energy consumption in 1994. There were 4 new nuclear plants under construction in 1997, one of which (in western France) was cancelled mid-way through the year and Electricité de France announced that it will not be considering any new plants before 2000. Also in 1997, following concern over its safety, it was decided that the 12-year-old Superphénix plant east of Lyons would be shut down.

Oil and Gas. In 1994, 2·8m. tonnes of crude oil were produced. The greater part came from the Parentis oilfield in the Landes. The importation and distribution of natural gas is the responsibility of the government monopoly Gaz de France. Production of natural gas (1994) was 94·4 petajoules. In 1994, 41·2% of total energy consumption came from oil; 13% from gas.

Minerals. France is a significant producer of nickel, uranium, iron ore, bauxite, potash, crude steel, pig iron, aluminium and coal. Société Le Nickel extracts in New Caledonia and is the world's third largest nickel producer; France is the world's seventh largest uranium producer. The mining sector contributed 1% of GDP in 1994, and employed 0·8% of the workforce.

Coal production (1995): 5·1m. tonnes. Coal power generators contributed 6·2% of total energy consumption in 1994. Coal reserves in Jan. 1996: 139m. tonnes. Production of other principal minerals and metals (1994, in 1,000 tonnes): crude steel, 18,242; iron ore (metal content), 708; pig iron, 12,444; aluminium (unwrought, primary), 481·50; potash salts, 936.

Agriculture. France is the world's largest food producer. The agricultural sector contributes about 4·6% of GDP, and employs about 4·5% of the workforce, down from 8·5% in 1980. Agriculture accounts for 14·5% of exports and 11·4% of imports.

In 1998 there were 680,000 holdings, compared to over 1m. in 1988. Co-operatives account for between 30-50% of output. In 1990 crop production accounted for 54·4% of total agricultural output; animal production for 45·6%.

Of the total area of France (54·9m. ha), the utilized agricultural area comprised 29·99m. ha in 1996. 18·29m. ha were arable, 10·53m. ha were under pasture, and 1·16m. ha were under permanent crops including vines (0·91m. ha).

Total area under cultivation and yield of grapes from the vine (1996): 871,038 ha; 7·57m. tonnes. Estimated wine production (1997–98): 56m. hectolitres.

The area under cultivation (and yield) for vegetables in 1996 was as follows: Leaf and stem, 130,544 ha (2·4m. tonnes); fruit vegetables, 39,882 ha (1·5m. tonnes); roots and bulbs, 44,782 ha (1·33m. tonnes); pods, 86,339 ha (657,461 tonnes); beans, lentils and other dry, 10,213 ha (20,449 tonnes).

Milk production: cows', 243,538,646 hectolitres; sheep's, 2,339,865 hectolitres; goats', 4,574,176 hectolitres.

Forestry. Forestry is France's richest natural resource, with a revenue of about 8,000m. francs a year, and accounts for 0·55m. of the workforce. In 1995 forest covered 15·03m. ha (27·3% of the land area). In 1990 the area under forests had been 14·23m. ha, or 25·9% of the land area. 73·7% of forest is private; 26% state-owned. Timber production in 1995 was 46·34m. cu. metres.

Fisheries. In 1996 there were 6,509 fishing vessels totalling 176,356 GRT, and 17,101 fishermen. Catch (1996, in tonnes): 868,572 (fish, 634,894; shellfish and molluscs, 233,678). Sea fishing accounts for approximately 92% of the total catch.

INDUSTRY

The industrial sector contributes around 28% of GDP and employs about 27% of the workforce. In Nov. 1997 capacity utilization in industry was approaching 85%. Chief industries: steel, chemicals, textiles, aircraft, machinery, electronic equipment, tourism, wine and perfume.

Industrial production (1994, in 1,000 tonnes): sulphuric acid, 2,227; caustic soda, 1,561; cement, 20,184. In 1993 (in 1,000 tonnes): sulphur, 1,106; polystyrene, 481; polyvinyl, 1,176; polyethylene, 1,308; wool, 56; cotton, 152; linen, 6; silk, 71.

Food products (1993, in 1,000 tonnes): chocolate, 547; biscuits, 475; sugar, 4,599; fish preparations, 109; jams and jellies, 161; cheese (1994), 1,562.

Engineering production (1994, in 1,000 units): car tyres, 66,744; motor vehicles, 3,176; television sets, 2,796.

Labour. According to the Employment Survey of March 1994, there was a working population of 25,136,598 (13,898,272 men and 11,238,326 women); out of an economically active population of 22,074,700, 1,127,300 were engaged in agriculture, forestry and fishing, 1,525,600 in building, 1,422,500 in transport and telecommunications, 1,481,100 in manufacturing industries, 608,300 in banking and insurance, 4,278,700 in services, 2,614,100 in commerce. Some 5m. people work in the public sector at national and local level. It was estimated in 1997 that 51% of households have no-one working in the private sector.

A new definition of 'unemployed' was adopted in Aug. 1995, omitting persons who had worked at least 78 hours in the previous month. Unemployment in 1998 was close to 3m. or 11·5% (1997, 12·5%) of the active population. The long-term jobless accounted for almost 40% of those seeking work. Under an 80% state-funded job creation programme announced in 1997, an extra 350,000 public-sector jobs will be created for the young by 2000.

Conciliation boards (*Conseils de Prud'hommes*) mediate in labour disputes. They are elected for 5-year terms by 2 colleges of employers and employees. In Jan. 1998 the minimum wage (SMIC) was 39·29 francs an hour (6,664 francs a month). SMIC affects about 1·5m. wage-earners. The average annual wage was 114,314 francs in 1994. Retirement age is 60. A 5-week annual holiday is statutory.

In May 1998 the national assembly approved a reduction in the working week from 39 to 35 hours. The main provisions obliged all companies employing more than 20 people to introduce the shorter working week from Jan. 2000 and all the rest from 2002. The law offers a sliding scale of incentives to employers provided that they cut working hours and create extra jobs. A second piece of legislation was planned for 1999 to determine how overtime would be paid, the working hours of salaried staff and the number of hours to be worked during the year. The introduction of a 35-hour working week in 1998 is unlikely to create many jobs but may slow wage claims and increase productivity.

Trade Unions. The main trade union confederations in 1997 were as follows: the Communist-led CGT (Confédération Générale du Travail), founded 1895; the CGT-FO (Confédération Générale du Travail–Force Ouvrière) which broke away from the CGT in 1948; the CFTC (Confédération Française des Travailleurs Chrétiens), founded in 1919 and divided in 1964, with a breakaway group retaining the old name and the main body continuing under the new name of CFDT (Confédération Française Démocratique du Travail); and the CGC (Confédération Générale des Cadres) formed in 1944, which represents managerial and supervisory staff. The main haulage confederation is the FNTR; the leading employers' association is the CNPF, often referred to as the *Patronat*. Unions are not required to publish membership figures, but in 1993 the 2 largest federations, the CGT and CFDT, had an estimated 0·63m. and 0·65m. members respectively.

Although France has the lowest rate of trade union membership in Europe, 9% in 1997 (compared to 29% in Germany, 33% in Britain and over 90% in Sweden), its trade unionists have considerable clout: they run France's welfare system; staff the country's dispute-settling industrial tribunals (*conseils de prud'hommes*); and fix national agreements on wages and working conditions. A union call to strike is

invariably answered by more than a union's membership. Nearly 6m. working days were lost in French strikes in 1995 compared to 415,000 in Britain and 247,000 in Germany.

INTERNATIONAL TRADE

The trade balance showed a surplus of nearly 200,000m. francs in 1997 due to a strong export market, and a drop in imports owing to sluggish domestic demand. Trade balance (1997 estimate, in US$): 19,900m. (1998 forecast, 24,800m.). Main trading partners: Argentina, USA, Austria, Brazil, Canada, Egypt, Finland, Ghana, Japan, Uruguay, Philippines, Poland, Korea (Rep.) and Singapore.

Privatization legislation of May 1993 gave foreign nationals the right to acquire more than 20% of a firm's capital (the previous limit). In 1997, following intense activity on the equity market, approximately one-third of French equity was owned by foreign investors.

Imports and Exports. Total imports (1997, in US$1): 263,919m.; total exports, 285,084m. Principal imports include: oil, machinery and equipment, chemicals, iron and steel, and foodstuffs. Major exports: metals, chemicals, industrial equipment, consumer goods and agricultural products.

Foreign trade by sector (1992, as % of total trade):

	% Imports	*% Exports*
Agriculture and agri-food	11·6	16·4
Energy	8·6	2·3
Raw materials and semi-products	24·9	23·7
Capital goods	24·2	27·6
Surface transport equipment	11·1	13·9
Consumer goods	16·9	15·3

In 1997 the chief import sources (as % of total imports) were as follows: Germany, 16·6%; Italy, 9·8%; UK, 8·3%; Belgium-Luxembourg, 8%. The chief export markets (as % of total) were: Germany, 15·9%; UK, 10·1%; Italy, 9·3%; Belgium-Luxembourg, 8·1%. Exports to other European Union members constituted 62·9% of the total, and imports from fellow European Union members accounted for 61·0% of all imports.

COMMUNICATIONS

Roads. In 1997 there were 806,000 km of road, including 7,100 km of motorway. France has the densest road network in the world, and the longest in the EU. Around 90% of all freight is transported by road. In 1996 there were 24·4m. private cars and 4·9m. commercial vehicles (3·62m. trucks, about 42,000 buses and 0·87m. motorcycles and scooters). The average distance travelled by a passenger car in the year 1996 was 14,000 km. In 1996 there were 8,080 road deaths, down from 9,083 in 1992.

Rail. In 1938 all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français (SNCF), which became a public industrial and commercial establishment in 1983. Legislation came into effect in 1997 which vested ownership of the railway infrastructure (track and signalling) in a newly established public corporation, the National Railway Network (RFN). The RFN is funded by payments for usage from the SNCF, government and local subventions and authority capital made available by the state derived from the proceeds of privatization. The SNCF remains responsible for maintenance and management of the rail network. The legislation also envisages the establishment of regional railway services which receive funds previously given to the SNCF as well as a state subvention. These regional bodies negotiate with SNCF for the provision of suitable services for their area. SNCF is the most heavily indebted and subsidized (38,000m. francs a year) company in France.

In 1997 SNCF totalled 33,769 km of track (one third of it electrified); it had an annual capacity of 58bn. passenger-km and 45bn. freight tonne-km. High-speed TGV lines link Paris to the south and west of France, and Paris and Lille to the Channel Tunnel (Eurostar). The high-speed TGV line appeared in 1983; it had 1,860 km of track in 1997, and another 4,400 km planned by 2015. Services from London through the Channel Tunnel began operating in 1994.

The Paris transport network consisted in 1993 of 202 km of metro, 352 km of regional express railways, 9·1 km of light rail and 7 km of passenger stock. There are metros in Lille (29 km), Lyons (20·8 km), Toulouse (10 km) and Marseilles (19·5 km), and tram/light railway networks in Grenoble (14·6 km), Lille (23 km), Marseilles (3 km), Nantes (16·5 km), Rouen (17 km), St Étienne (7 km) and Strasbourg (11·4 km).

Civil Aviation. The main international airports are at Paris (Charles de Gaulle), Paris (Orly), Bordeaux (Mérignac), Lyons (Satolas), Marseilles-Provence, Nice-Côte d'Azur, Strasbourg (Entzheim), Toulouse (Blagnac) and Nantes (Atlantique). The following had international flights to only a few destinations in 1998: Brest, Caen, Carcassonne, Clermont-Ferrand, Deauville, Le Havre, Le Touquet, Lille, Pau, Rennes, Rouen and St Étienne. The national airline is Air France. In 1995 it flew 349·9m. km, carrying 49,520,000 passengers (36,840,000 on domestic flights). In 1996 Charles de Gaulle airport handled 31,426,903 passengers (28,665,270 on international flights) and 886,114 tonnes of freight, Orly handled 27,333,472 passengers (16,742,976 on domestic flights) and 246,371 tonnes of freight, and Nice-Côte d'Azur handled 6,543,000 passengers (4,154,000 on domestic flights). Marseilles-Provence was the leading provincial airport in 1996 for freight, with 44,055 tonnes.

Shipping. The merchant fleet of ocean-going steam and motor ships totalling 1,000 gross tonnes or more (excluding special ships such as cable, icebreakers, etc.) comprised 65 vessels of 1,564,000 GRT in Jan. 1996. In 1993 from a total of 215 vessels (all sizes; GRT: 3,928,000), 212m. tonnes of cargo were unloaded, including 130m. tonnes of crude and refined petroleum products, 93m. tonnes were loaded; total passenger traffic was 29·2m. Chief ports: Marseilles, Le Havre, Nantes, Bordeaux and Rouen.

France has extensive inland waterways. Canals are administered by the public authority France Navigable Waterways (FVN). In 1993 there were 8,500 km of navigable rivers, waterways and canals (of which 1,647 km were accessible to vessels over 3,000 tons), with a total traffic of 59·8m. tonnes.

Telecommunications. France Télécom became a limited company on 1 Jan. 1997. In 1997, 33·7m. telephone main lines (575 for every 1,000 inhabitants) and 4·3m. mobile telephones were in use. In 1995 there were 1·7m. fax machines (including 0·4m. in working homes); 7·8m. PCs (equivalent to 134 per 1,000 persons); and 6·5m. Minitel videotext terminals were rented out by France Télécom. There were around 2·5m. Internet users in May 1998—just over 4% of the population.

Postal Services. There were 16,919 post offices in 1994. In 1995 a total of 24,391m. pieces of mail were processed, or 419 items per person. La Poste is a public enterprise under autonomous management responsible for mail delivery and financial services.

SOCIAL INSTITUTIONS

Justice. The system of justice is divided into 2 jurisdictions: the judicial, and the administrative. Within the judicial jurisdiction are common law courts including 473 lower courts (*tribunaux d'instance*, 11 in overseas departments), 186 higher courts (*tribunaux de grande instance*, 5 *tribunaux de première instance* in the overseas territories), and 454 police courts (*tribunaux de police*, 11 in overseas departments).

The *tribunaux d'instance* are presided over by a single judge. The *tribunaux de grande instance* usually have a collegiate composition, but may be presided over by a single judge in some civil cases. The *tribunaux de police*, presided over by a judge on duty in the *tribunal d'instance*, deal with petty offences (*contraventions*); correctional chambers (*chambres correctionelles*, of which there is at least 1 in each *tribunal de grande instance*) deal with graver offences (*délits*), including cases involving imprisonment up to 5 years. Correctional chambers normally consist of 3 judges of a *tribunal de grande instance* (a single judge in some cases). Sometimes in cases of *délit*, and in all cases of more serious *crimes*, a preliminary inquiry is made in secrecy by one of 569 examining magistrates (*juges d'instruction*), who either dismisses the case or sends it for trial before a public prosecutor.

Within the judicial jurisdiction are various specialized courts, including 227 commercial courts (*tribunaux de commerce*), composed of tradesmen and

manufacturers elected for 2 years initially, and then for 4 years; 271 conciliation boards (*conseils de prud'hommes*), composed of an equal number of employers and employees elected for 5 years to deal with labour disputes; 437 courts for settling rural landholding disputes (*tribunaux paritaires des baux ruraux*, 11 in overseas departments); and 116 social security courts (*tribunaux des affaires de sécurité sociale*).

When the decisions of any of these courts are susceptible of appeal, the case goes to one of the 35 courts of appeal (*cours d'appel*), composed each of a president and a variable number of members. There are 104 courts of assize (*cours d'assises*), each composed of a president who is a member of the court of appeal, and 2 other magistrates, and assisted by a lay jury of 9 members. These try crimes involving imprisonment of over 5 years. The decisions of the courts of appeal and the courts of assize are final. However, the Court of Cassation (*cour de cassation*) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, following which the cases must be retried by a court of appeal or a court of assizes.

The administrative jurisdiction exists to resolve conflicts arising between citizens and central and local government authorities. It consists of 34 administrative courts (*tribunaux administratifs*, 7 in overseas departments and territories) and 5 administrative courts of appeal (*cours administratives d'appel*). The Council of State is the final court of appeal in administrative cases, though it may also act as a court of first instance.

Cases of doubt as to whether the judicial or administrative jurisdiction is competent in any case are resolved by a *Tribunal de conflits* composed in equal measure of members of the Court of Cassation and the Council of State. In 1997 the new government restricted its ability to intervene in individual cases of justice.

Penal code. A revised penal code came into force on 1 March 1994, replacing the *Code Napoléon* of 1810. Penal institutions consist of: (1) *maisons d'arrêt*, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept; (2) punishment institutions – (a) central prisons (*maisons centrales*) for those sentenced to long imprisonment, (b) detention centres for offenders showing promise of rehabilitation, and (c) penitentiary centres, establishments combining (a) and (b); (3) hospitals for the sick. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners including work in open-air and semi-free establishments. Juvenile delinquents go before special judges in 138 (11 in overseas departments and territories) juvenile courts (*tribunaux pour enfants*); they are sent to public or private institutions of supervision and re-education.

The first Ombudsman (*Médiateur*) was appointed for a 6-year period in Jan. 1973. The present incumbent is Jacques Pelletier (app. 1992).

Capital punishment was abolished in Aug. 1981. In metropolitan France the detention rate on 1 Jan. 1997 was 88·3 prisoners per 100,000 population, up from 50 per 100,000 in 1975. The average period of detention in 1997 was 8·1 months. The principal offences committed were: theft, 28%; drug-related offences, 18%; rape and other sexual assaults, 18%. The population of the 187 penal establishments (3 for women) in Oct. 1998 was 55,155 men and 2,303 women, giving a total of 57,458.

Weston, M., *English Reader's Guide to the French Legal System.* Oxford, 1991

Religion. A law of 1905 separated church and state. In 1996 there were 95 Roman Catholic dioceses in metropolitan France and 112 bishops. In 1992 there were 43·77m. Roman Catholics (over 75% of the population), 0·8m. Protestants and 1·72m. Moslems.

Education. The primary, secondary and higher state schools constitute the 'Université de France'. Its Supreme Council of 84 members has deliberative, administrative and judiciary functions, and as a consultative committee advises respecting the working of the school system; the inspectors-general are in direct communication with the Minister. For local education administration France is divided into 25 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, 1 for each department.

Compulsory education is provided for children of 6–16. The educational stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2–5, to be given in infant schools or infant classes attached to primary schools.

2. Compulsory elementary instruction for children aged 6–11, to be given in primary schools and certain classes of the *lycées*. It consists of 3 courses: preparatory (1 year), elementary (2 years), intermediary (2 years). Physically or mentally handicapped children are cared for in special institutions or special classes of primary schools.

3. Lower secondary education (*Enseignement du premier cycle du Second Degré*) for pupils aged 11–15, consists of 4 years of study in the *lycées* (grammar schools), *Collèges d'Enseignement Technique* or *Collèges d'Enseignement Général*.

4. Upper secondary education (*Enseignement du second cycle du Second Degré*) for pupils aged 15–18: (1) *Long, général* or *professionel* provided by the *lycées* and leading to the *baccalauréat* or to the *baccalauréat de technicien* after 3 years; and (2) *Court*, professional courses of 3, 2 and 1 year are taught in the *lycées d'enseignement professionel*, or the specialized sections of the *lycées*, CES or CEG.

The following table shows the number of schools in 1994–95 and the numbers of pupils in full-time education:

	State Schools	*State Pupils*	*Private Schools*	*Private Pupils*
Nursery	18,646	5,597,600	343	897,300
Primary	35,618		5,626	
Secondary	7,501	4,327,200	3,711	1,142,000

Higher education is provided by the state free of charge in the universities and in special schools, and by private individuals in the free faculties and schools. Legislation of 1968 redefined the activities and working of universities. Bringing several disciplines together, 780 units for teaching and research (*UER–Unités d'Enseignement et de Recherche*) were formed which decided their own teaching activities, research programmes and procedures for checking the level of knowledge gained. They and the other parts of each university must respect the rules designed to maintain the national standard of qualifications. The UERs form the basic units of the 69 state universities and 3 national polytechnic institutes (with university status), which are grouped into 25 *Académies*. There are also 5 Catholic universities in Paris, Angers, Lille, Lyons and Toulouse; and private universities. There were 1,475,181 students at state universities (1993–94); 21,355 at private universities (1991–92).

Outside the university system, higher education (academic, professional and technical) is provided by over 400 schools and institutes, including the 177 *Grandes Écoles*, which are highly selective public or private institutions offering mainly technological or commercial curricula. These have an annual output of about 17,000 graduates, and in 1994–95 there were also 71,271 students in preparatory classes leading to the *Grandes Écoles;* in 1993–94, 232,844 were registered in the Sections de Techniciens Supérieurs, 71,273 in the Écoles d'Ingénieurs.

Adult literacy rate: 99·0%.

In 1993 total expenditure on education came to 5·8% of GNP and represented 10·4% of total government expenditure.

Health. Ordinances of 1996 created a new regional régime of hospital administration and introduced a system of patients' records to prevent abuses of public health benefits. In 1995 there were 160,235 doctors (equivalent to 1 for every 362 persons), 39,284 dentists, 53,085 pharmacists, 330,943 nurses and 11,957 midwives; and 3,810 hospitals, with a provision of 118 beds per 10,000 population.

Welfare. An order of 4 Oct. 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc. All previous matters relating to Social Security are dealt with in the Social Security Code, 1956; this has been revised several times. The Chamber of Deputies and Senate, meeting as Congress on 19 Feb. 1996, adopted an important revision of the Constitution giving parliament powers to review annually the funding of social security (previously managed by the trade unions and employers' associations), and to fix targets for expenditure in the light of anticipated receipts.

In 1997, 6m. people were dependent on the welfare system, which accounted for more than a quarter of GDP (US$333,000m.). The Social Security budget had a deficit of some 17,000m. francs in 1996, and a cumulative debt (1992–96) of 250,000m. francs. A special levy, the new social debt repayment tax (RDS), at 0·5% on all incomes including pensions and unemployment benefit, has been introduced to clear the cumulative debt. A modest reform of the system was announced in June 1997 which will include a review of all welfare benefits.

Contributions. The general social security contribution (CSG) introduced in 1991 was raised by 4% to 7·5% in 1997 by the Jospin administration in an attempt to dramatically reduce the deficit on social security spending, effectively almost doubling the CSG. All wage-earning workers or those of equivalent status are insured regardless of the amount or the nature of the salary or earnings. The funds for the general scheme are raised mainly from professional contributions, these being fixed within the limits of a ceiling and calculated as a percentage of the salaries. The calculation of contributions payable for family allowances, old age and industrial injuries relates only to this amount; on the other hand, the amount payable for sickness, maternity expenses, disability and death is calculated partly within the limit of the 'ceiling' and partly on the whole salary. These contributions are the responsibility of both employer and employee, except in the case of family allowances or industrial injuries, where they are the sole responsibility of the employer.

Self-employed Workers. From 17 Jan. 1948 allowances and old-age pensions were paid to self-employed workers by independent insurance funds set up within their own profession, trade or business. Schemes of compulsory insurance for sickness were instituted in 1961 for farmers, and in 1966, with modifications in 1970, for other non-wage-earning workers.

Social Insurance. The orders laid down in Aug. 1967 ensure that the whole population can benefit from the Social Security Scheme; at present all elderly persons who have been engaged in the professions, as well as the surviving spouse, are entitled to claim an old-age benefit.

Sickness Insurance refunds the costs of treatment required by the insured and the needs of dependants.

Maternity Insurance covers the costs of medical treatment relating to the pregnancy, confinement and lying-in period; the beneficiaries being the insured person or the spouse.

Insurance for Invalids is divided into 3 categories: (1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 50% of the average salary for the last 10 years, with additional allowance for home help for the third category.

Old-Age Pensions for workers were introduced in 1910 and are now fixed by the Social Security Code of 28 Jan. 1972. Since 1983 people who have paid insurance for at least 37½ years (150 quarters) receive at 60 a pension equal to 60% of basic salary. People who have paid insurance for less than 37½ years but no less than 15 years can expect a pension equal to as many 1/150ths of the full pension as their quarterly payments justify. In the event of death of the insured person, the husband or wife of the deceased person receives half the pension received by the latter. Compulsory supplementary schemes ensure benefits equal to 70% of previous earnings.

Family Allowances. A controversial programme of means-testing for Family Allowance was introduced in 1997 by the new administration. The Family Allowance benefit system comprises: (a) Family allowances proper, equivalent to 25·5% of the basic monthly salary for 2 dependent children, 46% for the third child,

41% for the fourth child, and 39% for the fifth and each subsequent child; a supplement equivalent to 9% of the basic monthly salary for the second and each subsequent dependent child more than 10 years old, and 16% for each dependent child over 15 years. (b) Family supplement for persons with at least 3 children or one child aged less than 3 years. (c) Ante-natal grants. (d) Maternity grant is equal to 260% of basic salary. Increase for multiple births or adoptions, 198%; increase for birth or adoption of third or subsequent child, 457%. (e) Allowance for specialized education of handicapped children. (f) Allowance for orphans. (g) Single parent allowance. (h) Allowance for opening of school term. (i) Allowance for accommodation, under certain circumstances. (j) Minimum family income for those with at least 3 children. Allowances (b), (g), (h) and (j) only apply to those whose annual income falls below a specified level.

Workmen's Compensation. The law passed by the National Assembly on 30 Oct. 1946 forms part of the Social Security Code and is administered by the Social Security Organization. Employers are invited to take preventive measures. The application of these measures is supervised by consulting engineers (assessors) of the local funds dealing with sickness insurance, who may compel employers who do not respect these measures to make additional contributions; they may, in like manner, grant rebates to employers who have in operation suitable preventive measures. The injured person receives free treatment, the insurance fund reimburses the practitioners, hospitals and suppliers chosen freely by the injured. In cases of temporary disablement, the daily payments are equal to half the total daily wage received by the injured. In case of permanent disablement, the injured person receives a pension, the amount of which varies according to the degree of disablement and the salary received during the past 12 months.

Unemployment Benefits vary according to circumstances (full or partial unemployment) which are means-tested.

CULTURE

Avignon is one of nine European Cities of Culture in the year 2000, along with Bergen (Norway), Bologna (Italy), Brussels (Belgium), Helsinki (Finland), Kraków (Poland), Prague (Czech Republic), Reykjavík (Iceland) and Santiago de Compostela (Spain). The title attracts large European Union grants.

Broadcasting. Radio and television broadcasting was reorganized under the Act of 7 Aug. 1974 which replaced the *Office de Radiodiffusion Télévision Française* with 4 broadcasting companies, a production company and an audio-visual institute. The broadcasting authority (an independent regulatory commission) is the *Conseil Supérieur de l'Audiovisuel (CSA).* Radio programmes are broadcast from 874 VHF transmitters of which 418 belong to 4 stations: *France Info, France Inter, France Musique* and *France Culture.* An external service, *Radio-France Internationale,* was founded in 1931 (as 'Poste Coloniale'), and broadcasts in 20 languages.

There are 2 state-owned TV channels, *Antenne-2* and *FR3,* which are partly financed by advertising, and 5 commercial channels; colour is by SECAM. TV broadcasts must contain at least 60% EU-generated programmes and 50% of these must be French.

There were about 58m. radio receivers in use in 1997; and 34·25m. TV sets (1995).

Cinema. There were 4,365 screens in 1995; attendances totalled 130·1m. (126m. in 1994); 115 full-length films were made in 1994. Around 360 new screens were to be opened between 1998 and 2000.

Press. There were about 80 daily papers (10 nationals, 70 provincials) in 1997. Top dailies: *L'Équipe*; *Le Monde*; *Le Parisien-Aujourd'hui*; *Le Figaro-L'Aurore*; *Libération*; *France-Soir*; *Ouest France*; *Le Progrès*; *Centre France*; *Sud Ouest*; *Voix du Nord.* The *Journal de Dimanche* is the only national Sunday paper. In 1995, total daily press circulation was 13·6m. copies, up from 10·3m. in 1980.

Tourism. There were 62,406,000 foreign tourists in 1996, spending US$28·36bn. France receives more foreign tourists than any other country, and had receipts in

1996 exceeded only in the USA and Italy. Around 11m. foreigners a year visit Paris. Countries of origin (visitors, in 1,000) in 1993: Germany, 12,900; UK, 8,000; Netherlands, 7,100; Italy, 6,300; Spain, 3,000; Belgium, 2,000; USA, 1,900; Switzerland, 1,900; Portugal, 1,700; Sweden, 878; Canada, 694; Denmark, 687; Ireland, 475; Greece, 348; Austria, 329; Japan, 320; Norway, 320. There were 596,670 classified hotel rooms in 1994.

OVERSEAS TERRITORIES

SOUTHERN AND ANTARCTIC TERRITORIES

The Territory of the TAAF was created on 6 Aug. 1955. It comprises the Kerguelen and Crozet archipelagoes, the islands of Saint Paul and Amsterdam (formerly Nouvelle Amsterdam), all in the southern Indian ocean, and Terre Adélie. Since 2 April 1997 the administration has had its seat in Saint-Pierre, Réunion; before that it was in Paris. The Administrator is assisted by a 7-member consultative council which meets twice yearly in Paris; its members are nominated by the Government for 5 years. The 15-member Polar Environment Committee, which in 1993 replaced the former Consultative Committee on the Environment (est. 1982), meets at least once a year to discuss all problems relating to the preservation of the environment.

The French Institute for Polar Research and Technology was set up to organize scientific research and expeditions in Jan. 1992. The staff of the permanent scientific stations of the TAAF (120 in 1998) is renewed every 6 or 12 months and forms the only population.

Administrateur Supérieur: Mme Brigitte Girardin.

Kerguelen Islands Situated 48–50° S. lat., 68–70° E. long.; consists of 1 large and 85 smaller islands, and over 200 islets and rocks, with a total area of 7,215 sq. km (2,786 sq. miles) of which Grande Terre occupies 6,675 sq. km (2,577 sq. miles). It was discovered in 1772 by Yves de Kerguelen, but was effectively occupied by

France only in 1949. Port-aux-Français has several scientific research stations (56 members). Reindeer, trout and sheep have been acclimatized.

Crozet Islands Situated 46° S. lat., 50–52° E. long.; consists of 5 larger and 15 tiny islands, with a total area of 505 sq. km (195 sq. miles). The western group includes Apostles, Pigs and Penguins islands; the eastern group, Possession and Eastern islands. The archipelago was discovered in 1772 by Marion Dufresne, whose mate, Crozet, annexed it for Louis XV. A meteorological and scientific station (17 members) at Base Alfred-Faure on Possession Island was built in 1964.

Amsterdam and **Saint-Paul Islands** Situated 38–39° S. lat., 77° E. long. Amsterdam, with an area of 54 sq. km (21 sq. miles) was discovered in 1522 by Magellan's companions; Saint-Paul, lying about 100 km to the south, with an area of 7 sq. km (2·7 sq. miles), was probably discovered in 1559 by Portuguese sailors. Both were first visited in 1633 by the Dutch explorer, Van Diemen, and were annexed by France in 1843. They are both extinct volcanoes. The only inhabitants are at Base Martin de Vivies (est. 1949 on Amsterdam Island), including several scientific research stations, a hospital, communication and other facilities (20 members). Crayfish are caught commercially on Amsterdam.

Terre Adélie Comprises that section of the Antarctic continent between 136° and 142° E. long., south of 60° S. lat. The ice-covered plateau has an area of about 432,000 sq. km (166,800 sq. miles), and was discovered in 1840 by Dumont d'Urville. A research station (27 members) is situated at Base Dumont d'Urville, which is maintained by the French Institute for Polar Research and Technology.

NEW CALEDONIA

KEY HISTORICAL EVENTS

New Caledonia was discovered by James Cook on 4 Sept. 1774. The first settlers (English Protestants and French Catholics) came in 1840. New Caledonia was annexed by France in 1853 and, together with most of its former dependencies, became an Overseas Territory in 1958.

Density, 10 per sq. km. In 1995 an estimated 62% of the population lived in urban areas. Projected population (2000): 200,000. The capital, Nouméa, had 76,293 inhabitants in 1996.

New Caledonia An area of 16,372 sq. km (about 400 km long, 50 km wide) with a population (1996 census) of 173,365. The east coast is predominantly Melanesian; the Nouméa region predominantly European; and the rest of the west coast is of mixed population.

Loyalty Islands 100 km (60 miles) east of New Caledonia, consisting of 3 large islands: Maré, Lifou and Uvéa, and many small islands. It has a total area of 1,981 sq. km and a population of 20,877, nearly all Melanesians, except on Uvéa which is partly Polynesian. The chief culture in the islands is coconuts; the chief export is copra.

Isle of Pines A tourist and fishing centre 50 km (30 miles) to the south-east of Nouméa, with an area of 152 sq. km and a population of 1,671.

Bélep Archipelago About 50 km north-west of New Caledonia, with an area of 70 sq. km and a population of 923.

The remaining islands are very small and have no permanent inhabitants. The largest are the Chesterfield Islands, a group of 11 well-wooded coral islets with a combined area of 10 sq. km, about 550 km west of the Bélep Archipelago. The Huon Islands, a group of 4 barren coral islets with a combined area of just 65 ha, are 225 km north of the Bélep Archipelago. Walpole, a limestone coral island of 1 sq. km, lies 150 km east of the Isle of Pines; Matthew Island (20 ha) and Hunter Island (2 sq. km), respectively 250 km and 330 km east of Walpole, are spasmodically active volcanic islands; and are also claimed by Vanuatu.

At the 1996 census there were 341 tribes (which have legal status under a high chief) living in 160 reserves, covering a surface area of 392,550 ha (21% of total land), and representing about 28·7 % of the population. 80,443 Melanesians belong to a tribe.

In addition to French, New Caledonia has a remarkable diversity of Melanesian languages (29 vernacular), divided into 4 main groups (Northern, Central, Southern and Loyalty Islands). There were 53,556 speakers (1996). The 3 most spoken forms are Drehu (11,338), Nengone (6,377) and Paicî (5,498). A ministerial decision in 1991 introduced local languages into the baccalauréat system. In 1997-98, 6 Melanesian languages were taught in schools.

CONSTITUTION AND GOVERNMENT

Following constitutional changes introduced by the French government in 1985 and 1988, the Territory is administered by a High Commissioner assisted by a 4-member Consultative Committee, consisting of the President of the Territorial Congress (as President) and the Presidents of the 3 Provincial Assemblies. The French government is represented by the appointed High Commissioner.

FRENCH POLYNESIA

KEY HISTORICAL EVENTS

French protectorates since 1843, these islands were annexed to France 1880–82 to form 'French Settlements in Oceania', which opted in Nov. 1958 for the status of an overseas territory within the French Community.

TERRITORY AND POPULATION

The total land area of these 5 archipelagoes comprising 130 volcanic islands and coral atolls (76 inhabited) scattered over a wide area in the eastern Pacific, is 4,167 sq. km. The population (1996 census) was 219,521 (105,587 females); density, 53 per sq. km. At Dec.1998 French forces stationed in Polynesia numbered 2,119 (based mostly on Tahiti and the Hao atoll) and employed 1,162 Polynesian citizens. In 1995 an estimated 56·4% of the population lived in urban areas. Projected population (2025), 300,000.

The official languages are French and Tahitian.

The islands are administratively divided into 5 *circonscriptions* as follows:

Windward Islands (Îles du Vent) (162,398 inhabitants, 1996) comprise Tahiti with an area of 1,042 sq. km and 150,707 inhabitants; Mooréa with an area of 132 sq. km and 11,682 inhabitants; Maiao (Tubuai Manu) with an area of 9 sq. km; and the smaller Mehetia and Tetiaroa. The capital is Papeete, Tahiti (79,024 inhabitants, including suburbs).

Leeward Islands (Îles sous le Vent) comprise the 5 volcanic islands of Raiatéa, Tahaa, Huahine, Bora-Bora and Maupiti, together with 4 small atolls (Tupai, Mopelia, Scilly, Bellinghausen), the group having a total land area of 404 sq. km and 26,838 inhabitants in 1996. The chief town is Uturoa on Raiatéa. The Windward and Leeward Islands together are called the Society Archipelago (Archipel de la Société). Tahitian, a Polynesian language, is spoken throughout the archipelago and used as a *lingua franca* in the rest of the territory.

Marquesas Islands 12 islands lying north of the Tuamotu Archipelago, with a total area of 1,049 sq. km and 8,064 inhabitants in 1996. There are 6 inhabited islands: Nuku Hiva, Ua Pou, Ua Uka, Hiva Oa, Tahuata, Fatu Hiva; and 6 smaller (uninhabited) ones; the chief centre is Taiohae on Nukuhiva.

Austral or Tubuai Islands lying south of the Society Archipelago, comprise a 1,300 km chain of volcanic islands and reefs. There are 5 inhabited islands (Rimatara, Rurutu, Tubuai, Raivavae and, 500 km to the south, Rapa), with a combined area of 148 sq. km (6,563 inhabitants in 1996); the chief centre is Mataura on Tubuai.

Tuamotu Archipelago consists of 2 parallel ranges of 76 atolls (53 inhabited) lying north and east of the Society Archipelago, and has a total area of 690 sq. km, with 15,370 inhabitants in 1996. The most populous atolls are Rangiroa (1,913 inhabitants), Hao (1,356) and Manihi (769).

The Mururoa and Fangataufa atolls in the south-east of the group were ceded to France in 1964 by the Territorial Assembly, and were used by France for nuclear tests from 1966–96. The cessation of nuclear testing marked the end of activities of the Pacific Testing Centre (CEP) in French Polynesia. The CEP was entirely dismantled during 1998. A small military presence remains to ensure permanent radiological control.

The *circonscription* also includes the Gambier Islands further east, with an area of 36 sq. km; the chief centre is Rikitea on the group's only inhabited island, Mangareva.

The uninhabited **Clipperton Island**, 1,000 km off the west coast of Mexico, is a dependency and is administered by the High Commissioner for French Polynesia but does not form part of the Territory; it is an atoll with an area of 5 sq. km.

CONSTITUTION AND GOVERNMENT

Under the 1984 Constitution, the Territory is administered by a Council of Ministers, whose President is elected by the Territorial Assembly from among its own members; the President appoints a Vice-President and 14 other ministers (16 ministers in total in 1999). There is an advisory Economic and Social Committee. French Polynesia is represented in the French Assembly by 2 deputies, in the Senate by 1 senator, in the Economic and Social Council by 1 councillor. The French government is represented by a High Commissioner. The Territorial Assembly comprises 41 members elected every 5 years from 5 constituencies by universal suffrage, using the same proportional representation system as in metropolitan French regional elections. To be elected a party must gain at least 5% of votes cast. The Assembly elects a head of local government.

A statute drafted at the end of 1995 proposes to create French Polynesia as an Autonomous Overseas Territory in which the President of the Council of Ministers will become the President of the territory.

RECENT ELECTIONS

Elections were held on 12 May 1996. The electorate was 125,000. 412 candidates stood. ENERGY AND NATURAL RESOURCES

French Polynesia is heavily dependant on external sources for its energy. Since the early 1980s efforts have been made to reduce this, which have included the development of solar energy. By 1999 it was estimated that production of solar energy was in the region of 2,700 hours a year.

Electricity. Production (1997) was 353m. kWh in 1994, of which 35% was hydroelectric. Consumption per capita (1995) was estimated to be 1,409 kWh. Between 1988 and 1997, 14,212 solar photovoltaic modules were installed in Polynesia.

Oil and Gas. In 1997 over 236,000 tonnes of combustible products were imported (with a value of FF346m.), mainly from Australia and Hawai; 8,600 tonnes of gas was imported.

Agriculture. Agriculture used to be the primary economic sector but now accounts for only a modest 8% (1997) of GDP. An important product is copra (coconut trees cover the coastal plains of the mountainous islands and the greater part of the low-lying islands); production (1997) 9,857 tonnes. A new and increasingly successful crop is the nono fruit, which has medicinal value. Exports of the nono reached FF15m. in 1998. Some 2,218 industrial enterprises employ 5,800 people. Principal industries include food and drink products, cosmetics, clothing and jewellery, furniture-making, metalwork and shipbuilding. Commerce is an important sector of the economy, employing (1997) some 7,400 persons in 2,448 enterprises across 1,752 retail and 696 manufacturing businesses.

The chief exports are coconut oil, fish, nono juice, mother of pearl and cultured pearls. Pearl production in recent years has doubled, with FF794m. worth of pearls exported in 1998. Representing 27% of the world market, Polynesia is the world's second largest producer of pearls after Australia. It is the second largest industry in Polynesia after tourism, and employs some 4,000 islanders.

Major trading partners: France, Japan (66% of pearl exports), Hong Kong, the USA and the EU, with France accounting for over 38% of total imports and around 25% of exports in 1997, and the EU as a whole 52% of imports.

KEY HISTORICAL EVENTS

Between the 16th and 18th centuries, the Fang and other peoples in the region of present-day Gabon were part of a federation of chiefdoms. Some collaborated in the slave-trade, while others suffered from it. The country's capital, Libreville, grew from a settlement of slaves who were rescued from captivity by the French in 1849. Colonized by France around this period, the territory was annexed to French Congo in 1888. There was resistance by the indigenous people between 1905 and 1911 to the depredations of colonial rule, but the country became a separate colony in 1910 as one of the four territories of French Equatorial Africa. Gabon became an autonomous republic within the French Community on 28 Nov. 1958 and achieved independence on 17 Aug. 1960.

TERRITORY AND POPULATION

Gabon is bounded in the west by the Atlantic Ocean, north by Equatorial Guinea and Cameroon and east and south by the Republic of the Congo. The area covers 267,667 sq. km; its population at the 1993 census was 1,014,976; density, 3·8 per sq. km. In 1995 an estimated 50·1% of the population were urban. 1997 estimate, 1,190,000; density, 4·4 per sq. km.

The UN gives a projected population for 2000 of 1·23m.

The capital is Libreville (362,386 inhabitants, 1993 census), other large towns being Port-Gentil (80,841), Franceville (30,246), Oyem (22,669) and Moanda (21,921).

KEY HISTORICAL EVENTS

The independent Georgian Social Democratic Republic was declared on 26 May 1918 and was recognized by the Russian Soviet Federal Socialist Republic on 7 May 1920. A rising in Mingrelia, Abkhazia and Adjaria was put down by Soviet troops. On 25 Feb. 1921 the country was renamed the Georgian Soviet Socialist Republic. On 15 Dec. 1922 Georgia was merged with Armenia and Azerbaijan to form the Transcaucasian Soviet Federal Socialist Republic. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the USSR.

Following nationalist successes at elections in Oct. 1990, the Supreme Soviet resolved in Nov. 1990 to begin a transition to full independence and on 9 April 1991, following a 98·9% popular vote in favour, unanimously declared the republic an independent state based on the treaty of independence of May 1918.

President Zviad Gamsakhurdia was deposed by armed insurrection on 6 Jan. 1992 and a military council took control. After elections in which he gained 95% of votes cast, Eduard Shevardnadze became *de facto* head of state in Oct. 1992. On 22 Oct. 1993 Georgia joined the CIS, a move ratified by parliament on 1 March 1994. Supporters of the deposed president Gamsakhurdia were in intermittent armed conflict with the government, mainly in Mingrelia, but suffered heavy defeats once Russian support became available via the CIS. On 9 Feb. 1998 there was an unsuccessful attempt on the life of Eduard Shevardnadze. Later in the month UN military observers who had been held hostage by opposition forces were released after negotiations with representatives of former president Gamsakhurdia.

Georgians accounted for 70·1% of the 1989 census population of 5,400,841; others included 8·1% Armenians, 6·3% Russians, 5·7% Azerbaijanis, 3% Ossetians, 1·9% Greeks, 1·8% Abkhazians and 1% Ukrainians. On 26 Nov. 1994 parliament adopted a new Constitution proclaiming Abkhazian sovereignty. CIS economic sanctions were imposed in Jan. 1996. Parliamentary elections were held on 23 Nov. 1996. Neither the constitution nor the elections were recognized by the Georgian government or the international community. Fighting flared up between rival militia forces again in May 1998 after Abkhazian forces ejected thousands of ethnic Mingrelian and Georgian refugees who had returned to the southern Abkhazian region of Gali. KEY HISTORICAL EVENTS

At the outbreak of the Napoleonic wars Germany consisted of many small states, independent but loosely bound by a common allegiance to the Holy Roman Emperor, a title which for most of its history fell to the Austrian royal house of Hapsburg. In 1806 the Holy Roman Empire was destroyed by Napoleon, who then combined 16 German states as the Confederation of the Rhine.

Following Napoleon's defeat in 1815, a larger Confederation was formed with 38 members (39 after 1817). Austria remained the dominant power with a permanent right to the presidency of the Confederation. Prussia held the vice-presidency. The other important states were: Bavaria, Saxony, Hanover, Württemberg, Baden, Hesse-Kassel, Hesse-Darmstadt, Holstein and Lauenberg, Brunswick, Nassau, Mecklenburg-Schwerin and Mecklenburg-Strelitz.

In 1848–50 attempts were made to draw up a constitution and elect a Confederation parliament. A constitution was published in Dec. 1848 but few states accepted it; a revised version was accepted in May 1849, but not by Austria or Bavaria. The parliament which sat from 20 March to 29 April 1850 was neither recognized by Austria nor powerful enough to control the other dominant state, Prussia. The Federal Diet therefore resumed power and held it until 1866.

In 1866 Prussia defeated Austria and formed the North German Confederation in 1867, under her own control. She had annexed Hanover, Hesse-Kassel and Nassau in 1866 together with the smaller states of Homburg and Frankfurt.

In 1870 Prussia went to war with France, rallied the German states in support and, following German victory, went on to the creation of the German Empire in 1871. The Empire included all German states except Austria and had, therefore, deep North-South, Protestant-Catholic divisions. It was dominated by Prussia, whose king became emperor. Conscious of arriving late on the world scene, Germany acquired colonies in West and South-West Africa in 1884 and at the end of the decade Zanzibar and Tanganyika in the East. The imperial government led Germany into the First World War in 1914 and when defeated, national unity collapsed. The emperor abdicated on 28 Nov. 1918.

After an anarchic period a republican government, with a constitution drawn up at Weimar in 1919, attempted under Chancellor Ebert to restore the economy and political stability. But the scale of reparations demanded by the Treaty of Versailles, the onset of world depression and the loss of resources and territory through warfare were too much for the fledgling government to manage.

In 1933 the National Socialist leader Adolf Hitler was appointed Chancellor. The National Socialist ('Nazi') party appealed to national pride and offered a return to self-respect after humiliation. Hitler became president of the Third Reich in 1934. His policies involved the wide expansion of German power and a theory of Aryan racial supremacy which meant in practice that non-Aryans were persecuted, murdered, and their assets confiscated. Hitler's expansionism led to his annexation of Austria and of German-speaking Czechoslovakia in 1938. In March 1939 he declared all of Czechoslovakia a German protectorate, and in Sept. invaded Poland, attempting to restore the authority exercised there by Prussia before 1918. This precipitated the Second World War.

The War ended in German defeat in 1945. The Allied forces occupied Germany; the UK, the USA and France holding the west and the USSR the east. By the Berlin Declaration of 5 June 1945 these governments assumed authority; each was given a zone of occupation, and the zone commanders-in-chief together made up the Allied

Control Council in Berlin. The area of Greater Berlin was also divided into 4 sectors.

At the Potsdam Conference of 1945 northern East Prussia was transferred to the USSR. It was also agreed that, pending a final peace settlement, Poland should administer the areas east of the rivers Oder and Neisse, with the frontier fixed on the Oder and Western Neisse down to the Czechoslovak frontier.

By 1948 it had become clear that there would be no agreement between the occupying powers as to the future of Germany. Accordingly, the western allies united their zones into one unit in March 1948. In protest, the USSR withdrew from the Allied Control Council, blockaded Berlin until May 1949, and consolidated control of eastern Germany, establishing the German Democratic Republic. A People's Council appointed in 1948 drew up a constitution which came into force in Oct. 1949, providing for a communist state of five Länder with a centrally-planned economy. In 1952 the government made a physical division between its own territory and that of the Federal Republic, in the form of a three-mile cordon fenced and guarded along the frontier. This left Berlin as the only point of contact; it was closed as a migration route by the construction of a concrete boundary wall in 1961. In 1953 there were popular revolts against food shortages and the pressure to collectivize. In 1954 the government eased economic problems, the USSR ceased to collect reparation payments, and sovereignty was granted. The GDR signed the Warsaw Pact in 1955. Socialist policies were stepped up in 1958, leading to flight to the West of skilled workers.

Meanwhile, a constituent assembly met in Bonn in Sept. 1948 and drafted a Basic Law, which came into force in May 1949. In Sept. 1949 the occupation forces limited their own powers and the Federal Republic of Germany came into existence. The occupation forces retained some powers, however, and the Republic did not become a sovereign state until 1955 when the Occupation Statute was revoked. The Republic consisted of the states of Schleswig-Holstein, Hamburg, Lower Saxony, Bremen, North Rhine-Westphalia, Hessen, Rhineland-Palatinate, Baden-Württemberg, Bavaria and Saarland, together with West Berlin.

The first chancellor, Konrad Adenauer (1949–63), was committed to the ultimate reunification of Germany and would not acknowledge the German Democratic Republic as a state. The two German states did not sign an agreement of mutual recognition and intent to co-operate until 1972, under Chancellor Willi Brandt. The most marked feature of the post-war period was rapid population growth and the restoration of industry. Immigration from the German Democratic Republic, about 3m. since 1945, stopped when the Berlin Wall was built in 1961; however there was a strong movement of German-speaking people back into Germany from German settlements in countries of the Soviet bloc. Industrial growth also attracted labour from Turkey, Spain, Italy and the Balkans.

The Paris Treaty, which came into force in 1955, ensured the Republic's contribution to NATO and NATO forces were stationed along the Rhine in large numbers, with consequent dispute about the deployment of nuclear missiles on German soil.

Even before sovereignty the Republic had begun negotiations for a measure of European unity and joined in creating the European Coal and Steel Community in 1951 and the European Economic Community in 1957. In Jan. 1957 the Saarland was returned to full German control. In 1973 the Federal Republic entered the UN.

In the autumn of 1989 movements for political liberalization in the GDR and re-unification with Federal Germany gathered strength. Erich Honecker and other long-serving Communist leaders were replaced in Oct.–Nov. The Berlin Wall was opened on 9 Nov.

Following the reforms in the GDR in Nov. 1989 the Federal Chancellor Helmut Kohl issued a plan for German confederation. The ambassadors of the 4 war-time allies (France, the USSR, the UK and the USA) met in Berlin in Dec. After talks with Chancellor Kohl on 11 Feb. 1990, President Gorbachev made no objection to German re-unification. The allies agreed a formula ('two-plus-four') for re-unification talks to begin after the GDR elections on 18 March. 'Two-plus-four' talks began on 5 May 1990. On 18 May Federal Germany and the GDR signed a treaty extending Federal Germany's currency, its economic, monetary and social legislation, to the GDR as of 1 July. On 23 Aug. the Volkskammer by 294 votes to

62 'declared its accession to the jurisdiction of the Federal Republic as from 3 Oct. according to article 23 of the Basic Law', which provided for the Länder of pre-war Germany to accede to the Federal Republic. On 12 Sept. the Treaty on the Final Settlement with Respect to Germany was signed by Federal Germany, the GDR and the 4 war-time allies.

The Federal Assembly (*Bundestag*) moved from Bonn to the renovated *Reichstag* in Berlin in May 1999.

The official language is German. Minor orthographical amendments were agreed in 1995. An agreement between German-speaking countries in Vienna on 1 July 1996 provided for minor orthographical changes and established a Commission for German Orthography in Mannheim. There have been considerable objections within Germany, particularly in the North, and many Länder are to decide their own language programmes for schools. Generally, both old and new spellings are acceptable.

CONSTITUTION AND GOVERNMENT

The Basic Law (*Grundgesetz*) was approved by the parliaments of the participating Länder and came into force on 23 May 1949. It is to remain in force until 'a constitution adopted by a free decision of the German people comes into being'. The Federal Republic is a democratic and social constitutional state on a parliamentary basis. The federation is constituted by the 16 Länder (states). The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the Länder must conform to the principles of a republican, democratic and social state based on the rule of law. Executive power is vested in the Länder, unless the Basic Law prescribes or permits otherwise. Federal law takes precedence over state law.

Legislative power is vested in the *Bundestag* (Federal Assembly) and the *Bundesrat* (Federal Council). The Bundestag is currently composed of 669 members and is elected in universal, free, equal and secret elections for a term of 4 years. A party must gain 5% of total votes cast in order to gain representation in the Bundestag, although if a party gets 3 candidates elected directly, they may take their seats even if the party obtains less than 5% of the national vote. The electoral system combines relative-majority and proportional voting; each voter has 2 votes, the first for the direct constituency representative, the second for the competing party lists in the Länder. All directly elected constituency representatives enter parliament, but if a party receives more 'indirect' than 'direct' votes, the first name in order on the party list not to have a seat becomes a member—the number of seats is increased by the difference ('overhang votes'). Thus the number of seats in the Bundestag varies, but is usually around 670. The Bundesrat consists of 69 members appointed by the governments of the Länder in proportions determined by the number of inhabitants. Each *Land* has at least 3 votes.

The Head of State is the Federal *President* who is elected for a 5-year term by a *Federal Convention* specially convened for this purpose. This Convention consists of all the members of the Bundestag and an equal number of members elected by the Länder parliaments in accordance with party strengths, but who need not themselves be members of the parliaments. No president may serve more than 2 terms. Executive power is vested in the Federal Government, which consists of the Federal *Chancellor*, elected by the Bundestag on the proposal of the Federal President, and the Federal Ministers, who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures, and regulation of time and calendar; (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic; (7) post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal Government; (9) trade marks,

copyright and publishing rights; (10) co-operation of the Federal Republic and the Länder in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real-estate acquisition, incremented value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates. The Federal Republic can claim part of the income and corporation taxes to cover its expenditures not covered by other revenues. Financial jurisdiction is uniformly regulated by federal legislation.

Federal laws are passed by the Bundestag and after their adoption submitted to the Bundesrat, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Bundestag and two-thirds of the votes of the Bundesrat.

THE LÄNDER

BADEN-WÜRTTEMBERG

KEY HISTORICAL EVENTS

The *Land* is a combination of former states. Baden (the western part of the present *Land*) became a united margravate in 1771, after being divided as Baden-Baden and Baden-Durlach since 1535; Baden-Baden was predominantly Catholic and Baden-Durlach, Protestant.

The margrave became an ally of Napoleon, ceding land west of the Rhine and receiving northern and southern territory as compensation. In 1805 Baden became a grand duchy and in 1806 a member state of the Confederation of the Rhine, extending from the Main to Lake Constance. In 1815 it was a founder-state of the German Confederation. A constitution was granted by the grand duke in 1818, but later rulers were less liberal and there was revolution in 1848, put down with Prussian help. The grand Duchy was abolished and replaced by a *Land* in 1919.

In 1949 Baden was combined with Württemberg to form three states; the three were brought together as 1 in 1952.

Württemberg, having been a duchy since 1495, became a kingdom in 1805 and joined the Confederations as did Baden. A constitution was granted in 1819 and the state remained liberal. In 1866 the king allied himself with Austria against Prussia, but in 1870 joined Prussia in war against France. The liberal monarchy came to an end with the abdication of William II in 1918, and Württemberg became a state of the German Republic. In 1945 the state was divided between different Allied occupation authorities but the divisions ended in 1952.

BAVARIA

Bayern

KEY HISTORICAL EVENTS

Bavaria was ruled by the Wittelsbach family from 1180. The duchy remained Catholic after the Reformation, which made it a natural ally of Austria and the Hapsburg Emperors.

The present boundaries were reached during the Napoleonic wars, and Bavaria became a kingdom in 1805. Despite the granting of a constitution and parliament, radical feeling forced the abdication of King Ludwig I in 1848. Maximilian II was followed by Ludwig II who allied himself with Austria against Prussia in 1866, but was reconciled with Prussia and entered the German Empire in 1871.

In 1918 the King Ludwig III abdicated. The first years of republican government were filled with unrest, attempts at the overthrow of the state by both communist and right-wing groups culminating in an unsuccessful coup by Adolf Hitler in 1923.

The state of Bavaria included the Palatinate from 1214 until 1945, when it was taken from Bavaria and added to the Rhineland. The present *Land* of Bavaria was formed in 1948.

Munich became capital of Bavaria in the reign of Albert IV (1467–1508) and remains capital of the *Land*.

BERLIN

KEY HISTORICAL EVENTS

After the end of World War II, Berlin was divided into 4 occupied sectors, each with a military governor from one of the victorious Allied Powers (the USA, the Soviet Union, Britain and France). On 30 Nov. 1948 a seperate municipal government was set up in the Soviet sector which led to the political division of the city. In contravention of the special Allied status agreed for the entire city, East Berlin became 'Capital of the GDR' in 1949 and thus increasingly integrated into the GDR as a whole. In West Berlin, the formal supreme authority of the Western Allies endured until 1990.

On 17 June 1953 the protest by workers in East Berlin against political oppression and economic hardship was supressed by Soviet military forces. To stop refugees, the east German government erected the Berlin Wall to seal off West Berlin's borders on 13 Aug. 1961.

The Berlin Wall unexpectedly collapsed on 9 Nov. 1989 as the regime in the GDR bowed to the internal pressure which had been building for months. East and West Berlin were amalgamated on the re-unification of Germany in Oct. 1990, and Berlin was declared the national capital. With the move of the national government, the parliament (Bundestag), and the federal organ of the Länder (Budesrat) in 1999, Berlin once again fulfils the functions of a capital city.

HESSEN

KEY HISTORICAL EVENTS

The *Land* consists of the former states of Hesse-Darmstadt and Hesse-Kassel, and Nassau. Hesse-Darmstadt was ruled by the Landgrave Louis X from 1790. He became grand duke in 1806 with absolute power, having dismissed the parliament in 1803. However, he granted a constitution and bicameral parliament in 1820. Hesse-Darmstadt lost land to Prussia in the Seven Weeks' War of 1866, but retained its independence, both then and as a state of the German Empire after 1871. In 1918 the grand duke abdicated and the territory became a state of the German Republic. In 1945 areas west of the Rhine were incorporated into the new *Land* of Rhineland-Palatinate, areas east of the Rhine became part of the *Land* of Greater Hesse.

Hesse-Kassel was ruled by the Landgrave William IX from 1785 until he became Elector in 1805. In 1807 the Electorate was absorbed into the Kingdom of Westphalia (a Napoleonic creation), becoming independent again in 1815 as a state of the German Confederation. In 1831 a constitution and parliament were granted but the Electors remained strongly conservative.

In 1866 the Diet approved alliance with Prussia against Austria; the Elector nevertheless supported Austria. He was defeated by the Prussians and exiled and Hesse-Kassel was annexed to Prussia. In 1867 it was combined with Frankfurt and some areas taken from Nassau and Hesse-Darmstadt to form a Prussian province (Hesse-Nassau). In 1801 Nassau west of the Rhine passed to France; Napoleon also took the northern state in 1806. The remnant of the southern states allied in 1803 and three years later they became a duchy. In 1866 the duke supported Austria against Prussia and the duchy was annexed by Prussia as a result. In 1944 the Prussian province of Hesse-Nassau was split in two: Nassau and Electoral Hesse, also called Kurhessen. The following year these were combined with Hesse-Darmstadt as the *Land* of Greater Hesse which became known as Hessen.

LOWER SAXONY

Niedersachsen

KEY HISTORICAL EVENTS

The *Land* consists of the former state of Hanover with Oldenburg, Schaumburg-Lippe and Brunswick. It does not include the cities of Bremen or Bremerhaven.

Oldenburg, Danish from 1667, passed to the bishopric of Lübeck in 1773; the Holy Roman Emperor made it a duchy in 1777. As a small state of the

Confederation after 1815 it supported Prussia, becoming a member of the Prussian Zollverein (1853) and North German Confederation (1867). The grand duke abdicated in 1918 and was replaced by an elected government.

Schaumburg-Lippe was a small sovereign principality. As such it became a member of the Confederation of the Rhine in 1807 and of the German Confederation in 1815. Surrounded by Prussian territory, it also joined the Prussian-led North German Confederation in 1866. Part of the Empire until 1918, it then became a state of the new republic.

Brunswick, a small duchy, was taken into the Kingdom of Westphalia by Napoleon in 1806 but restored to independence in 1814. In 1830 the duke, Charles II, was forced into exile and replaced in 1831 by his more liberal brother, William. The succession passed to a Hanoverian claimant in 913 but the duchy ended in 1918 with the Empire.

As a state of the republican Germany, Brunswick was greatly reduced under the Third Reich. Its boundaries were restored by the British occupation forces in 1945.

Hanover was an autonomous Electorate of the Holy Roman Empire whose rulers were also kings of Great Britain from 1714 to 1837. From 1762 they ruled almost entirely from England. After Napoleonic invasions Hanover was restored in 1815. A constitution of 1819 made no radical change and had to be followed by more liberal versions in 1833 and 1848.

Prussia annexed Hanover, despite its proclaimed neutrality, in 1866; it remained a Prussian province until 1946.

On 1 Nov. 1946 all four states were combined by the British military administration to form the *Land* of Lower Saxony.

NORTH RHINE-WESTPHALIA

Nordrhein-Westfalen

KEY HISTORICAL EVENTS

Historical Westphalia consisted of many small political units, most of them absorbed by Prussia and Hanover before 1800. In 1807 Napoleon created a Kingdom of Westphalia for his brother Joseph. This included Hesse-Kassel, but was formed mainly from the Prussian and Hanoverian lands between the rivers Elbe and Weser.

In 1815 the kingdom ended with Napoleon's defeat. Most of the area was given to Prussia, with the small principalities of Lippe and Waldeck surviving as independent states. Both joined the North German Confederation in 1867. Lippe remained autonomous after the end of the Empire in 1918; Waldeck was absorbed into Prussia in 1929.

In 1946 the occupying forces combined Lippe with most of the Prussian province of Westphalia to form the *Land* of North Rhine-Westphalia. On 1 March 1947 the allied Control Council formally abolished Prussia.

RHINELAND-PALATINATE

Rheinland-Pfalz

KEY HISTORICAL EVENTS

The *Land* was formed from the Rhenisch Palatinate and the Rhine valley areas of Prussia, Hesse-Darmstadt, Hesse-Kassel and Bavaria.

The Palatinate was ruled, from 1214, by the Bavarian house of Wittelsbach; its capital was Heidelberg. In 1797 its land west of the Rhine was taken into France, and Napoleon divided the eastern land between Baden and Hesse. In 1815 the land taken by France was restored to Germany and allotted to Bavaria. The area and its neighbours formed the strategically-important Bavarian Circle of the Rhine.

The rule of the Wittelsbachs ended in 1918 but the Palatinate remained part of Bavaria until the American occupying forces detached it in 1946.

The new *Land*, incorporating the Palatinate and other territory, received its constitution in April 1947.

SAARLAND

KEY HISTORICAL EVENTS

Long disputed between Germany and France, the area was occupied by France in 1792. Most was allotted to Prussia at the close of the Napoleonic wars in 1815.

In 1870 Prussia defeated France and when, in 1871, the German Empire was founded under Prussian leadership, it was able to incorporate Lorraine. This part of France was the Saar territory's western neighbour so the Saar was no longer a vulnerable boundary state. It began to develop industrially, exploiting Lorraine coal and iron.

In 1919 the League of Nations took control of the Saar until a plebiscite of 1935 favoured return to Germany. In 1945 there was a French occupation, and in 1947 the Saar was made an international area, but in economic union with France. In 1954 France and Germany agreed that the Saar should be a separate and autonomous state, under an independent commissioner. This was rejected by referendum and France agreed to return Saarland to Germany. It became a *Land* of the Federal Republic on 1 Jan. 1957.

SCHLESWIG-HOLSTEIN

KEY HISTORICAL EVENTS

The *Land* is formed from two states formerly contested between Germany and Denmark.

Schleswig was a Danish dependency ruled since 1474 by the King of Denmark as Duke of Schleswig. He also ruled Holstein, its southern neighbour, as Duke of Holstein, but he did so recognizing that it was a fief of the Holy Roman Empire. As such, Holstein joined the German Confederation which replaced the Empire in 1815.

Disputes between Denmark and the powerful German states were accompanied by rising national feeling in the duchies, where the population was part-Danish and part-German. There was war in 1848–50 and in 1864, when Denmark surrendered its claims to Prussia and Austria. Following her defeat of Austria in 1866 Prussia annexed both duchies.

North Schleswig (predominately Danish) was awarded to Denmark in 1920. Prussian Holstein and south Schleswig became the present *Land* in 1946.

TERRITORY AND POPULATION

The area of Schleswig-Holstein in 1996 was 15,771 sq. km. It is divided into 4 urban and 11 rural districts and 1,131 communes. The capital is Kiel. The population (estimate, 31 Dec. 1996) numbered 2,742,293 (1,339,326 males, 1,402,967 females).

Republic of Ghana

Capital: Accra
Population estimate, 2000: 19·93m.
GNP per capita: (PPP$) 1,790
HDI/world rank: 0·473/133

KEY HISTORICAL EVENTS

By the 17th century, several strong chiefdoms and warrior states, notably the powerful Ashanti state, ruled in the area. The Ashanti state was initially strengthened through its collaboration with the slave trade but by 1874 it had been conquered by Britain and made a colony. The hinterland became a protectorate in 1901. A period of indirect British rule began but was challenged after the Second World War by Kwame Nkrumah and the Convention People's Party (CPP), formed in 1949. The state of Ghana came into existence on 6 Mar. 1957 when the former Colony of the Gold Coast and the Trusteeship Territory of Togoland attained Dominion status. In Dec. 1956 the UN General Assembly approved the termination of British administration in Togoland and the eventual union of Togoland with the Gold Coast.

The country was declared a Republic within the Commonwealth on 1 July 1960 with Dr Kwame Nkrumah as the first President. On 24 Feb. 1966 the Nkrumah regime was overthrown in a military coup and Ghana was ruled by the National Liberation Council until 1 Oct. 1969 when the military regime handed over power to a civilian regime under a new constitution. On 13 Jan. 1972 the armed forces regained power.

In Oct. 1975 the National Redemption Council was subordinated to a Supreme Military Council (SMC). In 1979 the SMC was toppled in a coup led by Flight-Lieut. J. J. Rawlings. The new government permitted elections already scheduled and these resulted in a victory for Dr Hilla Limann and his People's National Party. However on 31 Dec. 1981 another coup led by Flight-Lieut. Rawlings dismissed the government and Parliament, suspended the constitution and established a Provisional National Defence Council to exercise all government powers.

A new pluralist democratic constitution was approved by referendum in April 1992. The Fourth Republic was proclaimed on 7 Jan. 1993.

Ghana is a member of the UN, the Commonwealth, OAU, ECOWAS and is an ACP state of the EU.

ECONOMY

Policy. Ghana is committed to the reform programmes of the IMF and World Bank and is one of Africa's biggest borrowers. In 1996 aid amounted to 11% of GDP, or 4 times the value of Ghana's exports. A privatization programme was inaugurated in 1988. By 1996, 100 of the 260 enterprises in which the government had a majority stake had been sold. Privatization deals raised US$804m. between 1990 and 1996, including the Ashanti Goldfields sell-off worth more than US$300m. Only South Africa among sub-Saharan African nations has raised more from privatization. Building, tourism, technology and financial services account for more than 46% of national income. President Rawlings has set a target date of 2020 for the country to achieve middle income status.

Performance. Real GDP growth was estimated at 2·1% in 1998 (3·0% in 1997).

Budget. The 1996 budget provided for (in ₵1,000m.): Revenue, 2,328·3; expenditure, 2,169·5. VAT was abolished in 1995.

Currency. The monetary unit is the *cedi* (GHC) of 100 *pesewas* (P). In 1996 inflation was an annualized 50%. It had declined to 28·0% in 1997 and was estimated to be 16·0% in 1998. It is a condition of the scheme that at least 70% of goods made within the zones must be exported. Within 18 months of the scheme being set up in 1995, 50 projects had been registered.

Ghana's stock exchange was one of the world's best performing stock markets in 1998.

ENERGY AND NATURAL RESOURCES

Ghana is facing an energy crisis, with power cuts of up to 12 hours a day because drought has caused the level of Lake Volta to drop to below the danger level.

Production (1994) 6·1bn. kWh, mainly from 2 hydro-electric stations operated by the Volta River Authority, Akosombo (6 units) and Kpong (4 units). Consumption per capita was estimated to be 304 kWh in 1995. It is planned that electricity production will become less dependent on hydro-electric stations and more so on gas, with the construction of a 600 km pipeline forming part of the proposed West African Gas Pipeline Project.

Oil and Gas. Ghana is pursuing the development of its own gas fields and plans to harness gas at the North and South Tano fields located off the western coast. Estimates put gas reserves at 480bn. cu. feet. Oil reserves are estimated at 129·6m. bbls.

KEY HISTORICAL EVENTS

Greece gained independence from the Ottoman Empire between 1821-29, and by the Protocol of London of 3 Feb. 1830 was declared a kingdom under the protection of Great Britain, France and Russia. Many Greeks were left outside the new state and the cause of the union of all Greeks was championed by Otto I, a Bavarian who was enthroned on 18 Jan. 1833. After his overthrow on 23 Oct. 1862 a Danish prince was elected George I, King of the Hellenes in 1863. The 1844 constitution was replaced by one based on popular sovereignty in 1864. A programme of domestic renewal was launched after 1910, including important land reforms in 1917. In 1864 Great Britain had ceded the Ionian Islands; in 1881 Thessaly and part of Epirus had been taken. Greece's area increased by 70%, the population growing from 2·8m. to 4·8 m. after the Treaty of Bucharest (1913) which recognized Greek sovereignty over Crete.

King Constantine, who succeeded on his father's assassination on 18 March 1913, opted for neutrality in the First World War, while Prime Minister Venezelos favoured the Entente powers. This split or National Schism led to British and French intervention which deposed Constantine on 11 June 1917. When his son Alexander died on 25 Oct. 1920, he returned on 19 Dec. and reigned until 27 Sept. 1922. He was forced to abdicate by a *coup* after defeat by Turkey and the loss of Smyrna. The Treaty of Lausanne (1923) recognized Smyrna as Turkish with Eastern Thrace and the islands of Imvros and Tenedos, all of which had been ceded to Greece by the 1920 Treaty of Sevres.

An exchange of Christian and Moslem populations followed. The presence of over 1m. immigrants brought about social problems, despite an effective peasant settlement in the countryside. The newcomers contributed strongly to the fall of the monarchy in a plebiscite on 13 April 1924. George II was restored after a new plebiscite on 25 Nov. 1935.

The authoritarian Metaxas, premier since 1937, was unable to preserve neutrality after the Italian ultimatum of 28 Oct. 1940. The successful resistance of the Greek army forced the Germans to aid Italy on 6 April 1941. Surrender followed on 20 April and Athens was occupied on 27 April. The harsh occupation lasted until 15 Oct. 1944.

The popular front EAM and its military wing ELAS, both dominated by the communists, took a leading part in resistance to the Germans. The king had moved in April 1941 to Crete, then to Cairo and London. On 30 Dec. 1944 he appointed Archbishop Damaskinos as regent before returning on 28 Sept. 1946 with British backing and the support of a plebiscite. On his death on 1 April 1947 he was succeeded by his brother Paul. A conflict with ELAS developed into a civil war in 1946-47 which made refugees of 10% of the population. Britain handed responsibility to the USA which pledged support against the communists who received only short-lived Yugoslav aid. Peace came after 1949.

The adoption, under US pressure, of a simple majority system rather than proportional representation and the growing industrialization of the economy brought stability, especially after 1955 under the pro-western Konstantinos Karamanlis. The late 1950s saw the emergence of the Left, capitalizing on the movement for union with Cyprus and unease over NATO membership (1952). On 9 Aug. 1954 Greece, Turkey and Yugoslavia signed a 20-year treaty of friendship and mutual aid.

The election of 1963, based on proportional representation, undermined the position of the Right and led to conflict with the new king Constantine, who succeeded his father Paul on 6 March 1964. A military *coup* on 21 April 1967, with fear of communism its stated reason, led to the departure the following year of the

king after an unsuccessful counter-*coup*. The authoritarian rule of the 'Colonels' was headed by George Papadopoulos, prime minister, regent (1972) and president after the republic was declared on 29 July 1973. The régime was overthrown in a bloodless *coup* by Gen. Chizikis on 25 Nov. 1973.

Inflation and the failure to defeat President Makarios of Cyprus or to prevent the Turkish invasion of the island led to the collapse of the military dictatorship on 23 July 1974. Karamanlis was recalled from exile to form a civilian government of national unity. On 17 Nov. 1974 he and his New Democracy Party won a large majority. The monarchy was abolished by a referendum on 8 Dec. 1974.

Hostility to the USA grew, especially as it was believed that America favoured Turkey, with whom conflicts persisted. The 1981 election brought Andreas Papandreou to power and the head of a socialist government. Earlier that year Greece had become the tenth member of the EC. Re-elected in 1985, Papandreou imposed economic austerity to combat inflation and soaring budgets but industrial unrest and evidence of widespread corruption led to his fall and a succession of weak governments. Papandreou returned to power in Oct. 1993 but ill-health forced his resignation two years later. His successor Constantinos Simitis took a more pro-European stance instituting economic reforms to prepare the way for entry into EMU.

TERRITORY AND POPULATION

Greece is bounded in the north by Albania, the Former Yugoslav Republic of Macedonia (FYROM) and Bulgaria, east by Turkey and the Aegean Sea, south by the Mediterranean and west by the Ionian Sea. The total area is 131,957 sq. km (50,949 sq. miles), of which the islands account for 25,042 sq. km (9,669 sq. miles).

The population was 10,259,900 (5,204,492 females) according to the census of March 1991. 1997 estimate: 10,511,000; density, 80 per sq. km.

The UN gives a projected population for 2000 of 10·6m.

An estimated 59·2% of the population lived in urban areas in 1995. There were 166,031 resident foreign nationals in 1991. A further 5m. Greeks are estimated to live abroad.

In 1987 the territory of Greece was administratively reorganized into 13 *regions* comprising in all 51 *departments*. Areas and populations according to the 1991 census:

The largest cities (1991 census populations) are Athens (the capital), 772,072 (total conurbation of Greater Athens, 3,072,922); Thessaloniki, 749,048; Piraeus, 182,671; Patras, 170,452; Peristerion, 137,288; Heraklion, 126,907; Larissa, 112,777; Kallithea, 114,233. Greater Athens, composed of the capital city, the port of Priaeus and a number of suburbs, contains about one third of the Greek population. It also contains about 50% of the country's industry and is the principal commercial, financial and diplomatic centre. Efforts have, however, been made to decentralize the economy. The second city, Salonika (Thessaloniki, with 974,000 inhabitants), with its major port, has grown rapidly in population and industrial development. Other important towns are Patras (300,000 inhabitants), Larissa (271,000 inhabitants), Volos and Iraklion on the island of Crete.

The Monastic Republic of **Mount Athos** (or Agion Oros, i.e. 'Holy Mountain'), the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. The peninsula is administered by a Council of 4 members and an Assembly of 20 members, 1 deputy from each monastery. The Constitution of 1927 gives legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May 1924, and its status is confirmed by the 1952 and 1975 Constitutions. Women are not permitted to enter. Population, 1997, 4,000.

The modern Greek language had 2 contesting literary standard forms, the archaizing *Katharevousa* ('purist'), and a version based on the spoken vernacular, 'Demotic'. In 1976 Standard Modern Greek was adopted as the official language, with Demotic as its core.

INTERNATIONAL RELATIONS

Greece is a member of the UN, EU, WEU, Council of Europe and NATO.

ECONOMY

Policy. Greek economic policy is focused on meeting the convergence criteria for joining the European Monetary Union. The aim is to join EMU by 2001 at the latest. In the late 1990s, Greek growth rates have been among the highest in the EU. Besides a restrictive incomes policy, the government has announced a number of structural reforms, including measures to enhance the flexibility of the labour market, improve the social security system, restructure public sector enterprises and speed up privatization.

Performance. Growth rates have averaged 3% of GDP over the past 5 years. Real GDP growth was 3·2% in 1997 (2·4% in 1996), with a forecast of 2·4% for 1998. GDP in US$ was 116·8bn. (1997, provisional) and 122·9bn. (1996).

Budget. Estimated revenue 1999 (in 1,000m. drachmas): 11,090; expenditure: 13,489.

VAT is 18% (reduced rate, 8%).

Currency. The unit of currency is the *drachma* (GRD), notionally divided into 100 *lepta*. In March 1998 the *drachma* was admitted to the Exchange Rate Mechanism, two years' membership of which is one of the conditions for joining the euro. The admission came along with a 14% devaluation. Inflation was 7·5% in Dec. 1996, 5·1% in Nov. 1997 and 5·0% in 1998. Foreign exchange reserves were US$14,189m. and gold reserves 3·62m. troy oz. in Feb. 1998. Total money supply in Oct. 1997 was 4,588bn. drachmas. The Current account (US$1m.) stood at –5,000 in 1997 (provisional) and –4,539 in 1996. Central government debt as percentage of GDP was 109% (provisional) at Dec. 1997 and 111·8% at Dec. 1996.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1995 was 9·2m. kW. 72% of power is supplied by lignite-fired power stations. A national grid supplies the mainland, and islands near its coast. Power is produced in remoter islands by local generators. Total production in 1995 was 37·55bn. kWh, with consumption per capita in 1995 an estimated 3,466 kWh. Electricity supply is: domestic, 220v, 50 cycles AC; industrial, 280v, AC 3 phase.

Oil and Gas. Output of crude petroleum, 1996, 3m. bbls; proven reserves, 1996, 12m. bbls. The oil sector plays a critical role in the Greek economy, accounting for more than 70% of total energy demand. Supply is mostly imported but oil prospecting is intensifying. Natural gas was introduced in Greece in 1997 through the recently built pipeline from Russia, and an additional source of supply is liquefied natural gas from Algeria. Demand for natural gas is in its infancy. The public monopoly in natural gas, DEPA, has developed only a few sales contracts to some large industrial groups, outside a large contract with DEH.

Minerals. Greece produces a variety of ores and minerals, including (with production, 1995, in tonnes) iron-pyrites (18,737), bauxite (2,200,215), nickel ore (2,069,466), magnesite (565,720), asbestos (4,920,650), chromite (5,650 in 1993), caustic magnesia (206,532), marble (white and coloured) and various other earths. There is little coal, and the lignite is of indifferent quality (56·5m. tonnes, 1995). Salt production (1995) 143,351 tonnes.

Agriculture. Of the total area (131,957 sq. km) 39,435·9 sq. km is arable and fallow. Another 52,101 sq. km is grazing land.

The Greek economy was traditionally based on agriculture, with small-scale farming predominating, except in a few areas in the north. There were 819,000 farms in 1998. However, there has been a steady shift towards industry and although agriculture still employs nearly 19% of the population, it accounts for only 11·6% of GDP. Agriculture accounts for 33·1% of exports (the highest proportion of any EU member country) and 17·9% of imports.

Production (1996, in 1,000 tonnes):

Wheat	2,086	Grapes	917
Rye	33	Wine must	439

INDUSTRY

Manufacturing contributed an estimated 2,219,730m. drachmas to GDP in 1993. The main products are canned vegetables and fruit, fruit juice, beer, wine, alcoholic

beverages, cigarettes, textiles, yarn, leather, shoes, synthetic timber, paper, plastics, rubber products, chemical acids, pigments, pharmaceutical products, cosmetics, soap, disinfectants, fertilizers, glassware, porcelain sanitary items, wire and power coils and household instruments.

Though manufacturing accounts for 21·35% of GDP, Greece's performance is hampered by the proliferation of small, traditional, low-tech firms, often run as family businesses. Food, drink and tobacco processing are the most important sectors, but there are also some steel mills and several shipyards. Shipping is of prime importance to the economy. In addition, there are major programmes under way in the fields of power, irrigation and land reclamation.

Automatic index-linking of wages was abolished at the end of 1990. Wage increases of 6·8% and 5·2% were made in the public sector in 1995 and 1996. In the private sector trade unions agreed to an 8% increase in 1995, 7·6% in 1996 and 7·5% in 1997. Since 1989 a statutory minimum of wage-bills must be spent on training (0·45%). Retirement age is 65 years for men and 60 for women. Unemployment was 10·3% in 1997.

The national body of trade unions is the Greek General Confederation of Labour.

KEY HISTORICAL EVENTS

The Mayan civilisation flourished in the area now known as Guatemala from 2500 BC until 1000 AD. Their descendants were subjugated by the conquistadors from 1523. From 1524 until 1821 Guatemala was part of a Spanish captaincy-general, comprising the whole of Central America. It became independent in 1821 and formed part of the Confederation of Central America from 1823 to 1839 when Rafael Carrera dissolved the Confederation. Since then it has had a turbulent political history with periods of presidential dictatorship, democracy and military dictatorship. Boundary disputes with El Salvador, Honduras and Belize (formerly British Honduras) have caused intermittent fighting.

The economic crisis of the 1930s brought the right-wing dictator Jorge Ubico to power. His overthrow by a revolution in 1944 opened a decade of rising left-wing activity which alarmed the USA. In 1954 the leftist régime of Jacob Arbenz Guzmán was overthrown by a CIA-supported *coup*. A series of right-wing governments failed to produce stability while the toll on human life and the violation of human rights was such as to cause thousands of refugees to flee to Mexico. Over 50,000 people were killed in the 1970s.

On 23 March 1982, ignoring a presidential election of the same month, a junta consisting of Brig.-Gen. Efrain Rios Montt and other army officers took part in a bloodless *coup*. Gen. Rios Montt later became president. A further *coup* on 8 Aug. 1983 removed Montt from the presidency. Maj.-Gen. Oscar Humberto Meijia Victores became head of state. Elections to a National Constituent Assembly were held on 1 July 1984, and a new constitution was promulgated in May 1985. Amidst violence and assassinations, the presidential election was won by Marco Vinicio Cerezo Arévalo. On 14 Jan. 1986 Cerezo's civilian government was installed—the first for 16 years and only the second since 1954. Violence continued, however, and there were frequent reports of torture and killings by right-wing 'death squads' and various attempts to murder the government. Relations with the USA deteriorated and military and economic aid was suspended. By May 1993 President Serranto had imposed martial law, but was then forced into exile. There was a gradual return to constitutional rule and the first genuine efforts to investigate past violations of human rights.

The presidential and legislative elections of Nov. 1995 saw the return of the left-wing to open politics for the first time in over 40 years. Meanwhile the Guatemalan Revolutionary Unit (URNG) declared a ceasefire. On 6 May and 19 Sept. 1996 the government signed agreements with the URNG which envisaged reforms to military, internal security, judicial and agrarian institutions. A ceasefire was concluded in Oslo on 4 Dec. 1996 and a final peace treaty was signed on 29 Dec. 1996 in Guatemala. This final treaty consolidates earlier agreements to reform the electoral system and the economy, especially agriculture, and to guarantee human rights.

The Guatemalan Forensic Anthropology Foundation has been chronicling 36 years of atrocities which took place during the civil war in which it is estimated that 100,000 people were killed and 40,000 more disappeared. In 1998, for the first time interviews were being held with war survivors who were willing to describe the murders and disappearances they witnessed. The war had ended with the signing of the peace agreements in 1996.

KEY HISTORICAL EVENTS

Present-day Guinea was historically a subordinate part of the broader Ghanaian empire in the 10th and 11th centuries and the Malinke empire (Mali-based) until the 16th century. A powerful feudal state of Guinea's Fulani people in the early 18th century resisted intrusions by both the French and the Moslem states to the north-east.

In 1888 Guinea became a French protectorate, in 1893 a colony and in 1904, a constituent territory of French West Africa. Forced labour and other colonial depredations ensued, although a form of representation was introduced in 1946. The independent Republic of Guinea was proclaimed on 2 Oct. 1958, after the territory of French Guinea had decided at the referendum of 28 Sept. to leave the French community rather than being self-governing within it. Ahmed Sékou Touré became the first president of the new republic. Guinea became a single-party state. Ties with France were broken in 1965 and only restored in 1976. For a time Guinea was isolated but in 1975 it joined its African neighbours in the Economic Community of West African States. Touré's strong measures to maintain his rule provoked riots in 1977. In 1977 and 1978, when a more liberal government policy was pursued, Touré spoke of his desire to co-operate with the West.

In 1980 Touré was elected for the fourth time for a 7-year term as president but died in 1984 when the armed forces staged a *coup* and dissolved the National Assembly and the *Parti démocratique de Guinée*. A Military Committee of National Rectification (CMRN) held power until Jan. 1991 when a Transitional Committee for National Rectification (CTRN) took over. Following popular disturbances a multi-party system was introduced in April 1992.

KEY HISTORICAL EVENTS

The area began to be settled with the break up of the ancient Ghanaian and Mali empires. The Portuguese explorer Nuno Tristão visited the coast in 1446. Portugal remained the major influence in the area and in the 19th century established its rule on the coast; however, Portuguese rule was not extended into the interior until later and met African resistance well into the 20th century. Portuguese Guinea came under Cape Verde until 1879 when it became a separate colony. Portuguese Guinea became an Overseas Territory in 1951.

Amilcar Cabral, one of the many Cape Verdians working in government service in Portuguese Guinea, joined other nationalists in 1956 to form the *Partido Africano da Independência da Guiné e Cabo Verde* (PAIGC). From 1963 this party waged a successful guerrilla war against Portuguese rule in Guinea, Guineans and Cape Verdians working together and by 1973 evicting the Portuguese from much of the interior where the PAIGC set up its own administration. On 20 Jan. 1973 Cabral was murdered but elections to a national assembly had already been held in liberated areas and on 23-24 Sept. 1973 the assembly proclaimed the independence of Guinea-Bissau. A Council of State was chosen with Luis Cabral, brother of Amilcar, as chairman.

In 1974, after the Portuguese revolution, Portugal abandoned the struggle to keep Guinea-Bissau and independence was formally recognized on 10 Sept. 1974. In 1975 Cape Verde also became independent under the rule of the PAIGC but the secretary-general of the party, President Pereira of Cape Verde, did not have authority over Guinea-Bissau and the two countries remained separate sovereign states.

On 14 Nov. 1980 Luis Cabral was overthrown in a *coup d'état* in part inspired by resentment in Guinea-Bissau over the privileges enjoyed by Cape Verdians and Guineans obtained a more prominent role under the new government of Major João Bernardo Vieira, previously prime minister.

On 16 May 1984 a new constitution was approved which retained Marxist principles but in Nov. 1986 the PAIGC Congress agreed a return to private enterprise in an attempt to solve critical economic problems and to lift the country out of poverty.

Co-operative Republic of Guyana

Capital: Georgetown
Population estimate, 2000: 874,000
GNP per capita: (PPP$) 2,280
HDI/world rank: 0·670/100

KEY HISTORICAL EVENTS

First settled by the Dutch West Indian Company about 1620, the territory was captured by Britain to whom it was ceded in 1814 and named British Guiana. To work the sugar plantations African slaves were transported here in the 18th century and East Indian and Chinese indentured labourers in the 19th century. From 1950 the anti-colonial struggle was spearheaded by the Peoples Progressive Party (PPP) led by Cheddi Jagan and Forbes Burnham, but after its election with a left-wing programme in the elections of 1953 the British government suspended the constitution. By the time internal autonomy was granted in 1961 Burnham had split with Jagan to form the more moderate People's National Congress (PNC). After much conflict, instigated by Britain and the USA who tried to destabilise Jagan's PPP government of 1961–64, Guyana became an independent member of the Commonwealth in 1966 with Burnham as the first prime minister.

On 3 Feb. 1970 Guyana became the world's first Co-operative Republic, with Arthur Chung as its first non-executive president. In Oct. 1980 the prime minister, Forbes Burnham, declared himself the executive-president. Two months later his party, the PNC, won a large majority of votes at a rigged election for the National Assembly: Burnham was then declared duly elected as president. When he died in Aug. 1985 his prime minister, Desmond Hoyte, succeeded as president. Like his predecessor, Hoyte was declared duly elected when the PNC gained a large majority at another rigged election for the National Assembly in Dec. 1985; but desperate economic straits forced Guyana to seek outside help which came on condition of restoring free elections. Dr Jagan returned to power in 1992. Following his death in March 1997 his wife, Janet Jagan, was sworn in as President on 24 Dec. 1997.

TERRITORY AND POPULATION

Guyana is situated on the north-east coast of Latin America on the Atlantic Ocean, with Suriname on the east, Venezuela on the west and Brazil on the south and west. Area, 83,000 sq. miles (214,969 sq. km). Estimated population (1997), 847,000.

The UN gives a projected population for 2000 of 874,000.

Ethnic groups by origin: 49% Indian, 36% African, 7% mixed race, 7% Amerindian and 1% others. The capital is Georgetown; other towns are New Amsterdam, Linden, Rose Hall and Corriverton.

Venezuela demanded the return of the Essequibo region in 1963. It was finally agreed in March 1983 that the UN Secretary-General should mediate. There was also an unresolved claim (1984) by Suriname for the return of an area between the New river and the Corentyne river.

KEY HISTORICAL EVENTS

The island of Hispaniola was discovered by Christopher Columbus in 1492. Haiti occupies the western third. The Spanish colony was ceded to France in 1697. After the extirpation of the Indians by the Spaniards (by 1533) large numbers of African slaves were imported whose descendants now populate the country. The slaves obtained their liberation following the French Revolution but Napoleon restored French authority and imprisoned Toussaint Louverture, the leader of the slaves who had been appointed a French general and governor. Subsequently the French surrendered to a blockading British squadron.

The country declared its independence on 1 Jan. 1804, and Gen. Jean-Jacques Dessalines proclaimed himself Emperor of the newly-named Haiti. After the assassination of Dessalines (1806) a separate régime was set up in the north under Gen. Henri Christophe who in 1811 had himself proclaimed King. In the south and west a republic was constituted, with Alexander Pétion as its first President. Pétion died in 1818 and was succeeded by Jean-Pierre Boyer, under whom the country became re-united after Henri Christophe had committed suicide in 1820. From 1822 to 1844 Haiti and the eastern part of the island (later the Dominican Republic) were united under Haitian rule. After one more monarchical interlude, under the Emperor Faustin (1847–59), Haiti has been a republic. From 1915 to 1934 Haiti was under United States occupation.

Dr François Duvalier was elected President on 22 Sept. 1957 and became president for life in 1964. He died on 21 April 1981 and was succeeded as president for life by his son, Jean-Claude Duvalier who fled the country on 7 Feb. 1986. Gen. Henry Namphy formed a Council of Government. In Jan. 1988 Leslie Manigat was elected president but Namphy again seized power in June 1988. In Sept. 1988 he was deposed and replaced by the military government of Lieut.-Gen. Prosper Avril. In March 1990 Ertha Pascal-Trouillot became head of an interim government. Father Jean-Bertrand Aristide was elected president in Dec. 1990.

On 30 Sept. 1991 President Aristide was deposed by a military junta and went into exile. Under international pressure, parliament again recognized Aristide as president in June 1993. After 2 agreements brokered by the UN and the Organization of American States a new government was formed in Aug. President Aristide was scheduled to return on 30 Oct. However, the military régime prevented UN forces from landing on 11 Oct., and on 13 Oct. the UN Security Council voted to apply new sanctions if the agreements were not adhered to. On 14 Oct. the Minister of Justice was assassinated and the USA and other UN members mounted a naval blockade.

The UN/OAS, Civil Mission (MICIVIH) was expelled by the junta on 11 July 1994. Despite a full embargo under UN Resolution 917, the junta showed no sign of stepping down. Former US President Carter flew to Haiti on 17 Sept. to negotiate their removal. 20,000 US troops moved into Haiti on 19 Sept. in an uncontested occupation. President Aristide returned to office on 15 Oct. 1994 and on 1 April 1995 a UN peacekeeping force (MANUH) took over from the US military mission. All UN contingents were scheduled to leave by 30 Nov. 1996, but a UN Security Council resolution provided for an extension. Aristide was succeeded by René Préval who was generally assumed to be a stand-in for his predecessor. Violence and poverty prevail. An estimated 7% of cocaine sold in the USA passes through Haiti.

KEY HISTORICAL EVENTS

In pre-Columbian times the area which is now Honduras was part of the Mayan empire. Discovered by Columbus in 1502, Honduras was ruled by Spain as part of the Captain-Generalcy of Guatemala. In 1821 Honduras gained its independence from Spain and from 1823 was part of the Central American Federation. On 5 Nov. 1838 the country declared itself an independent sovereign state, free from the Federation. Political instability became the rule, punctuated by a period of more serious administration from 1876 to 1891. The instability, with one period of US military occupation, continued until 1933. From 1933 to 1949 Gen. Tiburcio Carias Andino ruled as a dictator. There followed a disturbed period of presidential elections, depositions and military juntas. Dr Ramón Ernesto Cruz Velés was elected president in 1971 but a coup in 1972 led to his being superseded by Gen. López Arellano who ruled by decree until 1975 when he too was ousted by army officers in favour of Col. Melgar Castro. In 1978 a military junta took control, with the commander of the army, Gen. Policarpo Paz Garcia, nominated as head of state.

The end of military rule seemed to come in 1981 when a general election gave victory to the more liberal and non-military party, PLH (Partido Liberal de Honduras). The party's leader, Dr Roberto Svazo Cordova, became president. Considerable power, however, remained with the armed forces, led by their commander-in-chief, Gen. Gustavo Alvarez. While fighting the left-wing guerrillas, the military was also held to be responsible for the disappearance of political opponents.

In 1984 junior army officers forced Gen. Alvarez and other senior officers into exile and Gen. Walter López Reyes took over as commander-in-chief. There followed a period of less friendly relations with the USA and increasingly poor relations with Nicaragua, since the anti Sandinista (contra) rebels maintained bases in Honduras. Internal unrest continued into the 1990s with politicians and military leaders at loggerheads, particularly over attempts to investigate violations of human rights.

In Oct. 1998 much of Central America was devastated by Hurricane Mitch, the worst natural disaster to hit the area in modern times. Honduras and Nicaragua were paralysed by floods and mudslides. In Honduras 7,000 deaths were estimated with twice as many missing. 1m. of the city's inhabitants were left homeless and the country's agriculture was crippled with around a quarter of the coffee plantations destroyed.

KEY HISTORICAL EVENTS

The Hungarians call themselves "Magyars"; "Hungarian" derives from the Turkic name ("On ogur", i.e. ten arrows) of the tribal federation on the Don which Árpád and his horde left in order to settle the sparsely inhabited middle Danubian basin in 896. The horde spread terror by its forays but was pacified by defeat at the hands of the Germans at Augsburg in 955. In 1000 Stephen adopted Roman Catholicism and received a crown from the Pope. Stephen replaced the tribal structure with a system of counties administered by royal officials. As nomadism gave way to agriculture a feudal society developed led by nobility descended from the original conquerors.

In 1301 Árpád's line died out. Henceforth, with two exceptions, the throne was held by foreigners, sometimes holding other thrones simultaneously. The Angevin king, Lájos the Great (1342-82), was also king of Poland; under him Hungary attained a golden age of prosperity, civilization and international significance.

In the 15th century the expansionist Ottoman empire reached the southern borders of Hungary. This first incursion was repelled by János Hunyádi. His son Matthias Corvinus, elected king in 1458, ruled as an enlightened renaissance despot. In 1526 the Turks again advanced on the Hungarians who were defeated at the battle of Mohács and their king killed. Southern and central Hungary were annexed and turned into a desert. The western rump came under Hapsburg rule which was extended to most of Hungary with the expulsion of the Turks in 1699. A national rising in 1703 under Ferenc Rákoczi forced the crown to come to terms: Emperor Charles IV restored the constitution and the Hungarian assembly recognized the Emperor's claim to the Hungarian throne. The Hapsburgs imposed a centralizing Germanizing régime upon Hungary economically stagnating under protective tariffs designed to restrict industrialization to Austria. Nationalist sentiments led to the radical democracy of Lájos Kossuth who set up a breakaway government in Debrecen in 1848-49. Ruthless repression followed but Austria's military defeats in Italy (1859) and against Prussia (1866) forced the emperor to moderate his absolutism. Under the Compromise (*Ausgleich*) of 1867 a Dual Monarchy was constituted; Hungary gained internal autonomy while foreign affairs and defence became joint Austro-Hungarian responsibilities.

Hungary entered the First World War on Austria's side but as hostilities drew to a close the ideas of Mihaly Károlyi, who stood for peace and independence, grew in popularity. After the armistice of 3 Nov. 1918 a National Council under his chairmanship proclaimed an independent republic. Political and social unrest, however, were compounded by a Romanian invasion. On 21 March 1919 Károlyi was replaced by Béla Kun's Soviet republic and a reign of red terror which antagonized most of the population. Kun fled on 4 Aug. A counter-revolutionary government annulled all his and Károlyi's legislation and appointed Admiral Horthy as regent. Hungary was drastically reduced in size by the Peace Treaty.

The 1920s under the premiership of István Bethlen were a period of consolidation but Bethlen was forced to resign by the collapse of wheat prices in the world depression. Hungary's desire to revise the Versailles peace settlements brought her into alignment with Germany in the 1930s, and this was reinforced by her growing economic dependence on Germany. In 1940 Hungary adhered to the Tripartite pact and in June 1941 sent a force to join the German invaders of the Soviet Union. But pro-German sentiment was never wholehearted until Hitler occupied the country in March 1944. In Oct. Horthy was forced to abdicate in favour of a fascist "Arrow Cross" government but by then Soviet forces were well inside the frontiers.

The four democratic parties permitted by the Soviets formed a provisional government at Debrecen in Dec. 1944 which declared war on Germany and signed

an armistice with the Allies. At the elections of Nov. 1945 the Communists polled only 17% of the vote; their way to power was to lie in their leader Rákosi's "salami tactics" of divide and purge, backed up by their acquisition of key ministries under Soviet pressure. In Feb. 1949 Catholic opposition was weakened by the arrest of cardinal Mindszenty, and all political parties were united in a People's Front whose single list of candidates gained 96% of the vote at the May 1949 elections. A Soviet-type constitution was adopted in Aug. Rákosi carried out a drastic purge of "Titoists" and embarked on a programme of such ruthless collectivization and top-heavy industrialization that the post-Stalin Soviet leadership removed him from the premiership. As party leader, however, he intrigued against his successor Imre Nagy's more liberal "new course" and took his place again in April 1955. Rákosi resigned the party leadership in July 1956 but popular discontent continued. On 23 Oct. the attempted suppression of a student demonstration sparked off a 13-day revolution. Nagy became prime minister and János Kádár party leader. Nagy declared Hungary's neutrality and withdrawal from the Warsaw pact. After some hesitation the Soviet army crushed the revolt on 4 Nov. and installed Kádár in power. Nagy was arrested and later executed; the gains of the uprising were harshly suppressed. Cautious economic reforms were introduced in the mid-60s when liberalization brought higher living standards.

A gathering reformist tendency within the Hungarian Socialist Workers' (i.e. Communist) Party led by Imre Pozsgay culminated in its self-dissolution in Oct. 1989 and reconstitution as the Hungarian Socialist Party. The People's Republic was abolished on 23 Oct. 1989.

Nagy was reburied with state honours on 16 Aug. 1989. The following year a multi-party democracy came into being.

The head of state is the *President*, who is elected for 5-year terms by the National Assembly.

The single-chamber *National Assembly* has 386 members, made up of 176 individual constituency winners, 152 allotted by proportional representation from county party lists and 58 from a national list. It is elected for 4-year terms. A *Constitutional Court* was established in Jan. 1990 to review laws under consideration.

As a result of the minorities elections, national minorities formed 1,135 self-governing bodies at 930 settlements. All of Hungary's recognized minorities set up self-governments: Gypsies 673, Germans 211, Slovaks 57, Croats 56, Serbs 29, Poles 25, Romanians 24, Armenians 16, Greeks 13, Bulgarians 12, Ruthenes 7, and Slovenes and Ukrainians 6 each.

DEFENCE

The President of the Republic is C.-in-C. of the armed forces.

Men between the ages of 18 and 23 are liable for 9 months' conscription.

Defence expenditure in 1997 totalled US$666m., compared to US$3,380m. in 1985. Per capita spending in 1997 was US$66, down from US$317 in 1985. The 1997 expenditure represented 1·4% of GDP, compared to 7·2% in 1985.

Army. Hungary is divided into 4 army districts: Budapest, Debrecen, Kiskunfélegyháza and Pécs. The strength of the Army was (1997) 31,600 (including 19,000 conscripts). It is organized in 3 tank, 7 mechanized, 3 artillery, 1 engineer, 1 air defence artillery, 1 (Budapest) rivercraft and 1 anti-tank brigade, and 1 multiple rocket launcher, 2 anti-tank, 4 engineer and 2 air defence artillery regiments.

There are also 730 border guards.

Navy. The Danube Flotilla, the maritime wing of the Army, consisted of some 300 personnel in 1996, operating 6 river minesweepers and numerous boats and special-purpose vessels.

Air Force. The Air Force is under the control of the Army General Staff, with a strength (1996) of 17,500 (11,200 conscripts). The combat aircraft strength comprises 1 regiment of MiG-21 and MiG-23 fighters, 1 of MiG-29 interceptors and 1 of MiG-21 and Su-22 fighter-bombers and a regiment of Mi-8 and Mi-24 armed helicopters. Transport units are equipped with An-26 and L-410 aircraft. Other types in service include Mi-8/17 helicopters and L-39 Albatros and Yak-52 trainers.

In addition, 'Guideline' and 'Goa' surface-to-air missiles are operational.

INTERNATIONAL RELATIONS

Hungary is a member of the UN, Council of Europe, OECD, the Central European Initiative, NATO, and is an Associate Member of the EU and an Associate Partner of the WEU. In April 1994 Hungary applied to join the EU and is expected to become a member by 2002. Hungary became a member of NATO on 12 March 1999.

Hungary has had a long-standing dispute with Slovakia over the Gabčíkovo-Nagymaros Project, involving the building of dam structures in both countries for the production of electric power, flood control and improvement of navigation on the Danube as agreed in a treaty signed in 1977 between Hungary and Czechoslovakia. The International Court of Justice delivered judgment on the case

in Sept. 1997. Since the election of the new Slovak government in 1998 relations are improving and discussions under way.

ECONOMY

Policy. Privatization based on free market principles has been at the centre of economic policy since 1990. In 1995 the State Property Agency and the State Holding Company were merged in a new body charged with extending the private sector's share of former state assets to 80%. Legislation of June 1991 provides for compensating former owners or their descendants for property nationalized after May 1939. A Small Shareholder Programme of Privatization was launched in April 1994. Growing debt and balance of payments gap forced a Stabilization Programme.

The OECD reported in 1998 that 'the extensive macroeconomic package introduced in 1995 (which included the adoption of a crawling-peg exchange rate regime, an impressive programme of privatisation and a substantial fiscal tightening), as well as the deepening of structural reforms implemented earlier, created the conditions for the remarkable progress of the Hungarian economy over the past 2 years'.

Performance. Real GDP growth was 1·3% in 1996, and 4·6% in 1997. For the first 6 months of 1998 growth was measured at 4·8%. Total gross external debt was US$23·7bn. in 1997.

Budget. The budget for calendar years was as follows (in 1m. forints):

	1996	*1997*
Revenue	2,074,068	2,364,580
Expenditure	2,206,507	2,703,051

Currency. A decree of 26 July 1946 instituted a new monetary unit, the *forint* (HUF) of 100 *fillér*. The forint was made fully convertible in Jan. 1991. In 1996–97 the forint was devalued at a crawling peg exchange rate of 1·2% a month. Inflation was 19·8% in 1996, 18·2% in 1997 and forecast to be 16·0% in 1998 (down from 31% in June 1995). In Feb. 1998 foreign exchange reserves were US$8,601m. and gold reserves were 100,000 troy oz. Total money supply in Sept. 1996 was 1,092bn. forints.

Banking and Finance. In 1987 a two-tier system was established. The National Bank (*Director,* György Surányi) remained the central state financial institution, responsible for the circulation of money and foreign currency exchange, but also became a central clearing bank, with general (but not operational) control over commercial banks and development banks. There are over 40 commercial banks and 20 insurance companies based in Budapest. A law of June 1991 sets capital and reserve requirements, and provides for foreign investment in Hungarian banks. Permission is needed for investments of more than 10%. Privatization of the banking system is well under way.

The Hungarian International Trade Bank opened in London in 1973. In 1980 the Central European International Bank was set up in Budapest with 7 Western banks holding 66% of the shares. The National Savings Bank handles local government as well as personal accounts. Total savings deposits in 1994, 951,900m. forints.

A stock exchange was opened in Budapest in Jan. 1989.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1994 was 6·98m. kW, about a quarter of which is nuclear. There is an 880-mW nuclear power station at Paks which produced 41% of total output in 1995. 34,037m. kWh were produced in 1995 (14,026m. kWh by nuclear power), and 3,210m. kWh imported. Consumption per capita in 1995 was estimated at 3,200 kWh.

Oil and Gas. Oil and natural gas are found in the Szeged basin and Zala county. Production in 1995: Oil, 1,669,000 tonnes; gas, 5,365m. cu. metres.

Minerals. Production in 1995 (in 1,000 tonnes): Lignite, 7,153; brown coal, 6,458; hard coal (1994), 940; bauxite, 1,015.

Agriculture. Agriculture contributed 7% of GDP in 1996. Agricultural land was collectivized in 1950. It was announced in 1990 that land would be restored to its pre-collectivization owners if they wished to cultivate it. A law of April 1994 restricts the area of land that may be bought by individuals to 300 ha, and prohibits the sale of arable land and land in conservation zones to companies and foreign nationals. Today, although 90% of all cultivated land is in private hands, most farms are little more than smallholdings. Under the 1999 budget, funding for agriculture increased by 40%, with subsidies favouring small family farms. In 1998, agricultural exports totalled $3bn. (an increase of 10% on 1997), including grain exports of more than 4m. tonnes. 20,000 tonnes of sour cherry and 17,000 tonnes of plums were exported in 1998.

In 1996 the agricultural area was (in 1,000 ha) 6,179, of which 4,716 were arable, 1,148 meadows and pastures, 90 market gardens, and 225 orchards and vineyards.

Corn production dropped from 8·6m. tonnes in 1989 to below 6m. tonnes between 1994 and 1996. The annual maize yield has declined from 7m. tonnes to 3·5–4m. tonnes, potatoes from 0·9 to 0·6m. tonnes, and fruit from 1·6 to 1·3m. tonnes.

Livestock has drastically decreased since 1989 from 8·8m. pigs to 5m., from 1·8m. cattle to 1m., and from 1·9m. sheep to 1·5m. Thus the pig stock has declined to the 1938 level, the cattle stock to the 1945 level and the sheep stock to a level of the early 1930s.

The north shore of Lake Balaton and the Tokaj area are important wine-producing districts. Wine production in 1995 was 329m. litres.

Forestry. The forest area in 1995 was 1,719,000 ha, or 18·6% of the land area (up from 1,675,000 ha and 18·1% in 1990). Timber production in 1995 was 4·41m. cu. metres.

Fisheries. There are fisheries in the rivers Danube and Tisza and Lake Balaton. In 1993 there were 27,100 ha of commercial fishponds. In 1995 total catches were 22,866 tonnes, exclusively freshwater fish.

INDUSTRY

In 1995 there were 18,921 limited liability companies, 1,475 co-operative societies and 81,433 individual businesses.

Output growth in 1996 saw highly variable trends among the individual sectors of the manufacturing industry. The most dynamic sector continues to be the engineering industry. Its performance was driven by the 35·6% increase in exports. The manufacturing of non-ferrous mineral products went up by 1·2% (exports rose by 11·1%). With the exception of the engineering industry and manufacturing of non-ferrous mineral products the output of each sector of manufacturing industry declined: the textile and clothing industry by 4·2% and chemical industry by 0·6%. Within this, the domestic sales of the textile and clothing industry dropped by 8·5% and that of the chemical industry by 6·7%, while the exports of both sectors rose (by 3·7% and 35·6%, respectively).

Labour. In 1995 the workforce (in 1,000) was 6,251·4, of whom 6,082 (2,918·5 females) were of working age. The economically active population was 4,564·8 (2,181·4 females) of whom 3,636·4 were active earners. Persons employed, 4,045·2. Employed persons by sector, 1995 (in 1,000, women in parentheses): Mining, manufacturing, electricity, 1,029·4 (453); building, 190·5 (37·8); agriculture and forestry, 348·2 (108·4); transport and telecommunications, 333·2 (113·6); commerce, 550·8 (280); personal and business services, 394·4 (185·3); health, social and cultural services, 810·1 (593·7); public administration, 285 (131·7). Average monthly wages in 1995: 38,900 forints. Minimum monthly wage, 1996, 14,500 forints. The 10·9% unemployment rate in 1995 had dropped to 10·6% by the end of 1996; it was estimated to be 9·9% in 1997 and 9·6% in 1998. In 1996 wage costs remained within originally set limits, resulting in a decrease of 5% in real wages. However, real wages increased 5% in the first half of 1997. Retirement age: Men, 60; women, 55.

Trade Unions. The former official Communist organization (National Council of Trade Unions), renamed the Confederation of Hungarian Trade Unions (MSZOSZ), groups 70 organizations and claimed 1m. members in 1993. A law of 1991 abolished its obligatory levy on pay packets; its assets derived from this period are to be

distributed to other unions. Other unions are grouped in 6 federations (with 1993 membership): the Association of Autonomous Trade Unions (ASZOK, 0·3m.); Coalition of Christian Trade Unions (KESZOSZ, 0·15m.); Co-operation Forum of Trade Unions (SZEF, 0·5m.); Council of Intellectual Trade Unions (ÉSZT, 0·1m.); League of Independent Trade Unions (Liga, 0·25m.); Works Councils (60,000).

Social security benefits are administered jointly by elected representatives of trade unions and employers' organizations.

There are 111 local courts, 20 labour law courts, 20 county courts, 6 district courts and a Supreme Court. Criminal proceedings are dealt with by the regional courts through 3-member councils and by the county courts and the Supreme Court in 5-member councils. A new Civil Code was adopted in 1978 and a new Criminal Code in 1979.

Regional courts act as courts of first instance; county courts as either courts of first instance or of appeal. The Supreme Court acts normally as an appeal court, but may act as a court of first instance in cases submitted to it by the Public Prosecutor. All courts, when acting as courts of first instance, consist of 1 professional judge and 2 lay assessors, and, as courts of appeal, of 3 professional judges. Local government Executive Committees may try petty offences.

KEY HISTORICAL EVENTS

The first settlers came to Iceland in 874. Between 930 and 1262 Iceland was an independent republic, but by the 'Old Treaty' of 1262 the country recognized the rule of the King of Norway. In 1380 Iceland, together with Norway, came under the rule of the Danish kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. The invention of motorized fishing boats in the late nineteenth century revolutionized the fishing industry and gave impetus to the campaign for self determination. After 1 Dec. 1918 it was acknowledged as a sovereign state. It was united with Denmark only through the common sovereign until it was proclaimed an independent republic on 17 June 1944 following a referendum favouring severance from the Danish crown.

CONSTITUTION AND GOVERNMENT

The President is elected by direct, popular vote for a period of 4 years. Presidential elections were held on 29 June 1996. The electorate was 195,000. Ólafur Ragnar Grímsson (b. 1943) was elected against 3 opponents and sworn in 1 Aug 1996.

An electoral law of 1984 provides for an *Alþingi* (parliament) of 63 members. Of these, 54 seats are distributed among the 8 constituencies as follows: 14 seats are allotted to Reykjavík, 8 to Reykjanes (i.e. the South-west excluding Reykjavík) and 5 or 6 to each of the remaining 6. From the 9 seats then left, 8 are divided beforehand among the constituencies according to the number of registered voters in the preceding elections. Finally, one seat is given to a constituency after the elections, to compensate the party with the fewest seats as compared to its number of votes.

National Anthem. 'Guð vors lands' ('Oh God of Our Country'); words by M. Jochumsson, tune by S. Sveinbjörnsson.

The commune councils are elected by universal suffrage, in towns and other urban communes by proportional representation, in rural communes by simple majority. For general co-operation the communes are free to form district councils. All the communes except 10 towns are members in 20 district councils. The communes appoint one or more representatives to the district councils according to their population size. The commune councils are supervised by the Ministry of Social Affairs. In 1992 the government administration and the jurisdictional system at local level were fundamentally reformed, so that the jurisdictional power was totally separated from the executive power, resulting in a new division of responsibilities and functions between the magistrates and the district courts. For national government there are 27 divisions exercised by the magistrates.

Municipal elections were held on 31 May 1998.

COMMUNICATIONS

Roads. On 31 Dec. 1997 the length of the public roads (including roads in towns) was 12,691 km. Of these 8,180 km were national main roads and 4,511 km were provincial roads. Total length of surfaced roads was 3,305 km. A ring road of 1,400 km runs just inland from much of the coast; about 80% of it is smooth-surfaced. Motor vehicles registered at the end of 1997 numbered 149,979, of which 133,951 were passenger cars and 16,208 trucks; there were also 1,457 motor cycles. There were 14 fatal road accidents in 1997 with 15 persons killed.

Civil Aviation. Icelandair is the national carrier. In 1998 it served 12 destinations in western Europe and 6 in north America as well as operating domestic services. In 1996 it carried 958,786 passengers on scheduled foreign flights and 280,922 on domestic routes. The main international airport is at Keflavík (Leifsstöd), with Reykjavík for flights to the Faroe Islands, Greenland and domestic services. Services were also provided in 1998 by Atlantic Airways (Faroe Islands), Islandsflug, Greenlandair and SAS. Keflavík handled 747,692 passengers in 1996 and 21,262 tonnes of freight.

Shipping. Total registered vessels, 977 (244,812 gross tonnage) on 31 Dec. 1997; of these, 796 were sea-going fishing vessels.

Telecommunications. At the end of 1997 the number of telephone and telegraph offices was 127; number of telephone subscribers, 162,310 (596 per 1,000 persons); mobile cellular telephone subscribers, 65,746. In 1995 there were 80,000 fax machines and 55,000 PCs (206 per 1,000 persons). There were 122,000 Internet users in Feb. 1998, or around 44% of the total population.

Postal Services. At the end of 1997 the number of post offices was 87.

SOCIAL INSTITUTIONS

Justice. In 1992 jurisdiction in civil and criminal cases was transferred from the provincial magistrates to 8 new district courts, separating the judiciary from the prosecution. From the district courts there is an appeal to the Supreme Court in Reykjavík, which has 8 judges.

Religion. The national church, the Evangelical Lutheran, is endowed by the state. There is complete religious liberty. The affairs of the national church are under the superintendence of a bishop. At 1 Dec. 1997, 244,684 (89·9%) of the population were members of it (93·2% in 1980). 9,700 persons (3·6%) belonged to Lutheran free churches. 12,098 persons (4·5%) belonged to other religious organizations and 5,582 persons (2·1%) did not belong to any religious community.

Education. Primary education is compulsory and free from 6–15 years of age. Optional secondary education from 16 to 19 is also free. In 1997–98 there were about 42,300 pupils in primary schools, 18,200 in secondary schools and 8,200 tertiary-level students in Iceland. Some 25% of tertiary-level students study abroad.

There are 2 universities, Reykjavík (founded 1911) and Akureyri (1987). Total enrolment was 6,100 students in 1997–98. In Reykjavík there are a teachers' training and a technical college, and various other specialized institutions.

In 1996 public sector spending on education was 5·3% of GNP.

Health. On 31 Dec. 1994 there were 57 hospitals with 3,924 beds, 797 doctors, 273 dentists, 1,952 nurses, and 176 pharmacists.

Welfare. The main body of social welfare legislation is consolidated in 6 acts:

(i) The social security legislation (a) health insurance, including sickness benefits; *(b)* social security pensions, mainly consisting of old age pension, disablement pension and widows' pension, and also children's pension; *(c)* employment injuries insurance.

(ii) The unemployment insurance legislation, where daily allowances are paid to those who have met certain conditions.

(iii) The subsistence legislation. This is controlled by municipal government, and social assistance is granted under special circumstances, when payments from other sources are not sufficient.

(iv) The tax legislation. Prior to 1988 children's support was included in the tax legislation, according to which a certain amount for each child in a family was

subtracted from income taxes or paid out to the family. Since 1988 family allowances are paid directly to all children age 0-15 years. The amount is increased with the second child in the family, and children under the age of 7 get additional benefits. Single parents receive additional allowances. The amounts are linked to income.

(v) The rehabilitation legislation.

(vi) Child and juvenile guidance.

Health insurance covers the entire population. Citizenship is not demanded and there is a 6 month waiting period. Most hospitals are both municipally and state run, a few solely state run and all offer free medical help. Medical treatment out of hospitals is partly paid by the patient; the same applies to medicines, except medicines of lifelong necessary use, which are paid in full by the health insurance. Dental care is partly paid by the state for children under 17 years old and also for old age and disabled pensioners. Sickness benefits are paid to those who lose income because of periodical illness. The daily amount is fixed and paid from the 11th day of illness.

The *pension system* is composed of the public social security system and some 90 private pension funds. The social security system pays basic old age and disablement pensions of a fixed amount regardless of past or present income, as well as supplementary pensions to individuals with low present income. The pensions are index-linked, i.e. are changed in line with changes in wage and salary rates in the labour market. The private pension funds pay pensions that depend on past payments of premiums that are a fixed proportion of earnings. The payment of pension fund premiums is compulsory for all wage and salary earners. The pensions paid by the funds differ considerably between the individual funds, but are generally index-linked. In the public social security system, entitlement to old age and disablement pensions at the full rates is subject to the condition that the beneficiary has been resident in Iceland for 40 years at the age period of 16–67. For shorter period of residence, the benefits are reduced proportionally. Entitled to old age pension are all those who are 67 years old, and have been residents in Iceland for 3 years of the age period of 16–67. Entitled to disablement pension are those who have lost 75% of their working capacity and have been residents in Iceland for 3 years before application or have had full working capacity at the time when they became residents. Old age and disablement pension are of equally high amount; in the year 1996 the total sum was 160,476 kr. for an individual. Married pensioners are paid 90% of two individuals' pensions. In addition to the basic amount, supplementary allowances are paid according to social circumstances and income possibilities. Widows' pensions are the same amount as old age and disablement pension, provided the applicant is over 60 when she becomes widowed. Women at the age 50–60 get reduced pension. Women under 50 are not entitled to widows' pensions.

The *employment injuries insurance* covers medical care, daily allowances, disablement pension and survivors' pension and is applicable to practically all employees.

Social assistance is primarily municipal and granted in cases outside the social security legislation. Domestic assistance to old people and disabled is granted within this legislation, besides other services.

Child and juvenile guidance is performed by chosen committees according to special laws, such as home guidance and family assistance. In cases of parents' disablement the committees take over the guidance of the children involved.

KEY HISTORICAL EVENTS

The Moghul emperors held power over most of north India and the Deccan (the central plateau of the Indian peninsula) by 1712, when the emperor Bahadur died and his sons weakened the dynasty by disputing the succession.

The power of the states within the empire then revived. The Mahratta rulers of central and western India were led by Shahu; it was he who created the hereditary office of chief minister (*peshwa*) and after his death in 1749 the *peshwas* became the effective rulers of the Mahratta states. In the Deccan, the Moghuls' viceroy of Hyderabad declared himself independent, becoming the founder of the Moslem dynasty of Nizams of Hyderabad. In the north-west in 1739 the Moghuls lost the Punjab to the Persians (who later lost it to the Afghans).

South of Hyderabad were the independent Hindu states of Mysore and Travancore, a number of small principalities and the territory around Madras where the British East India Company was the most powerful force. The Company had maintained a factory at Madras since 1639 and had since established other bases at Bombay (1668) and at Calcutta in Bengal.

In 1740 the Moghul governor (*nawab*) of Bengal rebelled successfully. In 1756, alarmed at the degree to which the Company (anticipating trouble with the French) was arming itself, he attacked and subdued the British base at Calcutta. In 1757 a large British force under Clive retaliated by defeating the Nawab at Plassey. The British were then able to install their own Nawab. Their hold on Bengal and Madras was soon complete and they defeated the French who presented the only serious European challenge. The East India Company thus became the rising power in India at the very time when Moghul power was in decline. Outside the remaining Moghul supremacy the other powers were the Mahrattas, the Punjab Sikhs (nominally under Afghan rule), Hyderabad and Mysore.

Mysore was a Hindu state until 1764 when the Moslem commander Hyder Ali usurped the throne. Having allied themselves to the Nizam of Hyderabad in 1766, the British attached Mysore in 1767; war was intermittent until 1799 when Hyder Ali's successor Tippoo was defeated and the Hindu dynasty restored.

In 1775 a confederacy of Mahratta chiefs, led by the chief of Pune, united against the British power spreading from Bombay and were successful. Mahadaji Sindhia emerged from the war as the leader of a Mahratta empire, to which he added the former Moghul fief of Rajputana.

In 1784 the British government imposed tighter controls on the Company by means of the India Bill.

In 1794 Mahadaji Sindhia died. His successors entered into treaty relations with the British in 1805, by which time the Moghul emperor in Delhi was under Mahratta domination. British-Mahratta relations deteriorated, however, and in 1818 the British annexed the Mahratta states and became the 'protectors' of Rajputana. In 1826 they drove the Burmese out of Assam and in 1830 they occupied Mysore.

In the north-west the Sikh ruler Ranjit Singh had driven the Afghans out of the Punjab and Kashmir by 1819. He died in 1839. Within a short time his strong state and army were highly unstable. Mutual mistrust between Sikhs and British led in 1845-46 to war, ending in British annexation of some Sikh territory. In 1848-49 a second war was fought and the whole Punjab was annexed. Nagpur and Oudh were taken in 1853 and 1856.

INDIA

Since 1818 the East India Company had been the greatest power in India. Within its territory change had been rapid, and the mass of the Hindu population felt threatened by European attitudes, laws and religion. In 1857-58 there was a general rebellion, beginning with a revolt of Indian troops in the Company's army. The excesses of rebels and suppressing forces made the rebellion a national trauma for the British.

The immediate result was the India Act 1858, which transferred the Company's authority and territory to the Crown. The territory (excluding areas now forming Pakistan and Bangladesh) consisted of the Madras and Bombay presidencies; Bengal (which included Assam until 1874 when it became a separate province); the United Provinces and Oudh; the Central Provinces; the Punjab; Ajmere-Merwara; Coorg; and the Andaman Islands. The central government consisted of a viceroy and his executive, and an administrative council in England. This area under direct British rule (British *Raj*) co-existed with the independent states ruled by Indian princes; the viceroy claimed the right to interfere in the latter in emergency, and often did so.

In 1885 the Indian National Congress was founded by A. O. Hume and others, to work for more representative government. In 1892 the first Indian Councils Act added nominated Indian members to the central and provincial legislative councils.

In 1905-11 the experimental partition of Bengal into Hindu and Moslem provinces aroused violent opposition among Hindu Bengalis. This brought to the fore the question of national identity as opposed to religious identity. In 1906 the All-India Moslem League was founded to protect Moslem interests.

From 1909 there were further constitutional reforms, but the Congress thought them insufficient and began, especially after 1917, to work specifically for independence. The India Acts (1919 and 1935) defined and then revised the forms of parliamentary government. After 1930 Mohandas Gandhi led a campaign of civil disobedience for the end of British rule; his attempts at negotiation with Britain were abortive until the Second World War.

The war increased support for the independence movement, Congress being able to claim that Britain had involved India as a combatant state without consultation. In 1940, foreseeing a Hindu-dominated independent India, the Moslem League began to press for a separate Moslem state.

In June 1947 the scheme for partition was announced, after negotiations in which Gandhi had taken part. In Aug. India became independent within the Commonwealth, as a federal union of the former British provinces and the native states. Of the latter, Hyderabad had to be incorporated by force and was later dismembered.

Partition took place (*see* Pakistan), with mass movement of Hindus, Moslems and Sikhs, much violence and many deaths.

In 1950 India became a republic, within the Commonwealth, with Rajendra Prasad as the first president. In 1951 the Congress leader Pandit Nehru became prime minister, establishing a Congress domination which has lasted for all but brief periods. In 1966 his daughter Indira Gandhi became prime minister. She governed by Emergency Rule from 1975 but was defeated in the 1977 election, and re-elected again in 1979. Her son, Rajiv, succeeded her after her assassination by Sikh extremists on 31 Oct. 1984.

In 1956 the States Reorganization Act created a new structure of States and Territories with boundaries based on ethnic and language divisions.

There was an unresolved border war with China in 1962; but the status of Kashmir, disputed with Pakistan, has been the principal difficulty. The war of 1965, mediated at Tashkent (now Toshkent) by the USSR in 1966, left it divided between the two states. War again broke out when in Dec. 1971 India invaded East Pakistan and helped secure the independence of Bangladesh.

The Union was augmented by the annexation of Goa (a surviving Portuguese colony) in 1961 and of Sikkim in 1975.

In 1991 Rajiv Gandhi was assassinated by Tamil extremists after the government had imposed direct rule in Tamil Nadu. Throughout the early 1990s Hindu/Moslem violence was widespread.

India carried out 5 nuclear tests in May 1998. On 11 May 3 devices were exploded followed by 2 more on 13 May, as a result of which US President Bill Clinton imposed wide-ranging economic sanctions, subsequently lifted when India and Pakistan reached an accommodation on nuclear development.

TERRITORY AND POPULATION

India is bounded in the north-west by Pakistan, north by China, Tibet, Nepal and Bhutan, east by Myanmar, and south-east, south and south-west by the Indian Ocean. The far eastern states and territories are almost separated from the rest by Bangladesh. The area (excluding the Pakistan and China-occupied parts of Jammu and Kashmir) is 3,165,596 sq. km. A Sino-Indian agreement of 7 Sept. 1993 settled frontier disputes dating from the war of 1962. Population (excluding occupied Jammu and Kashmir), 1991 census: 846,302,688 (407,072,230 females; 217m. urban). About 24·7% of the population was urban in 1991 (in Maharashtra, 35%; in Arunachal Pradesh, 6·6%). By 1995 this had risen to 26·8%. 1996 estimate: 944m.; density, 299 per sq. km.

The UN gives a projected population for 2000 of 1,006·8m.

By 2050 India is expected to have a population of 1·53bn. and is projected to have overtaken China as the world's most populous country.

SOCIAL STATISTICS

Many births and deaths go unregistered. The Registrar General's data suggests a birth rate for 1995–96 of 28·3 per 1,000 population and a death rate of 9·0, which would indicate in a year approximately 26,500,000 births (equivalent to the population of California in the mid 1980s) and 8,500,000 deaths. Expectation of life at birth, 1990–95, 60·3 years for males and 60·6 years for females.

Marriages and divorces are not registered. The minimum age for a civil marriage is 18 for women and 21 for men; for a sacramental marriage, 14 for girls and 18 for youths. Annual growth rate, 1990–95, 2·3%. Infant mortality, 1990–95, 78 per 1,000 live births; fertility rate, 3·4 births per woman.

CLIMATE

India has a variety of climatic sub-divisions. In general, there are four seasons. The cool one lasts from Dec. to March, the hot season is in April and May, the rainy season is June to Sept., followed by a further dry season until Nov. Rainfall, however, varies considerably, from 4" (100 mm) in the N.W. desert to over 400" (10,000 mm) in parts of Assam.

Range of temperature and rainfall: New Delhi, Jan. 57°F (13·9°C), July 88°F (31·1°C). Annual rainfall 26" (640 mm). Bombay, Jan. 75°F (23·9°C), July 81°F (27·2°C). Annual rainfall 72" (1,809 mm). Calcutta, Jan. 67°F (19·4°C), July 84°F (28·9°C). Annual rainfall 64" (1,600 mm). Cherrapunji, Jan. 53°F (11·7°C), July 68°F (20°C). Annual rainfall 432" (10,798 mm). CONSTITUTION AND GOVERNMENT

The Constitution was passed by the Constituent Assembly on 26 Nov. 1949 and came into force on 26 Jan. 1950. It has since been amended 85 times.

India is a republic and comprises a Union of 25 States and 7 Union Territories. Each State is administered by a Governor appointed by the President for a term of 5 years while each Union Territory is administered by the President through a Lieut.-Governor or an administrator appointed by him. The head of the Union (head of state) is the *President* in whom all executive power is vested, to be exercised on the advice of ministers responsible to Parliament. The President, who must be an Indian citizen at least 35 years old and eligible for election to the House of the People, is elected by an electoral college of all the elected members of Parliament and of the state legislative assemblies, holds office for 5 years and is eligible for re-election. There is also a *Vice-President* who is *ex-officio* chairman of the Council of States.

There is a *Council of Ministers* to aid and advise the President; this comprises Ministers who are members of the Cabinet and Ministers of State and deputy ministers who are not. A Minister who for any period of 6 consecutive months is not a member of either House of Parliament ceases to be a Minister at the expiration of that period. The *Prime Minister* is appointed by the President; other Ministers are appointed by the President on the Prime Minister's advice. The salary of each Minister is Rs 27,000 per annum.

Parliament consists of the President, the *Council of States* (*Rajya Sabha*) and the *House of the People* (*Lok Sabha*). The Council of States, or the Upper House, consists of not more than 250 members; in Dec. 1996 there were 233 elected members and 5 members nominated by the President. The election to this house is indirect; the representatives of each State are elected by the elected members of the Legislative Assembly of that State. The Council of States is a permanent body not liable to dissolution, but one-third of the members retire every second year. The House of the People, or the Lower House, consists of 545 members, 543 directly elected on the basis of adult suffrage from territorial constituencies in the States, and the Union territories; in Dec. 1997 there were 541 elected members, 2 members nominated by the President to represent the Anglo-Indian community and 2 vacancies. The House of the People unless sooner dissolved continues for a period of 5 years from the date appointed for its first meeting; in emergency, Parliament can extend the term by 1 year.

State Legislatures. For every State there is a legislature which consists of the Governor, and (a) 2 Houses, a Legislative Assembly and a Legislative Council, in the States of Bihar, Jammu and Kashmir, Karnataka, Madhya Pradesh (where it is provided for but not in operation), Maharashtra and Uttar Pradesh, and (b) 1 House, a Legislative Assembly, in the other States. Every Legislative Assembly, unless sooner dissolved, continues for 5 years from the date appointed for its first meeting. In emergency the term can be extended by 1 year. Every State Legislative Council is a permanent body and is not subject to dissolution, but one-third of the members retire every second year. Parliament can, however, abolish an existing Legislative Council or create a new one, if the proposal is supported by a resolution of the Legislative Assembly concerned.

Legislation. The various subjects of legislation are enumerated in three lists in the seventh schedule to the constitution. List I, the Union List, consists of 97 subjects (including defence, foreign affairs, communications, currency and coinage, banking and customs) with respect to which the Union Parliament has exclusive power to make laws. The State legislature has exclusive power to make laws with respect to the 66 subjects in list II, the State List; these include police and public order, agriculture and irrigation, education, public health and local government. The powers to make laws with respect to the 47 subjects (including economic and social planning, legal questions and labour and price control) in list III, the Concurrent List, are held by both Union and State governments, though the former prevails. But Parliament may legislate with respect to any subject in the State List in circumstances when the subject assumes national importance or during emergencies.

Other provisions deal with the administrative relations between the Union and the States, interstate trade and commerce, distribution of revenues between the States and the Union, official language, etc.

Fundamental Rights. Two chapters of the constitution deal with fundamental rights and 'Directive Principles of State Policy'. 'Untouchability' is abolished, and its practice in any form is punishable. The fundamental rights can be enforced through

the ordinary courts of law and through the Supreme Court of the Union. The directive principles cannot be enforced through the courts of law; they are nevertheless fundamental in the governance of the country.

Citizenship. Under the Constitution, every person who was on the 26 Jan. 1950, domiciled in India and (a) was born in India or (b) either of whose parents was born in India or (c) who has been ordinarily resident in the territory of India for not less than 5 years immediately preceding that date became a citizen of India. Special provision is made for migrants from Pakistan and for Indians resident abroad. Under the Citizenship Act, 1955, which supplemented the provisions of the Constitution, Indian citizenship is acquired by birth, by descent, by registration and by naturalization. The Act also provides for loss of citizenship by renunciation, termination and deprivation. The right to vote is granted to every person who is a citizen of India and who is not less than 18 years of age on a fixed date and is not otherwise disqualified.

Parliament. Parliament and the state legislatures are organized according to the following schedule (figures show distribution of seats in Dec. 1996):

Language. The Constitution provides that the official language of the Union shall be Hindi in the Devanagari script. Hindi is spoken by over 30% of the population. It was originally provided that English should continue to be used for all official purposes until 1965. But the Official Languages Act 1963 provides that, after the expiry of this period of 15 years from the coming into force of the Constitution, English might continue to be used, in addition to Hindi, for all official purposes of the Union for which it was being used immediately before that day, and for the transaction of business in Parliament. According to the Official Languages (Use for official purposes of the Union) Rules 1976, an employee may record in Hindi or in English without being required to furnish a translation thereof in the other language and no employee possessing a working knowledge of Hindi may ask for an English translation of any document in Hindi except in the case of legal or technical documents.

The 58th amendment to the Constitution (26 Nov. 1987) authorized the preparation of a Constitution text in Hindi.

The following 18 languages are included in the Eighth Schedule to the Constitution (with 1994 estimate of speakers where over 5m.): Assamese (14·8m.), Bengali (68·3m.), Gujarati (44m.), Hindi (350·3m.), Kannada (35·7m.), Kashmiri, Konkani, Malayalam (34·4m.), Manipuri, Marathi (65·8m.), Nepali, Oriya (30·3m.), Punjabi (24·7m.), Sanskrit, Sindhi, Tamil (59·3m.), Telugu (71·9m.), Urdu (46·8m.).

RECENT ELECTIONS

Presidential elections were held on 14 July 1997. Dr Kocheril Raman Narayanan was elected by 94·97% of votes cast against 1 opponent.

Parliamentary elections were held over 7 days from 27 April to 7 May 1996 (23 and 30 May in Jammu and Kashmir). The electorate was 590m. The Bharatiya Janata Party gained 160 seats; the Congress (I), 136. After the elections, a coalition government was formed, led by Bharatiya Janata Party with Atal Behari Vajpayee as Prime Minister. It lasted for 13 days. A 13-party Coalition goverrnment with H. D. Deve Gowda as Prime Minister took office, supported by Congress (I) from outside. When Congress (I) withdrew support in March 1997, Inder Kumar Gujral replaced Deve Gowda and formed the Government. Congress (I) again withdrew support in Nov. 1997 and the Gujral government resigned. The President accepted the resignation and dissolved the House of the People and ordered elections with Gujral heading the caretaker government.

In the parliamentary elections held between 16 Feb. and 7 March 1998 the Bharatiya Janata Party (Hindu Nationalists) won 178 seats, the Indian National Congress 145, the Communist Party of India (Marxist) 32 and Samajwadi Party 21. Other parties won fewer than 20 seats each.

Local Government. There were in 1989-90, 72 municipal corporations, 1,770 municipal committees/boards/councils, 663 town area committees and 337 notified area committees. The municipal bodies look after the roads, water supply, drainage, sanitation, medical relief, vaccination, education, street lighting, etc. Their main sources of revenue are taxes on the annual rental value of land and buildings, octroi and terminal, vehicle and other taxes. The municipal councils enact their own bye-laws and frame their budgets, which in the case of municipal bodies other than corporations generally require the sanction of the State government. All municipal councils are elected on the principle of adult franchise.

For rural areas there is a 3-tier system of *panchayati raj* at village, block and district level, although the 3-tier structure may undergo some changes in State legislation to suit local conditions. All *panchayati raj* bodies are organically linked, and representation is given to special interests. Elected directly by and from among villagers, the *panchayats* are responsible for agricultural production, rural industries, medical relief, maternity and child welfare, common grazing grounds, village roads, tanks and wells, and maintenance of sanitation. In some places they also look after primary education, maintenance of village records and collection of land revenue. They have their own powers of taxation. There are judicial *panchayats* or village courts.

Panchayati raj now cover almost all the States and Union Territories with variations in structural pattern. *Panchayati raj* involves a 3-tier arrangement: Village level, block level and district level. Tenure of *Panchayati raj* institutions range from 3–5 years.

The powers and responsibilities of *Panchayati raj* institutions are derived from State Legislatures, and from the executive orders of State governments.

DEFENCE

The Supreme Command of the Armed Forces is vested in the President. Policy is decided at different levels by a number of committees, including the Political Affairs Committee presided over by the Prime Minister and the Defence Minister's Committee. Administrative and operational control rests in the respective Service Headquarters, under the control of the Ministry of Defence. As well as armed forces of 1,145,000 personnel in 1998, there was an active para-military force of 1,088,000, including 185,000 members of the Border Security Force based mainly in the troubled Jammu and Kashmir region. Military service is voluntary but, under the ammended constitution, it is regarded as a fundamental duty of every citizen to perform National Service when called upon. Defence spending for 1998-99 saw an increase of 14% on 1997-98 to US$9·8bn. Defence accounted for 13% of spending in 1998-99.

Nuclear weapons. India's first nuclear test was in 1974. The nuclear arsenal consisted of approximately 65 warheads in early 1998.

Army. The Army Headquarters functioning directly under the Chief of the Army Staff is divided into the following main branches: General Staff Branch; Adjutant General's Branch; Quartermaster-General's Branch; Master-General of Ordnance Branch; Engineer-in-Chief's Branch; Military Secretary's Branch.

The Army is organized into 5 commands each divided into areas, which in turn are subdivided into sub-areas.

The strength of the Army was (1998) 980,000. There are 3 armoured, 17 infantry and 10 mountain divisions and 5 independent armoured, 7 independent infantry, 3 independent artillery, 1 parachute, 1 mountain, 16 air defence and 3 engineer

The *Vikrant* was decommissioned on 31 Jan. 1997.

The fleet includes 8 'Kilo' and 1 'Foxtrot' Soviet-built diesel submarines and 4 smaller new German-designed boats. 5 Soviet-built missile-armed destroyers, 3 heavily modified and 6 rather less modified 'Leander' class frigates, all built in India, together with 1 ex-British Batch 3 'Leander' class and 9 other Soviet-type frigates form the main surface force. Coastal forces include 14 Soviet-designed missile and 4 anti-submarine corvettes, 6 fast missile craft, 7 offshore and 10 inshore patrol craft. There are 12 Soviet-built offshore minesweepers, and 8 much smaller inshore vessels. Amphibious lift for the 1,000 strong marine force is provided by 1 tank landing ship and 8 medium landing ships, as well as about 8 craft. Support forces include 1 tanker, 1 submarine depot ship, 1 transport, 10 survey and research ships, 2 tugs and 1 training ship.

The Naval Air force, 5,000 strong, operates 20 Sea Harriers, 5 Il-38 'May', 8 Tu-142M 'Bear-F', 20 Dornier 228 and 13 Britten-Norman Islander maritime patrol aircraft. Armed helicopters include 26 Chetak, 7 Ka-25, 10 Ka-27 and 32 Sea King, and the inventory is completed with some 30 training and communications aircraft.

Main bases are at Bombay (HQ Western Fleet, and main dockyard), Goa, Visakhapatnam (HQ Eastern Fleet) and Calcutta on the sub-continent, Port Blair in the Andaman Islands and Lakhshadweep on the Laccadive Islands. HQ Southern Command is at Kochi.

Naval personnel in 1998 numbered 55,000 including 5,000 Naval Air Arm and 1,000 marines.

The Coast Guard is an independent para-military service 4,000 strong in 1996, which functions under Defence Ministry control, but is funded by the Revenue Department. The force comprises 10 offshore patrol vessels and 40 inshore patrol craft. Its 20 aircraft include Dornier-228, Fokker F-27 and Britten-Norman Islanders, and 13 Chetak helicopters.

Air Force. The Air Headquarters, under the Chief of Air Staff, consists of 4 main branches, viz., Air Staff, Administration, Policy and Plans, and Maintenance. Training Command HQ is at Bangalore, Maintenance Command at Nagpur. Nominal strength in 1998 was 110,000 personnel, over 600 combat aircraft of all types, in over 40 squadrons of aircraft, 36 armed helicopters and about 30 squadrons of 'Guideline' and 'Goa' surface-to-air missiles, and close-range missiles such as 'Gainful' and Tigercat.

INTERNATIONAL RELATIONS

India is a member of the UN, the Commonwealth and the Colombo Plan.

ECONOMY

Policy. The highest economic decision-making body is the *National Development Council*, of which all state chief ministers are members. There is also a Planning Commission.

The eighth 5-year plan (1992–97) emphasized job creation and increased rural investment, and aimed at an annual growth of 5·6% of GDP, 3% in employment and a domestic savings rate of 21·6% of GDP. Indicative planning, however, is tending to take the place of centralized planning.

As a first step towards partial privatization of the 248 state-owned corporations, selected public sector enterprises are being allowed to raise funds through equity issues.

Requirements for government approval of investment decisions were reduced in 1990. The eighth plan (1992–97) envisaged an outlay of Rs 7,920,000m., with public sector investment of Rs 3,420,000m. Central plan outlay (1997–98), Rs 918,390m.

Performance. Real GDP growth at factor cost in 1996–97 was 6·8% (6·1% in 1995). For 1998 it was forecast to be around 4–5%, indicating that India managed to avoid the worst of the Asian crisis. The current account deficit stood at US$–3,532 in 1997.

Budget. Revenue and expenditure (on revenue account) of the central government for years ending 31 March, in Rs 1m.:

	1995–96	*1996–97*[1]	*1997–98*[2]
Revenue	1,685,713	1,983,536	2,310,756
Expenditure	1,983,023	2,265,590	2,613,409

[1]Revised. [2]Budget estimates.

Important items of revenue and expenditure on the revenue account of the central government for 1997–98 (estimates), in Rs 1m.:

Revenue		*Expenditure*	
Net tax revenue	1,379,568	General Services	1,167,096
Non-tax revenue	831,188	Defence	276,170
		Major subsidies	182,510

Total capital account receipts (1997–98 budget), Rs 2,774,893m.; capital account disbursements, Rs 2,777,284m. Total (revenue and capital) receipts, Rs 5,085,649m.; disbursements, Rs 5,390,693m.

Under the Constitution (Part XII and 7th Schedule), the power to raise funds has been divided between the central government and the states. Generally, the sources of revenue are mutually exclusive. Certain taxes are levied by the Union for the sake of uniformity and distributed to the states. The Finance Commission (Art. 280 of the Constitution) advises the President on the distribution of the taxes which are distributable between the centre and the states, and on the principles on which grants should be made out of Union revenues to the states. The main sources of central revenue are: customs duties; those excise duties levied by the central government; corporation, income and wealth taxes; estate and succession duties on non-agricultural assets and property, and revenues from the railways and posts and telegraphs. The main heads of revenue in the states are: taxes and duties levied by the state governments (including land revenues and agricultural income tax); civil administration and civil works; state undertakings; taxes shared with the centre; and grants received from the centre.

Currency. A decimal system of coinage was introduced in 1957. The Indian *rupee* (INR) is divided into 100 *paise*. The paper currency consists of Reserve Bank notes and Government of India currency notes.

Foreign exchange reserves in Feb. 1998 were US$24,044m. and gold reserves were 12·74m. troy oz. Inflation was 9·4% in 1997 and forecast to drop to 7·0% in 1998.

The official exchange rate was abolished on 1 March 1993; the rupee now has a single market exchange rate and is convertible. The pound sterling is the currency of intervention. Total money supply in Jan. 1998 was Rs 2,389bn.

Banking and Finance. The Reserve Bank, the central bank for India, was established in 1934 and started functioning on 1 April 1935 as a shareholder's bank;

it became a nationalized institution on 1 Jan. 1949. It has the sole right of issuing currency notes. Its *Governor* is Chakravarty Rangarajan (b. 1932). The Bank acts as adviser to the Government on financial problems and is the banker for central and state governments, commercial banks and some other financial institutions. It manages the rupee public debt of central and state governments and is the custodian of the country's exchange reserve. The Bank has extensive powers of regulation of the banking system, directly under the Banking Regulation Act, 1949, and indirectly by the use of variations in Bank rate, variation in reserve ratios, selective credit controls and open market operations.

The commercial banking system consisted of 300 scheduled banks (*i.e.*, banks which are included in the 2nd schedule to the Reserve Bank Act) and 4 nonscheduled banks in Jan. 1993; scheduled banks included 196 Regional Rural Banks. Total deposits in commercial banks, March 1997, stood at Rs 5,035,960m. The business of non-scheduled banks forms less than 0·1% of commercial bank business. Of the 300 scheduled banks, 35 were foreign banks which specialize in financing foreign trade but also compete for domestic business. The State Bank of India acts as the agent of the Reserve Bank for transacting government business as well as undertaking commercial functions. The 27 public sector banks (which comprise the State Bank of India and its 7 associate banks and 19 nationalized banks) account for about 80·7% of deposits and about 78% of bank credit of all scheduled commercial banks.

There are stock exchanges in Ahmedabad, Bombay, Calcutta, Delhi, Madras and 18 other centres.

Weights and Measures. Uniform standards of weights and measures, based on the metric system, were established for the first time by the Standards of Weights and Measures Act, 1956.

A second Standards of Weights and Measures Act, 1976, recognizes the International System of Units and is in line with the recommendations of the International Organisation of Legal Metrology. This Act also protects consumers through proper indication of weight, quantity, identity, source, date and price on packaged goods.

While the Standards of Weights and Measures are laid down in the Central Act, enforcement of weights and measures laws is entrusted to the state governments; the central Directorate of Weights and Measures is responsible for co-ordinating activities so as to ensure national uniformity.

Calendar. The dates of the Saka era (named after the north Indian dynasty of the first century AD) are used alongside Gregorian dates in issues of the *Gazette* of India, news broadcasts by All-India Radio and government-issued calendars, from 22 March 1957, a date which corresponds with the first day of the year 1879 in the Saka era.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1996 was 83·28m. kW. In Nov. 1996, 502,721 villages out of 579,132 had electricity. Production of electricity in 1995–96 was 380,084m. kWh, of which 299,606m. kWh came from thermal stations, 7,965m. kWh from nuclear stations and 72,513m. kWh from hydro-electric stations. 9 nuclear stations supplied 2·1% of output in 1995–96. Consumption per capita in 1995 was 419 kWh.

Oil and Gas. The Oil and Natural Gas Corporation Ltd and Oil India Ltd are the only producers of crude oil. Production 1996–97, 33·43m. tonnes, about 60% of consumption. The main fields are in Assam and Gujarat and offshore in the Gulf of Cambay (the Bombay High field). Natural gas production, 1995–96, 22,308m. cu. metres.

Water. 89·44m. ha (1995–96) irrigation potential had been created of which 79·89m. ha was utilized. Irrigation projects have formed an important part of all the Five-Year Plans. The possibilities of diverting rivers into canals being nearly exhausted, the emphasis is now on damming the monsoon surplus flow and diverting that. Ultimate potential of irrigation is assessed at 107m. ha, total cultivated land being 185m. ha.

A Ganges water-sharing accord was signed with Bangladesh in 1997, ending a 25-year dispute which had hindered and dominated relations between the two countries.

Minerals. The coal industry was nationalized in 1973. Production, including lignite, 1996–97 (provisional), 319m. tonnes; reserves, including lignite, are estimated at (1995–96) 202,000m. tonnes. Production of other minerals, 1996–97 (in 1,000 tonnes): Iron ore, 66,672; bauxite, 5,928; chromite, 1,664 (1995–96); copper ore, 3,900; manganese ore, 1,836; gold, 2,712 kg. Other important minerals are lead, zinc, limestone, apatite and phosphorite, dolomite, magnesite and silver. Value of mineral production, 1996–97, Rs 330,204·3m. of which mineral fuels produced Rs 275,053m., metallic minerals Rs 24,295m. and non-metallic Rs 11,392·4m.

Agriculture. About 70% of the people are dependent on the land for their living. In 1998 agriculture provided about 30% of GDP. The farming year runs from July to June through three crop seasons: Kharif (monsoon); rabi (winter) and summer. In 1994, 166,100,000 ha were used for arable land, 3,550,000 ha for permanent crops and 11,400,000 ha for permanent pasture.

Agricultural production, 1996–97 (in 1,000 tonnes): Rice, 80,530; wheat, 64,660; total foodgrains, 192,120; maize, 9,440; pulses, 14,020; sugar-cane, 267,480; oilseeds, 24,210; cotton, 14·16m. bales (of 170 kg); jute is grown in West Bengal (70% of total yield), Bihar and Assam, total yield, 9·42m. bales (of 170 kg). The coffee industry is growing: The main cash varieties are Arabica and Robusta (main growing areas Karnataka, Kerala and Tamil Nadu).

The tea industry is important, with production concentrated in Assam, West Bengal, Tamil Nadu and Kerala. Total crop in 1997, 810,600 tonnes; exports in 1997, 203,000 tonnes, valued at US$432m.

Livestock (1996): Cattle, 196m.; sheep, 45m.; pigs, 11·9m.; horses, 990,000; asses, 1·6m.; goats, 119·24m. (1995); buffaloes, 79·5m. (1995); chickens, 610m. (1995). There are more cattle and buffaloes in India than in any other country.

Fertilizer consumption in 1996–97 was 14·31m. tonnes.

Land Tenure. There are three main traditional systems of land tenure: *Ryotwari* tenure, where the individual holders, usually peasant proprietors, are responsible for the payment of land revenues; *zamindari* tenure, where one or more persons own large estates and are responsible for payment (in this system there may be a number of intermediary holders); and *mahalwari* tenure, where village communities jointly hold an estate and are jointly and severally responsible for payment.

Agrarian reform, initiated in the first Five-Year Plan, being undertaken by the state governments includes: (1) The abolition of intermediaries under *zamindari* tenure. (2) Tenancy legislation designed to scale down rents to $^1/_4$–$^1/_5$ of the value of the produce, to give permanent rights to tenants (subject to the landlord's right to resume a minimum holding for his personal cultivation), and to enable tenants to acquire ownership of their holdings (subject to the landlord's right of resumption for personal cultivation) on payment of compensation over a number of years. (3) Fixing of ceilings on existing holdings and on future acquisition; the holding of a family is between 4·05 and 7·28 ha if it has assured irrigation to produce two crops a year; 10·93 ha for land with irrigation facilities for only one crop a year; and 21·85 ha for all other categories of land. Tea, coffee, cocoa and cardamom plantations have been exempted. (4) The consolidation of holdings in community project areas and the prevention of fragmentation of holdings by reform of inheritance laws. (5) Promotion of farming by co-operative village management.

The average size of holding for the whole of India is 2·63 ha. Andhra Pradesh, 2·87; Assam, 1·46; Bihar, 1·53; Gujarat, 4·49; Jammu and Kashmir, 1·43; Karnataka, 4·11; Kerala, 0·75; Madhya Pradesh, 3·99; Maharashtra, 4·65; Orissa, 1·98; Punjab, 3·85; Rajasthan, 5·5; Tamil Nadu, 1·49; Uttar Pradesh, 1·78; West Bengal, 1·56.

Of the total 71m. rural households possessing operational holdings, 34% hold on the average less than 0·2 ha of land each.

Opium. By international agreement the poppy is cultivated under licence, and all raw opium is sold to the central government. Opium, other than for wholly medical use, is available only to registered addicts.

Forestry. The lands under the control of the state forest departments are classified as 'reserved forests' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), 'protected forests' and 'unclassed' forest land. In 1995 the total forest area was 650,050 sq. km (21·9% of the land area), up from 649,690 sq. km in 1990. India is one of only two developing countries to have increased its area under forests between 1990 and 1995, the other being Cape Verde. Main types are teak and sal. About 16% of the area is inaccessible, of which about 45% is potentially productive. In 1995, 299·16m. cu. metres of roundwood were produced, making India the third largest producer after the USA and China. India is the world's leading producer of fuelwood and charcoal. Most states have encouraged planting small areas around villages.

Fisheries. Total catch (1995–96) was 4·95m. tonnes, of which Kerala, Tamil Nadu, and Maharashtra produced about half. Of the total catch in 1995–96, 2·71m. tonnes were marine fish. There were 46,918 mechanized boats (1994–95). There were also 31,726 motorized traditional crafts and 159,481 traditional crafts in 1994–95. There were 11,440 fishermen's co-operatives with 1,250,379 members in 1995–96; total sales, Rs 1,495m. (1994–95).

INDUSTRY

Industries reserved for the public sector are arms and ammunition and allied items of defence equipment, military aircraft and warships, nuclear energy, coal and lignite, mineral oils and minerals specified in nuclear energy and railway transport. In a further group of industries (road transport, manufacture of chemicals such as drugs, dyestuffs, plastics and fertilizers) the state established new undertakings, but private enterprise may develop either on its own or with state backing.

Workdays lost by industrial disputes, 1995, 14·29m., through strikes and lockouts. Roads are divided into 6 main administrative classes, namely: national highways, state highways, other public works department (PWD) roads, *Panchayati Raj* roads, urban roads and project roads. The national highways (34,298 km in 1996) connect capitals of states, major ports and foreign highways. The national highway system is linked with the UN Economic and Social Commission for Asia and the Pacific international highway system. The state highways are the main trunk roads of the states, while the other PWD roads and *Panchayati Raj* roads connect subsidiary areas of production and markets with distribution centres, and form the main link between headquarters and neighbouring districts.

SOCIAL INSTITUTIONS

Justice. All courts form a single hierarchy, with the Supreme Court at the head, which constitutes the highest court of appeal. Immediately below it are the High Courts and subordinate courts in each state. Every court in this chain administers the whole law of the country, whether made by Parliament or by the state legislatures.

The states of Andhra Pradesh, Assam (in common with Nagaland, Meghalaya, Manipur, Mizoram, Tripura and Arunachal Pradesh), Bihar, Gujarat, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra (in common with Goa and the Union Territories of Daman and Diu and Dadra and Nagar Haveli), Orissa, Punjab (in common with the state of Haryana and the Union Territory of Chandigarh), Rajasthan, Tamil Nadu (in common with the Union Territory of Pondicherry), Uttar Pradesh, West Bengal and Sikkim each have a High Court. There is a separate High Court for Delhi. For the Andaman and Nicobar Islands the Calcutta High Court, for Pondicherry the High Court of Madras and for Lakshadweep the High Court of Kerala are the highest judicial authorities. The Allahabad High Court has a Bench at Lucknow, the Bombay High Court has Benches at Nagpur, Aurangabad and Panaji, the Gauhati High Court has Benches at Kohima, Aizwal, Imphal and Agartala, the Madhya Pradesh High Court has Benches at Gwalior and Indore, the Patna High Court has a Bench at Ranchi and the Rajasthan High Court has a Bench at Jaipur. Judges and Division Courts of the Guwahati High Court also sit in Meghalaya. Similarly, judges and Division Courts of the Calcutta High Court also sit in the Andaman and Nicobar Islands. Below the High Court each state is divided into a number of districts under the jurisdiction of district judges who preside over civil courts and courts of sessions. There are a number of judicial authorities subordinate to the district civil courts. On the criminal side magistrates of various classes act under the overall supervision of the High Court.

The Code of Criminal Procedure came into force with effect from 1 April 1974. It provides for complete separation of the Judiciary from the Executive throughout India.

In Oct. 1991 the Supreme Court upheld capital punishment by hanging.

The Union Government is also directly responsible for the central universities and all institutions declared by parliament to be of national importance; the promotion of Hindi as the federal language and co-ordinating and maintaining standards in higher education, research, science and technology. Professional education rests with the Ministry or Department concerned. There is a Central Advisory Board of Education to advise the Union and the State Governments on any educational question which may be referred to it.

School Education. The school system has 4 stages: Primary, middle, secondary and senior secondary.

Primary education is imparted either at independent primary (or junior basic) schools or primary classes attached to middle or secondary schools. The period of instruction varies from 4 to 5 years and the medium of instruction is in most cases the mother tongue of the child or the regional language. Free primary education is available for all children.

Legislation for compulsory education has been passed by some state governments and Union Territories but it is not practicable to enforce compulsion when the reasons for non-attendance are socio-economic. There are residential schools for country children.

The period for the middle stage varies from 2 to 3 years.

Higher Education. Higher education is given in arts, science or professional colleges, universities and all-India educational or research institutions. In 1995–96 there were 166 universities, 4 institutes established under state legislature act, 11 institutions of national importance and 37 institutions deemed as universities. JAMMU AND KASHMIR

KEY HISTORICAL EVENTS

The state of Jammu and Kashmir, which had earlier been under Hindu rulers and Moslem sultans, became part of the Mogul Empire under Akbar from 1586. After a period of Afghan rule from 1756, it was annexed by the Sikh rulers of the Punjab in 1819. In 1820 Ranjit Singh made over the territory of Jammu to Gulab Singh. After the decisive battle of Sobraon in 1846 Kashmir also was made over to Gulab Singh under the Treaty of Amritsar. British supremacy was recognized until the Indian Independence Act, 1947, when all states decided on accession to India or Pakistan. Kashmir asked for standstill agreements with both. Pakistan agreed, but India desired further discussion with the Government of Jammu and Kashmir State. In the meantime the state became subject to armed attack from the territory of Pakistan and the Maharajah acceded to India on 26 Oct. 1947 by signing the Instrument of Accession. India approached the UN in Jan. 1948; India-Pakistan conflict ended by

ceasefire in Jan. 1949. Further conflict in 1965 was followed by the Tashkent Declaration of Jan. 1966. Following further hostilities between India and Pakistan a ceasefire came into effect on 17 Dec. 1971, followed by the Simla Agreement in July 1972, whereby a new line of control was delineated bilaterally through negotiations between India and Pakistan and came into force on 17 Dec. 1972.

MADHYA PRADESH

KEY HISTORICAL EVENTS

The state was formed in 1956 to bring together the Hindu-speaking districts of the area including most of the former state of Madhya Bharat, the former states of Bhopal and Vindhya Pradesh and a former Rajput enclave, Sironj. This was an area which the Mahrattas took from the Moghuls between 1712 and 1760. The British overcame Mahratta power in 1818 and established their own Central Provinces. Nagpur became the Provinces capital and was also the capital of Madhya Pradesh until in 1956 boundary changes transferred it to Maharashtra. The present capital, Bhopal, was the centre of a Moslem princely state from 1723. An ally of the British against the Mahrattas, Bhopal (with neighbouring small states) became a British-protected agency in 1818. After independence Bhopal acceded to the Indian Union in 1949. The states of Madhya Bharat and Vindhya Pradesh were then formed as neighbours, and in 1956 were combined with Bhopal and Sironj and renamed Madhya Pradesh.

The state is in the largely desert area formerly known as Rajputana. The Rajput princes were tributary to the Moghul emperors when they were conquered by the Mahrattas' leader, Mahadaji Sindhia, in the 1780s. WEST BENGAL

KEY HISTORICAL EVENTS

Bengal was under the overlordship of the Moghul emperor and ruled by a Moghul governor (*nawab*) who declared himself independent in 1740. The British East India Company based at Calcutta was in conflict with the *nawab* from 1756 until 1757 when British forces defeated him at Plassey and installed their own *nawab* in 1760. The French were also in Bengal; the British captured their trading settlement at Chandernagore in 1757 and in 1794, restoring it to France in 1815.

The area of British Bengal included modern Orissa and Bihar, Bangladesh and (until 1833) Uttar Pradesh. Calcutta was the capital of British India from 1772 until 1912.

The first division into East and West took place in 1905-11 and was not popular. However, at Partition in 1947 the East (Moslem) chose to join what was then East Pakistan (now Bangladesh), leaving West Bengal as an Indian frontier state and promoting a steady flow of non-Moslem Bengali immigrants from the East. In 1950 West Bengal received the former princely state of Cooch Behar and, in 1954, Chandernagore. Small areas were transferred from Bihar in 1956.

TERRITORY AND POPULATION

West Bengal is in north-east India and is bounded north by Sikkim and Bhutan, east by Assam and Bangladesh, south by the Bay of Bengal, south-west by Orissa, west by Bihar and north-west by Nepal. The total area of West Bengal is 88,752 sq. km. At the 1991 census its population was 68,077,965, an increase of 24·73% since 1981; density of population, 767 per sq. km. The capital is Calcutta. KEY HISTORICAL EVENTS

In the 16th century Portuguese traders settled in some of the islands which now comprise Indonesia, but were ejected by the British, who in turn were ousted by the Dutch in 1595. From 1602 the Netherlands East India Company conquered the area and ruled until the dissolution of the Company in 1798. The Netherlands government then ruled the colony from 1816 until 1941, when it was occupied by the Japanese until 1945. On 17 Aug. 1945 an independent republic was proclaimed by Dr Sukarno and Dr Hatta, the nationalist leaders. The republic was not, however, recognized by the Netherlands with whom negotiations and fighting continued until 1949. On 27 Dec. 1949 complete and unconditional sovereignty was transferred to the Republic of the United States of Indonesia.

A settlement of the New Guinea (Irian Jaya) question was, however, delayed until 15 Aug. 1962, when through the offices of the UN, an agreement was concluded for the transfer of the territory to Indonesia on 1 May 1963.

In 1950 the federal form of government which had sprung up in 1946–48 was abolished, and Indonesia was again made a unitary state. On 5 July 1959, by presidential decree, the constitution of 1945 was reinstated.

On 12 Jan. 1960 President Sukarno issued a decree enabling him to control and dissolve the political parties. He also set up a mass organization, the National Front, and a supreme state body called the Provisional People's Consultative Assembly. On 6 March 1960 he prorogued parliament to be reorganized on the basis of the 1945 constitution with the local administrations nominating members to the new 'Mutual Co-operation House of Representatives'.

On 11–12 March 1966 the military commanders under the leadership of Lieut.-Gen. Suharto took over executive power while leaving President Sukarno as the head of state. The Communist party, which had twice attempted to overthrow the government and had killed six generals in 1965, was at once outlawed; the National Front was dissolved in Oct. 1966. On 22 Feb. 1967 Sukarno handed over all his powers to Gen. Suharto. Re-elected president at five-year intervals, most recently on 10 March 1998, Suharto presided over a booming economy but one which was characterized by corruption and croneyism. The weaknesses became apparent when, in 1997, a failure of economic confidence spread from Japan across Asia. By May 1998 Indonesia had regressed to the verge of civil war. As food prices doubled, then trebled, riots broke out in Jakarta destroying homes and shops. The risk of society fragmenting along ethnic and religious lines was emphasized by the particular sufferings of the Chinese community. President Suharto was forced to stand down on 21 May 1998 and was succeeded by his Vice-President, Bacharuddin Jusuf Habibie, who promised political and economic reforms. Continuing protest centred on the Suharto family which continues to exercise control over large part of the Indonesian economy. Several of the country's discontented regions are wanting to break free. The government has said that it may grant independence to East Timor, the former Portuguese colony it invaded in 1975.

TERRITORY AND POPULATION

Indonesia, with a land area of 741,098 sq. miles (1,919,443 sq. km), consists of 17,508 islands (6,000 of which are inhabited) extending about 3,200 miles east to west through three time-zones (East, Central and West Indonesian Standard time) and 1,250 miles north to south. The largest islands are Sumatra, Java, Kalimantan (Indonesian Borneo), Sulawesi (Celebes) and Irian Jaya (the western part of New Guinea). Most of the smaller islands except Madura and Bali are grouped together. The two largest groups of islands are Maluku (the Moluccas) and Nusa Tenggara (the Lesser Sundas).

Population at the 1990 census was 179,378,946. Estimate, 1995, 195·28m. (35·4% urban); density, 102 per sq. km.

The UN gives a projected population for 2000 of 212·56m.

East Timor. Portugal abandoned its former colony, whose population is largely Roman Catholic, in 1975, when it was occupied by Indonesia and claimed as the province of Timor Timur. The UN does not recognize Indonesian sovereignty over the territory. An independence movement, FRETILIN, has maintained a guerilla resistance to the Indonesian government which has resulted in large-scale casualties

and alleged atrocities. On 24 July 1998 Indonesia announced a withdrawal of troops from East Timor and an amnesty for some political prisoners, although no indication was given of how many of the estimated 12,000 troops and police would pull out. On 5 Aug. Indonesia and Portugal reached agreement on the outlines of an autonomy plan which would give the Timorese the right to self-government except in foreign affairs and defence.

ECONOMY

Policy. The Government's plan for growth has been hit by financial instability in the Asian money markets and international concern about corruption, a shaky banking system and the slow pace of deregulation and privatization; but this is not to deny the economic successes which were achieved by the Suharto administration. Since 1970 the economy has grown, on average, by more than 6% a year.

Performance. Economic growth was 7·5% in 1994, 8·1% in 1995, 8% in 1996 and an estimated 5% in 1997, but was forecast to decline dramatically to an estimated −17% in 1998. The Asian crisis and the economic collapse affected Indonesia more than any other country.

Budget. By law the budget must balance. The fiscal year starts 1 April. Revenue and expenditure for 1995–96 were 78,000,000m. rupiahs. Current revenue (in 1,000m. rupiahs), 1993–94, 52,280; current expenditure, 38,799; capital revenue, 10,372; capital expenditure, 25,661.

Currency. The monetary unit is the *rupiah* (IDR) notionally of 100 *sen*. Annual inflation was running at about 52% in mid-1998. In March 1998 Indonesia's official hard currency reserves were US$16·33bn., although usable reserves were just under US$10bn. Gold reserves were 3·1m. troy oz. in Feb. 1998. Total money supply in Nov. 1997 was 61,563bn. rupiahs.

Banking and Finance. The Bank Indonesia, successor to De Javasche Bank established by the Dutch in 1828, was made the central bank of Indonesia on 1 July 1953. Its *Governor* is Sudradjat Djiwandono. It had an original capital of 25m. rupiahs; a reserve fund of 18m. rupiahs and a special reserve of 84m. rupiahs. Total assets and liabilities as at Dec. 1992, 123,689,000m. rupiahs. Total savings deposits at July 1996 were 41,858,000m. rupiahs.

There are 117 commercial banks, 28 development banks and other financial institutions, 8 development finance companies and 9 joint venture merchant banks. Commercial banking is dominated by 7 state-owned banks: Bank Rakyat Indonesia provides services to smallholder agriculture and rural development; Bank Bumi Daya, estate agriculture and forestry; Bank Negara Indonesia 1946, industry; Bank Dagang Negara, mining; and Bank Expor-Impor Indonesia, export commodity sector. All state banks are authorized to deal in foreign exchange.

There are 70 private commercial banks owned and operated by Indonesians. The 11 foreign banks specialize in foreign exchange transactions and direct lending operations to foreign joint ventures. The government owns 1 Savings Bank, Bank Tabungan Negara, and 1,000 Post Office Savings Banks. There are also over 3,500 rural and village savings bank and credit co-operatives. At least 16 banks closed in the wake of the 1997 financial crisis.

The World Bank board agreed to resume lending in Indonesia in June 1998 by approving a US$225m. loan to reduce poverty. Also in June 1998 Indonesia reached agreement with foreign banks on a comprehensive private-sector debt restructuring programme, involving the rescheduling of some US$60bn. of Indonesian corporate debt over 8 years and the extension by up to 4 years of Indonesian bank liabilities totalling US$9·2bn. The most important element of the deal was the creation of the Indonesian Debt Restructuring Agency which provided protection against foreign exchange risk covering up to US$60bn. in corporate debt.

There is a stock exchange in Jakarta.

Weights and Measures. The metric system is in use.

The following are the old weights and measures: *Pikol* = 136·16 lb. avoirdupois; *Katti* = 1·36 lb. avoirdupois; *Bau* = 1·7536 acres; *Square Pal* = 227 hectares = 561·16 acres; *Jengkal* = 4 yd; *Pal* (Java) = 1,506 metres; *Pal* (Sumatra) = 1,852 metres.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1994 was 16·27m. kW. There were 7 hydro-electric plants in 1989; 19,044 out of 66,594 villages are supplied with electricity in Java

and Sumatra. Production was 61·37bn. kWh in 1994. Consumption per capita was estimated at 276 kWh in 1995.

Oil and Gas. The importance of oil in the economy is declining. The 1995 output of crude oil was 1,476,000 bbls. Natural gas production, 1994, was 2,949,635m. cu. ft.

Minerals. The high cost of extraction means that little of the large mineral resources outside Java is exploited; however, there is copper mining in Irian Jaya, nickel mining and processing on Sulawesi, aluminium smelting in northern Sumatra. Open-cast coal mining has been conducted since the 1890s, but since the 1970s coal production has been developed as an alternative to oil. Reserves are estimated at 28,000m. tonnes. Coal production (1994, in tonnes) 28·6m. tonnes; bauxite, 1,342,400 tonnes; iron ore, 334·9; copper, 1,065·5; silver, 105,961 kg; gold, 44,843 kg; nickel ore, 2,302; tin, 30·6.

Agriculture. Agriculture contributed 16% of GDP in 1996. Production (1994, in 1,000 tonnes): Rice, 46,641; cassava, 15,729; maize, 6,869; sweet potatoes, 1,845; sugar-cane (1993), 32,400; coconuts (1993), 14m.; copra (1993), 1,100; palm oil, 1,930; palm kernels, 472; soybeans, 1,565; rubber (1993), 1,370; coffee, 43·7; groundnuts, 632; vegetables (1993), 4,912; fruits (1993), 7,341; tea, 97·4; tobacco (1993), 85. In 1991, 6,750 tonnes of nutmeg were produced, about 75% of world production.

Livestock (1996): Cattle, 11·93m.; buffaloes, 3·56m. (1995); horses, 727,000; sheep, 7·68m.; goats, 12·53m. (1995); pigs, 7·82m.; chickens, 650m. (1995).

Forestry. In 1995 the area under forests was 109·79m. ha, or 60·6% of the total land area (115·21m. ha and 63·6% in 1990). Approximately 46% of the forested area is scheduled for selective logging, 33% for preservation for national parks and watersheds and 21% for removal for agriculture, industry and settlement. The loss of 5·42m. ha between 1990 and 1995 was exceeded during the same period only in Brazil. In 1995, 185·89m. cu. metres of roundwood were cut, most of it fuelwood and charcoal.

Fisheries. In 1995 total catches were 4,118,000 tonnes, of which 3,296,310 tonnes were sea fish. In 1991 there were 130,712 motorized and 373,086 other fishing vessels.

INDUSTRY

Manufacturing contributed 14·9% of GDP in 1990. There are shipyards at Jakarta Raya, Surabaya, Semarang and Amboina. There were (1985) more than 2,000 textile factories (total production in 1987–88, 2,925·6m. metres), large paper factories (817,200 tonnes, 1986–87), match factories, automobile and bicycle assembly works, large construction works, tyre factories, glass factories, a caustic soda and other chemical factories. Production (1987–88): Cement, 22,419,000 tonnes; fertilizers, 5,811,000 tonnes; 160,372 motor vehicles and 249,573 motor cycles; 2·36m. boxes of matches; glasses and bottles, 126,060 tonnes; steel ingots, 1,337,000 tonnes; 640 TV sets and 159,020 refrigerators.

In 1996 the labour force was 93,618,000. National daily average wage, 1996, 4,073 rupiahs. Unemployment in 1998 reached 15·4m., or about 17% of the total workforce of 90m.

Trade Unions. Workers have a constitutional right to organize. Unions are expected to affiliate to the Indonesian Welfare Labour Union (SBSI) which enjoys government approval, but in Nov. 1990 an independent union, Setia Kawan (Solidarity) was set up. About 40% of the labour force belong to unions. In 1993 (and 1992) there were 169 (197) strikes involving 97,807 (98,764) workers and resulting in the loss of 857,845 (1,044,519) working hours. Strikes are forbidden by law. President Habibie lifted the ban on labour unions on 26 May 1998, and shortly afterwards an Indonesian Workers' Party was launched to challenge Golkar, the ruling party.

INTERNATIONAL TRADE

Since 1992 foreigners have been permitted to hold 100% of the equity of new companies in Indonesia with more than US$50m. part capital, or situated in remote

Pressure on Indonesia's currency and stock market led to an appeal to the IMF and World Bank for long-term support funds in Oct. 1997. A bail-out package worth US$38,000m. was eventually agreed on condition that Indonesia tightened financial controls and instituted reforms, including the establishment of an independent privatization board, liberalizing foreign investment, cutting import tariffs and phasing out export levies.

In civil law the population is divided into three main groups: Indonesians, Europeans and foreign Orientals, to whom different law systems are applicable. When, however, people from different groups are involved, a system of so-called 'inter-gentile' law is applied.

The present criminal law, which has been in force since 1918, is codified and is based on European penal law. This law is equally applicable to all groups of the population.

KEY HISTORICAL EVENTS
Persia was ruled by the Shahs as an absolute monarchy from the 16th century until 30 Dec. 1906, when the first constitution was granted and a national assembly established. After a coup in 1921, Reza Khan began his rise to power which culminated in his deposing the last Shah of the Qajar Dynasty on 31 Oct. 1925. He was declared Shah as Reza Shah Pahlavi on 12 Dec. 1925 and the country's name was changed to Iran on 21 March 1935. When in the Second World War Iran supported Germany, the Allies occupied the country and forced Reza Shah to abdicate on 16 Sept. 1941 in favour of his son, Muhammad Reza Pahlavi.

Iran's oil industry was nationalized in March 1951. This was an important part of the policy of the National Front Party, whose leader, Dr Muhammad Mussadeq, became prime minister in April 1951. He was opposed by the Shah, but although ousted in 1952, quickly regained power. The Shah fled the country temporarily until Aug. 1953 when the monarchists staged a coup which led to Mussadeq finally being deposed.

The Shah's policy, which included the redistribution of land to small farmers and the enfranchisement of women, was opposed by the Shia religious scholars who considered it to be contrary to Islamic teaching. This group was considered responsible for the assassination of the prime minister, Hassan Ali Mansur, in 1965.

Despite economic growth, the country suffered considerable unrest because of opposition to the Shah's harsh repressive measures and his extensive use of the Savak, the secret police. The opposition was widespread and that led by Ayatollah Ruhollah Khomeini, the Shia Moslem spiritual leader who had been exiled in 1965, was particularly successful. Following intense civil unrest in Tehran, the Shah left Iran with his family on 17 Jan. 1979 (and died in Egypt on 27 July 1980). The Ayatollah Khomeini returned from exile on 1 Feb. 1979 and appointed a provisional government on 5 Feb. The Shah's government resigned and parliament dissolved itself on 11 Feb. Following a referendum in March, an Islamic Republic was proclaimed on 1 April 1979. The constitution of the Islamic Republic, approved by a national referendum in Dec. 1979, gave supreme authority to a religious leader (*wali faqih*), a position to be held by Ayatollah Khomeini for the rest of his life. In Sept. 1980 war began with Iraq with destruction of some Iranian towns and damage to the oil installations at Abadan. A UN-arranged ceasefire took place on 20 Aug. 1988, and UN-sponsored peace talks continued in 1989. On 15 Aug. 1990, following Iraq's invasion of Kuwait, the Iraqi President Saddam Hussein offered peace terms and began the withdrawal of troops from Iranian soil.

In 1997 the election of Mohammad Khatami as president signalled a shift away from Islamic extremism. A clampdown on Islamic vigilantes who wage a violent campaign against western 'decadence' is the latest sign of a cautiously liberal integration of the constitution. But the conservative faction led by the spiritual leader Ayatollah Ali Khamenei retains huge power including the final say on defence and foreign policy. In Oct. 1998 elections to the Assembly of Experts, the country's supreme constitutional authority, returned conservatives in 63 of the 86 seats. Turnout was low. Apathy was blamed on the clergy-inspired screening process which resulted in two-thirds of the aspiring candidates, including all women, being rejected in advance. However, subsequent local government elections signalled a liberal reaction which encouraged President Mohammad Khatami to stamp down on abuse of power and violence against secular critics.

TERRITORY AND POPULATION
Iran is bounded in the north by Armenia, Azerbaijan, the Caspian Sea and Turkmenistan, east by Afghanistan and Pakistan, south by the Gulf of Oman and the

Persian Gulf, and west by Iraq and Turkey. It has an area of 1,648,000 sq. km (634,293 sq. miles), but a vast portion is desert. Population (1996 census): 60·1m. (1995, 59% urban). Population density: 36 per sq. km.

The UN gives a projected population for 2000 of 76·43m.

By 1992 there were 2m. refugees from Afghanistan in Iran; repatriation began in 1993, but in 1996 Iran still had 13·9% of the world's refugees and asylum-seekers.

CONSTITUTION AND GOVERNMENT

The Constitution of the Islamic Republic was approved by a national referendum in Dec. 1979. It gives supreme authority to the *Spiritual Leader* (*wali faqih*), which position was held by Ayatollah Khomeini until his death on 3 June 1989. Ayatollah Seyed Ali Khamenei was elected to succeed him on 4 June 1989. Following the death of the previous incumbent, Ayatollah Ali Khamenei was proclaimed the *Source of Knowledge (Marja e Taghlid)* at the head of all Shi'ite Moslems in Dec. 1994.

The 83-member *Assembly of Experts* was established in 1982. It is popularly elected every 8 years. Its mandate is to interpret the constitution and select the Spiritual Leader. Candidates for election are examined by the *Council of Guardians*.

The *Islamic Consultative Assembly* has 270 members, elected for a 4-year term in single-seat constituencies. All candidates have to be approved by the *Council of Guardians*.

The *President* of the Republic is popularly elected for not more than two 4-year terms and is head of the executive; he appoints Ministers subject to approval by the *Islamic Consultative Assembly (Majlis)*.

Legislative power is held by the 270-member Islamic Consultative Assembly, directly elected on a non-party basis for a 4-year term by all citizens aged 15 or over. The voting age of 15 in Iran is lower than in any other country. Two-thirds of the electorate is under 30. Voting is secret but ballot papers are not printed; electors must write the name of their preferred candidate themselves. 5 seats are reserved for religious minorities. All legislation is subject to approval by a 12-member *Council of Guardians* who ensure it is in accordance with the Islamic code and with the Constitution. The Spiritual Leader appoints 6 members, as does the judiciary.

National Anthem. 'Sar zad az ofogh mehr-e khavaran' ('Rose from the horizon the affectionate sun of the East'); words by a group of poets; tune by Dr Riahi.

RECENT ELECTIONS

Presidential elections held on 23 May 1997 produced a landslide vote for Mohammad Khatami, who favours greater freedom and adherence to the rule of law. There were 4 candidates. Turn-out was 14m. Mohammad Khatami was elected with 69% of votes cast.

In March 1999, the first municipal and village elections since 1979 returned moderate candidates for most of the 200,000 contested council seats.

DEFENCE

Two years' military service is compulsory. Military expenditure totalled US$4,695m. in 1997, down from US$20,258m. in 1985. The 1997 spending represented 6·6% of GDP, compared to 36·0% in 1985. The expenditure in 1997 was equivalent to US$68 per capita.

Nuclear weapons. Although Iran is a member of the Non-Proliferation Treaty (NPT), it may be developing weapons using its nuclear power programme.

Army. The Army is organized in 4 armoured, 2 special force and 7 infantry divisions, 1 airborne brigade, some independent armoured, infantry and commando brigades, and 5 artillery groups. Equipment includes some 110 T-54/-55, 220 Chinese T-59, 150 T-62, 200 T-72, 250 Chieftain Mk 3/5, 150 M-47/-48, 160 M-60A1 and 200 Chinese T-69 main battle tanks and 664 multiple rocket launchers. The Army is estimated to have an inventory of 50 fixed-wing aircraft and over 200 helicopters but the effective strength is not known. There are reports of Iran developing non-conventional long-range missiles.

Strength (1997): 350,000 (about 250,000 conscripts). There is also a paramilitary gendarmerie of 120,000, including border guards.

Revolutionary Guard. The ground forces are loosely organized in battalions of no fixed size, and are grouped into 13 infantry and 2 armoured divisions plus other independent units. It controls the *Basij*, a volunteer 'popular mobilization army' of about 0·2m., which may reach 1m. strong in wartime.

Strength (1996): 100,000 ground forces and 20,000 naval.

Navy. The Navy received the first 2 of 3 Soviet-built 'Kilo' class submarines in late 1993, but these suffered battery problems and the third was not delivered until the end of 1996. The remainder of the fleet comprises 2 ex-US 'Sumner' class destroyers, 3 UK-built frigates, 2 very old ex-US patrol frigates, and 10 French-built and 10 new Chinese-built missile craft. Other units include 35 inshore patrol craft (some of them hovercraft), 3 small minesweepers, 7 tank landing ships and 3 tank landing craft. Auxiliaries include 3 replenishment tankers, 1 repair ship, 4 water tankers and 2 accommodation ships.

Naval Aviation comprises 1 anti-submarine helicopter squadron with 9 Sea King and AB-212 helicopters, a mine counter-measures squadron with 2 RH-53D helicopters, a transport squadron with about a dozen various aircraft and about 20 AB-205 and AB-206 transport and liaison helicopters. The main naval bases are at Bandar-e-Abbas, Bushehr and Chah Bahar.

Air Force. Combat aircraft include some Chinese-built F-6 fighter-bombers and F-7 interceptors, surviving US fighters that include F-14 Tomcat, F-5E Tiger II and F-4D/E Phantom II fighter-bombers, as well as a few RF-4E reconnaissance-fighters, and a number of MiG-29 interceptors and Su-24 strike aircraft purchased from

Russia. Transport aircraft include F27s, C-130 Hercules, PC-6 Turbo-Porters, Boeing 707s and 747s, some equipped as flight refuelling tankers. The status of the large fleet of CH-47C Chinook, Bell Model 214 and other helicopters is not known; but two P-3F Orion maritime patrol aircraft remain operational. Training aircraft include Pakistani-built Mushshak and Bonanza basic trainers and French-built Socata light aircraft, 30 PC-7 Turbo-Trainers and 15 Tucanos for advanced training.

Strength (1996): 30,000 personnel (about 12,000 air defence).

INTERNATIONAL RELATIONS

Relations between Iran and Afghanistan have deteriorated as Taliban militants gain ground against government forces supported by Iran. Threats of war were provoked in Oct. 1998 after the Taliban, the militant Islamic movement in Afghanistan, allegedly killed 6 Iranian diplomats and a journalist during the capture of Mazar i Sharif, Afghanistan's 4th largest city, and Bamiyan, one of the last strongholds of the Iranian-backed Shia Muslims. Border clashes were reported on 8 Oct. near the north-eastern city of Torbat-e-Jam; 1·5m. Afghan refugees, mostly from the Shia minority, fled to Iran.

Iran is a member of the UN, OPEC, ECO and the Colombo Plan.

ECONOMY

Policy. A 5-year plan, the Second Five-Year Development Plan (SFYDP), is running from March 1995. At the beginning of 1991 about 70% of industry was state-owned, much of it nationalized after the 1979 revolution, but the government is now committed to partial privatization. Strategic heavy industry will remain in the public sector.

Performance. Real GDP growth was 4·2% in 1995 (0·7% in 1994).

Budget. Total revenue and expenditure for 1998–99 (in 1,000m. rials) is put at 231,200, an increase of 20% over the 1997–98 budget. The accuracy of budget figures is questionable given the policy of dividing the budget into 2 parts: the first covering ministerial expenditure, the second dealing with state banks and industries, which receive allocations by the expediency of printing money.

Currency. The unit of currency is the *rial* (IRR) of which 10 = 1 *toman*. The value of the rial has fallen from IRR 70 to the US$ in 1979 to a low of IRR 4,630 in 1997. Gold reserves were 5·42m. troy oz. in March 1996. Inflation in Aug. 1998 was running at 20%. Total money supply in Oct. 1997 was 60,706m. rials.

Banking and Finance. The Central Bank is the note-issuing authority and government bank. Its *Governor* is Moshen Nurbakhach. All other banks and insurance companies were nationalized in 1979, and re-organized into new state banking corporations, of which there were 5 in 1994. Private banks were permitted to operate from 1994; their initial capital must be at least 5,000m. rials. The 'Law for Usury-Free Banking' dates from 1983. In 1985 interest on accounts was abolished.

A stock exchange re-opened in Tehran in 1992.

Weights and Measures. The metric system is in force.

Calendar. The Iranian year is a solar year running from 21 March to 20 March. The current solar year is 1378 (21 March 1999 to 20 March 2000). The Islamic *hegira* (622 AD, when Mohammed left Mecca for Medina) year 1420 corresponds to 17 April 1999–10 April 2000, and is the current lunar year.

ENERGY AND NATURAL RESOURCES

Electricity. Total installed capacity in 1996: 22,420,000 kW.; production, 85,825m. kWh (62,364m. steam, 15,475m. gas and combined, 7,376m. hydro-electric, 610m. diesel). Consumption per capita in 1995 was estimated to be 1,137 kWh.

Oil and Gas. Iran has 8·9% of proven global oil reserves. Oil is its chief source of revenue. The main oilfields are in the Zagros Mountains where oil was first discovered in 1908. Oil companies were nationalized in 1979 and operations of crude oil and natural gas exploitation are now run by the National Iranian Oil Company. Refining operations of crude oil are run by the National Company for

Refining and Distribution of Oil Products. Iran produced 5·5% of the world total oil output in 1996, and had reserves amounting to 93·0bn. bbls. in 1996.

Crude oil production (1995): 3,625,000 bbls. a day. Refining capacity (1990): 766·9 bbls. a day. Petroleum production (1996): 3,595,000 bbls. a day.

Iran has nearly one fifth of proven global gas reserves. A deal reached in Nov. 1997 between Gazprom, the Russian gas company, and Total, the French energy group, involves the investment of US$2,000m. into the development of a gas field.

In Dec. 1997 the first national gas pipeline linking Iran with the Caspian Sea via Turkmenistan was opened. The 200-km line links gas fields in western Turkmenistan to industrial markets in northern Iran.

Natural gas production (1994): 95,691m. cu. metres.

Minerals. Output (1996, in tonnes): Iron ore, 5,236,259; coal, 1,211,403; zinc and lead, 321,766; copper, 370,234; manganese, 82,694; chromite, 322,367; salt, 1,410,644; bauxite, 230,420; decorative stone, 6,120,071.

Agriculture. Agriculture accounts for approximately 25% of GDP. In 1998 cultivable land totalled 14,001,279 ha: 12,001,514 ha were under annual crops (of which 5,789,530 ha were irrigated). In 1998 there were 1,879,128 ha and 120,637 ha of productive and non-productive orchards and nurseries respectively.

Livestock (1996): 51·5m. sheep, 25·7m. goats (1995), 8·49m. cattle, 440,000 buffaloes (1995), 1·4m. asses, 186m. chickens (1995).

Forestry. Approximately 11% of Iran is forested, much of it in the Caspian region. Timber production in 1995 was 7·46m. cu. metres.

Fisheries. In 1995 total catches were 368,300 tonnes (251,000 tonnes from sea fishing).

INDUSTRY

Major industries: petrochemical, automotive, food, beverages and tobacco, textiles, clothing and leather, wood and fibre, paper and cardboard, chemical products, non-metal mining products, basic materials, machinery and equipment, copper, steel and aluminium. The textile industry uses local cotton and silk; carpet manufacture is an important industry. The country's steel industry is the largest in the Middle East.

Production of selected commodities in large-scale manufacturing establishments with 50 workers and more (1996): Sugar, 636,616 tonnes; stockings, 8·3m. pairs; machine-made bricks, 2,984m.; cement, 16,441,701 tonnes. Labour. The economically active population numbered 16m. in 1996-97, of which 14·6m. were employed. In Aug. 1998 unemployment was 11%.

INTERNATIONAL TRADE

There had been a limit on foreign investment, but legislation of 1995 permits foreign nationals to hold more than 50% of the equity of joint ventures with the consent of the Foreign Investment Board. Foreign debt was US$21,183m. in 1996.

Imports and Exports. Iran's main trading partners are Germany, Japan and Italy for imports; and Japan, the UK and USA for exports. Exports (1996, in US$1m.) totalled 22,496; imports 14,973. Main imports: machinery and motor vehicles, iron and steel, chemicals, pharmaceuticals, food. Main exports: oil, carpets, pistachios, leather and caviar. KEY HISTORICAL EVENTS

Iraq, formerly Mesopotamia, was part of the Ottoman Empire from 1534 until it was captured by British forces in 1916. Under a League of Nations mandate, administered by Britain, Amir Faisal Ibn Hussain was crowned king in 1921. On 3 Oct. 1932 Britain's mandate expired, and Iraq became an independent country. The pro-British policy was continued, and in Jan. 1943 Iraq declared war on the Axis powers.

The ruling Hashemite dynasty was overthrown by an armed coup led by a group of army officers on 14 July 1958. King Faisal II and his uncle, the ex-Regent the Emir Abdul Ilah, and Nuri al Said, the prime minister, were killed. A republic was established, controlled by a military-led Council of Sovereignty under Gen. Qassim. The republican regime terminated the adherence of Iraq to the Arab Federation, which Iraq and Jordan had formed in Feb. 1958.

In 1963 Qassim was overthrown, and Gen. Abdul Salam Aref became president, with a partial return to a civilian government. In 1966 Abdul Rahman Aref succeeded his brother as president, but on 17 July 1968 a successful coup was mounted by the Ba'ath Party and Gen. Ahmed Al Bakr became president, prime minister, and chairman of a newly established ruling 9-member Revolutionary Command Council. In July 1979 Saddam Hussein, the vice-president, became president in a peaceful transfer of power.

In Sept. 1980 Iraq invaded Iran in a dispute over territorial rights in the Shatt-al-Arab waterway which developed into a full-scale war. A UN-arranged ceasefire took place on 20 Aug. 1988 and UN-sponsored peace talks continued in 1989. On 15 Aug. 1990 Iraq offered peace terms and began the withdrawal of troops from Iranian soil.

Early on 2 Aug. 1990 Iraqi forces invaded and rapidly overran Kuwait, meeting little resistance. The Amir escaped to Saudi Arabia. President Saddam declared the annexation of Kuwait on 8 Aug.

On 6 Aug. the UN Security Council voted by 13 to nil with 2 abstentions (Cuba and Yemen) to impose total economic sanctions on Iraq until it withdrew from Kuwait. On 7 Aug. the USA announced it was sending a large military force to Saudi Arabia at the latter's request to prevent a further Iraqi invasion of the area, and the UK made a similar commitment the following day. Various other countries announced the despatch of forces and equipment to this coalition force, including 12 Arab League countries on 10 Aug.

Measures to secure Iraq's withdrawal from Kuwait were given international legal sanction by a UN Security Council Resolution of 25 Aug. (by 13 votes to nil), authorizing a naval blockade of Iraq under UN auspices. Further Security Council resolutions included (25 Sept., by 14 votes to 1) an air embargo of Iraq and (29 Oct., 13–nil), a call for compensation to be paid by Iraq to states for losses resulting from the invasion of Kuwait. A 12th resolution of 29 Nov. (12 in favour, Cuba and Yemen against, China abstaining) authorized the use of military force if Iraq did not withdraw by 15 Jan. 1991.

On the night of 16–17 Jan. coalition forces began an air attack on strategic targets in Iraq. A land offensive followed on 24 Feb. The Iraqi army was routed and sustained massive destruction. Kuwait City was liberated on 27 Feb. and on 28 Feb. Iraq agreed to the conditions of a provisional cease-fire, including withdrawal from Kuwait.

On 3 April 1991 the UN Security Council adopted a permanent cease-fire resolution by 12 votes to 1 (Cuba) with 2 abstentions (Ecuador, Yemen). This provided for Iraq and Kuwait to respect the disputed border, the UN to demarcate it, and the Security Council to guarantee it. A UN observer force was to monitor a demilitarized zone extending 10 km into Iraq and 5 km into Kuwait. Iraq accepted

the destruction of all chemical and biological weapons and nuclear weapons-usable material, under international supervision, and liability for damages arising from its invasion of Kuwait.

Insurrections amongst Shi'ites in the south and Kurds in the north were put down by government forces. A massive exodus of Kurdish refugees to the borders of Iran and Turkey followed. International relief operations were succeeded in April by the establishment of 'safe havens' for refugees within Iraqi borders policed by US and other coalition troops. Kurdish opposition leaders began talks with the Iraqi government at the end of April, and refugees began to move from the border areas into camps in north Iraq under the supervision of US, UK and other coalition forces. In May 1991 a UN Security Council resolution adopted by 14 votes to 1 (Cuba) provided for a fund to compensate victims for damage caused during the Iraqi invasion of Kuwait. The fund is based at Geneva, administered by a council of representatives of all the Security Council members, and supplied from not more than 30% of Iraqi oil-export earnings. Iraq denounced the resolution as illegal, but said it would comply with it as it had no choice. Following a UN-Iraqi agreement, about 500 UN security guards were brought in to protect Kurds in the north in June 1991. Coalition forces in Iraq withdrew in 1991, leaving only air forces based in Turkey.

In Sept. a UN Security Council resolution adopted by 13 votes to 1 (Cuba) with 1 abstention (Yemen) permitted Iraq to sell oil worth US$1,600m. to pay for food and medical supplies and start a reparations fund. In Oct. the Security Council voted unanimously to prohibit Iraq from all nuclear activities except medical. Imports of materials used in the manufacture of nuclear, biological or chemical weapons are banned, and UN inspectors have received wide powers to examine and retain data throughout Iraq.

In Aug. 1992 the USA, UK and France began to enforce an air exclusion zone over southern Iraq in response to the government's persecution of Shi'ite Moslems. Following Iraqi violations of this zone, and incursions over the Kuwaiti border, US, British and French forces made air and missile attacks on Iraqi military targets in Jan. 1993. On 27 June 1993 US forces made a missile attack on an intelligence centre in Baghdad in retaliation for an attempt on former US President Bush's life while he was visiting Kuwait in April. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait. In the first half of 1995 UN weapons inspectors secured information on an extensive biological weapons programme.

An agreement between the UN and Iraq of 20 May 1996 (renewed in June 1997) permitted Iraq to export crude oil worth US$2,000m. in order to purchase foodstuffs and medicine.

At the beginning of Sept. 1996 Iraqi troops occupied the town of Arbol in a Kurdish safe haven in support of the Kurdish Democratic Party faction which was at odds with another Kurdish faction, the Patriotic Union of Kurdistan. On 3 Sept. 1996 US forces fired missiles at targets in southern Iraq and extended the no-fly area northwards to the southern suburbs of Baghdad (33rd parallel).

Relations with the USA deteriorated still further in 1997 when Iraq refused co-operation with UN weapons inspectors. On 29 Oct. the Iraqi Revolutionary Command Council announced that it had 'postponed' a decision to stop working with UNSCOM, the UN commission responsible for the destruction of Iraq's ballistic, chemical and biological weapons programmes, but it went on to demand that there should be no American nationals among the UN inspectors. The UN team suspended its operations in Iraq and the Security Council warned Saddam Hussein of 'serious consequences' if he carried out his threat to expel the Americans.

While the USA and the UK threatened retaliatory action, the larger Arab countries with Russia, China and France urged compromise. However, a renewal of hostilities looked probable until late Feb. 1998 when Kofi Annan, the UN Secretary General, forged an agreement in Baghdad allowing for 'immediate, unconditional and unrestricted access' to all suspected weapons sites. Then, in Aug. 1998, Saddam Hussein engineered another stand-off with the UN arms inspectors, demanding a declaration that Iraq had rid itself of all weapons of mass destruction. This the UN chief inspector refused to do. Co-operation was suspended, an act that was condemned by the UN Security Council. In Nov., all UN personnel left Iraq as the USA threatened air strikes unless Iraq complied with UN resolutions. Russia and France urged further diplomatic efforts, but on 16 Dec. the USA and Britain

launched air and missile attacks aimed at destroying Sadaam Hussein's arsenal of nuclear, chemical and biological weapons. In all, 97 targets were destroyed. In the aftermath, the USA and Britain continued attacks on selected military and communication targets while encouraging the Iraqi opposition and tightening the trade embargo.

KEY HISTORICAL EVENTS

With the collapse of the Roman empire, Ireland developed its own Gaelic culture and language. But from the 12th century, the English dominated. Vast tracts of land were granted to English settlers and English law was introduced. In 1541, Henry VIII was recognized as King of Ireland. Most Irish remained Roman Catholic and in the reign of Elizabeth insurrection broke out against the Protestant overlords. In the early 17th century Scottish settlers in the north of Ireland established a strong Protestant enclave which led to rebellion in 1640. After 1649 Cromwell restored English domination. Irish resistance was brought to a bloody conclusion by the Battle of the Boyne (1690).

For over a century, the Roman Catholic majority had no share in government. The 1801 Act of Union gave Ireland representation at Westminster but opposition to British rule was reinforced in 1846 when the failure of the potato harvest and the apparent unwillingness of Britain to provide aid led to widespread famine. The subsequent mass emigration, chiefly to the United States, further damaged the Irish economy and intensified demands for Home Rule. In the north, however, Home Rule was bitterly opposed by the Protestant interest. In 1898 the Ulster Unionist party was set up to campaign for the right to remain part of the UK.

In April 1916 an insurrection against British rule took place and a republic was proclaimed. The armed struggle was renewed in 1919 and continued until 1921. The independence of Ireland was reaffirmed in Jan. 1919 by the Irish Parliament (*Dáil Éireann*), elected in Dec. 1918.

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the 6 counties accepted this scheme, and a Northern Parliament was duly elected on 24 May 1921. The rest of Ireland, however, ignored the Act.

On 6 Dec. 1921 a treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status subject to the right of Northern Ireland to opt out. This right was exercised, and the border between the Irish Free State (26 counties) and Northern Ireland (6 counties) was fixed in Dec. 1925 as the outcome of an agreement between Great Britain, Ireland and Northern Ireland.

Subsequently the constitutional links between Ireland and the UK were gradually removed by the *Dáil*. The remaining formal association with the British Commonwealth by virtue of the External Relations Act, 1936 was severed when the Republic of Ireland Act, 1948 came into operation on 18 April 1949.

Ireland joined the European Economic Community in 1973 and has since benefitted enormously from inward investment leading to strong economic growth.

In the mid-1950s, the Irish Republican Army, which had led a violent campaign for Irish unity in the 1920s, re-emerged as a fighting force with a bombing campaign in Northern Ireland. Differences between the two religious communities intensified to the point, in 1969, when British troops had to be deployed to keep the peace. In 1972, the Unionist government in Belfast resigned and direct rule from London was imposed. By 1984 sectarian violence had accounted for the deaths of 2,400 civilians and 700 members of the security forces.

On 22 Feb. 1995 the Irish and British Prime Ministers (John Bruton and John Major) announced joint proposals for a settlement in Northern Ireland which envisaged: An elected single-chamber 90-member Northern Ireland Assembly; a north-south body comprising members of the assembly and representatives of the Irish government; and changes to the Irish constitution to withdraw the Republic's territorial claim to Northern Ireland if it were contrary to the will of a majority of its people. Under the chairmanship of former US Senator George Mitchell, a marathon

negotiating struggle on 9–10 April 1998 led to a framework for sharing power designed to satisfy Protestant demands for a reaffirmation of their national identity as British, Catholic desires for a closer relationship with the predominantly Catholic Republic of Ireland and Britain's wish to return to Northern Ireland the powers London assumed in 1972 when the local Stormont legislature was disbanded.

In the referendum on 22 May 1998, 94·4% of votes in the Republic and 71·12% in Northern Ireland were cast in favour of the Good Friday peace agreement.

For details of recent peace negotiations turn to the section on Northern Ireland on page 1655.

CLIMATE

Influenced by the Gulf Stream, there is an equable climate with mild south-west winds, making temperatures almost uniform over the whole country. The coldest months are Jan. and Feb. (39–45°F, 4–7°C) and the warmest July and Aug. (57–61°F, 14–16°C). May and June are the sunniest months, averaging 5·5 to 6·5 hours each day, but over 7 hours in the extreme S.E. Rainfall is lowest along the eastern coastal strip. The central parts vary between 30–44" (750–1,125 mm), and up to 60" (1,500 mm) may be experienced in low-lying areas in the west. Dublin, Jan. 40°F (4°C), July 59°F (15°C). Annual rainfall 30" (750 mm). Cork, Jan. 42°F (5°C), July 61°F (16°C). Annual rainfall 41" (1,025 mm).

CONSTITUTION AND GOVERNMENT

Ireland is a sovereign independent, democratic republic. Its parliament exercises jurisdiction in 26 of the 32 counties of the island of Ireland. The first Constitution of the Irish Free State came into operation on 6 Dec. 1922. Certain provisions which were regarded as contrary to the national sentiments were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from the original document. On 14 June 1937 a new Constitution was approved by Parliament and enacted by a plebiscite on 1 July 1937. This Constitution came into operation on 29 Dec. 1937. Under it the name Ireland (Éire) was restored. It states that the whole island of Ireland is the national territory, but that, pending its reintegration, laws enacted by Parliament have the same area and extent of application as those of the former Irish Free State.

The head of state is the *President*, whose role is largely ceremonial, but who has the power to refer proposed legislation which might infringe the Constitution to the Supreme Court.

The *Oireachtas* or National Parliament consists of the President, a House of Representatives (*Dáil Éireann*) and a Senate (*Seanad Éireann*). The *Dáil*, consisting of 166 members, is elected by adult suffrage on the Single Transferable Vote system in constituencies of 3, 4 or 5 members. Of the 60 members of the Senate, 11 are nominated by the *Taoiseach* (Prime Minister), 6 are elected by the universities and the remaining 43 are elected from 5 panels of candidates established on a vocational basis, representing the following public services and interests: (1) national language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) agricultural and allied interests, and fisheries; (3) labour, whether organized or unorganized; (4) industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) public administration and social services, including voluntary social activities. The electing body comprises members of the *Dáil*, Senate, county boroughs and county councils.

A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

No amendment of the Constitution can be effected except with the approval of the people given at a referendum.

Fianna Fáil gained 7 seats (group in European Parliament: Union for Europe); Fine Gael, 4 (European People's Party); Greens, 2 (Green Group); Labour, 1 (European Socialist Party); independent, 1 (Liberal/ELDR).

CURRENT ADMINISTRATION

President: Mary McAleese (b. 1951), elected out of 5 candidates on 30 Oct. 1997 and inaugurated 11 Nov. 1997.

A new coalition Government was formed on 26 June 1997 between Fianna Fáil (FF) and The Progressive Democrats (PD). In March 1999 it comprised:

Taoiseach (Prime Minister): Bertie Ahern (b. 1951; FF). *Tánaiste (Deputy Prime Minister), Minister for Enterprise and Employment:* Mary Harney (b. 1953; PD). *Finance:* Charlie McCreevy (b. 1949; FF). *Social, Community and Family Affairs:* Dermot Ahern (b. 1955; FF). *Justice, Equality and Law Reform:* John O'Donoghue (b. 1956; FF). *Environment and Rural Development:* Noel Dempsey (b. 1953; FF). *Defence:* Michael Smith (b. 1940; FF). *Agriculture, Forestry and Food:* Joe Walsh (b. 1943; FF). *Tourism and Trade:* Dr. Jim McDaid (b. 1949; FF). *Transport, Energy and Communications:* Mary O'Rourke (b. 1937; FF). *Arts, Culture, Gaeltacht and the Islands:* Síle de Valera (b. 1954; FF). *Health and Children:* Brian Cowen (b. 1960; FF). *Education, Science and Technology:* Micheál Martin (b. 1960; FF). *Marine and Natural Resources:* Michael Woods (b. 1935; FF). *Foreign Affairs:* David Andrews (b. 1935; FF).

There are 17 Ministers of State.

Attorney-General: David Byrne, SC.

Local Government. The elected local authorities comprise 29 county councils, 5 county borough corporations, 5 borough corporations, 49 urban district councils and 26 Boards of Town Commissioners. All the members of these authorities are elected under a system of proportional representation, normally every 5 years. All residents of an area who have reached the age of 18 and whose names appear on the register of electors are entitled to vote in the local election for their area. Elected members

are not paid, but provision is made for the payment of travelling expenses and subsistence allowances.

The range of services for which local authorities are responsible is broken down into 8 main programme groups as follows: Housing and Building; Road Transportation and Safety; Water Supply and Sewerage; Development Incentives and Controls; Environmental Protection; Recreation and Amenity; Agriculture, Education, Health and Welfare; Miscellaneous Services. Because of the small size of their administrative areas the functions carried out by town commissioners and some of the smaller urban district councils have tended to become increasingly limited, and the more important tasks of local government have tended to become the responsibility of the county councils.

The local authorities have a system of government which combines an elected council and a whole-time manager. The elected members have specific functions reserved to them which include the striking of rates (local tax), the borrowing of money, the adoption of development plans, the making, amending or revoking of bye-laws and the nomination of persons to other bodies. The managers, who are paid officers of their authorities, are responsible for the performance of all functions which are not reserved to the elected members, including the employment of staff, making of contracts, management of local authority property, collection of rates and rents and the day-to-day administration of local authority affairs. The manager for a county council is manager also for every borough corporation, urban district council and board town commissioners whose functional area is wholly within the county.

At the elections of June 1991 at city and county council level, 883 seats were contested. Fianna Fáil won 357 seats with 38% of votes cast, Fine Gael 270 with 26%, Labour 90 with 11%, the Progressive Democrats 37 with 5%, the Workers' Party 24 with 4%, the Greens 13 with 2%, and Sinn Féin 7 with 2%. Independents gained 85 seats.

DEFENCE

Supreme command of the Defence Forces is vested in the President. Exercise of the supreme command is regulated by law (Defence Act 1954). Military Command is exercised by the government through the Minister for Defence who is the overall commander of the Defence Forces.

The Defence Forces comprise the Permanent Defence Force (the regular Army, the Air Corps and the Naval Service) and the Reserve Defence Force (comprising a First Line Reserve of members who have served in the Permanent Defence Force, a second-line Territorial Army Reserve and a second-line Naval Reserve). A review of the Reserve Forces is currently being carried out. The total strength of the Permanent Defence Force in 1997 averaged 11,750. The total strength of the Reserve in 1998 averaged 14,000. The Defence Forces supplied an average of 750 personnel to 14 peace-support missions throughout the world in 1998.

Defence expenditure in 1997 totalled US$767m. (US$210 per capita), representing 1·0% of GDP.

Army. The Army is organized in 3 brigades, each with a territorial responsibility. The brigades are identical in organization and include 3 infantry battalions, a field artillery regiment, a cavalry squadron, a field engineer company, a field communications company, a military police company and a logistics support batallion which provides transport, medical, ordnance, catering and administrative services. A Training Centre at the Curragh, Co. Kildare provides military training and education for personnel of the Defence Forces. A Logistics Base, with elements located at the Curragh and Dublin provides force level logistical support. The average army strength in 1998 was 9,600 personnel.

Navy. The Naval Service, based at Haulbowline in Co. Cork, comprises 6 offshore patrol vessels and 1 helicopter patrol vessel. Two Dauphin helicopters (operated by the Air Corps) for use from the helicopter patrol vessel and 2 maritime reconnaissance aircraft are deployed for fishery protection and other duties. A contract for an additional Fishery Protection Vessel was placed in Dec. 1997, and delivery is expected in late 1999. The average Naval Service strength in 1998 was 1,000 personnel.

Air Corps. The Air Corps has its headquarters in Dublin and has 2 other bases. Most of the Corps' technical and administrative services are located at Casement

Aerodrome, Baldonnel, Co. Dublin which is the main centre for flying and technical training. Fixed-wing aircraft types in service include 4 Fouga Magister armed jet trainers, 7 SIAI Marchetti SF 260W armed piston-engined trainers, 7 Cessna F 172 reconnaissance aircraft, 2 CASA CN 235 maritime patrol aircraft and 1 Beech Super Kingair and 1 Gulfstream G IV aircraft for VIP transport. The Corps also has 7 Alouette III, 5 Dauphin and 2 Gazelle helicopters in use. The Air Corps currently operates 1 PBN Defender 4000 and 1 Squirrel SA 355N on behalf of the Gardai Siochana. A review of the Naval Service and Air Corps was completed in mid-1998 and Implementation Plans for the re-organization of both are being drawn up. The average Air Corps strength in 1998 was 1,000 personnel.

INTERNATIONAL RELATIONS

Ireland is a member of the UN, OECD, the Council of Europe and the EU.

VAT is 21% (reduced rate 12·5%).

Total Public Capital Programme Expenditure amounted to IR£3,640m. in 1997, with provision for IR£4,324m. in 1998. On 31 Dec. 1996 the National Debt amounted to IR£29,912m. of which IR£21,193m. was denominated in Irish pounds and IR£8,718m. in foreign currencies. The official external reserves of the Central Bank of Ireland amounted to IR£5,092m. at the end June of 1997. Ireland is the largest recipient of EU aid per head of population.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Ireland and the *Irish pound* became a subdivision of it; irrevocable conversion rate 0·787564 Irish pounds to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002. There will be 7 euro notes in different colours and sizes

denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking, by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and Irish pounds until the Irish pound is withdrawn from circulation—which must be by 1 July 2002.

The *Irish pound* (IEP) or *punt Éireannach* consists of 100 *pence*. From 10 Sept. 1928 when the first Irish legal-tender notes were issued, the Irish currency was linked to Sterling on a one-for-one basis. This relationship was discontinued on 30 March 1979 when, following Ireland's adherence to the EMS (which it had joined on its inception on 13 March 1979), it became inconsistent with Ireland's obligations. The Central Bank has the sole right of issuing legal tender notes; token coinage is issued by the Minister for Finance through the Bank. The volume of legal-tender notes outstanding on 30 June 1997 was IR£2,213m. The Irish pound was realigned within the ERM on 30 Jan. 1993 with bilateral central rates of the IR£ against other ERM currencies being reduced by 10% effective 1 Feb. Inflation was forecast to be 2·6% in 1998 (1·4% in 1997). Gold reserves were 360,000 troy oz. in Feb. 1998 and foreign exchange reserves were US$6,019m.

Banking and Finance. The Central Bank (founded in 1943), replaced the Currency Commission as the note-issuing authority. The Central Bank has the power of receiving deposits from banks and public authorities, of rediscounting Exchequer bills and bills of exchange, of making advances to banks against such bills or against Government securities, of fixing and publishing rates of interest for rediscounting bills, or buying and selling certain Government securities and securities of any international bank or financial institution formed wholly or mainly by governments. The Bank also collects and publishes information relating to monetary and credit matters. The Central Bank Acts, 1971, 1989 and 1997, together with the Building Societies Act, 1989, the Investment Intermediaries Act, 1995 and the Stock Exchange Act, 1995, give further powers to the Central Bank in the regulation and supervision of financial institutions and payment systems. The capital of the Bank is IR£40,000, of which IR£24,000 has been paid up and is held by the Minister for Finance.

The Board of Directors of the Central Bank consists of a Governor, appointed for a 7-year term by the President on the advice of the Government, and 9 directors, all appointed by the Minister for Finance. The Governor is Maurice O'Connell (b. 1937; appointed 1994).

At 31 Dec. 1996 there were 42 credit institutions authorized to carry on banking business in the State; 5 building societies and 3 State banks, ICC Bank, ACC Bank and the Trustee Savings Bank. In addition there were 13 credit institutions authorized in another Member State of the European Union operating in Ireland.

At 31 Dec. 1996 total assets of within-the-State offices of all credit institutions amounted to IR£67bn.

The Dublin stock exchange has been affiliated to the London exchange since 1973.

Weights and Measures. Conversion to the metric system is in progress; with some exceptions which are confined to the domestic market, all imperial units of measurement ceased to be legal, for general use, after 31 Dec. 1994.

ENERGY AND NATURAL RESOURCES

Electricity. The total generating capacity was (1997) 4,297 MW. In 1996 the total sales of electricity amounted to 16,726m. units supplied to 1,483,740 customers. Production in 1995 totalled 17·9bn. kWh; consumption per capita in 1995 was an estimated 4,343 kWh.

Oil and Gas. Over 0·6m. sq. km of the Irish continental shelf has been designated an exploration area for oil and gas; at the furthest point the limit of jurisdiction is 520 nautical miles from the coast. It has been established that there is potential for discoveries both offshore and onshore. In the offshore there is a vast Continental Shelf in which 13 major basins and troughs have been identified. Much of the shelf remains unexplored but from 1971 to date 129 exploration wells have been drilled, and since 1965 a total of 348 separate surveys have been carried out from which

approximately 316,000 line kilometres of seismic data has been produced since 1985.

A number of encouraging oil and gas flows have been recorded, including the Corrib North Prospect in the Slyne/Erris Trough and '7 Heads' and 'Helvick' fields which are located in the Celtic Sea. In Nov. 1992 revised licensing terms were issued which allowed for a range of generous allowances against tax. In 1994 a Frontier Licensing Round in the Erris and Slyne Troughs resulted in the award of five licences over 28 blocks. A further 8 licences over 32 blocks were awarded under the Porcupine Basin Frontier Licensing Round in 1995.

Eleven licences were awarded over 58 full and part blocks under the Petroleum Exploration round in the Rockall Trough in June 1997. The area in the Round covered 615 full and 35 part blocks in an area of almost 150,000 sq. km. The Rockall Trough lies some 100 to 650 km west of Ireland with water depths ranging from 500 metres to 2,500 metres.

Comprehensive work programmes will be undertaken that will ensure licensed areas are fully explored. Up to 18,000 km of new 2D seismic, and up to 2,000 sq. km of 3D seismic data will be acquired and assessed by the end of the first four years of the licences.

An invitation was issued to interested petroleum companies to apply for a Lease Undertaking over the 'Seven Heads' oil and gas accumulation in the Celtic Sea. The area which covers almost 520 sq. km has been closed to the granting of authorizations since March 1997.

At the same time details of a Petroleum Licensing Round in the South Porcupine Basin were also announced. The acreage on offer covers 156 blocks in the Irish offshore—an area of over 5,000 sq. km. Due to the special difficulties created by the physical environment of the area, it has been designated as a Frontier Area. Long term licences for a period of 15 years will be granted.

The South Porcupine Basin lies off the south-west coast of Ireland. Water depths vary from 200 metres in the east to over 2,500 metres in the south-west.

An Onshore Petroleum Prospecting Licence was issued for a three year period from 1 Dec. 1997 covering 1,960 km of the Northwest Carboniferous Basin in counties Sligo, Leitrim, Roscommon, Cavan and Monaghan.

These steps in conjunction with the maintenance of Ireland's 'open door' approach to licensing, its favourable environment and existing tax regime achieves a risk/reward balance which reflects Ireland's circumstances and acknowledges the realities of competition for internationally mobile exploration and production investment.

In 1997 consumption of natural gas was 3,400m. cu. metres, of which 70% came from the Kinsale Head gas field, 50 km off the south coast, and the smaller Ballycotton field about 16 km north-west of Kinsale Head field, which was discovered in 1989 and which went into production in July 1991. These gas reserves are expected to be exhausted by the year 2003. Gas transmission and distribution is carried out by Bord Gais Eireann (Irish Gas Board). A gas pipeline from County Dublin to south-west Scotland was completed in 1994. 30% of gas used in 1997 was imported via the Interconnector. At Dec. 1997 there were 290,000 gas consumers in Ireland.

Peat. The country has very little indigenous coal, but possesses large reserves of peat, the development of which is handled largely by Bord na Mona (Peat Board). To date, the Board has acquired and developed 85,000 ha of bog and has 20 locations around the country. In the year ending 31 March 1998, the Board sold 67,000 tonnes of sod peat and 3,005,000 tonnes of milled peat for use in 5 milled peat electricity generating stations. 263,000 tonnes of briquettes were produced for sale to the domestic heating market. The Board also sold 1·5m. cu. metres of horticultural peat.

Minerals. Lead and zinc concentrates are important. In 1997 mineable resources stood at over 6m. tonnes of zinc and over 1m. tonnes of lead. Metal content of concentrates production, 1996: Zinc, 164,500 tonnes; lead, 45,300 tonnes. Gypsum, limestone and aggregates are important, and there is some production of silver (contained in lead) and dolomite. About 50 companies are involved in exploration, which is centred on base metals, but with interest also in gold, gem minerals,

industrial minerals and coal. There is a thriving sand, gravel and aggregate extraction industry, employing some 7,500 people.

Agriculture. The CSO's Labour Force Survey shows in 1997, 134,000 people whose primary source of income was from agriculture. A total of 301,000 people worked on farms on a regular basis, working the equivalent of 223,400 full-time jobs. There were 149,500 farm holdings in Ireland, almost all of which were family farms. Average farm size was 29·2 ha. 48% of farms were under 20 ha. 12% of farmers were under 35 and 45% were over 55.

Agriculture represented 6·3% of GDP in 1997. The total area used for agricultural and forestry purposes is almost 5m. ha. Over 90% of the agricultural area is devoted to grass, and beef and milk production currently account for two-thirds of gross agricultural output.

At June 1997 the total area used for crops was 308,800 ha, of which wheat accounted (in ha.) for 91,300; oats, 21,300; barley, 190,000; other cereals, 6,100; potatoes, 20,400.

Gross agricultural output (including changes in stock) for the year 1997 was estimated at IR£3·3bn.; aggregate income from agriculture is IR£2bn. Direct income payments, financed or co-financed by the EU, amounted to IR£941m. or 47% of aggregate income. Livestock (June 1998): Cattle, 7,794,500; sheep, 8,373,400; pigs, 1,818,600; poultry, 13,146,900.

Forestry. Current forest area cover (570,000 ha in 1995, up from 500,000 ha in 1990) amounts to 11% of the agricultural and forestry area, or about 8% of total land area. Timber production in 1995 was 2·2m. cu. metres.

Fisheries. In 1992 approximately 16,000 people were engaged full- or part-time in the sea fishing industry. In 1997 the fishing fleet consisted of 1,185 vessels. The quantities and values of fish landed during 1997 were: Wetfish, 261,400·8 tonnes, value IR£98,242,610·17; Shellfish, 46,538·5 tonnes, value IR£46,534,492·70. Total quantity: 307,939·30 tonnes; total value, IR£144,777,102·87. The main types of fish caught were horse mackerel (75,002·2 tonnes), herring (57,154·9 tonnes), mackerel (53,093·5 tonnes) and blue whiting (25,986·9 tonnes).

INDUSTRY

Enterprise Ireland. Enterprise Ireland is the organization established by the Government to help increase the sales, exports and employment of Irish companies. A key part of the Enterprise Ireland mission is to bring science, technology and innovation, marketing, enterprise development and business training into the mainstream of economic development in Ireland.

IDA Ireland. The IDA was established by the Irish Government in 1969 but its remit was altered in 1993 when responsibility for development of indigenous industry was moved to Enterprise Ireland. The objective of IDA Ireland is to create employment in Ireland by attracting and developing overseas industry.

Today, Ireland is recognised as a base for a wide range of activities, from software development and information technology to international services and pharmaceuticals. Over 1,250 foreign-owned enterprises have established businesses in Ireland.

Forfás. Forfás is the policy advisory and coordination board for industrial development and science and technology. It is the statutory agency through which powers are delegated to Enterprise Ireland for the promotion of indigenous enterprise and to IDA Ireland for the promotion of inward investment. It also aims to encourage the development of industry, technology, marketing and human resources.

The census of industrial production for 1995 gives the following details of the values (in IR£1m.) of gross and net output for the principal manufacturing industries. The figures for net output are those of gross output minus cost of materials, including fuel, light and power, repairs to plant and machinery and amounts paid to others in connection with products made.

By 1996, gross output was IR£38,456m. and net, IR£19,483m. Annual volume of production was up 15·3% in 1997. In 1998 foreign companies in Ireland generated three-quarters of the country's manufacturing exports, over half of manufacturing output and more than two-thirds of manufacturing employment. Companies are attracted by 10% corporation tax.

Labour. The total labour force for 1998 was estimated to be 1,621,100, of which 127,000 were out of work. The unemployment rate in 1998 was an estimated 7·8%. Of those at work, 136,000 were employed in the Agricultural sector in 1998, 437,600 in the Industrial sector and 921,000 in the Services sector. The retirement age is 65 years.

Trade Unions. The number of trade unions in Dec. 1997 was 50; total membership, 502,962. The 6 largest unions accounted for 70% of total membership. There were 11 employers' associations holding negotiation licences, with membership of 10,320. A series of three year social pacts, which, in addition to covering a range of economic and social policy measures, include provision for pay increases, have been negotiated between the Government, trade unions and employers' organizations since 1987. The fourth such agreement concluded in Jan. 1997, Partnership 2000, provides pay increases of 7·25% of basic pay in the public and private sectors of the economy over the period of the agreement, 1997–99. In addition, employers and unions may engage in local level bargaining for a further increase, which must not exceed 2% of the basic pay cost of the particular group of employees.

The trade balance in 1998 was an estimated US$21·2bn.

Ireland is one of the most trade-dependent countries in the world. Exports constitute an increasing share of the economy's output of goods and services. In 1997, the total value of merchandise exports amounted to just over IR£35bn. and generated a trade surplus of IR£9·2bn. In employment terms, taking the economy as a whole, one job in four is directly dependent on exports. When indirect influences are taken into account, almost one job in two depends on exports. Exports of goods and services in 1996 contributed over 80% of GDP. In 1997, 67·5% of exports went to other European Union countries and 56·2% of imports were from within the EU. Information technology has become increasingly important, and by 1998 Ireland had become the second biggest exporter of software after the USA.

Civil Aviation. Aer Lingus was incorporated in 1936 as a State-owned enterprise. Its principal business is the provision of passenger and cargo services to a range of points in the UK, Europe and the USA. In 1993, the company was restructured into the present Aer Lingus Group plc. Within the Group there are three airline operating companies: Aer Lingus which operates services to London and Europe; Aer Lingus Shannon, which operates services to the United States; Aer Lingus Commuter, which operates domestic services within Ireland and to UK provincial points.

During the year ended 31 March 1998 Aer Lingus carried almost 6m. passengers and 37,000 tonnes of cargo.

In addition to Aer Lingus, there were in 1998, 18 independent air transport operators, most notably Ryanair, TransAer and Cityjet, which operate scheduled and/or charter services to and from Ireland. In 1998 services were also provided by Aer Arran, Aeroflot, AB Airlines, Air Engiadina, Air France, Air Liberté, Air Malta, Air Ukraine, Alitalia, Austrian Airlines, Belavia, British Airways, British Midland, Condor Flugdienst, Continental Airlines, Crossair, Delta Air Lines, Finnair, Iberia,

Icelandair, Jersey European Airways, KLM, KLM-UK, Lufthansa, Malaysia Airlines, Manx Airlines, SABENA, Saudia, SAS, TAP, Tarom, Tyrolean Airways and Virgin Atlantic.

The principal airports are at Dublin, Shannon and Cork; there are also 6 privately-owned airports. In 1996 Dublin handled 9,021,000 passengers (8,556,000 on international flights) and 67,300 tonnes of freight.

Shipping. The merchant fleet totalled 193,934 GRT in 1996, including oil tankers, 191 GRT and container ships, 17,276 GRT. Total cargo traffic passing through the country's ports amounted to 33,918,000 tonnes in 1996.

Inland Waterways. The principal inland waterways open to navigation are the Shannon Navigation (270 km), which includes the Shannon-Erne Waterway (Ballinamore/Ballyconnell Canal), and the Grand Canal and Barrow Navigation (249 km). The Waterways Service of the Department of Arts, Culture and the Gaeltacht is responsible for the waterways system as a public amenity. Merchandise traffic has now ceased and navigation is confined to pleasure craft operated either privately or commercially. The Royal Canal (146 km) from Dublin to Mullingar (53 km) was reopened for navigation in 1995.

Telecommunications. Ireland's telecommunications sector has been fully liberalized with effect from 1 Dec. 1998 when the last remaining elements of Telecom Éireann's exclusive privilege were removed. All elements of the market are now open to competition from other licensed operators. There are 2 licensed mobile telephone operators, Eircell (a subsidiary of Telecom Éireann) with both TACS and GSM networks, and Esat Digifone, operating a GSM network. A competition for the award of a combined GSM and DCS 1800 licence to a third operator was held in 1998.

The Minister for Public Enterprise, a member of the Government, has overall policy responsibility for the development of the sector. Among the key elements of the Government's policy is the objective of creating a fully open and competitive telecommunications market that will stimulate investment in advanced information infrastructure and services in Ireland and develop Ireland as a global leader in the growth of internet-based industries and electronic commerce.

The Director of Telecommunications Regulation, established by legislation as an independent officer with a separate office and staff in June 1997, is responsible for licensing of operators, allocation of numbers and radio frequency spectrum, supervision of network interconnection arrangements and other regulatory functions.

Telecom Éireann—Operational Information. The dominant operator in the telecommunications sector remains Telecom Éireann, a statutory body set up under the Postal and Telecommunications Services Act, 1983. In 1996, 20% of the State's holding was sold to KPN/Telia, a Dutch-Swedish consortium, and they have an option of a further 15%. The government recently concluded an Employee Share Ownership Scheme under which 14·9% of the company is being made available to employees and has indicated its intention to have an Initial Public Offer (IPO) of shares in the company in mid-1999.

Number of working lines (April 1998), 1·5m; data lines, 31,609; Eircell (mobile telephone network), 415,000 customers approx.. Number of telex lines, 2,000 customers approx.; Eirpac (public packet-switched network), 2,500 customers approx.; Eirpage (radio paging network), customer base 40,175 (Oct. 1997). There were 520,000 PCs in use in 1995 and 300,000 Internet users in Oct. 1998.

Postal Services. Postal services are provided by An Post, a statutory body established under the Postal and Telecommunications Services Act, 1983. Number of Post Offices as of 31 Dec. 1996, 1,921; delivery points, 1,261,000. Number of items delivered in the year ended 31 Dec. 1996, 578·0m. An Post also offers a range of services to the business community through a dedicated unit, Special Delivery Services, subsidiaries PostGEM, Printpost and Precision Marketing Information. A range of services are provided through the Post Office network including Savings and Investments, passport applications, bill payments, National Lottery products and the payment of Social Welfare benefits on an agency basis for the State.

SOCIAL INSTITUTIONS

Justice. The Constitution provides that justice shall be administered in public in Courts established by law by Judges appointed by the President on the advice of the Government. The jurisdiction and organization of the Courts are dealt with in the Courts (Establishment and Constitution) Act, 1961 and the Courts (Supplemental Provisions) Acts, 1961–91. These Courts consist of Courts of First Instance and a Court of Final Appeal, called the Supreme Court. The Courts of First Instance are the High Court with full original jurisdiction and the Circuit and the District Courts with local and limited jurisdictions. A judge may not be removed from office except for stated misbehaviour or incapacity and then only on resolutions passed by both Houses of the Oireachtas. Judges of the Supreme and High Courts are appointed from among practising barristers or serving Circuit Court judges. Judges of the Circuit and District Courts may be appointed from among practising barristers or practising solicitors.

The Supreme Court, which consists of the Chief Justice (who is ex officio an additional judge of the High Court) and 7 ordinary judges, may sit in two Divisions and has appellate jurisdiction from all decisions of the High Court. The President may, after consultation with the Council of State, refer a Bill, which has been passed by both Houses of the Oireachtas (other than a money bill and certain other bills), to the Supreme Court for a decision on the question as to whether such Bill or any provision thereof is repugnant to the Constitution.

The High Court, which consists of a President (who is ex officio an additional Judge of the Supreme Court) and 23 ordinary judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise concerning the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The High Court on Circuit acts as an appeal court from the Circuit Court.

The Court of Criminal Appeal consists of the Chief Justice or an ordinary Judge of the Supreme Court, together with either 2 ordinary judges of the High Court or the President and one ordinary judge of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave to appeal. The decision of the Court of Criminal Appeal is final, unless that court, the Attorney-General or the Director of Public Prosecutions certifies that the decision involves a point of law of exceptional public importance, in which case an appeal is taken to the Supreme Court.

The Offences against the State Act, 1939 provides in Part V for the establishment of Special Criminal Courts. A Special Criminal Court sits without a jury. The rules of evidence that apply in proceedings before a Special Criminal Court are the same as those applicable in trials in the Central Criminal Court. A Special Criminal Court is authorized by the 1939 Act to make rules governing its own practice and procedure. An appeal against conviction or sentence by a Special Criminal Court may be taken to the Court of Criminal Appeal. On 30 May 1972 Orders were made establishing a Special Criminal Court and declaring that offences of a particular class or kind (as set out) were to be scheduled offences for the purposes of Part V of the Act, the effect of which was to give the Special Criminal Court jurisdiction to try persons charged with those offences.

The High Court exercising criminal jurisdiction is known as the Central Criminal Court. It consists of a judge or judges of the High Court, nominated by the President of the High Court. The Court sits in Dublin and tries criminal cases which are outside the jurisdiction of the Circuit Court.

The Circuit Court consists of a President (who is ex officio an additional judge of the High Court) and 25 ordinary judges. The country is divided into 8 circuits. The jurisdiction of the court in civil proceedings is subject to a financial ceiling, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters it has jurisdiction in all cases except murder, treason, piracy, rape, serious and aggravated sexual assault and allied offences. The Circuit Court acts as an appeal court from the District Court.

The District Court, which consists of a President and 50 ordinary judges, has summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the Court has jurisdiction in contract and tort (except slander, libel, seduction, slander of title and false imprisonment) where the claim does not exceed IR£5,000; in proceedings founded on hire-purchase and credit-sale agreements, the jurisdiction is IR£5,000.

All criminal cases, except those of a minor nature, and those tried in the Special Criminal Court, are tried by a judge and a jury of 12. Generally, a verdict need not be unanimous in a case where there are not fewer than 11 jurors if 10 of them agree on the verdict.

At 31 Dec. 1996 the police force, the Garda, had a total staff of 10,817. There were 100,785 indictable crimes reported, of which 41,056 were solved, and 451,267 non-indictable crimes resulted in proceedings. 241,095 persons were convicted in total. There were 1·19 murders per 100,000 population and 4·595 juvenile offenders cautioned per 1,000 population.

Religion. In 1997 there were an estimated 3·34m. Roman Catholics and 300,000 members of other religions. According to the census of population taken in 1991 the principal religious professions were as follows:

	Leinster	*Munster*	*Connacht*	*Ulster (part of)*	*Total*

Sean Brady (b. 1939) is the Roman Catholic Cardinal of Armagh and Primate of All Ireland.

In May 1990 the General Synod of the Church of Ireland voted to ordain women.

Education. In 1997 total expenditure on education came to 5·9% of GNP.

Elementary. Elementary education is free and was given in about 3,329 national schools (including 119 special schools) in 1997–98. The total number of pupils on rolls in 1997–98 was 460,000, including pupils in special schools and classes; the number of teachers of all classes was about 21,100 in 1997–98, including remedial teachers and teachers of special classes. The total salaries for teachers for 1998, including superannuation etc., was IR£599,774,000.

Special. Special provision is made for handicapped and deprived children in special schools which are recognized on the same basis as primary schools, in special classes attached to ordinary schools and in certain voluntary centres where educational services appropriate to the needs of the children are provided. Integration of handicapped children in ordinary schools and classes is encouraged wherever possible, if necessary with special additional support. There are also part-time teaching facilities in hospitals, child guidance clinics, rehabilitation workshops, special 'Saturday-morning' centres and home teaching schemes. Special schools (1996–97) numbered 119 with approximately 7,438 pupils. There were also some 5,998 pupils enrolled in about 476 special classes, and 1,302 (Sept. 1998) remedial teachers were employed for pupils in ordinary national schools. There is a National Education Officer for travelling children.

Secondary. Voluntary secondary schools are under private control and are conducted in most cases by religious orders. These schools receive grants from the State and are open to inspection by the Department of Education. The number of recognized secondary schools during the school year 1998–99 was 432, and the number of pupils in attendance was 211,365.

Vocational Education Committee schools provide courses of general and technical education. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of vocational schools during the

school year 1998–99 was 245, and the number of full-time students in attendance was 98,685. These schools are controlled by the local Vocational Education Committees; they are financed mainly by State grants and also by contributions from local rating authorities and Vocational Education Committee receipts. These schools also provide adult education facilities for their own areas.

Comprehensive and Community Schools. Comprehensive schools which are financed by the State combine academic and technical subjects in one broad curriculum so that each pupil may be offered educational options suited to his needs, abilities and interests. Pupils are prepared for State examinations and for entrance to universities and institutes of further education. The number of comprehensive and community schools during the school year 1998–99 was 82 and the number of students in attendance was 52,675. These schools also provide adult education facilities for their own areas and make facilities available to voluntary organizations and to the adult community generally.

The net non capital State expenditure for second level and further education for 1997 was IR£807,274,000.

Education Third-Level. Traditionally, the third-level education system in Ireland has comprised the university sector, the technical and technological colleges and the colleges of education, all of which are substantially funded by the State and are autonomous. In recent years, a number of independent private colleges have developed, offering a range of mainly business-related courses conferring professional qualifications and, in some instances, recognized diplomas and certificates.

University education is provided by the National University of Ireland, founded in Dublin in 1908, by the University of Dublin (Trinity College), founded in 1592, and by the Dublin City University and the University of Limerick established in 1989. The National University comprises 4 constituent universities, NUI Dublin, NUI Cork, NUI Galway and NUI Maynooth.

St Patrick's College, Maynooth, Co. Kildare, is a national seminary for Catholic priests and a pontifical university with the power to confer degrees up to doctoral level in philosophy, theology and canon law.

Besides the University medical schools, the Royal College of Surgeons in Ireland (a long-established independent medical school) provides medical qualifications which are internationally recognized. Courses to degree level are available at the National College of Art and Design, Dublin.

Institutes of Technology in 12 centres (Athlone, Carlow, Cork, Dundalk, Dun Laoghaire, Limerick, Tallaght, Galway, Letterkenny, Sligo, Tralee and Waterford) provide vocational and technical education and training for trade and industry from craft to professional level through certificate, diploma and some degree courses. These colleges (with the exception of Dun Laoghaire) were established on a statutory basis on 1 Jan. 1993. Prior to this they operated under the aegis of the Vocational Education Committees (VECs) for their areas. Dun Laoghaire College of Art and Design was designated under the RTC Act 1992, from 1 April 1997. The Dublin Institute of Technology (DIT) was also established on a statutory basis on 1 Jan. 1993. Prior to this it operated under the aegis of City of Dublin VEC. The DIT provides certificate, degree and diploma level courses in engineering, architecture, business studies, catering, music, etc. The Hotel and Catering College in Killybegs continues to operate under the aegis of Co. Donegal VEC.

Total full-time enrolments in the 1997–98 academic year were approximately 42,000.

There are 5 Colleges of Education for training primary school teachers. For degree awarding purposes, 3 of these colleges are associated with Trinity College, 1 with Dublin City University and 1 with The University of Limerick. There are also 2 Home Economics Colleges for teacher training, 1 associated with Trinity College and the other with The National University of Ireland, Galway.

The total full-time enrolment at third-level in institutions aided by the Department of Education and Science in 1996–97 was 100,204. The total current expenditure from public funds on third level education during the financial year ended 31 Dec. 1996 was approximately IR£497,900,000. The National Council for Educational Awards, established on a statutory basis in 1979, is the validating and awarding authority for courses in the third-level sector outside the universities.

Agricultural. Teagasc, the Agriculture and Food Development Authority, is the State agency responsible for providing advisory, training, research and development services for the agriculture and food industries. Full-time instruction in agriculture is provided for all sections of the farming community. There are 4 agricultural colleges, administered by Teagasc, and 7 private Teagasc-aided agricultural colleges. Courses in commercial horticulture are also offered, and short courses for adults already farming.

Health. Everybody ordinarily resident in Ireland has either full or limited eligibility for the public health services.

(i) A person who satisfies the criteria of a means test receives a medical card which confers Category 1 or full eligibility on them and their dependants. This entitles the holder to the full range of public health and hospital services, free of charge, i.e. family doctor, drugs and medicines, hospital and specialist services as well as dental, aural and optical services. Maternity care and infant welfare services are also provided.

(ii) The remainder of the population have Category 2 or limited eligibility. Category 2 patients receive public consultant and public hospital services subject to certain charges. They are not entitled to free drugs or medicines but receive reimbursement of their drug expenditure in excess of IR£90 in any quarter commencing Jan., April, July and Oct. or a refund of all drug expenditure over IR£32 per month if they suffer from a long term medical condition requiring ongoing medication.

Persons in Category 2 are liable for a hospital in-patient charge of IR£25 per night up to a maximum of IR£250 in any 12 consecutive months (with effect from 1 Jan. 1998). There is no charge for out-patient services. However persons in Category 2 are liable for a charge of IR£12 if they attend the Accident and Emergency Department of a hospital without a letter of referral from a General Practitioner.

The Long Term Illness Scheme entitles persons to free drugs and medicines which are prescribed in respect of 15 specific illnesses. The needs of individuals with significant or ongoing medical expenses are met by a range of other schemes which provide assistance towards the cost of prescribed drugs and medicines. The *Drug Cost Subsidization Scheme* caters for people who do not have a medical card or a long term illness book and are certified as having a medical condition with a regular and ongoing requirement for prescribed drugs and medicines. Persons who qualify for inclusion in this scheme will not have to spend more than IR£32 in any month on prescribed medication. Under the *Drugs Refund Scheme* which covers expenditure by the whole family, any expenditure on prescribed medication above IR£90 in a calendar quarter is refunded by the Health Board.

Where an individual or a family is subjected to a significant level of ongoing expenditure on medical expenses, such as general practitioner fees or prescribed drugs due to a long term medical condition, these expenses may be reckoned in determining eligibility for a medical card. Eligibility for a medical card is solely a matter for the Chief Executive Officer of the relevant health board to decide.

Services for Children: Health Boards provide, with the co-operation of a wide range of voluntary organizations, comprehensive child welfare and protection services including adoption, fostering, residential care, day care, social work and family support services.

Welfare Services: There are various services provided for the elderly, the chronically sick, the disabled and families in stress, such as social support services, day care services for children, home helps, home nursing, meals-on-wheels, day centres, cheap fuel, etc. Health Boards also provide disabled persons, without charge, with training for employment and place them in jobs.

Grants and Allowances: The Department of Health and Children provide, through the Health Boards, a wide range of services for people with disabilities. These include day care, therapy services, training, employment, sheltered work and residential services as well as transport to and from these services.

Blind welfare allowance—provides a means-tested supplementary weekly allowance to unemployed recipients of the following allowances from the Department of Social, Community and Family Affairs, Disability Allowance, Blind Allowance or Old Age Pension.

Motorized Transport Grant—a grant of up to IR£2,884 is payable, subject to a means test, to disabled persons towards the purchase of a car, in order that they might obtain or retain employment; in some cases the grant is paid to those living in very isolated areas.
Health Contributions—A health contribution of 2% of income is payable by those with Category 2 eligibility. Employers meet the levy in respect of those employees who have a medical card.

In 1996 there were 62 general government hospitals with a total of 11,937 beds with an 82·2% occupancy rate. In Health Board hospitals, voluntary/Joint Board hospitals and homes for the mentally handicapped there was a total staff of 65,755. Of these 4,684 were medical/dental staff, 5,576 were para-medics and 27,264 were nurses.

Welfare. Social Welfare Services (SWS) is the executive arm of the Department of Social, Community and Family Affairs and is responsible for the day to day administration and management of social welfare schemes and services through a network of local, regional and decentralized offices. The Department's local delivery of services is structured on a regional basis. There are a total of 10 regions, with offices in Waterford, Cork, Limerick, Galway, Longford, Sligo, Dundalk and three in Dublin.

The Social Welfare Appeals Office (SWAO) is an independent office responsible for determining appeals against decisions on social welfare entitlements.

There are, in addition, three statutory agencies under the aegis of the Department:
—*the Combat Poverty Agency* which has responsibilities in the areas of advice to the Minister, research, action programmes and public information in relation to poverty;
—*the Pensions Board* which has the function of promoting the security of occupational pensions, their development and the general issue of pensions coverage;
—*the National Social Service Board* which has the function of ensuring that all citizens have easy access to the highest quality of information, advice and advocacy on social services.

Social Welfare Schemes. The social welfare supports can be divided into three categories:
Social Insurance (Contributory) payments made on the basis of a Pay Related Social Insurance (PRSI) record. Such payments are funded by employers, employees and the self-employed. Any deficit in the fund is met by Exchequer subvention.
Social Assistance (Non Contributory) payments made on the basis of satisfying a means test. These payments are financed entirely by the Exchequer.
Universal services such as Child Benefit or Free Travel which do not depend on PRSI or a means test.

CULTURE

Broadcasting. Public service broadcasting is provided by Radio Telefis Éireann (RTÉ), a statutory body established under the Broadcasting Authority Acts 1960–93. RTÉ is financed principally by TV licence and advertising. In 1996 a total of 972,069 TV licences were issued. Legislation enacted in 1988 provided for the establishment of the Independent Radio and Television Commission to arrange provision of independent commercial radio stations and an independent TV service. There were (1996) 21 local commercial radio stations, 10 community radio stations, 2 special interest Irish language radio stations, 1 independent national radio station and 4 hospital radio stations. There were 2·5m. radio receivers in 1996 and 1·46m. TV receivers. The IRTC have recently awarded the contract for the first independent TV service which was due to come on air in Sept. 1998. An Irish-language TV channel, Teilifis na Gaeilge, began broadcasting for 4 hours a day in 1996.

Cinema. In 1995 Ireland made 17 films and there were 197 cinema screens.

Press. In 1997 there were 8 weekday newspapers and 5 Sunday newspapers (all in English) with a combined circulation of 1,310,411 for Jan. to June 1997.

Tourism. Total number of overseas tourists in 1997 was 5,007,000. These, together with cross-border visitors, spent IR£2,105m.

Festivals. St. Patrick's Day is celebrated annually, but the 1999 festival was earmarked as a 'homecoming festival' when the entire Irish diaspora could come together from around the world and mark the millennium.

Libraries. In 1995 there were 2 National Libraries, 516 public libraries, 33 Higher Education libraries and 4 non-specialized. They held a total of 17,750,000 volumes and had a combined 863,918 registered users.

KEY HISTORICAL EVENTS

The area once designated as Palestine, of which Israel forms part, was formerly part of Turkey's Ottoman Empire. During the First World War, when Turkey was allied with Germany, the Arabs under Ottoman rule rebelled and Palestine was occupied by British forces. In 1917 the British Government issued the Balfour Declaration, stating that it viewed 'with favour the establishment in Palestine of a national home for the Jewish people'. In 1922 the League of Nations recognized 'the historical connection of the Jewish people with Palestine' and 'the grounds for reconstituting their national home in that country,' and Britain assumed a mandate over Palestine, pending the establishment there of such a national home. In accordance with the mandate, Jewish settlers were admitted to Palestine, under the direction of Zionist settlement agencies, where the population had remained almost entirely Arab. There were anti-Zionist riots in 1921 and 1929. In the 1930s the Nazi persecution of the Jews led to escalated immigration into Palestine.

In Nov. 1947 the UN General Assembly passed a resolution calling for the establishment of a Jewish and an Arab state in Palestine. On 14 May 1948 the British Government terminated its mandate, and the Jewish leaders proclaimed the State of Israel. No independent Arab state was established in Palestine. Instead the neighbouring Arab states invaded the new Israel on 15 May 1948. The Jewish state defended itself successfully, and the cease-fire in Jan. 1949 left Israel with one-third more land than had been originally assigned by the UN. The Suez crisis of 1956 saw Israel joined with Britain and France in a tripartite attack on Egypt in an effort to topple Nasser's regime which they each regarded as inimical to their own interests in the region.

In 1967, following some years of uneasy peace, local clashes on the Israeli–Syrian border were followed by Egyptian mass concentration of forces on the borders of Israel. The UN emergency force in Gaza was expelled and a blockade of shipping to and from Israel was imposed by Egypt in the Red Sea. Israel struck out at Egypt on land and in the air on 5–9 June 1967. Jordan joined in the conflict which spread to the Syrian borders. By 11 June the Israelis had occupied the Gaza Strip and the Sinai peninsula as far as the Suez Canal in Egypt, West Jordan as far as the Jordan valley and the heights east of the Sea of Galilee, including Quneitra in Syria.

A further war broke out on 6 Oct. 1973 when Egyptian and Syrian offensives were launched. Following UN Security Council resolutions a cease-fire finally came into being on 24 Oct. In Dec. Egypt and Israel signed a dis-engagement agreement; as did Israel and Syria on 31 May 1974. A further dis-engagement agreement was signed between Israel and Egypt in Sept. 1975.

Developments in 1977 included President Sadat of Egypt's visit to Israel and peace initiative. In March 1978 Israeli troops entered southern Lebanon but later withdrew after the arrival of a UN peace-keeping force. In Sept. 1978 US President Carter convened the Camp David conference at which Egypt and Israel agreed on frameworks for peace in the Middle East with treaties to be negotiated between Israel and her neighbours. Negotiations began in the USA between Egypt and Israel in Oct. 1978 and a treaty was signed in Washington on 26 March 1979. Under this treaty Israel withdrew from the Sinai Desert in two phases; part was achieved on 26 Jan. 1980 and the final withdrawal by 26 April 1982.

In June 1982 Israeli forces once again invaded the Lebanon, this time in massive strength, and swept through the country, laying siege to and bombing Beirut. On 16 Feb. 1985 the Israeli forces started a complete withdrawal, leaving behind an Israeli trained and equipped Christian Lebanese force to act as a control over and buffer against Moslem Shi'a or Palestinian guerrilla attacks.

In 1993 following declarations by the Prime Minister, Yitzhak Rabin, recognizing the Palestine Liberation Organization (PLO) as representative of the Palestinian people, and by Yasser Arafat, leader of the PLO, renouncing terrorism and recognizing the State of Israel, an agreement was signed in Washington providing for limited Palestinian self-rule in the Gaza Strip and Jericho. A further agreement, signed by the Foreign Minister, Shimon Peres, and Yasser Arafat on 9 Feb. 1994 dealt with control over the Egypt–Gaza Strip and Jericho–Jordan border crossings, and security arrangements for Jewish settlers in Gaza which would divide the strip into 3 zones. On 4 May 1994 in Cairo an Israeli–Palestinian agreement on the first phase of Palestinian self-rule in the Gaza Strip and Jericho was signed by the Israeli Prime Minister Yitzhak Rabin and Yasser Arafat. An Israeli–Palestinian agreement was signed in Washington on 28 Sept. 1995. (For details *see* PALESTINIAN-ADMINISTERED TERRITORIES: Key Historical Events). Negotiations on the permanent status of the West Bank and Gaza began in 1996.

On 4 Nov. 1995 Yitzhak Rabin was assassinated by a Jewish religious extremist. In the subsequent election, a right wing coalition led by Binyamin Netanyahu took office. Peace talks with the Palestinians then stalled, partly as a result of Palestinian terrorism but also because it became clear that Israel balked at the basic conditions for a settlement. In Feb. 1998 plans were announced to construct a new Jewish settlement in East Jerusalem, a move which Palestinians said could kill the peace progress.

Following a visit to the Middle East by UK Prime Minister Tony Blair, representing the EU, the two sides agreed to meet in London. No agreement was reached on an American proposal that Israel should withdraw from 13·1% of the West Bank. But a further meeting was agreed, for Oct. 1998. It took place at the Wye Plantation in Maryland, USA where Israel accepted partial withdrawal on condition that the Palestinians cracked down on terrorism. The following month, 2% of the West Bank was handed over to Palestinian control and 250 Palestinian prisoners were released. Further moves were put on hold after the collapse of the Netanyahu coalition and the announcement of early elections.

The area of Israel, including the Golan Heights (1,150 sq. km) and East Jerusalem (70 sq. km), is 21,946 sq. km (8,473 sq. miles), with a population estimated in 1997 to be 5·53m., including East Jerusalem, the Golan Heights and Israeli settlers in the occupied territories.

The UN gives a projected population for 2000 of 6·08m.

In 1995 an estimated 90·7% of the population lived in urban areas. Population density, 252 per sq. km.

CONSTITUTION AND GOVERNMENT

Israel is an independent sovereign republic, established by proclamation on 14 May 1948.

In 1950 the Knesset (*Parliament*), which in 1949 had passed the Transition Law dealing in general terms with the powers of the Knesset, President and Cabinet, resolved to enact from time to time fundamental laws, which eventually, taken together, would form the Constitution. The 9 fundamental laws that have been passed: The Knesset (1958), Israel Lands (1960), the President (1964), the Government (1968), the State Economy (1975), the Army (1976), Jerusalem, capital of Israel (1980), the Judicature (1984) and the Electoral System (1996).

The *President* (head of state) is elected by the Knesset by secret ballot by a simple majority; his term of office is 5 years. He may be re-elected once.

The Knesset, a one-chamber Parliament, consists of 120 members. It is elected for a 4-year term by secret ballot and universal direct suffrage. Under the system of election introduced in 1996, electors vote once for a party and once for a candidate for Prime Minister. To be elected Prime Minister, a candidate must gain more than half the votes cast, and be elected to the Knesset. If there are more than 2 candidates and none gain half the vote, a second round is held 15 days later. The Prime Minister forms a cabinet (no fewer than 8 members and no more than 18) with the approval of the Knesset.

DEFENCE

Conscription (for Jews and Druze only) is 3 years (usually 4 years for officers; 2 years for women).

The Israel Defence Force is a unified force, in which army, navy and air force are subordinate to a single chief-of-staff. The Minister of Defence is *de facto* C.-in-C. The cabinet usually forms a defence committee with authority to make decisions on military operations.

Defence expenditure in 1997 totalled US$11,143m., representing 11·5% of GDP. Expenditure per capita in 1997 was US$1,917, a figure exceeded only by Qatar.

INTERNATIONAL RELATIONS

A 46-year old formal state of hostilities with Jordan was brought to an end by a peace agreement on 26 Oct. 1994.

Israel is a member of the UN.

ECONOMY

Policy. 30 to 40 of some 150 state-owned companies are scheduled for privatization under a scaled-down programme of 1991. During the period 1986–95, the proceeds of privatization totalled US$2,000m. (target, US$5,000m.). In 1996, the Prime Minister inaugurated an acceleration of the privatization process, and took over privatization powers from the Ministry of Finance. Efforts to generate some 0·5m. jobs are being made to cope with the influx of Soviet immigrants.

Performance. The economy was estimated to be growing by 1·5% in 1998, compared to 1·9% in 1997, and down from an average of 6% between 1991 and 1995. The current account deficit in 1997 stood at US$–5,014m.

Budget. The budget year runs from 1 Jan to 31 Dec. beginning with 1992. (Previously it ran from 1 April to 31 March).

Budget revenue and expenditure (in 1m. shekels):

	1992	*1993*	*1994*	*1995*	*1996*[1]

[1]Provisional

Currency. The unit of currency is the *shekel* (ILS) of 100 *agorot.* Foreign exchange reserves were US$21,530m. and gold reserves 10,000 troy oz. in Feb. 1998. Inflation in 1997 was 7% (10·6% in 1996). By Sept. 1998 it had come down to 4·5%, the lowest rate in 30 years. Total money supply in Sept. 1996 was 17,280m. shekels.

Banking and Finance. The Bank of Israel was established by law in 1954 as Israel's central bank. Its *Governor* is appointed by the President on the recommendation of the Cabinet for a 5-year term. He acts as economic adviser to the Government and has ministerial status. The *Governor* is Jacob Frenkel. There are 26 commercial banks headed by Bank Leumi Le Israel, Bank Hapoalim and Israel Discount Bank, 2 merchant banks, 1 foreign bank, 15 mortgage banks and 9 lending institutions specifically set up to aid industry and agriculture. The government holds a majority stake in the 4 largest banks, but these are now (1997) in process of privatization.

There is a stock exchange in Tel Aviv.

Weights and Measures. The metric system is in general use. The (metrical) *dunam* = 1,000 sq. metres (about 0·25 acre).

Jewish Year. The Jewish year 5759 corresponds to 21 Sept. 1998–10 Sept. 1999; 5760 to 11 Sept. 1999–29 Sept. 2000.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity in 1997 was an estimated 7·804m. kW. Electric-power production amounted during 1997 to 35,098m. kWh; consumption per capita in 1995 was estimated to be 4,738 kWh.

Oil and Gas. The only significant hydrocarbon is oil shale.

Water. In the northern Negev farming has been aided by the Yarkon–Negev water pipeline. This has become part of the overall project of the 'National Water Carrier', which is to take water from the Sea of Galilee (Lake Kinnereth) to the south. The plan includes a number of regional projects such as the Lake Kinnereth–Negev pipeline which came into operation in 1964; it has an annual capacity of 320m. cu. metres. Total water production in 1997 amounted to 2,188m. cu. metres of which 1,959m. cu. metres was consumed.

Minerals. The most valuable natural resources are the potash, bromine and other salt deposits of the Dead Sea. Potash production in 1995 was 2,214,000 tonnes.

Agriculture. In the coastal plain mixed farming, poultry raising, citriculture and vineyards are the main agricultural activities. The Emek (the Valley of Jezreel) is the

main agricultural centre of Israel. Mixed farming is to be found throughout the valleys; the sub-tropical Beisan and Jordan plainlands are also centres of banana plantations and fish breeding. In Galilee mixed farming, olive and tobacco plantations prevail. The Hills of Ephraim are a vineyard centre; many parts of the hill country are under afforestation.

The area under cultivation (in 1,000 dunams) in 1994 was 4,344, of which 1,930 were under irrigation. Of the total cultivated area (1994) 2,129 dunams were under field crops, 550 under vegetables, potatoes, pumpkins and melons, 830 under citrus and plantations, 32 under fish ponds and the rest under miscellaneous crops. Production, 1995 (in 1,000 tonnes): Wheat, 242; barley, 7·2; maize grain, 2·5; potatoes, 281; melons, 79·4; tomatoes, 503·7; citrus fruit, 942·3; grapefruit, 404·4; cotton, 42·8.

Livestock (1997) 375,000 cattle, 350,000 sheep, 105,000 pigs (1996), 70,000 goats, 28,120,000 poultry.

Types of rural settlement: (1) The *Kibbutz* and *Kvutza* (communal collective settlement), where all property and earnings are collectively owned and work is collectively organized. (124,600 people lived in 269 *Kibbutzim* in 1995.) (2) The *Moshav* (workers' co-operative smallholders' settlement) which is founded on the principles of mutual aid and equality of opportunity between the members, all farms being equal in size (160,000 in 411). (3) The *Moshav Shitufi* (co-operative settlement), which is based on collective ownership and economy as in the *Kibbutz*, but with each family having its own house and being responsible for its own domestic services (13,100 in 43). (4) Other rural settlements in which land and property are privately owned and every resident is responsible for his own well-being. In 1996 there were 233 villages with a population of 141,500.

Forestry. In 1995 forests covered 102,000 ha or 4·9% of the total land area. Timber production was 113,000 cu. metres in 1995.

SOCIAL INSTITUTIONS

Justice. Law. Under the Law and Administration Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was obtaining in Palestine on 14 May 1948 in so far as it is not in conflict with that Ordinance or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities.

Capital punishment was abolished in 1954, except for support given to the Nazis and for high treason.

The law of Palestine was derived from Ottoman law, English law (Common Law and Equity) and the law enacted by the Palestine legislature, which to a great extent was modelled on English law.

Civil Courts. Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bye-laws and certain specified offences committed within a municipal area. Magistrates courts, established in each district and sub-district, have limited jurisdiction in both civil and criminal matters. District courts, sitting at Jerusalem, Tel Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates courts, and in all criminal matters, and as appellate courts from magistrates courts and municipal courts. The 14-member Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil or of Criminal Appeal).

In addition, there are various tribunals for special classes of cases. Settlement Officers deal with disputes with regard to the ownership or possession of land in settlement areas constituted under the Land (Settlement of Title) Ordinance.

Religious Courts. The rabbinical courts of the Jewish community have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of

members of their community and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community with the consent of all parties to the action.

The courts of the several recognized Christian communities have a similar jurisdiction over members of their respective communities.

The Moslem religious courts have exclusive jurisdiction in all matters of personal status over Moslems who are not foreigners, and over Moslems who are foreigners, if under the law of their nationality they are subject in such matters to the jurisdiction of Moslem religious courts.

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of 2 judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

In 1996 government expenditure on public order and safety totalled 4,481m. shekels.

Religion. Religious affairs are under the supervision of a special Ministry, with departments for the Christian and Moslem communities. The religious affairs of each community remain under the full control of the ecclesiastical authorities concerned: in the case of the Jews, the Sephardi and Ashkenazi Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Moslems, the Qadis. The Druze were officially recognized in 1957 as an autonomous religious community.

In 1997 there were: Jews, 4,701,600; Moslems, 867,900; Christians, 126,100; Druze, 96,700.

The Chief Rabbi is Israel Meir Lau.

There is a unified state-controlled elementary school system with a provision for special religious schools. The standard curriculum for all elementary schools is issued by the Ministry with a possibility of adding supplementary subjects comprising not more than 25% of the total syllabus. Most schools in towns are maintained by municipalities, a number are private and some are administered by teachers' co-operatives or trustees.

PALESTINIAN-ADMINISTERED TERRITORIES

KEY HISTORICAL EVENTS

Under the Israeli–Palestinian agreement of 28 Sept. 1995 the Israeli army re-deployed from 6 of the 7 of the largest Palestinian towns in the West Bank and from 460 smaller towns and villages. Following this in April 1996 an 82-member *Palestinian Council* was elected and also a head (*Rais*) of the executive authority of the Council. The rest of the West Bank stayed under Israeli army control with some progressive redeployments at 6-month intervals, although Palestinian civil affairs here too were administered by the Palestinian Council. Negotiations on the permanent status of the West Bank and Gaza began in May 1996. Issues to be resolved include the position of 0·17m. Israelis in the West Bank and 0·18m. in East Jerusalem, the status of Jerusalem, military locations and water supplies.

Following the opening of an archaeological tunnel in Jerusalem, armed clashes broke out at the end of Sept. 1996 between demonstrators and Palestinian police on the one hand and Israeli troops. On 18 Nov. 1996 the Israeli Minister of Defence approved plans for an expansion of Jewish settlement in the West Bank. Under an agreement brokered by King Hussein of Jordan and signed by the Prime Minister of Israel and the President of the Palestinian Authority on 15 Jan. 1997 Israeli troop withdrawals from 80% of Hebron and all rural areas of the West Bank were scheduled to take place in 3 phases between 28 Feb. 1996 and 31 Aug. 1998.

The Israeli decision in Feb. 1997 to continue to promote Jewish settlement in the Jerusalem suburb of Har Homa was perceived by the Palestinian authorities as a hostile move and caused a setback to peace negotiations. In 1998, an American proposal that Israel should withdraw from 13·1% of the West Bank was not agreed on, but at a meeting in the USA in Oct. Israel accepted partial withdrawal on condition that the Palestinians cracked down on terrorism.

CONSTITUTION AND GOVERNMENT

In April 1996 the Palestinian Council removed from its Charter all clauses contrary to its recognition by Israel, including references to armed struggle as the only means of liberating Palestine, and the elimination of Zionism from Palestine. The *President* is directly elected and heads the executive organ, the Palestinian National Authority, one fifth of whose members he appoints, while four fifths are elected by the *National Council.* The latter comprises 88 members and is directly elected by the first-past-the-post system from 16 electoral districts.

Following an Israeli–Palestinian agreement on customs duties and VAT in Aug. 1994 the Palestinians set up their own customs and immigration points into Gaza and Jericho. Israel collects customs dues on Palestinian imports through Israeli entry points and transfers these to the Palestinian treasury.

Israeli currency is in use. Banking is regulated by the Palestinian Monetary Authority.

There is a Palestinian *Council for Reconstruction and Development.*

The Palestinian police consists of some 15,000; they are not empowered to arrest Israelis, but may detain them and hand them over to the Israeli authorities. A securities exchange opened in Nablus in Feb. 1997.

The **West Bank** (preferred Palestinian term, Northern District) has an area of 5,879 sq. km (2,270 sq. miles) and a projected population for 2000 of 1,662,000.

97% of the population in 1988 were Palestinian Arabs of whom some 85% were Moslems, 7·4% Jewish and 8% Christian. In 1995 there was a Palestinian diaspora of 3·3m. The birth rate in 1997 was estimated at 37·7 per 1,000 population and the death rate 4·5 per 1,000. In 1994, there were 77,604 private cars and 21,714 commercial vehicles and trucks registered. There were (1993) 225,595 pupils in primary schools and 125,305 in secondary schools, plus 21,399 students in institutions of higher education. In 1993 there were 17 hospitals and clinics with 1,418 beds.

The **Gaza Strip** (preferred Palestinian term, Gaza District) has an area of 363 sq. km (140 sq. miles) and a population of 792,000 in 1995. The population doubled between 1975 and 1995. The projected population for 2000 is 1,163,000. The fertility rate in the period 1990–95, of 8·8 births per woman, was the highest anywhere in the world. Infant mortality, 1990–95, 44 per 1,000 live births.

The chief town is Gaza itself. In 1984, over 98% of the population were Arabic-speaking Moslems. In 1995 an estimated 94·2% of the population lived in urban areas. Citrus fruits, wheat and olives are grown, with farm land covering 193 sq. km (1980) and occupying most of the active workforce. In 1993 there were 20,434 private cars and 4,518 commercial vehicles and trucks registered. Gaza International Airport, at the southern edge of the Gaza Strip, opened in Nov. 1998. There were (1993) 141,902 pupils in primary schools and 75,494 in secondary schools, plus (1994) 12,473 students in higher education, up from 4,701 in 1991. In 1993 there were 6 hospitals and clinics with 957 beds.

RECENT ELECTIONS

Elections for *President* and *National Council* were held on 20 Jan. 1996. The electorate was 1,013,200; turn-out was 84%. 672 candidates stood for the Council. Yasser Arafat was elected *President* against 1 opponent by 88·1% of votes cast, and was sworn in on 12 Feb. 1996. In the *National Council* elections, 55 seats went to the Liberation Movement of Palestine, 15 to independents, 7 to Independent Fatah, 4 to Independent Islamists, 3 to Independent Christians, 1 to Samaritans and 1 other, with 2 vacant.

KEY HISTORICAL EVENTS

A part of the Roman Empire and the Holy Roman Empire that succeeded it, Italy was divided into several states including a number of city states such as Venice, Florence and Genoa. Much of the territory was under the rule of the Pope while France, Spain and Austria had possessions at various times.

From 1815 a strong movement grew throughout the Italian states for *risorgimento* (unification) and for independence from Austrian control. Victor Emmanuel II, King of Sardinia-Piedmont from 1849, his prime minister from 1852, Count Cavour, and Giuseppe Garibaldi, an Italian soldier, together achieved success for the movement. The first Italian parliament assembled in Feb. 1861, and on 17 March declared Victor Emmanuel King of Italy. During the remaining years of the 19th century, Italy acquired an African colonial empire composed of Eritrea, Somaliland and Libya. For her support of the allies in the First World War (1914-18) Italy gained the Trentino and the Istrian peninsula on the North Adriatic.

Fascism spread rapidly after the war and in 1922 Benito Mussolini, leader of the Fascist Party, was appointed prime minister. In 1924 he established himself as dictator with the title *Duce*. His internal policy, with a programme of public works, greater efficiency and better law and order, was successful. In 1929 the Lateran Treaties with the Papacy ended over a century of tension between Church and State. However, his aggressive foreign policy as evinced by the invasion of Ethiopia in 1935 and his alliance with Nazi Germany in 1936 was eventually to lead to his downfall. During the Second World War (1939-45) British forces captured much of Italy's colonial empire, and in 1942 occupied Libya. The allies conquered Sicily and Mussolini was compelled to resign in July 1943. In 1945 he was captured and killed by Italian partisans.

June 1946 saw the end of the reign of the House of Savoy, whose kings had ruled over Piedmont for nine centuries and as Kings of Italy since 1861. The Crown Prince Umberto, son of King Victor Emmanuel III, had become Lieut-Gen. (i.e. Regent) of the kingdom on 5 June 1944. Following the abdication and retirement to Egypt of his father on 9 May 1946, Umberto was declared King Umberto II, but his reign only lasted until 13 June when he left the country. Three days before, on 10 June 1946, Italy had become a republic, following a referendum.

In the post war years the ruling Christian Democrat Party resisted the challenge of the Communists to pursue a strongly pro-West and European policy. But no single government was able to reform an ailing economy or face up to lawlessness and corruption. Changes of administration were frequent. From 1947 to the early 1990s, Italy had no less than 57 governments. In 1992, in the wake of Italy's humiliating exit from Europe's Exchange Rate Mechanism (ERM), the old political establishment was driven out of office. Several prominent politicians were accused of links to organized crime and some went to prison. A new era for Italian politics opened the way for a radical modernization of the country's economic and social structure.

On 9 Oct. 1998 prime minister Romano Prodi resigned after losing a vote of confidence following his refusal to bow to demands made by his Communist allies. He was asked to try and form a new government but he was unable to do so and was replaced by Massimo D'Alema, the first former Italian Communist to become prime minister.

CLIMATE

The climate varies considerably with latitude. In the south, it is warm temperate, with little rain in the summer months, but the north is cool temperate with rainfall more evenly distributed over the year. Florence, Jan. 46·8°F (8·2°C), July 74·3°F (23·5°C). Annual rainfall 38" (974 mm). Milan, Jan. 37·9°F (3·3°C), July 68·3°F (20·2°C). Annual rainfall 32" (819 mm). CONSTITUTION AND GOVERNMENT

The Constitution dates from 1948. Italy is 'a democratic republic founded on work'. Parliament consists of the *Chamber of Deputies* and the *Senate*. The Chamber is elected for 5 years by universal and direct suffrage and consists of 630 deputies. The Senate is elected for 5 years on a regional basis by electors over the age of 25; each Region having at least 7 senators, consisting of 315 elected senators; the Valle d'Aosta is represented by 1 senator only, the Molise by 2. The President of the Republic can nominate 11 senators for life from eminent persons in the social, scientific, artistic and literary spheres. The President may become a senator for life. The *President* is elected in a joint session of Chamber and Senate, to which are added 3 delegates from each Regional Council (1 from the Valle d'Aosta). A two-thirds majority is required for the election, but after a third indecisive scrutiny the absolute majority of votes is sufficient. The President must be 50 years or over; term of office, 7 years. The Speaker of the Senate acts as the deputy President. The President can dissolve the chambers of parliament, except during the last 6 months of the presidential term. An attempt to create a new constitution, which had been under consideration for 18 months, collapsed in June 1998.

A *Constitutional Court*, consisting of 15 judges who are appointed, 5 each by the President, Parliament (in joint session) and the highest law and administrative courts, can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President and Ministers.

The reorganization of the Fascist Party is forbidden. Direct male descendants of King Victor Emmanuel are excluded from all public offices, have no right to vote or to be elected, and are banned from Italian territory; their estates are forfeit to the State. Titles of nobility are no longer recognized, but those existing before 28 Oct. 1922 are retained as part of the name.

A referendum was held in June 1991 to decide whether the system of preferential voting by indicating 4 candidates by their listed number should be changed to a simpler system, less open to abuse, of indicating a single candidate by name. The electorate was 46m. Turn-out was 62·5% (there was a 50% quorum). 95·6% of votes cast were in favour of the change. As a result, an electoral reform of 1993 provides

for the replacement of proportional representation by a system in which 475 seats in the Chamber of Deputies are elected by a first-past-the-post single-round vote and 155 seats by proportional representation in a separate single-round vote on the same day. There are 27 electoral regions. There is a 4% threshold for entry to the Chamber of Deputies.

At a further referendum in April 1993, turn-out was 77%. Votes favoured the 8 reforms proposed, including a new system of election to the Senate and the abolition of some ministries. 75% of the Senate is now elected by a first-past-the-post system, the remainder by proportional representation; no party may present more than 1 candidate in each constituency. In July 1997 an all-party parliamentary commission on constitutional reform proposed a directly elected president with responsibility for defence and foreign policy, the devolving of powers to the regions, a reduction in the number of seats in the Senate and in the lower house and the creation of a third chamber to speak on behalf of the regions.

National Anthem. 'Fratelli d'Italia' ('Brothers of Italy'; words by G. Mameli; tune by M. Novaro, 1847).

Local Government. Italy is administratively divided into 15 autonomous regions and 5 autonomous regions with a special constitutional status; these are subdivided

into 102 provinces and 1,230 municipalities. The regions have their own councils and governments with certain legislative and administrative functions adapted to the circumstances of each region. A government commissioner co-ordinates regional and national activities. Since 1993 mayors have been directly elected for 4-year terms in towns of more than 15,000 inhabitants and allot 60% of seats on municipal councils, the remainder being apportioned according to party vote.

Measures for the autonomy of the largely German-speaking **Alto Adige** (South Tyrol) were granted in Jan. 1992 and accepted by Austria in June 1992.

A powerful separatist movement, the Northern League, campaigns for autonomy for the regions around the Po Valley. Local government elections were held on 27 April 1997 and 11 May 1997, involving 11 provinces and 1,192 communes. The electorate was 14·4m. Regional elections held in Nov. 1997 resulted in landslide victories for the ruling centre-left coalition. In mayoral elections on 7 June 1998 the ruling centre-left coalition gained only 5 out of 16 seats in provincial capitals, with the centre-right Freedom Alliance winning 10 seats. The centrist former Christian Democrats took one seat.

DEFENCE

Head of the armed forces is the Defence Chief of Staff. There is conscription for 12 months. In Aug. 1998 the government voted to allow women into the armed forces.

In 1997 defence expenditure totalled US$21,837m. (US$377 per capita), representing 1·9% of GDP.

Army. The Field Army is organized into 3 corps headquarters (1 mountain), consisting of 3 mechanized, 2 armoured and 4 mountain brigades, 2 armoured cavalry, 2 heavy artillery and 2 amphibious battalions, 3 aviation groups, 3 artillery regiments and 2 anti-aircraft regiments; an air defence command with surface-to-air missiles; and an aviation group. There is a territorial defence force of 8 independent mechanized brigades deployed in 7 military regions, and a rapid intervention force and a support brigade with missiles. Equipment includes 167 M-60A1, 910 Leopard and 242 Centauro main battle tanks. The Army air corps operates 8 DO228 transports, over 40 light aircraft and 360 helicopters. Navy. The principal ships of the Navy are the light aircraft carrier *Giuseppe Garibaldi* and the helicopter-carrying cruiser *Vittorio Veneto*. The *Giuseppe Garibaldi*, 13,450 tonnes, was completed in 1985 and operates an air group of 10 SH-3D Sea King anti-submarine helicopters and 5 AV8-B Harrier aircraft. She is also armed with 4 Teseo anti-ship missiles. The *Vittorio Veneto*, completed in 1969, is of 9,650 tonnes, and operates a squadron of 6 AB-212 anti-submarine helicopters as well as a twin launcher for anti-submarine rockets and US Standard SM-1 surface-to-air missiles, and Teseo anti-ship missiles.

The combatant forces also include 8 diesel submarines, 4 guided-missile destroyers armed with Standard SM-I, 26 frigates, of which 18 carry one or more AB-212 helicopters and 6 missile-armed patrol hydrofoils. Mine countermeasure forces comprise 12 coastal minehunters. There are 4 new helicopter-carrying offshore patrol vessels for the protection of economic resources. Amphibious lift for the San Marco commando group (1,000 men) is provided by 3 dock landing ships and 35 craft. Auxiliaries include 2 replenishment oilers, 4 water carriers, 3 survey ships, 4 trial vessels, 2 training ships and 8 large tugs.

The Naval Air Arm, 1,600 strong, operates 75 anti-submarine and training helicopters and has acquired the first 8 operational and 2 training Harrier-type TAV-8B short take off/vertical landing aircraft for the carrier squadron.

There is a Special Forces commando of some 600 assault swimmers.

Main naval bases are at Spezia, Naples, Taranto and Ancona, with minor bases at Brindisi and Venice. The personnel of the Navy in 1998 numbered 40,000 (16,000 conscripts), including the naval air arm and the marine battalion.

Paramilitary maritime tasks are carried out by the Financial Guards fleet of some 70 patrol craft and a harbour control force with 12 inshore patrol craft and numerous boats.

Air Force. Control is exercised through 2 regional headquarters near Taranto and Milan. Units assigned to NATO comprise the 1st air brigade of Nike-Hercules surface-to-air missiles, 9 fighter-bomber, 7 interceptor and 1 tactical reconnaissance

Search and rescue are performed by 30 Agusta-Sikorsky HH-3F helicopters and smaller types. There are also strong support and training elements; some MB 339 jet trainers have armament provisions for secondary close air support and anti-helicopter roles.

Air Force strength in 1998 was about 60,000 (18,000 conscripts).

INTERNATIONAL RELATIONS

Italy is a member of the UN, NATO, EU, WEU and the Central European Initiative. Italy is a signatory to the Schengen Accord of June 1990 which abolishes border controls between Italy and Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Luxembourg, the Netherlands, Norway, Portugal, Spain and Sweden.

ECONOMY

Policy. The government is committed to a reduction in borrowing, a strong currency and low inflation. It has embarked on an ambitious privatization programme to reduce radically its presence in industry and banking. In 1997 the government completed its biggest privatization to date with the 26,000bn. lire flotation of Telecom Italia. It also sold a third tranche in the Eni oil and gas group, privatized the Banca di Roma, Italy's second largest banking group, and pursued this programme with further sell-offs in 1998.

In May 1998 Italy became one of the 11 founder members of the EMU. The OECD reports that with this primary political objective achieved, the tasks of economic policy are to consolidate the progress made on the macroeconomic front, and implement the structural reforms needed for faster employment growth.

Performance. GDP growth at current market prices was 5·7% in 1996 and 4·2% in 1997. Total GDP in 1997 was 1,939,875bn. lire and 2,024,105bn. lire in 1998. Real GDP growth in 1998 was 1·4%, and forecast to be 1·5% in 1999, although the rate of growth was likely to remain weaker than in most European countries. With the terms of trade improving and import growth decelerating, the trade surplus is expected to grow despite the adverse affects of currency depreciation in Asian countries. The OECD commented that this, together with the projected disappearance of the deficit on the invisible account, may keep the current account surplus close to 3·5% in 1999, reinforcing Italy's newly-achieved position as a net creditor *vis-à-vis* the rest of the world.

Budget. Total revenue and expenditure for fiscal years, in 1,000bn. lire:

	Revenue	*Expenditure*		*Revenue*	*Expenditure*
1991	456,995	579,966	1994	504,320	641,910
1992	512,718	627,579	1995	557,657	699,534
1993	516,655	663,237	1996	591,991	727,402

Budgets for 1998 (and 1997) in 1,000,000m. lire: revenue, 581,188 (591,161) of which tax 546,188 (554,194); expenditure, 673,182 (690,737) of which capital expenditure 68,598 (67,070) and interest payments 181,121 (193,002).

The 1998 budget provided for an increase in value-added tax. Some reforms due to take place in 1998 were meant to reallocate the existing tax burden in a more business-friendly way. The rate of corporation tax was to come down from 53·2% to 37%. Other measure include reducing social security contributions, and a new two-tier income tax, brought in to encourage entrepreneurs to reinvest in profits and issue

equity. Accompanying the tax reform was the devolution of substantial taxing powers from the central government to the regions.

VAT is 20% (reduced rate, 10%).

The public debt at 31 Dec. 1997 totalled 2,100,686,000m. lire. Between 1992 and 1997 the public deficit came down from more than 10% to 3%, or possibly less, of gross domestic product. Interest rates have also declined significantly.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Italy and the *lira* became a subdivision of it; irrevocable conversion rate 1,936·27 lira to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002 the euro can be used in banking; by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and lire until the lira is withdrawn from circulation—which must be by 1 July 2002.

The *lira* (ITL) notionally consists of 100 *centesimi*. Inflation was 1·7% in 1997 (the lowest rate in 30 years) and 1·8% in 1998. The Economic Bulletin reported that "professional forecasters expect inflation to decline to just above 1% in line with the forecast for the euro area as a whole". The lira left the ERM in Sept. 1993 and rejoined in Nov. 1996. Gold reserves were 66·67m. troy oz. in Feb. 1998 and foreign exchange reserves were US$51,542m. Total money supply in Dec. 1997 was 646,000bn. lire.

Banking and Finance. The bank of issue is the Bank of Italy (founded 1893). It is owned by public-sector banks. Its *governor* (Antonio Fazio, b. 1936) is selected without fixed term by the 13 directors of the Bank's non-executive board. In 1991 it received increased responsibility for the supervision of banking and stock exchange affairs, and in 1993 greater independence from the government. Its gold reserve amounted to 40,929bn. lire in Dec. 1998; the foreign credit reserves of the Exchange Bureau (*Ufficio Italiano Cambi*) amounted to 88,611bn. lire.

Credit institutions are under the control of the state's 'Inspectorate of Credit'. Other credit institutions are classified as: (1) 176 commercial banks including 80 banche popolari and 51 branches of foreign banks; (2) 591 co-operative banks; (3) 700 rural and artisans' banks; (4) 6 Istituti di Categoria.

The 'Amato' law of July 1990 gave public sector banks the right to become joint stock companies and permitted the placing of up to 49% of their equity with private shareholders.

On 31 Dec. 1997 the post office savings banks had deposits and current accounts of 307,481,000m. lire. On 31 Dec. 1998 credit institutions had deposits of 892,091bn. lire.

Legislation reforming stock markets came into effect in Dec. 1990. In 1996 local stock exchanges, relics of pre-unification Italy, were closed, and stock exchange activities concentrated in Milan.

Weights and Measures. The metric system is in use. 1 quintal = 100 kg.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 57·19m. kW in 1994. In 1997 the total power generated was 251,462m. kWh, of which 46,676m. kWh were generated by hydro-electric plants. Consumption in 1997 was 253,673m. kWh, of which 58,507m. kWh was for domestic use. Consumption per capita was an estimated 4,238 kWh in 1995.

Oil and Gas. Oil production, 1997, 5,892,055 tonnes. In 1997, natural gas production in 1,000 cu. metres was 19,123,396.

Fisheries. The fishing fleet comprised, in 1994, 15,798 motor boats of 245,637 gross tonnes. The catch in 1996 was 3,325,990 quintals, of which 3,258,346 quintals were from marine waters.

INDUSTRY

Industry accounted for 25·6% of GDP in 1997. The main branches of industry are: (% of industrial value added at factor cost in 1996) Textiles, clothing, leather and footwear (11·2%), food, beverages and tobacco (8·0%), energy products (11·8%), agricultural and industrial machines (9·2%), metal products except machines and means of transport (8·9%), mineral and non-metallic mineral products (5·8%), timber and wooden furniture (4·5%), electric plants and equipment (6·7%), chemicals and pharmaceuticals (8·2%), means of transport (5·4%).

In 1996, 60·9% of the workforce were in services, 32·1% in industry and 7% in agriculture. There are strong indications of labour markets having become less rigid, especially in the north. In the centre and north unemployment was 6·9% in July 1998; in the relatively poor south, it was 22·5%. In 1995 the difference in the unemployment rates in the north and in the south was 14%, compared to a difference of just 2% in the 1960s. Over 50% of Italy's jobless have been out of work for more than a year. Pensionable retirement age was 60 for men and 55 for women in 1991, but this is being progressively raised to 65 for both sexes. Agreements between the government, employers and trade unions in 1992 and 1993 ended automatic wage indexation and regulated labour relations and wage increases. There are plans to introduce a 35-hour week in 2001.

In 1997 parliament approved the so-called 'Trev Package', which involves a large number of institutional changes regarding working hours and apprenticeships, mainly for young people from the south, and the introduction of employment agencies.

Trade Unions. There are 3 main groups: the Confederazione Generale Italiana del Lavoro (CGIL; no longer Communist-dominated), the Confederazione Italiana Sindacati Lavoratori (CISL; Catholic), and the Unione Italiana del Lavoro (UIL). Membership in 1994: CGIL, 5·2m. (2·7m. retired); CISL, 3·7m. (1·5m. retired); UIL, 1·7m. (0·5m. retired). In referendums held in June 1995 the electorate voted to remove some restrictions on trade union representation, end government involvement in public sector trade unions and end the automatic deduction of trade union dues from wage packets.

JAMAICA

Capital: Kingston
Population estimate, 2000: 2·59m.
GNP per capita: (PPP$) 3,450
HDI/world rank: 0·735/84

KEY HISTORICAL EVENTS

Jamaica was discovered by Columbus in 1494 and was occupied by the Spaniards from 1509 until 1655 when the island was captured by the English. Their possession was confirmed by the Treaty of Madrid of 1670. In 1661, a representative constitution was established consisting of a governor, privy council, legislative council and legislative assembly. The slavery introduced by the Spanish was augmented as sugar production increased in value and extent in the 18th century. The plantation economy collapsed with the abolition of the slave trade in the late 1830s. The 1866 Crown Colony government was introduced, with a legislative council consisting of official and unofficial members. In 1884 a partially elective legislative council was instituted. Women were enfranchised in 1919. By the late 1930s, demands for self-government increased and the constitution of Nov. 1944 stated that the governor was to be assisted by a house of representatives of 32 elected members, a legislative council (the upper house) of 15 members, and an executive council. Every person over 21 years of age was granted the right to vote.

In 1958 Jamaica joined with Trinidad, Barbados, the Leeward Islands and the Windward Islands to create the West Indies Federation; but Jamaica withdrew in 1961. In 1959 internal self-government was achieved and in 1962 Jamaica became an independent state within the British Commonwealth.

TERRITORY AND POPULATION

Jamaica is an island which lies in the Caribbean Sea about 150 km south of Cuba. The area is 4,411 sq. miles (11,425 sq. km). The population at the census of 7 April 1991 was 2,374,193. Estimated population in 1995 was 2,500,025, distributed on the basis of the 13 parishes of the island as follows: Kingston and St Andrew, 683,700; St Thomas, 88,600; Portland, 78,300; St Mary, 111,200; St Ann, 155,800; Trelawny, 72,100; St James, 167,100; Hanover, 67,600; Westmoreland, 133,800; St Elizabeth, 148,200; Manchester, 173,500; St Catherine, 398,600; Clarendon, 221,500. 1995 density; 219 per sq. km.

The UN gives a projected population for 2000 of 2·59m.

An estimated 53·7% of the population were urban in 1995.

Chief towns (population, 1995): Kingston and St Andrew, 538,100, metropolitan area; Spanish Town, 110,400; Portmore, 93,800; Montego Bay, 82,000; May Pen, 45,900; Mandeville, 39,900.

The population is about 75% of African ethnic origin.

SOCIAL STATISTICS

Expectation of life at birth, 1990–95, 71·4 years for males and 75·8 years for females. Infant mortality, 1990–95, 14 per 1,000 live births; fertility rate, 2·6 births per woman.

CLIMATE

A tropical climate but with considerable variation. High temperatures on the coast are usually mitigated by sea breezes, while upland areas enjoy cooler and less humid conditions. Rainfall is plentiful over most of Jamaica, being heaviest in May and from Aug. to Nov. The island lies in the hurricane zone. Kingston, Jan. 76°F (24·4°C), July 81°F (27·2°C). Annual rainfall 32" (800 mm).

CONSTITUTION AND GOVERNMENT

Under the Constitution of Aug. 1962 the Crown is represented by a Governor-General appointed by the Crown on the advice of the Prime Minister. The Governor-General is assisted by a Privy Council of 6 appointed members. The Legislature

comprises the *House of Representatives* and the *Senate*. The Senate consists of 21 senators appointed by the Governor-General, 13 on the advice of the Prime Minister, 8 on the advice of the Leader of the Opposition. The House of Representatives (60 members) is elected by universal adult suffrage for a period not exceeding 5 years. Electors and elected must be Jamaican or Commonwealth citizens resident in Jamaica for at least 12 months before registration. It is likely that Jamaica will become a republic in the early part of the 21st century, with Queen Elizabeth II being replaced as head of state by a ceremonial president.

KEY HISTORICAL EVENTS

The house of Yamato united the nation in about 200 AD. The present imperial family are their direct descendants. From 1186 until 1867 successive families of the military Shoguns exercised the temporal power. For centuries Japan followed a policy of national isolation. The 16th century marked the beginning of foreign trade but in the 17th century all exchange with Europeans and all trade, except with the Dutch, was proscribed. Not until 1859 was the country opened to foreign trade and residence. In 1867 the Emperor Meiji recovered the imperial power after the abdication on 14 Oct. 1867 of the fifteenth and last Tokugawa Shogun Keiko. In 1871 the feudal system (*Hōken Seido*) was abolished and in the early 1890s constitutional government was introduced by the Emperor.

Japan's victory over Russia in the war of 1904 prevented Russian expansion into Korea and consolidated Japan's position as the strongest military power in Asia. Japan used the pretext of the Anglo-Japanese alliance to attack Chinese territory during the First World War. Bad feelings over the terms of the subsequent peace treaty led to continuing hostility between the two countries.

Economic distress, population growth (from 30m. in 1868 to 65m. in 1930) and a sense of dissatisfaction with the 'unjapanese' system of constitutional government led to the emergence between the wars of extremist nationalist and militarist movements in Japan. Plots among the young army officers, a revolt in Manchuria and the assassination of two prime ministers (a third only escaped when his brother-in-law was shot by mistake) highlighted the weaknesses of central government. In 1936 a military revolt in Tokyo gave the premiership to Konoe Fumimaro, a popular but ineffective figure, who failed to prevent further militarization of the country. In 1938 a national mobilization law was passed and in 1940 all political parties merged into the Imperial Rule Assistance Association.

On 27 Sept. 1940 Germany, Italy and Japan signed a 10 year pact to assure their mutual co-operation in the establishment of a 'new world order', with Japanese leadership recognized in Asia. In 1940 Japan invaded North Indochina and on 7 Dec. 1941 attacked the United States (principally at Pearl Harbour) and British bases in the Pacific, and then declared war on these two countries. Japanese forces eventually surrendered in Aug. 1945 after the dropping of atomic bombs on Hiroshima and Nagasaki. The country was placed under US military occupation, and in a new constitution in 1947 the Japanese people renounced the war and pledged themselves to uphold democracy and peace. The Emperor became a constitutional monarch instead of a divine ruler.

At San Francisco on 8 Sept. 1951 a Treaty of Peace was signed by Japan and representatives of 48 countries. A security treaty with the USA provided for the stationing of American troops in Japan until the latter was able to undertake its own defence. The peace treaty came into force on 28 April 1952, when Japan regained her sovereignty. Of the islands under US administration since 1945, the Bonin (Ogasawara), Volcano, and Daito groups and Marcus Island were returned to Japan in 1968, and the southern Ryukyu Islands (Okinawa) in 1972.

Confidence in what had been a world beating economy fell drastically after 1997 causing the government to cut taxes, provide financial support for small companies and to begin the reform of the heavily indebted banking system.

CONSTITUTION AND GOVERNMENT

The Emperor is Akihito (b. 23 Dec. 1933), who succeeded his father, Hirohito on 7 Jan. 1989 (enthroned, 12 Nov. 1990); married 10 April 1959, to Michiko Shoda (b. 20 Oct. 1934). *Offspring:* Crown Prince Naruhito (Hironomiya; b. 23 Feb. 1960), married Masako Owada (b. 9 Dec. 1963) 9 June 1993; Prince Fumihito (Akishinomiya; b. 30 Nov. 1965); Princess Sayako (Norinomiya; b. 18 April 1969). In it the Japanese people pledge themselves to uphold the ideas of democracy and peace. The Emperor is the symbol of the States and of the unity of the people. Sovereign power rests with the people. The Emperor has no powers related to government. Fundamental human rights are guaranteed.

Legislative power rests with the *Diet*, which consists of the *House of Representatives*, elected by men and women over 20 years of age for a 4-year term, and an upper house, the *House of Councillors* of 252 members (100 elected by party list system with proportional representation according to the d'Hondt method and 152 from prefectural districts), one-half of its members being elected every 3 years.

In Nov. 1994 the Diet adopted electoral reforms changing the number of members in the House of Representatives from 511 to 500, of whom 300 are to be elected from single-seat constituencies, and 200 by proportional representation on a base of 11 regions. There is a 2% threshold to gain one of the latter seats. Donations to individual politicians are to be supplanted over 5 years by state subsidies to parties.

DEFENCE

Japan has renounced war as a sovereign right and the threat or the use of force as a means of settling disputes with other nations. Its troops had not been able to serve abroad, but in 1992 the House of Representatives voted to allow up to 2,000 troops to take part in UN peacekeeping missions. A law of Nov. 1994 authorizes the Self-Defence Force to send aircraft abroad in rescue operations where Japanese citizens are involved.

In Jan. 1991 Japan and the USA signed a renewal agreement under which Japan pays 40% of the costs of stationing US forces and 100% of the associated labour costs. US forces in Japan totalled 47,000 in 1997, of whom 28,000 were on Okinawa. A US-Japanese agreement of Dec. 1996 stipulates that one fifth of the territory on Okinawa occupied by the US military is to be returned to local landowners by 2008.

Defence expenditure in 1997 totalled US$40,891m. (US$325 per capita).

Army. The 'Ground Self-Defence Force' is organized in 5 regional commands and in 1997 had an authorized strength of 148,000 (5,200 women) and a reserve of 46,000 men. The Army is organized in 12 infantry divisions, 1 armoured division, 1 airborne brigade, 2 air defence brigades, 1 artillery, 2 combined, 5 engineer and 1 helicopter brigade in addition to 4 training brigades. Equipment includes 190 T-61, 870 T-74 and 100 T-90 main battle tanks, approximately 90 AH-1S attack helicopters, as well as some 200 transport helicopters and 16 MU-2H fixed-wing aircraft.

Navy. The 'Maritime Self-Defence Force' is tasked with coastal protection and defence of the sea lanes to 1,000 nautical miles range from Japan. The modern and well-equipped combatant forces are mainly fitted with American weapon systems, which in many cases have been re-engineered and improved in Japan.

The combatant fleet, all home-built, includes 17 diesel submarines and 1 trials and training boat. There are 3 Aegis-equipped guided-missile destroyers, 5 other guided-missile destroyers armed with US Standard SM-1 surface-to-air missiles, 25 helicopter-carrying frigates and 27 other frigates, of which 2 are employed on non-military tasks. Light forces comprise 3 missile hydrofoils and 3 small inshore patrol craft. There are 39 mine warfare vessels: 1 minelayer, 1 layer/command ship, 3 1,200-tonne offshore mine countermeasure vessels, 27 coastal minesweepers and 2 smaller vessels. A substantial amphibious capability is provided by 6 tank landing ships supported by some 40 smaller craft. 12 major auxiliaries include 4 combined oiler/ammunition ships, 8 survey vessels and 5 training support vessels, and there are several hundred minor auxiliaries and service craft.

Training units use piston-engined Fuji T-3 basic trainers, Fuji T-1 jet intermediate trainers, Kawasaki T-4 jet trainers and supersonic Mitsubishi T-2 jet advanced trainers. 6 surface-to-air missile groups (19 squadrons) are in service. Strength (1996) 44,500.

INTERNATIONAL RELATIONS

In terms of total aid given, Japan was the most generous country in the world in 1997, donating US$9·4bn. in international aid in the course of the year. This represented 0·22% of its GDP.

Japan is a member of the UN, Colombo Plan, APEC and OECD.

ECONOMY

Policy. The head of the Economic Planning Agency (Taichi Sakaiya) has cabinet rank. In Dec. 1996 the Government adopted a 5-year economic and financial reform plan centred on the relaxing of state controls and the creation of jobs. Its implementation is co-ordinated by the Ministry of International Trade and Industry. In late 1997 the economy was thrown off course by the collapse of three leading financial institutions which had been saddled with bad debts following the stock market and property crash in 1990. Following a period of recession, this raised fears of another but more severe downturn.

A series of packages of measures aimed at reviving the Japanese economy were introduced in late 1997 and early 1998. Key measures included proposals to stabilize the financial sector, deregulate share buy-backs, promote discussion of US-style pension plans and allow companies to change the way they value land assets. However, the ruling Liberal Democratic Party remained strictly opposed to income tax cuts, which many of Japan's trading partners wanted to see introduced to boost domestic demand.

Performance. The real growth rate for 1998 was estimated at –2·2%, the first negative economic growth rate since the oil crisis of 1974 savaged the economy. Bankruptcies have been running at record levels. Yet, for all the financial blues, Japan remains one of the world's strongest economies with a highly trained workforce and the talent to exploit profitable export markets.

Budget. Ordinary revenue and expenditure for fiscal year ending 31 March 1999 balanced at 77,669,200m. yen.

Of the proposed revenue (in yen) in 1998, 58,522,000m. was to come from taxes and stamps, 15,557,000m. from public bonds. Main items of expenditure: Social security, 14,843,100m.; public works, 8,985,300m.; local government, 15,870,000m.; education, 6,345,700m.; defence, 4,939,700m.

The outstanding national debt incurred by public bonds was estimated in March 1997 to be 247,462,000m. yen.

The estimated 1998 budgets of the prefectures and other local authorities forecast a total revenue of 87,096,000m. yen, to be made up partly by local taxes and partly by government grants and local loans.

Currency. The unit of currency is the *yen* (JPY). Inflation in 1997 was 1·8%, with a forecast of 0·3% in 1998. Japan's foreign exchange reserves totalled US$209,778m. in Feb. 1998 (the highest of any country). Gold reserves in Feb. 1998 were 24·23m. troy oz. In Dec. 1997 the currency in circulation consisted of 54,670,000m. yen Bank of Japan notes and 4,046,000m. yen subsidiary coins.

Banking and Finance. The Nippon Ginko (Bank of Japan), founded 1882, finances the government and the banks, its function being similar to that of a central bank in other countries. The Bank undertakes the management of Treasury funds and foreign exchange control. Its *Governor* is Masaru Hayami (b. 1925; appointed March 1998 for a 5-year term). Its gold bullion and cash holdings at 31 Dec. 1997 stood at 517,000m. yen.

There were on 31 Dec. 1997, 10 city banks, 64 regional banks, 33 trust banks, 3 long-term credit banks, 64 member banks of the second association of regional banks, 405 Shinkin banks (credit associations), 352 credit co-operatives, and 93 foreign banks. There are also various governmental financial institutions, including postal savings which amounted to 247,114,700m. yen in Sept. 1998. Total savings by individuals, including insurance and securities, stood at 1,182,335,600m. yen on 30 Sept. 1998, and about 58% of these savings were deposited in banks and the post-office.

1997 saw the disappearance of Yamaichi Securities, Japan's fourth largest stockholder; also Sanyo Securities and the Hokkaido Takushoku bank.

Japan's banks are in a situation where many of them would be insolvent if they admitted the market value of the loans, shares and property they hold. As at 30 Sept. 1998 it was estimated that the banking system's bad loans amounted to 21,230bn. yen (US$179bn.).

There are 8 stock exchanges, the largest being in Tokyo, Osaka and Nagoya.

Weights and Measures. The metric system is obligatory.

ENERGY AND NATURAL RESOURCES

In 1996 generating facilities were capable of an output of 233·7m. kW; electricity produced was 1,009,349m. kWh. There were 51 nuclear reactors in 19 power plants, producing 33·4% of electricity, and 6 more were under construction in 1996. 10 regional publicly-held supply companies produce 74·4% of output. Consumption per capita in 1995 was an estimated 6,895 kWh.

Rice is the staple food, but its consumption is declining. Rice cultivation accounted for 1,953,000 ha in 1997. The area planted with industrial crops such as rapeseed, tobacco, tea, rush, etc., was 202,000 ha in 1996.

Average farm size was 1·5 ha in 1997.

In 1995 there were 3,467,000 power cultivators and tractors and 1,650,000 rice power planters. (1990): 1,871,000 power sprayers and dusters.

Output of rice (in 1,000 tonnes), was 10,748 in 1995, 10,344 in 1996 and 10,025 in 1997.

Sweet potatoes, which in the past mitigated the effects of rice famines, have, in view of rice over-production, decreased from 4,955,000 tonnes in 1965 to 1,130,000 tonnes in 1997. Domestic sugar-beet and sugar-cane production accounted for only

35% of requirement in 1995. In 1997, 1·71m. tonnes were imported, 38·8% of this being imported from Australia, 37·8% from Thailand, 13·4% from Cuba and 8·2% from South Africa.

KEY HISTORICAL EVENTS

During the first World War (1914–18) the Arabs of Transjordan and Palestine rebelled against the suzerainty of Turkey, which had become an ally of Germany. Britain supported the rebellion, occupied the areas and in 1920 was given a League of Nations mandate for Transjordan and Palestine. In April 1921 the Amir Abdullah Ibn Hussein (brother of King Feisal of Iraq) became the ruler of Transjordan, which was officially separated from Palestine in 1923. On 20 Feb. 1928 an agreement was signed between Transjordan and Britain whereby the latter (with the approval of the League of Nations) recognized the existence of an independent government in Transjordan under the rule of the Amir Abdullah.

By a treaty signed in London on 22 March 1946 Britain recognized Transjordan as a sovereign independent state. On 25 May 1946 the Amir Abdullah assumed the title of king; and when the treaty was ratified on 17 June 1949 the name of the territory was changed to that of the Hashemite Kingdom of Jordan. On 13 March 1957 the Anglo-Transjordan treaty of March 1948 was terminated by mutual consent, and all British troops were withdrawn.

The part of Palestine remaining to the Arabs under the armistice with Israel on 3 April 1949, with the exception of the Gaza Strip on the Mediterranean coast, was in Dec. 1949 placed under Jordanian rule and formally incorporated in Jordan on 24 April 1950. In June 1967 this territory ('the West Bank') was occupied by Israel. On 31 July 1988 King Hussein announced the dissolution of Jordan's legal and administrative ties with the West Bank.

King Hussein, who became king in 1953 at the age of 17 after his father was declared mentally unfit to rule, remained in executive control in the face of attempted assassinations and frequent changes of prime ministers for 35 years until his death on 7 Feb. 1999.

In Jan. 1999, the late King Hussein had confirmed by royal decree that his eldest son, Prince Abdullah, was his heir in place of the King's brother Prince Hassan Bin Talal who had held the position of Crown Prince for 34 years. King Hussein died on 7 Feb. 1999.

The Constitution ratified on 8 Dec. 1952 provides that the Cabinet is responsible to Parliament. The legislature consists of a *Senate* of 40 members appointed by the King and a *Chamber of Deputies* of 80 members elected by universal suffrage. 9 seats are reserved for Christians, 6 for Bedouin and 3 for Circassians. A law of 1993 restricts each elector to a single vote, replacing a system in which electors had several votes depending on the number of seats in the constituency.

The lower house was dissolved in 1976 and elections postponed because no elections could be held in the West Bank under Israeli occupation. Parliament was reconvened on 9 Jan. 1984. By-elections were held in March 1984 and 6 members were nominated for the West Bank, bringing Parliament to 60 members. Women voted for the first time in 1984. On 9 June 1991 the King and the main political movements endorsed a national charter which legalized political parties in return for the acceptance of the constitution and monarchy. Movements linked to, or financed by, non-Jordanian bodies are not allowed.

KEY HISTORICAL EVENTS

What was formerly known as Soviet Central Asia embraced the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent (now Toshkent) was occupied and in 1868 Samarkand (now Samarqand), and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by an agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government was established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar régime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan (now Uzbekiston), Turkmenistan and Tajikistan were accepted into the USSR as Union Republics. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan which was established as an Autonomous Soviet Republic in 1925 and became a constituent republic in 1936.

Independence was declared on 16 Dec. 1991 when Kazakhstan joined the CIS.

The 1989 census population was 16,464,464, of whom Kazakhs accounted for 39·7%, Russians 37·8%, Germans 5·8%, Ukrainians 5·4%, Uzbeks and Tatars 2% each. In 1997 there were 0·5m. Germans. Since 1992 a further 0·5m. have emigrated to Germany. Estimate, Jan. 1996, 16·5m. (51·4% female; 59·6% urban) with a population density of 6·1 per sq. km.

CONSTITUTION AND GOVERNMENT

Relying on a judgement of the Constitutional Court that the 1994 parliamentary elections were invalid, President Nazarbaev dissolved parliament on 11 March 1995 and began to rule by decree. A referendum on the adoption of a new constitution was held on 30 Aug. 1995. The electorate was 8·8m.; turn-out was 80%. 89% of votes cast were in favour. The Constitution thus adopted allows the President to rule by decree and to dissolve parliament if it holds a no-confidence vote or twice rejects his nominee for Prime Minister. It establishes a parliament consisting of a 47-member Senate, 40 senators being elected by some 4,000 representatives of local authorities and 7 appointed by the President; and a lower house of 67, directly elected, though heads of families may cast votes for all of their family members. Candidates must gain an absolute majority of votes to be elected, and are not permitted to disclose their political affiliation.

A Constitutional Court was set up in Dec. 1991 and a new Constitution adopted on 28 Jan. 1993, but President Nazarbaev abolished the Constitutional Court in 1995.

National Anthem. A competition for a new anthem had no result, and the old Soviet anthem is retained.

DEFENCE

In 1991 the former Soviet Union transferred some 2,680 T-64/-720, 2,428 ACVs and 6,900 artillery to storage bases in Kazakhstan. The equipment is deteriorating. A US funded programme for nuclear dismantlement and demilitarization continues.

Defence expenditure in 1997 totalled US$503m. (US$31 per capita).

Army. The Army is organized in 1 tank and 2 motor rifle divisions; 1 independent motor rifle, 1 artillery, 1 multiple rocket launcher and 1 surface-to-surface missile regiment; and 1 artillery and 1 airborne brigade. Equipment includes 624 T-62 and T-72 main battle tanks. Personnel, 1996, 25,000. Paramilitary units: Republican Guard (2,500), Ministry of the Interior Security Troops (20,000), Frontier Guards (12,000).

Navy. Formally constituted in Aug. 1996, a force of 9 inshore patrol craft with further craft on order from Germany operates on the Caspian Sea. Personnel, 250.

Air Force. In 1995 there was an Air Force division with about 15,000 personnel with some 150 combat aircraft, including MiG-29 and Su-27 interceptors and MiG-27 and Su-24 strike aircraft.

INTERNATIONAL RELATIONS

In Jan. 1995 agreements were reached for closer integration with Russia, including the combining of military forces, currency convertibility and a customs union.

Kazakhstan is a member of the UN, CIS and the NATO Partnership for Peace. Sandwiched between Russia and China, in 1998 President Nazarbaev signed major treaties with both countries in the hope of improving relations with both.

ECONOMY

Policy. A National Council for Economic Reform was instituted in Jan. 1993. A privatization programme for 1993–95 envisaged the sale of most state enterprises with more than 200 employees by a combination of cash and vouchers. Enterprises of national importance remain controlled by the government through holding companies. President Nazarbaev is overseeing a process of wholesale privatization, the reform of financial and credit systems, the liberalization of prices for goods and services, the adoption of a system of free trade and the attraction of foreign investment. A privatization programme started in April 1994 involving the auctioning of 3,500 medium-size enterprises. Coupons are issued to citizens to be exchanged for shares in investment funds. Foreign nationals may participate in trading after the auctions. Large (i.e. with over 2,000 employees) and small (i.e. with fewer than 500) enterprises are being sold for cash.

Performance. The break-up of the Soviet Union triggered an economic collapse, as orders from Russian factories for Kazakhstan's metals and phosphates, 2 mainstays of the economy, dried up. Low oil and commodity prices cut revenues by a third in 1998. Real GDP growth was 1·1% in 1997 and forecast to be 1·8% in 1998, having been –8·9% in 1995.

Budget. The government was forced to withdraw the 1999 budget in order to recalculate the effect of lower commodity prices on GDP. Budgetary income in 1996 (1997 in brackets) was 218,278m. tenge (278,737m. tenge); expenditure was 259,564m. tenge (300,945m. tenge).

Currency. The unit of currency is the *tenge* of 100 *tiyn*, which was introduced on 15 Nov. 1993 at 1 tenge = 500 roubles. It became the sole legal tender on 25 Nov. 1993. Inflation was running at 1,250% in 1994, but had dropped to 130% in 1997, and it was hoped that it would be around 17% by the end of 1998. In Jan. 1997 foreign exchange reserves were US$2,700m. Total money supply in Sept. 1997 was 102,541m. tenge.

Banking and Finance. The central bank and bank of issue is the National Bank (*Governor*, Uraz Djandosov). In 1998 there were 90 banks, compared to 240 in 1993.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity is 17m. kW. Output in 1996 was 58,600m. kWh. (1997 estimate, 61,000m. kWh). There is 1 nuclear power station. Consumption per capita was an estimated 3,800 kWh in 1996.

Oil and Gas. By 2010 Kazakhstan aims to have become the world's sixth largest oil producer.

Proven oil reserves in 1996 were 2,000m. tonnes. The Tengiz field has estimated oil reserves between 6,000m. and 9,000m. bbls.; the Karachaganak field has oil reserves of 2,000m. bbls., and gas reserves of 20,000,000m. cu. feet. Output of crude oil (including gas concentrates), 1996, 22·9m. tonnes (1997 estimate, 26·2m. tonnes); natural gas, 6,396m. cu. metres (1997 estimate, 7,300m. cu. metres). In Sept. 1997 Kazakhstan signed oil agreements with China worth US$9·5bn.; these include a 3,000 km pipeline to Xinjiang province in western China. Oil and gas investment by foreign companies is now driving the economy. In 1997 oil production sharing deals were concluded with 2 international consortia to explore the North Caspian basin and to develop the Karachaganak gas field.

It is hoped that by 2003 exploitation of the oil reserves of the Caspian shelf will start. Initially production is expected to amount to 100,000 bbls. per day, possibly rising to as much as 1·2m. bbls. per day by 2013. It is believed that there may be as much as 14bn. tonnes of oil and gas reserves under Kazakhstan's portion of the Caspian Sea. In early 1998 the Tengiz field was yielding 170,000 bbls. per day, which should rise to 250,000 per day by 2000.

Minerals. Kazakhstan is extremely rich in mineral resources, including coal, bauxite, cobalt, vanadium, iron ores, chromium, phosphates, borates and other salts, copper, lead, manganese, molybdenum, nickel, tin, gold, silver tungsten and zinc. Coal production (1996 estimate), 76·6m. tonnes; iron ore (1996), 12·6m. tonnes; gold (1993), 14·6 tonnes; steel (1996), 3·22m. tonnes; refined copper (1997 estimate), 0·30m. tonnes.

Agriculture. Kazakh agriculture has changed from primarily nomad cattle breeding to production of grain, cotton and other industrial crops. In 1996 agriculture accounted for 13% of GDP. In 1993, 181·3m. ha were under cultivation, of which private subsidiary agriculture accounted for 0·3m. ha and commercial farming 6·3m. ha in 16,300 farms. Private and commercial agriculture accounted for 35% of output by value in 1992; agricultural output was valued at 13,700m. roubles (in constant 1983 prices) in 1993, 97% of the 1992 figure. In 1993 agriculture contributed 37% of GNP. Around 60,000 private farms have emerged since independence.

Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards, which accounted for 95,000 ha of cultivated land in 1985. Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. Livestock (1996): 6·86m. cattle (down from 9·57m. in 1993), 18·72m. sheep (down from 33·63m. in 1993), 1·7m. horses and (1995) 50m. chickens.

Output of main agricultural products (in 1m. tonnes) in 1997 (estimate): Grain, 14·2; sugar-beet, 0·4; cotton, 0·2; vegetables, 0·8; meat (cattle and poultry), 1·4 (1996); milk, 3·7; and 1,400m. eggs. About half of the grain is exported, mainly to Russia (around 5·5m. tonnes annually), Ukraine and Turkmenistan.

Forestry. Forests covered 10·50m. ha in 1995, or 3·9% of the land area (up from 9·54m. ha and 3·6% in 1990). Only the USA and Uzbekiston exceeded the 0·96m. ha afforested in Kazakhstan between 1990 and 1995. In 1997, 290,000 cu. metres of timber were cut.

Fisheries. Catches in 1995 totalled 49,602 tonnes, exclusively freshwater fish.

INDUSTRY

Kazakhstan was heavily industrialized in the Soviet period, with non-ferrous metallurgy, heavy engineering and the chemical industries prominent. Output was valued at 30,000m. tenge in current prices in 1996 and 35,000m. tenge in 1997. Production (1997 estimate, in tonnes) included ferroalloy, 680,000; mineral fertilizer, 200,000; chemical fibre, 1,900 (1993); cardboard, 7,400 (1996); lead, 85,000; fabrics, 24·6m. sq. metres; leather footwear, 0·8m. pairs; forge-press machines, 180; tractors, 3,100; radio sets, 600; refrigerators and freezers, 12,900 (1993); washing machines, 23,200.

Labour. In 1996 the population of working age was estimated as 7·4m. In Jan. 1997, 3% of the labour force were registered unemployed, of whom 15,400 were receiving benefits. Average monthly salaries in 1993 were 134·9 tenge.

INTERNATIONAL TRADE

In Jan. 1994 an agreement to create a single economic zone was signed with Kyrgyzstan and Uzbekistan (now Uzbekiston). Since Jan. 1992 individuals and enterprises have been able to engage in foreign trade without needing government permission, except for goods 'of national interest' (fuel, minerals, mineral fertilizers, grain, cotton, wool, caviar and pharmaceutical products) which may be exported only by state organizations. Foreign nationals may be licensed to purchase Kazakh assets for privatization. Foreign debt was US$4,500m. in 1997.

Imports and Exports. In 1997 imports were valued at US$6,656m. and exports at US$6,015m. Main export markets (% of trade in 1996): CIS countries, 55·7%; Europe, 26·4%; Asia, 16·2%; America, 1·5%. KEY HISTORICAL EVENTS

Prior to colonialism, the area covered by Kenya comprised African farming communities, notably the Kikuyu and the Masai. From the 16th century through to the 19th, they were loosely controlled by the Arabic rulers of Oman (whose base moved to Zanzibar in the early 19th century). In 1895, the British declared part of the region the East Africa Protectorate, including the mainland dominions of the Sultan of Zanzibar as well as Mau, Kipini, the island of Lamu and all adjacent islands between the rivers Umba and Tana. In 1905 the colony and the protectorate, formerly known as the East African Protectorate, was transferred from the Foreign Office to the Colonial Office. In Nov. 1906 the protectorate, excluding the Sultan of Zanzibar's dominions, was placed under the control of a governor and annexed to the Crown, and known from 1920 as the Colony of Kenya. It was only in Dec. 1963 that the Sultan ceded his coastal strip to Kenya.

In the First World War the Germans in East Africa invaded the south of Kenya but the British army, under Gen. Smuts, counter-attacked and captured much of German East Africa.

The influx of European settlers was resented by Africans not only for the whites' land holdings, but also for their exclusive political representation in the colonial Legislative Council. A state of emergency existed between Oct. 1952 and Jan. 1960 during the period of the Mau Mau uprising caused by discontent, particularly among the Kikuyu people, over colonial rule and land policy. Over 13,000 Africans and 100 Europeans were killed. The Kenya African Union was banned and its president, Jomo Kenyatta, imprisoned. When the state of emergency ended in 1960 political activity resumed, to pave the way to independence, and two political parties emerged.

On his release from imprisonment Jomo Kenyatta became president of the Kenya Africa National Union, while the Kenya African Democratic Union, which favoured a regional form of government, was led by Ronald Ngala and Daniel T. arap Moi.

Full internal self-government was achieved in 1962 and in Dec. 1963 Kenya became an independent member of the Commonwealth.

Before independence the East African High Commission had been administering services of an inter-territorial nature for Kenya, Tanzania and Uganda and this continued after independence. The arrangement was changed to the East African Community in 1967. The Community practically ceased to function after 30 June 1977, chiefly because of the failure to agree a budget and the refusal of President Nyerere of Tanzania to negotiate with President Amin of Uganda.

In 1964 and 1965 constitutional amendments provided for Kenya to become a republic with a president as head of state, and a further change in 1966 required members who changed their parties to seek re-election. Later that year another amendment amalgamated the Senate and the House of Representatives to form a unicameral National Assembly.

In 1982 Kenya became a one-party state and in 1986 party preliminary elections were instituted to reduce the number of parliamentary candidates at general elections. Only those candidates obtaining over 30% of the preliminary vote were eligible to stand.

On the death of Kenyatta in Aug. 1978 Daniel T. arap Moi, the vice-president, became acting president and was elected in 1979, and then re-elected in 1983, 1988, 1992 and 1997. An attempted coup in 1982 was unsuccessful. A multi-party election was permitted in 1992 and again in 1997, the first genuinely competitive elections since 1963.

TERRITORY AND POPULATION

Kenya is bounded by Sudan and Ethiopia in the north, Uganda in the west, Tanzania in the south and Somalia and the Indian Ocean in the east. The total area is 582,646 sq. km, of which 571,416 sq. km is land area. In the 1989 census, the population was 21,443,636 (19% urban).

The UN gives a projected population for 2000 of 30·34m.

The land areas, populations and capitals of the provinces are:

Most of Kenya's 26·44m. people belong to 13 tribes, the main ones including Kikuyu (about 22% of the population), Luhya (14%), Luo (13%), Kalenjin (12%), Kamba (11%), Gusii (6%), Meru (5%) and Mijikenda (5%).

Swahili is the official language, but people belonging to the different tribes have their own language as their mother tongue. English is spoken in commercial centres.

SOCIAL STATISTICS

1995 births, 1,013,000; deaths, 312,000. Birth rate (per 1,000 population), 1995, 37·3; death rate, 11·5. Growth rate: 1996 and 1997, 2·7%; 1995, 2·8%. Expectation of life at birth, 1990–95, 52·7 years for males and 55·4 years for females. Infant mortality, 1990–95, 71 per 1,000 live births. Fertility rate, 1997, 4·5 births per woman.

CLIMATE

The climate is tropical, with wet and dry seasons, but considerable differences in altitude make for varied conditions between the hot, coastal lowlands and the plateau, where temperatures are very much cooler. Heaviest rains occur in April and May, but in some parts there is a second wet season in Nov. and Dec. Nairobi, Jan. 65°F (18·3°C), July 60°F (15·6°C). Annual rainfall 39" (958 mm). Mombasa, Jan. 81°F (27·2°C), July 76°F (24·4°C). Annual rainfall 47" (1,201 mm).

CONSTITUTION AND GOVERNMENT

There is a unicameral *National Assembly*, which until the Dec. 1997 elections had 200 members, comprising 188 elected by universal suffrage for a 5-year term, 10 members appointed by the President, and the Speaker and Attorney-General ex-officio. Following a review of constituency boundaries, the National Assembly now has 210 elected members, 12 members appointed and the two ex-officio members, making 224 in total. The President is also directly elected for 5 years; he appoints a Vice-President and other Ministers to a Cabinet over which he presides. A constitutional amendment of Aug. 1992 stipulates that the winning presidential candidate must receive a nationwide majority and also the vote of 25% of electors in at least 5 of the 8 provinces. The sole legal political party had been the Kenya African National Union (KANU), but after demonstrations by the pro-reform lobby which led to extreme violence, KANU agreed to legalize opposition parties.

National Anthem. 'Ee Mungu nguvu yetu' ('Oh God of all creation'); words by a collective, tune traditional.

RECENT ELECTIONS

The most recent presidential and parliamentary elections were held on 29 Dec. 1997. In the presidential election Daniel T. arap Moi was opposed by 14 candidates including Charity Ngilu for the Social Democratic Party (SDP), who was aiming to become Africa's first elected female head of state. In the event, Daniel T. arap Moi

benefited from an opposition split along tribal lines and won comfortably, with a 40·4% show of the vote, passing the 25% threshold in 5 out of 8 provinces. Mwai Kibaki (Democratic Party) came next with 30·9% and Raila Odinga (National Development Party) third, with 10·8%.

At the National Assembly elections of 29 Dec. 1997, KANU gained 107 seats, the Democratic Party (DP) 39, the National Development Party 21, the Forum for the Restoration of Democracy (FORD)-Kenya 17, the Social Democratic Party 15; and 5 other parties won 11 seats between them. Of the 12 members appointed by the president, 6 were from KANU and 2 from DP, plus 1 each from 4 other parties.

Currency. The monetary unit is the *Kenya shilling* (KES) of 100 *cents*. The currency became convertible in May 1994. The shilling was devalued by 23% in April 1993. Inflation was 11·2% in 1997 (9% in 1996 and 1·6% in 1995). Foreign exchange reserves were US$580m. in Feb. 1998 and gold reserves were 80,000 troy oz. In Feb. 1998 total money supply was 90,490m. shillings.

Banking and Finance. The central bank and bank of issue is the Central Bank of Kenya (*Governor*, Micah Cheserem). There are 50 banks, 40 non-banking financial institutions and a couple of building societies. In March 1995 their combined assets totalled KSh.£268,811m. On 15 Oct. 1997 the government announced its decision to offload a further 25% of its stake in the Kenya Commercial Bank, which lowers its shareholding to 35%. Savings deposits totalled KSh.£724m. in March 1990.

There is a stock exchange in Nairobi.

ENERGY AND NATURAL RESOURCES

Electricity. Installed generating capacity was 807 MW in 1994; mostly provided by hydropower from power stations on the Tana river, with some from oil-fired power stations and by geothermal power. Production (1994) 3,538m. kWh. Consumption per capita in 1995 was 125 kWh.

Oil and Gas. Kenya signed an oil and gas exploration deal in 1997 with Canada's Tornado Resources Ltd, who pledged to commit a minimum of US$7m. over a 3-year period.

Minerals. In 1989 there were 49 mines and quarries. Production, 1994 (in 1,000 tonnes): Soda ash, 224; fluorspar, 89; salt, 75·8. Other minerals included gold, raw soda, lime and limestone, diatomite, garnets and vermiculite.

Agriculture. As agriculture is possible from sea-level to altitudes of over 9,000 ft, tropical, sub-tropical and temperate crops can be grown and mixed farming is pursued. Agriculture produced 29% of GDP in 1996. In 1994 there were 4m. ha of arable land, 520,000 ha of permanent crop land and 21·3m. ha of pasture. Four-fifths of the country is range-land which produces mainly livestock products and the wild game which is a major tourist attraction.

Tea and coffee are the two big foreign exchange earners, ahead of tourism. Horticultural products, particularly flowers, are in fourth position.

Kenya has about 110,000 ha under tea production, and is the world's largest exporter of tea. The production is high quality tea, raised in near-perfect agronomic conditions. It is plucked the whole year round, and almost exclusively by hand. In 1996 production reached a record 257m. kg (244·5m. in 1995) and earned about US$350m. in exports.

Coffee production in 1996–97 is estimated at between 75,000 and 78,000 tonnes (97,500 tonnes in 1995–96 and 96,000 tonnes in 1994–95). Arabica coffee covers 176,500 ha of land under coffee in Kenya. Some 70% of the total hectarage under coffee is cultivated by 335,000 smallholders, although their production has been in decline in recent years.

Fresh horticultural exports were 84,824 tonnes in 1996, up 18% on the 71,758 tonnes in 1995, earning about US$340m. By the year 2000 Kenyan horticultural exports are expected to pass the 100,000 tonnes mark, with increases in pre-packed vegetables, salads, cut flowers, avocados, passion fruit and mangoes. The biggest growth has been in cut flowers, up 20% from 29,374 tonnes in 1995 to 35,212 tonnes in 1996. Around two-thirds of the flowers are destined for the Netherlands, largely for re-export. 1996 vegetable exports totalled 32,742 tonnes and fruit 16,869 tonnes, both up on 1995.

Maize is Kenya's most important food crop with about 1·4m. ha under cultivation and annual production in excess of 2m. tonnes. Sisal, pyrethrum, maize and wheat are crops of major importance in the Highlands, while coconuts, cashew nuts, cotton, sugar, sisal and maize are the principal crops grown at the lower altitudes.

Livestock (1996): Cattle, 13·84m.; sheep, 5·6m.; goats, 7·4m. (1995); camels, 810,000 (1995); chickens, 25m. (1995).

More than half the agricultural labour force is employed in the livestock sector, accounting for 10% of GDP.

Forestry. Forests covered 1·29m. ha in 1995 (2·3% of the land area), mainly between 6,000 and 11,000 ft above sea-level. There are coniferous, broad-leaved, hardwood and bamboo forests. Timber production was 41·7m. cu. metres in 1995.

Fisheries. Catches in 1995 totalled 193,790 tonnes, of which 188,324 tonnes were freshwater fish. While the aggregate landings from Kenya's inland waters (more than 90% from Lake Victoria) have grown over the past 20 years, marine fishing has not reached its full potential, despite a coastline of 680 km. Fish landed from the sea totals between 5,000 and 7,000 tonnes annually, but there is an estimated potential of 200,000 tonnes in tuna and similar species.

INDUSTRY

In 1994 there were 648 manufacturing firms employing more than 50 persons. The main products are textiles, chemicals, vehicle assembly and transport equipment, leather and footwear, printing and publishing, food and tobacco processing and oil refining. Production in 1994 included (in tonnes): Sugar, 303,000; maize meal, 233,200; wheat flour, 191,400; animal feed (1988), 184,266; cotton yarn, 4,767; cotton fabrics, 45·69m. sq. metres.

Labour. The labour force in 1996 was 13,953,000 (54% males). In 1997 the unemployment level was close to 3m.

INTERNATIONAL TRADE

Foreign debt was US$6,893m. in 1996. Foreign investment on the stock exchange has been permitted since 1 Jan. 1995. Export Processing Zones were introduced in 1990, offering foreign companies exemption from taxes and duties for 10 years.

Imports and Exports. Exports were valued at US$2,852m. in 1996; imports, US$2,067m. Exports are estimated to have increased by 13·7% in 1995 and by 21·4% in 1996. The estimated growth for 1997 was 25%.

Principal exports (in 1,000m. shillings) 1994: Tea, 16·9; coffee, 13; horticultural produce, 8·3. Imports: Petroleum, 18·6; machinery and transport equipment, 31·8; chemicals (1993), 19·9; manufactures, 14·7.

Main import suppliers, 1996: UK, 13·2%; United Arab Emirates, 8·2%; Japan, 7·4%; Germany, 6·1%. Main export markets, 1996: Uganda, 15·4%; Tanzania, 12·0%; UK, 10·8%; Germany, 7·7%.

The UK is the largest foreign investor in Kenya with over US$1,500m. in more than 60 enterprises.

COMMUNICATIONS

Roads. Of some 63,800 km of roads in 1996, only about 8,900 km, or 14%, have been surfaced. More than 80,000 km of roads are unclassified. The network has seriously deteriorated since the mid 1980s through poor maintenance. Urban roads comprise around 7,000 km, or about 5% of the total road network, but less than half of them are classified as 'good' or in 'fair' condition. Yet more than 70% of all vehicles in the country use urban roads because of the heavy concentration of economic activities in urban areas. Overall, more than 80% of passengers and freight are carried on the roads. There were, in 1996, 278,000 passenger cars, 32,000 motor cycles, 62,000 vans and trucks and 19,200 buses and coaches, plus 28,420 road tractors. There were 11,785 road accidents in 1994 (2,424 fatal).

Rail. In 1994 route length was 2,506 km of metre-gauge. In 1994–95, 1·6m. passengers and 2·1m. tonnes of freight were carried.

Civil Aviation. There are international airports at Mombasa (Moi International) and Nairobi (Jomo Kenyatta International). The national carrier is the now privatized Kenya Airways. KLM has a 26% share of Kenya Airways. In 1998 services were also provided by Aero Zambia, Aeroflot, Air Austral, Air Djibouti, Air France, Air Gabon, Air India, Air Madagascar, Air Malaŵi, Air Mauritius, Air Seychelles, Air Tanzania Corporation, Air Zimbabwe, Airkenya Aviation, Alitalia, Alliance Air,

Telecommunications. Kenya had 269,800 main telephone lines in 1997, or 8·1 per 1,000 persons. The government aims to improve telephone availability in rural areas from 0·16 lines per 100 persons in 1997 to 1 line per 100 by 2015, and in urban areas from 4 lines to 20 lines per 100 persons. Cellular phone subscribers numbered 2,300 in 1995, there were 18,000 PCs and 3,800 fax machines. In Jan. 1998 there were approximately 5,000 Internet users.

Postal Services. In 1995 there were 1,061 post offices, or 1 for every 26,000 persons.

In the course of its Appellate duties the court of Appeal visits Mombasa, Kisumu, Nakuru and Nyeri. The High court with full jurisdiction in both civil and criminal matters comprises a total of 28 puisne Judges. Puisne Judges sit in Nairobi (16), Mombasa (2), Nakuru, Kisumu, Nyeri, Eldoret Meru and Kisii (1 each).

KIRIBATI

Ribaberikin Kiribati

(Republic of Kiribati)

Capital: Bairiki (Tarawa)
Population estimate, 2000: 87,000
Estimated GDP: $62m.

KEY HISTORICAL EVENTS

The islands that now constitute Kiribati were first settled by early Austronesian-speaking peoples long before the 1st century AD. Fijians and Tongans arrived about the 14th century and subsequently merged with the older groups to form the traditional I-Kiribati Micronesian society and culture. The Gilbert and Ellice Islands were proclaimed a British protectorate in 1892 and annexed at the request of the native governments as the Gilbert and Ellice Islands Colony on 10 Nov. 1915 (effective on 12 Jan. 1916). Formally part of the British Colony of Gilbert and Ellice Islands, which separated into two parts in 1976, the Gilberts achieved full independence as Kiribati in 1979. Internal self-government was obtained on 1 Nov. 1976 and independence achieved on 12 July 1979 as the Republic of Kiribati. On 1 Oct. 1975 the former Ellice Islands severed constitutional links with the Gilbert Islands and took on a new name, Tuvalu.

TERRITORY AND POPULATION

Kiribati (pronounced Kiribahss) consists of 3 groups of coral atolls and one isolated volcanic island, spread over a large expanse of the Central Pacific with a total land area of 717·1 sq. km (276·9 sq. miles). It comprises **Banaba** or Ocean Island (5 sq. km), the 16 **Gilbert Islands** (295 sq. km), the 8 **Phoenix Islands** (55 sq. km), and 8 of the 11 **Line Islands** (329 sq. km), the other 3 Line Islands (Jarvis, Palmyra and Kingman Reef) being uninhabited dependencies of the USA. The capital is the island of Bairiki in Tarawa.

Population, 1990 census, 72,298. 1997 estimate, 82,400; density, 115 per sq. km.

In 2000 the population is projected to be 87,000.

In 1995 an estimated 64·3% of the population lived in rural areas. Between 1988 and 1993, 4,700 people were resettled on Teraina and Tabuaeran atolls because the main island group was overcrowded. Banaba, all 16 Gilbert Islands, Kanton (or Abariringa) in the Phoenix Islands and 3 atolls in the Line Islands (Teraina, Tabuaeran and Kiritimati—formerly Washington, Fanning and Christmas Islands respectively) are inhabited; their populations in 1990 (census) were as follows:

Banaba (Ocean Is.)	284	Abemama	3,218	Onotoa	2,112
Makin	1,762	Kuria	985	Tamana	1,396
Butaritari	3,786	Aranuka	1,002	Arorae	1,440
Marakei	2,863	Nonouti	2,766	Kanton	45
Abaiang	5,314	North Tabiteuea	3,275	Teraina	936

South Tarawa	25,154	Beru	2,909	Kiritimati	2,537
Maiana	2,184	Nikunau	2,048		

The remaining 11 atolls have no permanent population; the 7 Phoenix Islands comprise Birnie, Rawaki (formerly Phoenix), Enderbury, Manra (formerly Sydney), Orona (formerly Hull), McKean and Nikumaroro (formerly Gardner), while the others are Malden and Starbuck in the Central Line Islands, and Caroline, Flint and Vostok in the Southern Line Islands. KEY HISTORICAL EVENTS

Korea was united in a single kingdom under the Silla dynasty from 668. China, which claimed a vague suzerainty over Korea, recognized the latter's independence in 1895. Korea concluded trade agreements with the USA in 1882 and with Great Britain and Germany in 1883. After the Russo-Japanese war of 1904–05, Korea was virtually a Japanese protectorate. On 29 Aug. 1910 it was formally annexed by Japan, thus ending 600 years of Confucian rule under the Yi dynasty.

Following the collapse of Japan in 1945, American and Soviet forces entered Korea to enforce the surrender of the Japanese troops, dividing the country into portions separated by the 38th parallel of latitude. Negotiations between the Americans and the Russians regarding the future of Korea broke down in May 1946. In 1948 two separate states were proclaimed. In the south, Syngman Rhee, former president of the Korean government in exile, was elected president of the Republic of Korea, which was recognized by the UN as the only legal government of Korea. In the north, Kim Il-sung, a major in the Red Army who had marched back into Korea with the Soviet forces, was proclaimed premier of the Democratic Peoples' Republic of Korea—which was recognized by the USSR as the only legal government of Korea.

The US occupation forces withdrew from South Korea in June 1949. Military equipment promised by the USA as part of their aid programme was still on its way to Korea when the North Koreans launched, in June 1950, a full-scale invasion across the 38th parallel. The next day the Security Council of the UN approved a resolution condemning the invasion and asking all member-states to assist in the restoration of peace.

The war, in which North Korea received support from the Chinese army and South Korea from the UN forces and the USA, lasted for three years, killed some 5m. people and destroyed an estimated 43% of Korea's industrial plant and 33% of her homes. It was concluded by an armistice signed on 27 July 1953 which implicitly recognized the 38th parallel and the *de facto* boundary between North and South Korea.

Twelve years of Syngman Rhee's authoritarian rule collapsed after student demonstrations brought the country to the brink of civil war in April 1960. There followed nine months of multi-party parliamentary government. A military coup in May 1961 led to the dissolution of the National Assembly, the introduction of martial law and the establishment of Gen. Park Chung Hee as president for the next 17 years. Park's assassination in Oct. 1979 threw the country again into a state of crisis. The prime minister, Choi Kyu Hah, became President until Aug. 1980. He was succeeded by Gen. Chun Doo Hwan who was re-elected under a revised constitution in March 1981 and retained his majority again in Feb. 1985. A new, more democratic, constitution, approved by both ruling and opposition parties, came into force in 1988.

On 13 Dec. 1991 the prime ministers of North and South Korea signed a declaration of non-aggression and reconciliation, agreeing to respect each other's political systems, and not to interfere in each other's internal affairs or slander each other.

The Four-Party Meeting to Promote Peace on the Korean Peninsula (South Korea, North Korea, USA and China) held the first plenary session in Geneva, Switzerland in Dec. 1997.

Security worries in the region were stirred up again on 31 Aug. 1998 when North Korea launched what was first thought to be a new medium-range ballistic missile, but was later believed to be a satellite, across Japan into the Pacific Ocean.

After many months of little progress, there was a significant development in The Four-Party Meeting to Promote Peace on the Korean Peninsula at a further session in Geneva in Oct. 1998, with the establishment of sub-committees to look into the most important issues in detail.

INTERNATIONAL RELATIONS

Defections to South Korea from North Korea totalled 86 in 1997, up from 40 in 1995 and 8 in 1993.

South Korea is a member of the UN and OECD.

The aim of Korea's foreign policy is to secure international support for peace and stability in Northeast Asia, including a means to reunify the Korean Peninsula without confrontation.

ECONOMY

Policy. The seventh 5-year social and economic plan (1993–97) aimed at controlling growth and strengthening national competitiveness. Part of the plan ('the core industrial sector system') was to make the powerful family-owned conglomerates (*chaebol*) more competitive by restricting the industrial areas in which they may engage. Results so far have been mixed. Samsung and the SK Group have restructured but others in the top 5 are resisting change.

After thirty years of impressive economic growth, South Korea was hit by financial crisis in 1997 when it became clear that the *chaebol* had been allowed to borrow too heavily against inadequate returns. In Dec. 1997, Korea's international debts were estimated at US$200,000m. An IMF and World Bank rescue was tied to undertakings to transform the economy into one based on market principles instead of state directives. Korea's lack of foreign reserves was also identified as a major problem, thus assistance was secured from the IMF and other global financial institutions totalling US$58·3bn. Reforms so far approved by the National Assembly include greater monetary policy independence for the central bank, a new structure for financial negotiations and the lifting of the 50% ceiling on foreign ownership of listed Korean companies. During 1998 the government tightened accounting rules to make business more open, gave minority shareholders and institutional investors more say in corporate affairs and opened South Korea's capital markets. A genuine attempt is also being made to welcome foreign investors; foreign investment, which stood at US$8·9bn. in 1998, is expected almost to double in 1999.

A schedule for privatization was announced in July 1998, whereby out of 24 non-financial state owned enterprises (parent companies), 11 would be privatized in stages by 2002. In addition, the 61 subsidiaries of these 24 parent companies would also be privatized immediately or in stages. It was hoped this scheme would raise US$10bn. from foreign investors by 2002.

Performance. GDP growth rate was 5·0% in 1997 (6·8% in 1996 and 8·9% in 1995), but fell to –5·8% for 1998. In 1999 the rate was expected to be 3·8%. Between 1990 and 1996 the average annual real growth in GNP per capita was 6·2%.

It is unlikely that South Korea would be strong enough to face unification unaided. In Dec. 1997 South Korea turned to the IMF for a US$58bn. bail-out. External liabilities by Nov. 1998 were estimated to be US$152·5bn.

Budget. Revenue and expenditure (in 1,000,000m. won), including bond insurance, at the 1999 budget: 84·9 and 84·9. Sources of revenue: National tax, 61·9; non-tax, 18·2. Expenditure includes: defence, 13·7; infrastructure, 12·2; education, 17·4; agriculture and fisheries, 8·1; technology, 3·8; environment, 1·8.

Currency. The unit of currency is the *won* (KRW). Inflation was 8·5% in 1998. Usable foreign exchange reserves were US$48·51bn. in Jan. 1999, up from US$8·9bn. in 1997. Gold reserves were 330,000 troy oz. in Feb. 1998. Total money supply in Jan. 1998 was 34,891bn. won.

Banking and Finance. The central bank and bank of issue is the Bank of Korea (*Governor*, Chol-hwan Chon). In Sept. 1998 bank deposits totalled 462,000,000m. won, of which 199,000,000m. won were savings and time deposits.

There are 22 national and provincial commercial banks. The largest bank is Hanvit Bank, formed in Feb. 1999 through the merger of Commercial Bank of Korea and Hanil Bank, their combined assets totalling 102,000,000m. won (US$82bn.). There were 73 foreign banks in Dec. 1998. These are granted parity of treatment with domestic banks.

In addition, there are non-bank financial institutions including 45 insurance companies such as the Land Bank of Korea, the Credit Guarantee Fund, and 14 merchant banks. The use of real names in financial dealings has been required since 1994.

There is a stock exchange in Seoul.

KEY HISTORICAL EVENTS

Following the collapse of Japan in 1945 Soviet forces arrived in North Korea, one month ahead of the Americans, and established a Communist-led provisional government. The newly created Korean Workers' (i.e. Communist) Party, with other pro-Communist groups and individuals, formed the United Democratic front. On 25 Aug. 1948 the Communists organized elections for a Supreme People's Assembly, both in the Soviet-occupied north and the American-occupied south; some southern deputies went to the north and took their seats. A People's Democratic Republic was proclaimed on 9 Sept. 1948 and Kim Il-sung became premier, purging all rivals.

On 25 June 1950 North Korea invaded the south; its advance was stopped with the aid of UN forces. Chinese Communist 'volunteers' joined the war in Oct. 1950. Truce negotiations were begun in 1951 and concluded on 27 July 1953. A demilitarized zone was set up along the final battle line between North and South Korea.

On 13 Dec. 1991 the prime ministers of North and South Korea signed a declaration of non-aggression, agreeing not to interfere in each other's internal affairs. 3 agreements were reached between the North and South Korean prime ministers in 1992 on proposals for military, economic, political and social co-operation.

Kim Il-sung, head of state, Communist Party and the military since 1948, died on 8 July 1994, and was succeeded by his son, Kim Jong Il, who was formally elected general-secretary of the ruling North Korean Workers' Party in Oct. 1997.

In June 1993, after negotiations with the USA, North Korea reversed its decision to withdraw from the Nuclear Non-Proliferation Treaty. On 21 Oct. 1994 an agreement to restrict nuclear power to peaceful purposes in Korea was signed by North Korea and the USA. Talks on setting up a four-way peace conference involving the USA, China and North and South Korea broke down in Sept. 1997 on the question of food aid as a precondition of negotiations. Initial problems were subsequently resolved and the Four-Party Meeting to Promote Peace on the Korean Peninsula, with representatives from the four countries, held the first plenary session at Geneva, Switzerland in Dec. 1997.

Although food aid has been stepped up, the UN World Food Programme estimated in 1997 that 2m. North Koreans face starvation. An American congressional delegation estimated in 1998 that famine has killed between 300,000 and 800,000 North Koreans in each of the previous 3 years.

Celebrating its 50th anniversary in 1998, North Korea confirmed Kim Jong Il as paramount leader and military supreme commander.

Security worries in the region were stirred up again on 31 Aug. 1998 when North Korea launched what was first thought to be a new medium-range ballistic missile, but was later believed to be a satellite, across Japan into the Pacific Ocean.

After many months of little progress, there was a significant development in The Four-Party Meeting to Promote Peace on the Korean Peninsula at a further session in Geneva in Oct. 1998, with the establishment of sub-committees to look into the most important issues in detail. Since then, North Korea has called on the USA to pay US$300m. to inspect an underground site which the Americans suspect is part of a revived programme to develop nuclear weapons.

TERRITORY AND POPULATION

North Korea is bounded in the north by China, east by the sea of Japan, west by the Yellow Sea and south by South Korea, from which it is separated by a demilitarized zone of 1,262 sq. km. Its area is 122,762 sq. km. Official population estimate in 1995, 23,261,000 (64% urban); density, 187·6 per sq. km.

The UN gives a projected population for 2000 of 23·91m.

In the elections to the Supreme People's Assembly held on 26 July 1998, 687 deputies were elected, as was the case in 1990. The South Korean weekly NEWSREVIEW states that North Korea has made it a rule that there should be one deputy per 30,000 people, suggesting that the population has remained stable since 1990. 30,000 multiplied by 687 would give a population of 20·61m., more than 2·5m. less than official estimates.

The area, 1987 population (in 1,000) and chief towns of the provinces and cities with provincial status:

CONSTITUTION AND GOVERNMENT

The political structure is based upon the Constitution of 27 Dec. 1972. Constitutional amendments of April 1992 delete references to Marxism-Leninism but retain the Communist Party's monopoly of rule. The Constitution provides for a *Supreme People's Assembly* elected every 5 years by universal suffrage. Citizens of 17 years and over can vote and be elected. The government consists of the *Administration Council* directed by the Central People's Committee (*Secretary,* Chi Chang Ik).

The head of state is the *President*, elected for 4-year terms. On the death of Kim Il-sung on 8 July 1994 his son and designated successor, Kim Jong Il (b. 1942), assumed all his father's posts. On 5 Sept. 1998 he took over as President and 'Supreme Leader'.

Party membership was 2m. in 1995. There are also the puppet religious Chongu and Korean Social Democratic Parties and various organizations combined in a Fatherland Front.

Defence expenditure in 1997 totalled US$5,409m. (US$246 per capita), and represented 27·2% of GDP, the highest percentage of any country in the world.

Nuclear wweapons. North Korea is suspected of having a secret nuclear-weapons programme, and perhaps has enough material to build 2 warheads.

Army. One of the world's biggest, the Army is organized in 26 infantry divisions (some motorized); 14 armoured, 23 motorized infantry and 5 independent infantry brigades; 1 special purpose corps numbering 88,000; 6 heavy artillery brigades with multiple rocket launchers, 1 independent surface-to-surface missile brigade and 1 regiment. Equipment includes some 3,400 T-34, T-54/55, T-62 and Type-59 main battle tanks, chemical weapons and possibly nuclear warheads. Strength (1996) 1m., with 0·75m. reserves. There is also a paramilitary worker-peasant Red Guard of some 3·8m. and a Ministry of Public Security force of 115,000 including border guards.

Navy. The Navy, principally tasked to coastal patrol and defence, comprises 24 diesel submarines (20 of Chinese design and 4 ex-Soviet) and 12 small coastal submarines. Surface forces include 3 small missile-armed frigates, 4 corvettes, 42 missile craft, 200 fast torpedo craft, 18 anti-submarine patrol craft and some 180

Combat aircraft include 60 MiG-23 and 30 MiG-29 interceptors, 40 Su-25 fighter-bombers and more than 100 F-6s (Chinese-built MiG-19s) for ground attack and reconnaissance, as well as 40 Chinese-built A5 fighter-bombers. There are 200 An-2 light transport aircraft, about 20 larger fixed-wing transports, 50 Mi-8 transport helicopters and 80 US Hughes 300 and 500 helicopters.

INTERNATIONAL RELATIONS

North Korea is a member of the UN.

ECONOMY

Policy. In Dec. 1993 it was officially admitted that the third 7-year plan had failed to achieve its industrial targets owing to the disappearance of Communist markets and aid. Policy now concentrates on the development of agriculture, light industry and foreign trade.

Performance. GDP growth rate was negative in 1996 at –4·6%.

Budget. Estimated revenue, 1992, US$19·3bn.; expenditure, US$19·3bn.

Currency. The monetary unit is the *won* (KPW) of 100 *chon*. Banknotes were replaced by a new issue in July 1992. Exchanges of new for old notes were limited to 500 won.

Banking and Finance. The bank of issue is the Central Bank of Korea (*governor*, Chong Song Taek).

Weights and Measures. While the metric system is in force traditional measures are in frequent use. The *jungbo* = 1 ha; the *ri* = 3,927 metres. A new yearly calendar was announced on 9 July 1997 based on Kim Il-sung's birthday on 15 April 1912. Thus 15 April 1999–14 April 2000 is Year 88.

ENERGY AND NATURAL RESOURCES

Electricity. There are 3 thermal power stations and 4 hydro-electric plants. A nuclear power plant is being built. Installed capacity was 9·5m. kW in 1994. Production in 1994 was 35·96bn. kWh. Consumption per capita was an estimated 1,394 kWh in 1995. Hydro-electric potential exceeds 8m. kW. A hydro-electric plant and dam under construction on the Pukhan near Mount Kumgang has been denounced as a flood threat by the South Koreans, who constructed a defensive 'Peace Dam' in retaliation. American aid to increase energy supply slowed after evidence that North Korea had broken its promise to freeze its nuclear weapons programme. But in Oct. 1998 Japan agreed to contribute US$1bn. towards building 2 nuclear power stations and the US Congress agreed to funds to supply fuel oil on condition that North Korea abandons its nuclear ambitions.

Oil and Gas. Oilwells went into production in 1957. An oil pipeline from China came on stream in 1976. Crude oil refining capacity was 70,000 bbls. a day in 1990.

Minerals. North Korea is rich in minerals. Estimated reserves in tonnes: Iron ore, 3,300m.; copper, 2·15m.; lead, 6m.; zinc, 12m.; coal, 11,990m.; uranium, 26m.; manganese, 6,500m. 98m. tonnes of coal and lignite were mined in 1994, 11m. tonnes of iron ore in 1996 and 16,000 tonnes of copper ore in 1994. 1994 production of gold was 5,000 kg; silver, 50 tonnes; salt, 600,000 tonnes.

Agriculture. In 1994 there were 1·7m. ha of arable land, 300,000 ha of permanent crop land and 50,000 ha of pasture. In 1995 there were 0·65m. ha of paddy fields. In 1995, 4·09m. persons were economically active in agriculture.

Collectivization took place between 1954 and 1958. 90% of the cultivated land is farmed by co-operatives. Land belongs either to the State or to co-operatives, and it is intended gradually to transform the latter into the former, but small individually-

tended plots producing for 'farmers' markets' are tolerated as a 'transition measure'. Livestock farming is mainly carried on by large state farms.

There is a large-scale tideland reclamation project. In 1994, 1·46m. ha were under irrigation, making possible 2 rice harvests a year. There were 75,000 tractors in 1994. The technical revolution in agriculture (nearly 95% of ploughing, etc., is mechanized) has considerably increased the yield of wheat (sown on 90,000 ha). Production (1993, in 1,000 tonnes): Wheat, 100; rice, 2,940; maize, 1,960; potatoes, 1,750; soya beans, 380. Total grain production was 2·52m. tonnes in 1996.

Livestock, 1996: Cattle, 1·35m.; pigs, 3·35m.; sheep, 395,000; goats, 305,000 (1995); 23m. chickens (1995).

A chronic food shortage has led to repeated efforts by UN agencies to stave off famine. In Jan. 1998, the UN launched an appeal for US$378m. for food for North Korea, the largest ever relief effort mounted by its World Fund Programme.

Forestry. Forest area in 1995 was 6·17m. ha (51·2% of the land area). Timber production was 4·92m. cu. metres in 1995.

Fisheries. In 1995 total catches were approximately 1,850,000 tonnes, of which 94% were sea fish. There is a fishing fleet of 30,600 vessels including 20,000 motor vessels.

INDUSTRY

Industries were intensively developed by the Japanese occupiers, notably cotton spinning, hydro-electric power, cotton, silk and rayon weaving, and chemical fertilizers. Production in 1986: Cement, 9m. tonnes; textiles, 600m. metres; motor-cars (1993), 10,000; TV sets, 240,000; ships, 50,000 GRT. Annual steel production capacity was 4·3m. tonnes in 1987.

Labour. The labour force totalled 11,881,000 (55% males) in 1996. Nearly 35% of the economically active population in 1995 were engaged in agriculture, fisheries and forestry.

INTERNATIONAL TRADE

Joint ventures with foreign firms have been permitted since 1984. A law of Oct. 1992 revised the 1984 rules: Foreign investors may now set up wholly-owned facilities in special economic zones, repatriate part of profits and enjoy tax concessions. Economic zones have been set up at the ports of Sonbong and Najin. In 1996 foreign debt was estimated at US$11,830m. The USA imposed sanctions in Jan. 1988 for alleged terrorist activities. Since June 1995 South Korean businesses and individuals have been permitted to make investments and set up branch offices in North Korea. South Korea donated 0·15m. tonnes of rice to North Korea in 1995 and a further 50,000 tonnes in 1997.

Imports and Exports. Exports in 1997 were US$904m.; imports, US$1,270m. In 1992 China was the biggest trade partner (total trade US$620m.), followed by Japan, CIS and Iran. The chief exports are metal ores and products, the chief imports machinery and petroleum products.

COMMUNICATIONS

Roads. There were 31,200 km of road in 1996, of which 2,000 km were paved. There were 248,000 motor cars in 1990.

Rail. The railway network totalled 8,533 km in 1990, of which 3,250 km were electrified. In 1990, 38·5m. tonnes of freight and 35m. passengers were carried.

There is a metro and tramway in Pyongyang.

Civil Aviation. There is an international airport at Pyongyang (Sunan). The national carrier, Air Koryo, had flights in 1998 to Bangkok, Beijing, Berlin, Macao, Moscow, Sofia and Vladivostok, and China Northern Airlines flew to Beijing and Dalian.

Shipping. The leading ports are Chongjin, Wonsan and Hungnam. Pyongyang is connected to the port of Nampo by railway and river. In 1995 the ocean-going merchant fleet totalled 1·08m. GRT, including oil tankers, 0·23m. GRT.

The biggest navigable river is the Yalu, 698 km up to the Hyesan district.

Telecommunications. An agreement to share in Japan's telecommunications satellites was reached in Sept. 1990. There were 1,100,000 main telephone lines in 1997, or 48·2 per 1,000 population. In 1995 there were 3,000 fax machines.

SOCIAL INSTITUTIONS

Justice. The judiciary consists of the Supreme Court, whose judges are elected by the Assembly for 3 years; provincial courts; and city or county people's courts. The procurator-general, appointed by the Assembly, has supervisory powers over the judiciary and the administration; the Supreme Court controls the judicial administration.

In Jan. 1999 approximately 200,000 political prisoners were being held at 10 detention camps in the country.

Religion. The Constitution provides for 'freedom of religion as well as the freedom of anti-religious propaganda'. In 1986 there were 3m. Chondoists, 400,000 Buddhists and 200,000 Christians. Another 3m. followed traditional beliefs.

Education. Free compulsory universal technical education lasts 11 years: 1 pre-school year, 4 years primary education starting at the age of 6, followed by 6 years secondary. In 1994-95 there were 37 universities, 31 specialized universities (agriculture, 2; chemical industry; cinema; coal mining; construction; economics, 2; education, 5; fine arts; foreign studies; geology; hydraulics and dynamics; light industry; mechanical engineering; medicine; mining and metallurgy; music and dance; pharmacy; physical education; printing; railways; science; sea transport; technology, 2; veterinary science) and 108 specialized colleges.

KEY HISTORICAL EVENTS

The ruling dynasty was founded by Shaikh Sabah al-Awwal, who ruled from 1756 to 1772. In 1899 the then ruler, Shaikh Mubarak, concluded a treaty with Great Britain wherein, in return for the assurance of British protection, he undertook to support British interests. In 1914 the British Government recognized Kuwait as an independent government under British protection. On 19 June 1961 an agreement reaffirmed the independence and sovereignty of Kuwait and recognized the Government of Kuwait's responsibility for the conduct of internal and external affairs; the agreement of 1899 was terminated.

On 2 Aug. 1990 Iraqi forces invaded the country, meeting little resistance, and President Saddam of Iraq declared the annexation of Kuwait on 8 Aug. Following the expiry of the date required by the UN for the withdrawal of Iraqi forces on 15 Jan. 1991, an air offensive was launched by coalition forces against targets in Kuwait, followed by a land attack on 24 Feb. Iraqi forces were routed, and Kuwait City was liberated on 26 Feb. Iraq withdrew all its forces from Kuwait. On 10 Nov. 1994 Iraq recognized the independence and boundaries of Kuwait.

TERRITORY AND POPULATION

Kuwait is bounded in the east by the Arabian (Persian) Gulf, north and west by Iraq and south and south-west by Saudi Arabia, with an area of 17,818 sq. km. In 1992-93 the UN Boundary Commission redefined Kuwait's border with Iraq, moving it slightly northwards in conformity with an agreement of 1932. The population at the census of 1995 was 1,590,013 (96% urban), of whom about 56% were non-Kuwaitis. Population density, 89 per sq. km.

The UN gives a projected population for 2000 of 1·97m.

Following the Iraqi occupation of 1990-91, the government announced plans to reduce its population to about 1m. to ensure that Kuwaitis formed a majority at about 0·55m.

The country is divided into 5 governorates: The capital (comprising Kuwait City, Kuwait's 9 islands and territorial and shared territorial waters) (population 305,964, 1998 estimate); Hawalli (496,245); Ahmadi (313,424); Jahra (252,157) and Farwaniya (498,584).

The chief cities are (1993 population estimate) Kuwait, the capital (31,241), and its suburbs Hawalli (84,478), as-Salimiya (116,104), Jahra (139,476) and Farwaniya (47,106).

The Neutral Zone (Kuwait's share, 2,590 sq. km), jointly owned and administered by Kuwait and Saudi Arabia from 1922 to 1966, was partitioned between the two countries in May 1966, but the exploitation of the oil and other natural resources continues to be shared.

KEY HISTORICAL EVENTS

The Kingdom of Laos, once called Lanxang (the Land of a Million Elephants), was founded in the 14th century. The kingdom has always depended on the maintenance of good relations with its more powerful neighbours, Thailand, Myanmar and Vietnam.

In 1893 Laos became a French protectorate and in 1907 acquired its present frontiers. In 1945, after French authority had been suppressed by the Japanese, an independence movement known as Lao Issara (Free Laos) set up a government under Prince Phetzarath, the viceroy of Luang Prabang. This government collapsed with the return of the French in 1946, its leaders fleeing to Thailand.

Under a new constitution of 1947 Laos became a constitutional monarchy under the Luang Prabang dynasty, and in 1949 became an independent sovereign state within the French Union. A few Lao Issara leaders remained in dissidence under Prince Souphanouvong who allied himself with the Vietminh and subsequently formed the 'Pathet Lao' (Lao state) rebel movement.

An almost continuous state of war began in 1953 between the Royal Lao Government, supported by American bombing and Thai mercenaries, and the Patriotic Front Pathet Lao, supported by North Vietnamese troops. Peace talks from 1972 resulted in an agreement on 21 Feb. 1973 providing for the formation of a provisional government of national union, and the withdrawal of foreign troops. A provisional coalition government was duly formed in 1974. However, after the Communist victories in neighbouring Vietnam and Cambodia in April 1975, the Pathet Lao took over the running of the whole country, maintaining only a façade of a coalition. On 29 Nov. 1975 HM King Savang Vatthana abdicated and the People's Congress proclaimed a People's Democratic Republic of Laos on 2 Dec. 1975.

KEY HISTORICAL EVENTS

The territory that is now Latvia was controlled by crusaders, primarily the German Order of Livonian Knights, until 1561, when Latvia fell into Polish and Swedish hands. Between 1721 and 1795 Latvia was absorbed into the Russian empire. In the part of Latvia unoccupied by the Germans during the First World War, the Bolsheviks won 72% of the votes in the Constituent Assembly elections (Nov. 1917). Soviet power was proclaimed in Dec. 1917, but was overthrown when the Germans occupied all Latvia (Feb. 1918). Restored when they withdrew (Dec. 1918), it was overthrown once more by combined British naval and German military forces (May–Dec. 1919), and a democratic government set up. This régime was in turn replaced when a coup took place in May 1934.

The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR. On 21 July a People's Diet proclaimed the establishment of the Latvian Soviet Socialist Republic and applied to join the USSR, whose Supreme Soviet accepted the application on 5 Aug.

On 4 May 1990 the Latvian Supreme Soviet declared, by 138 votes to nil with 58 abstentions, that the Soviet occupation of Latvia on 17 June 1940 was illegal, and resolved to re-establish the authority of the Constitution of 1922. A transition period was set for the restoration of independence. In a referendum in March 1991 the principle of independence was supported by 73·6% of votes cast. A fully independent status was conceded by the USSR State Council in Sept. 1991.

CONSTITUTION AND GOVERNMENT

The Declaration of the Renewal of the Independence of the Republic of Latvia dated 4 May 1990, and the 21 Aug. 1991 declaration re-establishing de facto independence, proclaimed the authority of the Constitution *(Satversme)*. The Constitution was fully re-instituted as of 6 July 1993, when the 5th Parliament *(Saeima)* was elected.

The head of state in Latvia is the *President*, elected by parliament for a period of 3 years, set to rise to 4 years.

The highest legislative body is the one-chamber parliament comprised of 100 deputies and elected in direct, proportional elections by citizens 18 years of age and over. Deputies serve for 4 years and parties must receive at least 5% of the national vote to gain seats in parliament.

In a referendum on 3 Oct. 1998, 53% of votes cast were in favour of liberalizing laws on citizenship, which would simplify the naturalization of the Russian-speakers who make up nearly a third of the total population and who were not granted automatic citizenship when Latvia regained its independence from the former Soviet Union in 1991.

Executive power is held by the *Cabinet of Ministers*.

KEY HISTORICAL EVENTS

The Ottomans invaded Lebanon, then part of Syria, in 1516-17 and held nominal control until 1918. After 20 years' French mandatory regime, Lebanon was proclaimed independent on 26 Nov. 1941. On 27 Dec. 1943 an agreement was signed between representatives of the French National Committee of Liberation and of Lebanon by which most of the powers and capacities exercised hitherto by France were transferred as from 1 Jan. 1944 to the Lebanese Government. The evacuation of foreign troops was completed in Dec. 1946.

In early May 1958 the Moslem opposition to President Chamoun rose in insurrection and for 5 months the Moslem quarters of Beirut, Tripoli, Sidon and the northern Bekaa were in insurgent hands. On 15 July the US Government acceded to President Chamoun's request and landed a force of army and marines who re-established Government authority.

Internal problems were exacerbated by the politically active Palestine population and by the deeply divisive question of the Palestinian problem itself. An attempt to regulate the activities of Palestinian fighters through the secret Cairo agreement of 1969 was frustrated both by the inability of the Government to enforce its provisions, and by an influx of battle-hardened fighters expelled from Jordan in Sept. 1970. A further attempt to control the guerrillas in 1973 also failed. From March 1975, Lebanon was beset by civil disorder by which the economy was brought to a virtual standstill.

By Nov. 1976 large-scale fighting had been brought to an end by the intervention of the Syrian-dominated Arab Deterrent Force which ensured sufficient security to permit Lebanon to establish quasi-normal conditions under President Sarkis. Large areas of the country, however, remained outside governmental control, including West Beirut, which was the scene of frequent conflict between opposing militia groups. The south, where the Arab Deterrent Force could not deploy, remained unsettled and subject to frequent Israeli attacks. In March 1978 there was an Israeli invasion following a Palestinian attack inside Israel. Israeli troops eventually withdrew in June, but instead of handing over all their positions to UN Peacekeeping Forces, they installed Israeli-controlled Christian Lebanese militia forces in border areas. Severe disruption continued in the south. In June 1982 Israeli forces once again invaded, this time in massive strength, and swept through the country, eventually laying siege to and bombing Beirut. In Sept. Palestinian forces, together with the PLO leadership, evacuated Beirut. On 23 Aug. 1982 Bachir Gemayel was elected President of Lebanon. On 14 Sept. he was assassinated. There followed a period of 'no peace, no war' with intermittent clashes between various *de facto* forces on the ground. Israeli forces started a complete withdrawal on 16 Feb. 1985. Western forces pulled out after a peace agreement was signed by the leaders of the Druze, Amal and (Christian) Lebanese Forces to end the civil war on 28 Dec. 1985 but it was not until the end of 1990 that the various militias which had held sway in Beirut withdrew. A new Government of National Reconciliation was announced on 24 Dec. 1990. The dissolution of all militias was decreed by the National Assembly in April 1991, but the Shi'ite Moslem militia Hizbollah was allowed to remain active and deploy heavy weapons. In July the army defeated the Palestine Liberation Organization at Sidon, depriving the latter of their territorial base in South Lebanon, and bringing the army up to the Israeli-occupied southern strip ('security zone').

Following a 17-day Israeli bombardment of Hizbollah positions and South Lebanon generally in April 1996, a US-brokered unsigned 'understanding' of 26 April 1996 guaranteed that Hizbollah guerrillas and Palestinian radical groups would cease attacks on civilians in northern Israel and granted Israel the right to self-defence and return of fire. Hizbollah maintained the right to resist Israel's occupation of Lebanese soil.

CONSTITUTION AND GOVERNMENT

The first Constitution was established under the French Mandate on 23 May 1926. It has since been amended in 1927, 1929, 1943 (twice), 1947 and 1990. It is based on a separation of powers, with a President, a single-chamber *National Assembly* elected by universal suffrage at age 21 in 12 electoral constituencies, and an independent judiciary. In Oct. 1995 the National Assembly extended the President's term of office from 6 to 9 years. The executive consists of the President and a Prime Minister and Cabinet appointed after consultation between the President and the National Assembly. The system is adapted to the communal balance on which Lebanese political life depends by an electoral law which allocates deputies according to the religious distribution of the population, and by a series of constitutional conventions whereby, *e.g.*, the President is always a Maronite Christian, the Prime Minister a Sunni Moslem and the Speaker of the Assembly a Shia Moslem. There is no party system. In Aug. 1990, and again in July 1992, the National Assembly voted to increase its membership, and now has 128 deputies with equal numbers of Christians and Moslems.

On 21 Sept. 1990 President Hrawi established the Second Republic by signing constitutional amendments which had been negotiated at Taif (Saudi Arabia) in Oct. 1989. These institute an executive collegium between the President, Prime Minister and Speaker, and remove from the President the right to recall the Prime Minister, dissolve the Assembly and vote in the Council of Ministers.

KEY HISTORICAL EVENTS

The Basotho nation was constituted in the 19th century under the leadership of Moshoeshoe I, bringing together refugees from disparate tribes scattered by Zulu expansionism in southern Africa. War with land-hungry Boer settlers in 1856 (and again in 1886) cost the Basotho significant territory, and Moshoeshoe appealed for British protection. This was granted in 1868, and in 1871 the territory was annexed to the Cape Colony (now Republic of South Africa), but in 1883 it was restored to the direct control of the British government through the High Commissioner for South Africa.

In 1955 the Basutoland Council, which had been established in 1903, sought and obtained the right to pass its own laws for its internal affairs. In 1965 full internal self-government was achieved and the paramount chief became King Moshoeshoe II. On 4 Oct. 1966 Basutoland became an independent and sovereign member of the British Commonwealth as the Kingdom of Lesotho. Chief Leabua Jonathan, leader of the Basotho National Party and prime minister from 1965, forced the king to refrain from trying to gain some executive power in 1967, and suspended the constitution when the elections of 1970 were declared invalid. Parliamentary rule, with a national assembly of nominated members, was reintroduced in April 1973; although there was subsequent talk of elections, these were constantly postponed.

On 20 Jan. 1986, after a border blockade by the Republic of South Africa, Chief Jonathan was deposed in a bloodless military *coup* led by Maj.-Gen. Justin Lekhanya who became the chairman of a newly formed military council, banned political parties and granted significant powers to the king. South Africa embarked on a major scheme to develop Lesotho's water resources.

King Moeshoeshoe II was deposed by the Military Council in Nov. 1990 and replaced by King Letsie III. Maj.-Gen. Lekhanya was deposed from the chairmanship of the Military Council in a bloodless coup on 30 April 1991. The Military Council was dissolved and a democratic constitution promulgated in April 1993.

The elections in May 1998 were won by the ruling Lesotho Congress for Democracy, but its opponents said that the poll was rigged. In Sept. 1998 an army mutiny prompted intervention from South Africa to support the government. An agreement was reached allowing the LCD to stay in power for up to 18 months pending new elections, but also foreign troops would remain in Lesotho until its own security forces were ready to maintain law and order.

LIBERIA

Republic of Liberia

Capital: Monrovia
Population estimate, 2000: 3·26m.
Estimated GDP: $2·4bn.

KEY HISTORICAL EVENTS

The Republic of Liberia had its origin in the efforts of several American philanthropic societies to establish freed American slaves in a colony on the West African coast. In 1822 a settlement was formed near the spot where Monrovia now stands. On 26 July 1847 the State was constituted as the Free and Independent Republic of Liberia.

On 12 April 1980, President Tolbert was assassinated and his government overthrown in a coup led by Master-Sergeant Samuel Doe, who was later installed as Head of State and Commander-in-Chief of the army. At the beginning of 1990 rebel forces entered Liberia from the north and fought their way successfully southwards to confront President Doe's forces in Monrovia. The rebels comprised the National Patriotic Front of Liberia (NPFL) led by Charles Taylor, and the hostile breakaway Independent National Patriotic Front led by Prince Johnson. A peacekeeping force dispatched by the Economic Community of West African States (ECOWAS) disembarked at Monrovia on 25 Aug. 1990, and attempts to form a new provisional government were made.

On 9 Sept. 1990 President Doe was assassinated by Prince Johnson's rebels. At an ECOWAS summit at Bamako (Mali) on 28 Nov., government forces and the two rebel factions signed a ceasefire. ECOWAS installed a provisional government led by Amos Sawyer. Charles Taylor also declared himself president, as did the former vice-president, Harry Moniba. On 13 Feb. 1991 Taylor, Johnson and the commander of the Liberian armed forces signed a second ceasefire. After a West African 12-nation summit meeting from July to Oct. 1991 Taylor signed an agreement to allow ECOWAS to disarm his troops and organize elections. However, fighting continued. A UN Security Council resolution in Nov. 1992 imposed an arms embargo and expressed support for ECOWAS's action.

Peace negotiations opened in Geneva in July 1993 between the interim government, the armed forces, the NPFL and the United Liberation Movement (ULIMO) under OAU auspices. A peace agreement was signed on 25 July. On 12 Sept. 1994 the leaders of the 3 military factions, Charles Taylor (NPFL), Alhaji Kromah (ULIMO) and Gen. Hezekiah Bowen, commander of the Armed Forces, met in Ghana and agreed to form a new Council of State, but other warring factions and civilian forces in Monrovia repudiated this. On 21 Dec. 1994 at Accra under Ghanaian auspices the factions concluded an agreement providing for a cease-fire on 28 Dec. 1994, the establishment of safe zones and buffer zones under ECOWAS control, elections on 14 Nov. 1995 and a new 5-member transitional executive. However, factional fighting continued into 1995. On 19 Aug. 1995 an eleventh peace agreement was signed in Abuja by Taylor, Kromah and George Boley (Council for Peace in Liberia, CPL). Fighting broke out in April 1996 between the Krahn and Mandingo branches of ULIMO. It was terminated on 31 July 1996 by an unconditional ceasefire between all factions.

A peace agreement was signed on 17 Aug. 1996 under the auspices of ECOWAS in Abuja which provided for the disarmament of all factions by the end of Jan. 1997 and the election of a president on 31 May 1997. ECOWAS's peacekeeping force, ECOMOG, was increased from 8,500 to 18,000 troops. By the end of Jan. 1997 some 20,000 out of perhaps 60,000 insurgents had surrendered their arms. Possession of arms after that date became a criminal offence. The civil war is reckoned to have killed up to 200,000 people, and made 1m. homeless. A presidential election was held in July 1997. Charles Taylor was elected by an overwhelming majority.

LIBYA

Jamahiriya Al-Arabiya Al-Libiya Al-Shabiya Al-Ishtirakiya Al-Uzma

(Great Socialist People's Libyan Arab Republic)

Capital: Tripoli
Population estimate, 2000: 6·39m.
Estimated GDP: $34·5bn.
HDI/world rank: 0·806/64

KEY HISTORICAL EVENTS

Tripoli fell under Ottoman domination in the 16th century, and although in 1711 the Arab population secured some measure of independence, the country came under the direct rule of Turkey in 1835. In 1911, Italy occupied Tripoli and in 1912, by the Treaty of Ouchy, Turkey recognized the sovereignty of Italy in Tripoli.

During the Second World War, the British army expelled the Italians and their German allies, and Tripolitania and Cyrenaica were placed under British, and Fezzan under French, military administration. This continued until 1950 under a UN directive. Libya became an independent, sovereign kingdom with the former Amir of Cyrenaica, Muhammad Idris al Senussi, as king on 24 Dec. 1951.

King Idris was deposed in Sept. 1969 by a group of army officers, 12 of whom formed the Revolutionary Command Council which, chaired by Col. Muammar Qadhafi, proclaimed the Libyan Arab Republic. Qadhafi favoured Arab unity, but his efforts in that direction have been abortive. The Federation of the Arab Republics formed in 1972 with Libya, Egypt and Syria as members, an agreement to merge Libya and Egypt in 1973, a proposed union with Tunisia in 1974, and a union with Syria in 1980 have all proved unsuccessful.

In 1977 the country's name was changed to Great Socialist People's Libyan Arab Jamahiriya. At the same time the Revolutionary Command Council was superceded by a more democratic system of People's Congress and Popular Committees. Qadhafi remained head of state. Throughout the 1980s Libya had constant disagreements with its neighbours and its relations with the USA and other Western countries deteriorated, culminating in the US bombing of the capital in April 1987, in an attempt to punish Qadhafi for his alleged support of international terrorism.

A US trade embargo was enforced in 1986. In 1992 the UN imposed sanctions and the USA banned international flights and the sale of defence equipment to Libya because it refused to surrender suspects in the 1988 bombing of a Pan Am flight over Lockerbie in Scotland. In 1996 US sanctions were widened to penalize any foreign company that invested more than US$40m. in Libya's oil industry. In April 1999, Libya handed over 2 men suspected of planting the bomb on the Pan Am airliner to be tried in the Netherlands but under Scottish law. The UN responded to Libya's disavowal of terrorism with a promise to lift sanctions but the US trade embargo remains in place.

TERRITORY AND POPULATION

Libya is bounded in the north by the Mediterranean Sea, east by Egypt and Sudan, south by Chad and Niger and west by Algeria and Tunisia. The area is estimated at 1,775,500 sq. km. The population at the census on 31 July 1984 was 3,637,488. Estimate (1996), 5·59m. (86% urban; 47·9% female); density, 3·18 per sq. km.

The UN gives a projected population for 2000 of 6·39m.

The country was formerly divided into 13 administrative regions, but as of 1998 there are 26 administrative regions (*Shabiyat*). They are Shabiya Al-Batan, Shabiya Jabal Al-Akhdar, Shabiya Al-Wahad, Shabiya Al-Jofra, Shabiya Wadi Al-Hait, Shabiya Al-Morqib, Shabiya Tripoli, Shabiya Sabrata/Sorman, Shabiya Yefrin, Shabiya Derna, Shabiya Al-Marj, Shabiya Al-Kofra, Shabiya Murzaq, Shabiya Wadi Al-Shaati, Shabiya Ben Walid, Shabiya Al-Jafarah, Shabiya Nikat Al-Khams,

Shabiya Nalout, Shabiya Al-Qoba, Shabiya Benghazi, Shabiya Sirte, Shabiya Sabah, Shabiya Musrata, Shabiya Tarhouna/Msallata, Shabiya Zawiyah and Shabiya Gharyan.

The official language is Arabic.

SOCIAL STATISTICS

1997 births, 255,000; deaths, 43,000. Birth rate, 1997 (per 1,000 population), 43·9; death rate, 7·5. Life expectancy (1997 estimate), 65·0 years; growth rate, 3·64%. Infant mortality, 1990–95, 68 per 1,000 live births; fertility rate, 6·4 births per woman.

CLIMATE

The coastal region has a warm temperate climate, with mild wet winters and hot dry summers, although most of the country suffers from aridity. Tripoli, Jan. 52°F (11·1°C), July 81°F (27·2°C). Annual rainfall 16" (400 mm). Benghazi, Jan. 56°F (13·3°C), July 77°F (25°C). Annual rainfall 11" (267 mm).

CONSTITUTION AND GOVERNMENT

In 1977 a new form of direct democracy, the state of the masses, was promulgated and the name of the country was changed to Great Socialist People's Libyan Arab Jamahiriya. Under this system, every adult is supposed to be able to share in policy making through the Basic People's Congresses of which there are some 2,000. These Congresses appoint People's Committees to execute policy. Provincial and urban affairs are handled by People's Committees responsible to Municipality People's Congresses, of which there are 26, now called *Shabiyat.* Officials of these Congresses and Committees form at national level the 3,000-member General People's Congress which normally meets for about a week early each year (usually in March). This is the highest policy-making body in the country. The General People's Congress appoints its own General Secretariat and the General People's Committee, whose members (the equivalents of ministers elsewhere) head the government departments which execute policy at national level.

Until 1977 Libya was ruled by a Revolutionary Command Council (RCC) headed by Col. Muammar Qadhafi. Upon its abolition in that year the 5 surviving members of the RCC became the General Secretariat of the General People's Congress, still under Qadhafi's direction. In 1979 they stood down to be replaced by officials elected by the Congress. Since then, Col. Qadhafi has retained his position as Leader of the Revolution. Neither he nor his former RCC colleagues have any formal posts in the present administration, although they continue to wield considerable authority.

About 143,000 acres are used for settled farming; about 272,000 acres are covered by natural forests. The Agricultural Development Authority plans to reclaim 6,000 ha each year for agriculture. KEY HISTORICAL EVENTS

Liechtenstein is a sovereign state whose history dates back to 3 May 1342 when Count Hartmann III became ruler of the county of Vaduz. Additions were later made to the count's domains and by 1434 the territory reached its present boundaries. It consists of the two former counties of Schellenberg and Vaduz (until 1806 immediate fiefs of the Holy Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein. On 23 Jan. 1719 the Emperor Charles VI constituted the two counties as the Principality of Liechtenstein. In 1862 the constitution established an elected diet which was to participate in the legislative process. After the First World War, Liechtenstein severed its treaties with Austria in 1919 and turned towards Switzerland, adopting Swiss currency in 1921. Liechtenstein has been represented abroad by Switzerland since 1919. On 5 Oct. 1921 a new constitution based on that of Switzerland extended democratic rights. It also stated that the head of government must be a Liechtenstein citizen.

KEY HISTORICAL EVENTS

Lithuanian tribes which were organized into state units in the 9th century unified in the face of encroachment by the German order of Teutonic Knights. At the time of Tatar-Mongol domination of Russia, Lithuania annexed Russian lands until by the middle of the 15th century Belorussia, parts of Russia and Ukraine as far as the Black Sea were under its rule. Lithuania united with Poland dynastically in 1385 and politically in 1569. During the partitions of the Polish-Lithuanian Commonwealth by Russia, Prussia and Austria in the 18th century, Lithuania yielded its Russian territories and was absorbed into the Russian empire in 1795.

Following the German occupation during the First World War and the Russian revolution on 16 Feb. 1918, the Lithuanian Council proclaimed the restoration of the Lithuanian state. The Soviets attempted re-capturing the lost lands and heavy fighting occurred between the Soviet, German, Polish and Lithuanian forces. In April 1919, the Soviets withdrew and the re-formed Lithuanian government established a democratic republic. Lithuanian independence was recognized by the Treaty of Versailles. The peace treaty between Lithuania and the Soviet Union was signed in July 1920. In Oct. 1919, Poland occupied Vilnius, the capital of the historic Lithuanian state, and incorporated it into Poland in 1923 (this was acknowledged by Lithuania only in 1938). In Dec. 1926, the democratic régime was overthrown by a coup.

The secret protocol of the Soviet-German frontier treaty of 23 Sept. 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. In Oct. 1939, the province and city of Vilnius (in Polish occupation 1920-39) were ceded by the USSR. An ultimatum (14 June 1940) led to the formation of a government acceptable to the USSR. Lithuania became a Soviet Socialist Republic of the USSR on 3 Aug. 1940.

On 11 March 1990 the newly-elected Lithuanian Supreme Soviet, by 120 votes to nil, proclaimed independence based on the continuing validity of the act of independence of 16 Feb. 1918. This decision was not accepted by the USSR government.

Massive price rises in Jan. 1991 triggered demonstrations from ethnic Russians and led the Prime Minister, Kazimiera Prunskiene, to resign. Initially dispatched to Vilnius to enforce conscription, Soviet army units occupied key buildings in the face of mounting popular unrest. On 13 Jan. the army fired on demonstrators and there were fatal casualties. A referendum on independence was held in Feb. 1991 at which 90·5% voted in favour. A fully independent status was conceded by the USSR State Council on 6 Sept. 1991.

The restructuring of priority sectors of the Lithuanian economy is presently facilitated by the second stage of privatization: privatization for cash, giving equal rights to local and foreign investors. The Ministry of European Affairs of the Republic of Lithuania co-ordinates the privatization process in Lithuania and directly organizes privatization of the largest state-controlled entities in industry and infrastructure. Privatization of these enterprises is carried out by a competitive procedure of international tenders, prepared and executed by internationally renowned advisors.

Performance. Among the wealthiest province of the former Soviet Union, Lithuania has weathered the economic crisis overspilling from Russia. 30% of exports go to the EU compared to 20% to Russia. The growth forecast for 1998 has been cut from 7% to 5·5%.

KEY HISTORICAL EVENTS

Lying at the heart of Western Europe between Belgium, France and Germany, the Grand-Duchy of Luxembourg has been an independent State ever since the Treaty of London of 19 April 1839, concluded between the major powers of that time—the United Kingdom, Austria, France, Prussia and Russia—and Belgium and the Netherlands.

The origins of Luxembourg stretch back as far as 963 AD when Count Sigfried founded the castle of Lutzilinburhurch, which rapidly developed into an important fortress. The House of Luxembourg was most prominent on the European scene during the 14th and 15th centuries, when four Counts of the House of Luxembourg became Emperors of the Holy Roman Empire and Kings of Bohemia (e.g. Wenceslas, who founded the University of Prague and built the Wenceslas Bridge in the Golden City). The House of Luxembourg went into decline after this bright period and was successively occupied by Burgundy, Spain, Austria (under Empress Marie-Theresa and Emperor Joseph II) and finally by revolutionary France.

In 1815 the Vienna Treaty decided that the Grand Duchy of Luxembourg would come under the house of Orange-Nassau, also sovereigns of the Netherlands. This meant that the King of the Netherlands was at the same time Grand-Duke of Luxembourg with the country as his personal property (personal union). In 1839 the Walloon-speaking area was joined to Belgium.

In 1890 the personal union with the Netherlands ended with the accession of a member of another branch of the house of Nassau, Grand-Duke Adolphe of Weilburg. In both world wars (1914–18 and 1939–45) Luxembourg, a neutral country, was invaded and occupied by German forces. From May 1940 until Sept. 1944 the government carried on an independent administration in London. In June 1942, Luxembourg became the only nazi-occupied country to stage a general strike against the occupation. Harsh repression of the population (deportations, executions) followed.

In 1948 a Benelux customs union formed by Belgium, the Netherlands and Luxembourg allowed for standardization of prices, taxes and wages and the free movement of labour among the three countries. Luxembourg was a founder member of the European Union.

TERRITORY AND POPULATION

Luxembourg has an area of 2,586 sq. km (999 sq. miles) and is bounded on the west by Belgium, south by France, east by Germany. The population (1998) was 423,700 (including 147,700 foreigners); density, 164 per sq. km.

The UN gives a projected population for 2000 of 430,000.

In 1998 an estimated 89·2% of the population were urban. The capital, Luxembourg, had (1998) 79,500 inhabitants; Esch-sur-Alzette, the centre of the mining district, 24,600; Differdange, 16,800; Dudelange, 16,400, and Pétange, 13,300.

Letzebuergesch is spoken by most of the population, and since 1985 has been an official language with French and German.

The Grand Duchy of Luxembourg is a constitutional monarchy.

The reigning Grand Duke is **Jean**, b. 5 Jan. 1921, son of the late Grand Duchess Charlotte and the late Prince Felix of Bourbon-Parma; succeeded 12 Nov. 1964 on the abdication of his mother; married to Princess Joséphine-Charlotte of Belgium, 9 April 1953. *Offspring:* Princess Marie-Astrid, b. 17 Feb. 1954, married Christian of Habsbourg-Lorraine 6 Feb. 1982 (*Offspring:* Marie Christine, b. 31 July 1983; Imre, b. 8 Dec. 1985; Christophe, b. 2 Feb. 1988; Alexander, b. 26 Sept. 1990; Gabriella, b. 26 March 1994); Prince Henri, hereditary Grand-Duke appointed Lieutenant of the Grand-Duke in March 1998, b. 16 April 1955, married Maria Teresa Mestre 14 Feb. 1981 (*Offspring:* Prince Guillaume, b. 11 Nov. 1981, Prince Felix, b. 3 June 1984, Prince Louis, b. 3 Aug. 1986, Princess Alexandra, b. 16 Feb. 1991, Prince Sebastian, b. 16 April 1992); Prince Jean, b. 15 May 1957, married Hélène Vestur (*Offspring:* Marie-Gabrielle, b. 18 Dec. 1986, Constantin, b. 22 July 1988, Wenceslas, b. 17 Nov. 1990, Carl-Johann, b. 15 Aug. 1992); Princess Margaretha, b. 15 May 1957, married Prince Nicolas of Liechtenstein 20 March 1982 (*Offspring:* Marie-Annunciata, b. 12 May 1985, Marie-Astrid, b. 26 June 1987, Joseph-Emmanuel, b. 7 May 1989); Prince Guillaume, b. 1 May 1963, married Sibilla Weiller 24 Sept. 1994 (*Offspring:* Paul-Louis, b. 4 March 1998).

The constitution of 17 Oct. 1868 was revised in 1919, 1948, 1956, 1972, 1983, 1988, 1989, 1994, 1996 and 1998. In March 1998 Grand-Duke Jean designated his eldest son, Henri, the heir to the throne, his 'Lieutenant-Representant' according to article 42 of the Luxembourg Constitution. The oath was sworn in the presence of the Grand-Duke and Grand-Duchess, the Prime Minister, the Government Ministers and the members of Parliament. The Lieutenant-Representant has the same prerogatives as the Sovereign himself.

The separation of powers is not clearly defined between the legislature and the executive, resulting in much interaction between the two bodies. Only the judiciary is completely independent.

The 12 cantons are divided into 4 electoral districts: the South, the East, the Centre and the North. Voters choose between party lists of candidates in multi-member constituencies. The parliament is the *Chamber of Deputies*, which consists of a maximum of 60 members elected for 5 years. Voting is compulsory and there is universal suffrage. Seats are allocated according to the rules of proportional representation and the principle of the smallest electoral quote. There is a *Council of State* of 21 members appointed by the Sovereign for life. It advises on proposed laws and any other question referred to it.

The head of state takes part in the legislative power, exercises executive power and has a part in the judicial power. The constitution leaves to the sovereign the right to organize the Government, which consists of a Minister of State, who is Prime Minister, and of at least 3 Ministers. Direct consultation by referendum is provided for in the Constitution.

Local Government. In Luxembourg, where there are neither provinces nor departments (as in France), the commune is the only application of the principle of territorial decentralization. The commune forms an autonomous authority, from the administrative point of view, on a territorial basis. It administers its patrimony and its interests through local representatives, under the control of the central authority.

Each commune has its own commune council directly elected by the inhabitants. Communal elections are held automatically on the 2nd Sunday of Oct. preceding the expiration of the mandate of the communal council (6 years). Elections are held under the absolute majority system, except in larger communes (at least 3,500 inhabitants) where elections are held on the party-list system, with proportional representation as for the legislative elections.

Communal authority is exercised by the communal council and by the corporate body of burgomasters and aldermen (SYVICOL). Burgomasters are appointed and dismissed by the Grand-Duke. Town aldermen are appointed by the Grand-Duke, and those of other communes by the Minister of the Interior.

DEFENCE

There is a volunteer light infantry battalion of (1996) 800, of which only the career officers are professionals. In recent years Luxembourg soldiers and officers have been actively participating in peace-keeping missions, mainly in the former Yugoslavia. There is also a Gendarmerie of 560.

In 1997 military expenditure totalled US$129m. (US$313 per capita), representing 0·8% of GDP.

INTERNATIONAL RELATIONS

Luxembourg is a member of the UN, Benelux, the EU, OECD, the Council of Europe, NATO and WEU. The Schengen Accord of June 1990 abolished border controls between Luxembourg, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Italy, the Netherlands, Norway, Portugal, Spain and Sweden.

ECONOMY

Policy. The world economic crisis of 1973–74 hit the then monolithic Luxembourg economy very hard. The previously strong steel sector had to be thoroughly restructured and this, along with industrial diversification and the emergence of the new service sector, helped to consolidate Luxembourg's economic indicators. The

service sector employs the most people, including 21,500 employees in more than 200 banks (1997). Companies dealing with insurance, reinsurance and pension funds are the next biggest employers. Other prospering sectors of the Luxembourg economy include telecommunications, audio-visual and multimedia, and industrial plastics.

Performance. In terms of GDP per head, Luxembourg is the richest sovereign country in the world, with 31,531 PPS (purchasing power standards) in 1997.

Real GDP growth was 4·0% in 1998 (4·8% in 1997) against a European average of 2·7%. Real GDP is projected to grow at around 3·5% in 1999 and 2000. Total GDP in 1998 was LUF595·4bn.

The OECD Economic Survey of 1999 reports: 'The Luxembourg economy has continued to perform well... Exports have been a major driving force, underpinned by buoyant export markets and a strong export performance of the financial and communication sectors. Private consumption has strengthened due to higher wage increases and robust employment growth. Investment has also been buoyant, partly due to special factors such as the purchase of some aircraft.'

Budget. Revenue and expenditure (including extraordinary) for years ending 30 April (in 1m. francs):

	1995	*1996*	*1997*	*1998*
Revenue	149·8	164·3	163·9	170·3
Expenditure	148·8	161·4	163·15	170·4

Central government spending was expected to rise by almost 5·9% in nominal terms in 1999. Public debt in June 1998 was LUF28·8bn., of which LUF27·0bn. was domestic.

VAT is 15%, with reduced rates of 6% and 3% (for books).

According to government projections, the general government surplus was expected to be 1·4% of GDP in 1998 (down from 2·9% in 1997). Income taxes and business taxes have been reduced to preserve competitiveness in the international environment. The normal tax rate for companies came down to 37·45% in 1998, compared with 40·3% in 1996.

Currency. On 1 Jan. 1999 the euro (EUR) became the legal currency in Luxembourg and the *Luxembourg franc* became a subdivision of it; irrevocable conversion rate 40·3399 Luxembourg francs to 1 euro. The euro, which consists of 100 cents, will not be in circulation until 1 Jan. 2002. There will be 7 euro notes in different colours and sizes denominated in 500, 200, 100, 50, 20, 10 and 5 euros, and 8 coins denominated in 2 and 1 euros, then 50, 20, 10, 5, 2 and 1 cents. Even though notes and coins will not be introduced until 1 Jan. 2002, the euro can be used in banking, by means of cheques, travellers' cheques, bank transfers, credit cards and electronic purses. Banking will be possible in both euros and Luxembourg francs until the Luxembourg franc is withdrawn from circulation—which must be by 1 July 2002. As a result of the adoption of the euro, monetary union with Belgium has been terminated.

The *Luxembourg franc* (LUF) notionally consists of 100 *centimes*, and is at parity with the Belgian franc. Inflation in 1999 was an estimated 1·7%. Foreign exchange reserves (excluding gold) were US$75,000m. in 1995. Gold reserves were 310,000 troy oz. in Feb. 1998.

Banking and Finance. Luxembourg's Central Bank (formerly the Monetary Institute) was established in July 1998 (*Director-General*, Yves Mersch). In 1997 there were 215 banks and 75 other credit institutions established in Luxembourg, which has become an international financial centre. German banks make up nearly a third of all the banks. Total deposits in 1997 were LUF7,834·0bn.; net assets in unit trusts, LUF7,560·7bn.; net assets in investment companies, LUF4,754·9bn. There is a stock exchange.

The financial sector accounted for 18·9% of GDP in 1997 and the banks showed a net profit of LUF76·5bn. The total number of approved insurance companies in 1996 was 89, with reinsurance companies numbering 244; the amount of premiums due was LUF121,408·0m.

According to the OECD Economic Survey of 1999: 'Tax advantages in comparison with neighbouring countries, strict bank secrecy rules, a liberal

regulatory environment and the rapid implementation of EU directives in Luxembourg law, combined with a favourable geographical location at the heart of Europe and a qualified and multilingual labour force, have been central in creating competitive advantages in financial services.'

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. Apart from hydroelectricity and electricity generated from fossil fuels, Luxembourg has no national energy resources. Installed capacity in 1997 was 1·2m. kW. Power production was 1,145m. kWh in 1997. Consumption per capita in 1997 was estimated to be 15,053 kWh.

Minerals. The national steel industry mainly relies on imported ore. In 1997 production (in tonnes) of pig-iron, 1,438,030; of steel, 2,580,219.

Agriculture. The contribution of agriculture, viticulture and forestry to the economy has been gradually declining over the years, accounting for only 1·5% of GDP in 1994. However, the actual output of this sector has nearly tripled during the past 30 years, a trend common to many EU countries. Agriculture accounts for 11·9% of exports and 12·9% of imports. There were 6,039 workers engaged in agricultural work (including wine-growing and forestry) in 1997 (1,703 wage-earners), and 2,976 farms with an average area of 48·98 ha; 126,629 ha were under cultivation in 1997.

Production, 1997 (in tonnes) of main crops: Maize, 496,100; roots and tubers, 31,275; bread crops, 59,789; forage crops, 145,498; pulses, 1,530; grassland, 223,732. Production, 1997 (in 1,000 tonnes) of meat, 27·4; milk, 264·0; butter, 3·1 (1996); cheese, 3·0 (1996). In 1997, 174,708 hectolitres of wine were produced. In 1997 there were 7,659 tractors, 882 harvester-threshers, 1,818 manure spreaders and 1,971 gatherer-presses.

Livestock (1997): 2,295 horses, 212,335 cattle, 77,149 pigs, 8,009 sheep.

In 1996 there were 2,501 industrial enterprises, of which 1,546 were in the building industry. Production, 1997 (in 1,000 tonnes): Steel, 2,580; rolled steel products, 3,887.

Labour. In 1997 the estimated total workforce was 226,500, of which 118,500 worked in the service industries. The government fixes a legal minimum wage. Retirement is at 65. Employment creation averaged 3·3% every year between 1985 and 1997, with a total increase in jobs of 47·8% over the period. In 1997 the unemployment rate was 3·6%, but by Sept. 1998 it had dropped to 3·0%. This is the lowest rate of unemployment for any EU nation.

The OECD reports that Luxembourg has one of the lowest unemployment rates among OECD members, but 'a broader concept of labour under-utilization ("broad unemployment"), which adds people of working age in benefit schemes and labour market programmes to registered unemployment, shows a less favourable development, with broad unemployment exceeding 13% of the broad labour force in 1997, compared with less than 12% in 1995.'

Trade Unions. The main trade unions are the O–GBL (Socialist) and the LCGB (Christian–Social). Other sectorial unions include ALEBA (the banking sector), FNCTLL (railworkers), and FEP (private employers). In Oct. 1998, union representatives were elected in both the private and public sectors.

INTERNATIONAL TRADE

Luxembourg is in the process of turning itself into a centre for electronic commerce, the world's fastest-growing industry.

Cargolux has developed into one of the major international freight carriers.

Postal Services. In 1997 there were 106 post offices. In 1995 a total of 155m. items of mail were processed (378 items per person).

SOCIAL INSTITUTIONS

Justice. The Constitution makes the Courts of Law independent in performing their functions, restricting their sphere of activity, defining their limit of jurisdiction and providing a number of procedural guarantees. The Constitution has additionally laid down a number of provisions designed to ensure judges remain independent of persons under their jurisdiction, and to ensure no interference from the executive and legislative organs. All judges are appointed by Grand-Ducal order and are irremovable.

The judicial organization comprises 3 Justices of the Peace (conciliation and police courts). The country is, in addition, divided into 2 judicial districts, i.e. Luxembourg and Diekirck. District courts deal with matters such as civic and commercial cases. Offences which are punishable under the Penal Code or by specific laws with imprisonment or hard labour fall within the jurisdiction of the criminal chambers of District Courts, as the Assize Court was repealed by law in 1987. The High Court of Justice consists of a Supreme Court of Appeal and a Court of Appeal.

The judicial organization of the Grand-Duchy does not include the jury system. A division of votes between the judges on the issue of guilt/innocence may lead to acquittal. Society before the Courts of Law is represented by the Public Prosecutor Department, composed of members of the judiciary directly answerable to the government.

Religion. The population is mostly Roman Catholic, although perhaps only 30% are practising Catholics. There are small Protestant, Jewish, Greek Orthodox and Moslem communities as well.

Education. Adult literacy rate, 1995, 97·4% (male, 98·0%; female, 96·8%). Education is compulsory for all children between the ages of 6 and 15. In 1996–97 there were 9,932 children in pre-primary school with 584 teachers; 28,232 pupils in primary schools; 28,483 pupils in secondary schools (including vocational training). In higher education (1996–97) the Higher Institute of Technology had 298 students. In 1996–97 there were 326 students in teacher training. In 1996–97 the University Centre of Luxembourg had 1,606 students and around 200 academic staff. Luxembourg does not have a full-time university, so many students have to go abroad, predominantly to France, Germany and Belgium. In 1996–97, 984 students pursued university studies.

In 1995 total expenditure on education came to LUF22m. (3·9% of GNP).

Health. In 1997 there were 1,030 doctors (344 GPs and 686 specialists) and 247 dentists. There were 34 hospitals in 1994 and 4,438 hospital beds in 1992. Total health spending accounted for 7% of GDP in 1997.

Welfare. In Luxembourg the social security system was built in several stages. It has been extended with regard to both the socio-professional categories and the risk groups covered. The law of 26 July 1986 introduced the minimum wage, a mechanism to guarantee private means. It consists of a supplementary benefit paid up to a set threshold determined according to the composition of the household. This benefit is awarded irrespective of the causes of the need.

Public contributions play a growing role in financing the system. In 1995 they accounted for 40% of the resources, with employees' and employers' contributions forming just over half. Around 50% of social security benefits goes towards pension schemes, and around 25% goes to health insurance. Nearly half the ordinary budget is absorbed by social security.

CULTURE

Broadcasting. The major broadcaster of TV and radio programmes is CLT (*Compagnie Luxembourgeoise de Télédiffusion*), along with local and regional radio stations that have emerged since the 1991 Law on Electronic Media. CLT was set up in 1929 and started broadcasting in 1932. In the same year Radio Luxembourg started broadcasting its multilingual programmes. In 1954, CLT received an exclusive licence for broadcasting radio and TV in the Grand-Duchy, which was extended until the end of 2010 in 1995.

In 1995, 12 TV channels and 12 radio stations belonged to the CLT group. It also broadcast 4 TV channels and 3 radio stations via the ASTRA satellite system. The 1991 Law on Electronic Media allowed the creation of 4 new radio networks and 15 local radio stations, and thus ended the CLT monopoly.

The commercial *Radio-Télé-Luxembourg* broadcasts 1 programme in Letzebuergesch on FM. There are commercial and religious programmes in French, German, English and Italian. 10 TV programmes are broadcast. Colour transmission is by the SECAM system. In 1995 there were 155,000 TV sets in use and 260,000 radio receivers. Satellite and cable TV is widespread.

Cinema. In 1997 there were 26 cinemas.

Press. There were 5 daily newspapers in 1997 with a circulation of 156,000, equivalent to 368 per 1,000 inhabitants. 4 of these papers are published in the Grand-Duchy, and 1 in neighbouring France. There are a number of weekly titles with a circulation of 77,800. LUF65m. of direct government aid is granted to the Luxembourg press.

Tourism. In 1997 there were 711,000 tourists, 7,638 hotel rooms and 1,109,000 overnight stays. Tourists spent US$295m. in 1996. Camping is widespread, and weekend and short-stay tourism accounts for many tourists.

Festivals. Every year there is Echternach–Luxembourg (May–June) and Wiltz (June–July). Both feature a variety of classical music, jazz, theatre and recitals.

Libraries. The National Library is in Luxembourg City, and there are smaller municipal libraries in most towns.

National Theatre and Opera. There are several theatres in Luxembourg City, including *Théâtre Municipal*, *Théâtre des Capucins* and *Théâtre du Centaure*. There are also a number of theatres in Esch/Alzette.

Museums and Galleries. The main museums are the *Musée d'Histoire de la Ville*, the *Villa Vauban*, the *Musée National d'Histoire Naturelle*, the *Cercle Municipal* and the *Musée National d'Histoire et d'Art*.

Capital: Skopje
Population estimate, 2000: 2·23m.
Estimated GDP: $2·0bn.
HDI/world rank: 0·749/80

KEY HISTORICAL EVENTS

The history of Macedonia can be traced to the reign of King Karan (808–778 BC), but the country was at its most powerful at the time of Philip II (359–336 BC) and Alexander the Great (336–323 BC). At the end of the 6th century AD, Slavs began to settle in Macedonia. There followed a long period of internal fighting but the spread of Christianity led to consolidation and the creation of the first Macedonian Slav state, the Kingdom of Samuel, 976–1018. In the 14th century it fell to Serbia, and in 1355 to the Turks.

After the Balkan wars of 1912–13 Turkey was ousted and Serbia received part of the territory, the rest going to Bulgaria and Greece. In 1918 Yugoslav Macedonia was incorporated into Serbia as South Serbia, becoming a republic in the Socialist Federal Republic of Yugoslavia. Claims to the historical Macedonian territory have long been a source of contention with Bulgaria and Greece. Macedonia declared its independence on 18 Sept. 1991 and was admitted to the UN on 8 April 1993. In April 1999 the Kosovo crisis which led to NATO air attacks on Yugoslavian military targets set off a flood of refugees into Macedonia.

TERRITORY AND POPULATION

Macedonia is bounded in the north by Yugoslavia, in the east by Bulgaria, in the south by Greece and in the west by Albania. Its area is 25,713 sq. km. According to the 1994 census final results, the population on 20 June 1994 was 1,945,932. The ethnic groups were Macedonians (1,295,964), Albanians (441,104), Turks (78,019), Rhomas (43,707), Serbs (40,228), Vlachs (8,601). There were 36,427 others and 1,882 not stated. Ethnic Albanians predominate on the western side of Macedonia. Minorities are represented in the Council for Inter-Ethnic Relations. 1996 population estimate, 1·98m.; density, 77 per sq. km.

The UN gives a projected population for 2000 of 2·23m.

In 1995 an estimated 59·9% of the population lived in urban areas.

The major cities (with 1994 census population) are: Skopje, the capital, 444,299; Bitola, 77,464; Prilep, 68,148; Kumanovo, 71,853; Tetovo, 50,344.

The *President* is directly elected for 5-year terms. Candidates must be citizens aged at least 40 years. The parliament is a 120-member single-chamber *Assembly (Sobranie)*, elected by universal suffrage for 4-year terms. There is a *Constitutional Court* whose members are elected by the assembly for non-renewable 8-year terms, and a *National Security Council* chaired by the President. Laws passed by the Assembly must be countersigned by the President, who may return them for reconsideration, but cannot veto them if they gain a two-thirds majority.

Political Parties. The new Law on Political Parties makes a distinction between a political party and an association of citizens. The signatures of 500 citizens with the right to vote must be produced for a party to be legally registered. Presently the country has 34 legally registered parties.

KEY HISTORICAL EVENTS

Evidence of human inhabitants on Madagascar dates back 2,000 years, and the island was settled by people of African and Indonesian origin when it was visited by the Portuguese explorer, Diego Diaz, in 1500. The island was unified under the Imérina monarchy between 1797 and 1861, but French claims to a protectorate led to hostilities culminating in the establishment of a French protectorate on 30 Sept. 1895. The monarchy was abolished and Madagascar became a French colony on 6 Aug. 1896.

Madagascar became an Overseas Territory of France in 1946, and on 14 Oct. 1958, following a referendum, was proclaimed the autonomous Malagasy Republic within the French community, achieving full independence on 26 June 1960.

In Feb. 1975 Col. Richard Ratsimandrava, Head of State, was assassinated. A National Military Directorate was established on 12 Feb. On 15 June it handed over power to a Supreme Revolutionary Council under Didier Ratsiraka. The 1975 Constitution instituted a 'Democratic Republic' in which only a single political party was permitted.

After 6 months of anti-government unrest, during which the opposition formed an alternative 'government', in Oct. 1991 the government and the Committee of Living Forces, a coalition of 16 opposition parties led by Albert Zafy, agreed to form an 18-month transitional administration. However, Zafy refused to join a government formed on 13 Nov., and was instead appointed chairman of the High State Authority for a Provisional Government formed on 23 Nov.

A new Constitution instituted the Third Republic in Sept. 1992.

Capital: Lilongwe
Population estimate, 2000: 10·98m.
GNP per capita: (PPP$) 690
HDI/world rank: 0·334/161

KEY HISTORICAL EVENTS

A powerful kingdom dominated much of Malaŵi and the surrounding area from the 15th to the 18th centuries, based on the Bantu-speaking people who began settling there 200 years earlier. However, by the beginning of the 19th century, this had disintegrated into many small entities, and occupation by Ngoni people from the south facilitated European control. The explorer David Livingstone reached Lake Nyasa, now Lake Malaŵi, in 1859 and it was the land along the lake's western shore that became, in 1891, the British Protectorate of Nyasaland. The name was changed to British Central Africa Protectorate in 1893 but reverted to Nyasaland in 1907.

In 1884 the British South Africa Company applied for a charter to trade. Within a few years the slavery and the slave trade had been suppressed. Pressure on land, the colour bar and other grievances about colonial rule generated Malaŵian resistance which was only checked by 1915. After the Second World War, the Nyasaland African Congress was formed to lead a new wave of resistance, particularly against the impending federation of the country to two neighbouring British colonies.

In 1953 Nyasaland was joined with Southern Rhodesia (Zimbabwe) and Northern Rhodesia (Zambia) to form the Federation of Rhodesia and Nyasaland, under British control. This union was dissolved in 1963 when Nyasaland was for a year self-governing, until on 6 July 1964 it became independent, adopting the name of Malaŵi. In 1966 Malaŵi was declared a republic and Dr Hastings Banda became the first president. Jailed in 1959–60 for his activities in the resistance, Banda had led the Malaŵi Congress Party to victory in elections in 1961 and established a one party dictatorship which lasted for 30 years. In 1994, with the election of Bakili Muluzi, Malaŵi returned to multi-party democracy.

KEY HISTORICAL EVENTS

Malaysia is a federation consisting of the eleven States of Peninsular Malaysia and the two states of Sabah and Sarawak.

The Portuguese were the first Europeans to settle in the area and Malacca became a Portuguese possession in 1541. The Dutch took Malacca in 1641 and held it until 1794 when it was occupied by the British who had established three trading posts at the end of the 18th century. Although Malacca was returned to the Dutch in 1814, it was finally ceded to Britain in 1824. At the same time (1814-24) Stamford Raffles established a settlement and Singapore became British territory.

In 1826 Singapore and Malacca were incorporated with Penang to form the Straits Settlements. In 1896 Negri Sembilan, Penang, Perak and Selangor became the Federated Malay States; these were 'protected' states and were not part of the Straits Settlements. The remaining five Malay states became known as the Unfederated Malay States.

Singapore and what is now Malaysia were occupied by the Japanese from 1941 to 1945. Soon thereafter, in Jan. 1946, plans were published to create a Malaysian Union excluding Singapore but including the four Federated and the five Unfederated Malay States and the Settlements of Penang and Malacca. The Union came into being in April 1946 but was soon abandoned in the face of opposition. However, in Jan. 1948 the Union was reconstituted as the Federation of Malaya.

From 1948 to 1960 a State of Emergency existed in order to counter revolt by Malayan Communists aimed at the disruption of the country's economy. Commonwealth forces supported the Federation's own armed forces.

Following lengthy negotiations independence was granted to the Federation of Malaya on 31 Aug. 1957.

On 31 Aug. 1963 Malaysia was created from the Federation of Malaya, Singapore, North Borneo (renamed Sabah) and Sarawak. Brunei was also invited to join but no agreement could be reached. The UK relinquished sovereignty over Singapore, North Borneo and Sarawak from independence day and extended the 1957 defence agreement with Malaya to apply to Malaysia. Malaysia became a member of the Commonwealth. Singapore left Malaysia on 9 Aug. 1965 to become an independent sovereign state.

Under the leadership of Mahathir Mohamad, south-east Asia's longest-serving leader, Malaysia entered on a period of economic prosperity, broken eventually by the 1997-98 recession. Economic turbulence caused political dissent within the government. In Sept. 1998 Anwar Ibrahim was sacked from his job as finance minister and deputy prime minister and expelled from the dominant UMNO party. His support for continuing economic reform was in conflict with Dr Mahathir's policy of introducing capital controls to insulate the economy. Facing allegations of corruption and sexual promiscuity, Mr Anwar was subsequently arrested and jailed for 6 years.

TERRITORY AND POPULATION

The federal state of Malaysia comprises the 11 states and 1 federal territory of Peninsular Malaysia, bounded in the north by Thailand, and with the island of Singapore as an enclave on its southern tip; and, on the island of Borneo to the east, the state of Sabah (which includes the federal territory of the island of Labuan), and the state of Sarawak, with Brunei as an enclave, both bounded in the south by Indonesia and in the north-west and north-east by the South China and Sulu Seas.

The area of Malaysia is 329,758 sq. km (127,317 sq. miles) and the population (1997 estimate) is 21·7m.; density, 62 per sq. km. Malaysia's national waters cover 515,256 sq. km.

ECONOMY

Policy. Malaysia's response to the economic crisis that swept Asia in 1997-98 was to put much of the blame on foreign speculators. After a fall in the value of of the *ringgit* by 48% between July 1997 and July 1998, Dr Mahathir announced tough restrictions on currency transactions. The aim was to meet head on the problem of bank debt. Interest rates could be lowered without leading to a run on the ringgit. But short-term stability may not be enough to restore Malaysia to economic prosperity. In 1998 the economy shrank by over 5% and bank debt remains one of the highest in south-east Asia.

Performance. During the sixth 5-year plan (1991–95) economic growth averaged 8·7% a year (target, 8·1%). Between 1990 and 1996 the average annual real growth in GNP per capita was 6·1%. In 1997 growth was an estimated 8% but was estimated to be –6% for 1998.

Budget. 1997 budget: Revenue, RM60,780m.; expenditure, RM59,980m. Revenue and expenditure for calendar years, in RM1m.:

	1993	*1994*	*1995*	*1996*	*1997*[1]
Revenue	41,231	44,730	50,953	56,549	60,947
Operating expenditure	32,315	32,285	36,573	43,268	43,304

KEY HISTORICAL EVENTS

Mali's political organization and power reached their peak between the 11th and 13th centuries when its gold-based empire controlled much of the surrounding area. It declined thereafter and the French began invading from Senegal in the mid-19th century, fully annexing the country by 1904. The region became the territory of French Sudan as part of French West Africa. The Sudanese Union, led by Modibo Keita, gained strength in the 1950s and took over the internal running of the country after winning elections in 1957. The country became an autonomous state within the French Community on 24 Nov. 1958, and on 4 April 1959 joined with Senegal to form the Federation of Mali. The Federation achieved independence on 20 June 1960, but Senegal seceded on 22 Aug. and Mali proclaimed itself an independent republic on 22 Sept., with Keita as president. Much later, in March 1982, Guinea and Mali were to agree to pursue gradual unification. The National Assembly was dissolved on 17 Jan. 1968 by President Modibo Keita, whose government was then overthrown by an army coup on 19 Nov. 1968; power was assumed by a Military Committee for National Liberation led by Lieut. Moussa Traoré, who became president on 19 Sept. 1969. He ruled on the basis of tight control during the severe drought of the 1970s. Traoré formed a political party in 1976, the *Union démocratique du peuple malien* (UDPM), and was confirmed as president in elections in June 1979. He was deposed on 26 March 1991 in a military coup. Lieut.-Col. Amadou Touré was named head of a Transitional Committee of Public Safety.

In Jan. 1991 a cease-fire was signed with Tuareg insurgents in the north, but sporadic skirmishing continued. A further agreement was reached at a Special Conference on the North held in Dec. 1991, and in April 1992 a national pact was concluded providing for a special administration for the Tuareg north. A further accord with Tuareg insurgents under which their northern bases would be dismantled was signed in May 1994.

Under its current president, Alpha Oumar Konaré, 2 elections for the National Assembly have been held, but the first (April 1997) was cancelled by the Constitutional Court and the second, in July 1997, was boycotted by opposition parties which are weakened by internal fighting.

Malta's application to join the EU made in July 1990 by the Nationalist government was on hold during the 2 years in which the Labour Party was in power, but following the Nationalist Party's victory in the 1998 general election the bid for membership was renewed, with the hope of being in the first group of applicants.

ECONOMY

The Maltese economy has developed and expanded significantly over the past decade. The manufacturing and tourism industries have become the pillars of the domestic economy. Malta's economic strategy aims to consolidate these two industries and to strengthen and expand other service-related sectors. The national industrial strategy encourages the need for technologies that promote high quality manufactured products and increased value-added output. Direct investment by both local and foreign entrepreneurs is actively promoted and supported, with various incentives available, while particular importance is attached to the development of small- and medium-sized companies. The national tourism strategy focuses on the

promotion of Malta as an upmarket tourist destination. Importance is also attached to the development of niche tourism, including conference travel, education and cultural tourism. The cruise-liner business is also being developed and the island is currently serving as a hub port for Mediterranean cruises.

The contribution of manufacturing and tourism to domestic economic growth is complemented by financial and freeport services. Malta is now established as an international financial centre. The container transhipment and feeder sector is also becoming a growth area for the Maltese economy. The Malta Freeport plays an important role in this activity as it is effectively positioned to act as a distribution centre in the Mediterranean. Apart from providing efficient transhipment operations to the major shipping lines, the Freeport offers warehouse facilities and other related services.

Since 1971, Malta has had an Association Agreement with the European Union which enables market access to mainland Europe. An application to join the European Union is currently under discussion.

There are also 12 international banks.

During 1998 Malta continued to establish itself as a financial international business centre. The Malta Financial Services Centre is the autonomous government authority set up in 1994 as the primary regulator of financial services.

ENERGY AND NATURAL RESOURCES

Electricity. Electricity is generated at 2 interconnected power stations located at Marsa (272 MW) and Delimara (195 MW). The primary transmission voltages are 132,000, 33,000 and 11,000 volts while the low-voltage system is 415/240V, 50Hz with neutral point earthed. Installed capacity was 405,000 kW in 1994. Production in 1994 was 1·41bn. kWh.

Oil and Gas. Intensive negotiations with AGIP led to the successful conclusion of an oil exploration agreement in an offshore area of approximately 9,000 sq. km. Onshore exploration was revived and a deep stratigraphic well is currently being drilled onshore at Gozo (1998–99). In 1998, 2 consortia received Exploration Study Agreements from Malta to investigate the possibility of offshore drilling.

Water. The Water Services Corporation manages water supply to the Maltese Islands. 1996–97: demand for water, 46·5m. cu. metres. Ground water provided 47·3% of the total water delivered to the distribution system. Desalination (Reverse Osmosis Plants) provided 52·7% of the total potable water requirements.

Agriculture. Despite the dry climate and the lack of fertile land, a wide-range of fruits and vegetables are cultivated. The two main crops are potatoes and tomatoes. The former is the country's primary export crop whilst the latter are the main input for the local canning industry. Peaches, plums, nectarines and apricots are Malta's main fruits. Sugar-melons, water-melons and strawberries are grown intensively and have significant export potential. Cereals and sulla are mainly grown for hay and straw for livestock feeding.

Malta is self-sufficient in chicken, eggs, pork and fresh milk. During 1997 export of pork was initated and it appears that there is a significant potential in such a venture. Livestock in 1996: Cattle, 21,000; sheep, 16,000; pigs, 69,000; chickens, 1m. Livestock produce accounted for 68·5% of the total value of agricultural production during 1998.

During 1998 the contribution of agriculture to GDP was estimated at Lm35·2m. or 3%. There are about 2,582 full-time farmers (1·9% of the economically active workforce).

Fisheries. In Dec. 1997 the fishing industry employed 1,699 power-propelled and 9 other fishing boats, engaging some 374 full-time and 1,442 part-time fishermen. The catch for 1997 was 887 tonnes, valued at Lm1,549,693. Production from fish farms was 1,800 tonnes. It is estimated that during 1998 the local aquaculture industry produced a total of about 2,000 tonnes of sea bass and sea bream valued at Lm4·4m. 95% of local production was harvested for export, mainly to Italy. The production forecast for the marine hatchery at the National Aquaculture Centre in 1998 is 1·1m. It is estimated that all the aquaculture industry employs about 120 full-timers and around 60 part-timers.

INDUSTRY

Besides manufacturing (food, clothing, chemicals, electrical machinery parts and electronic components and products), the mainstays of the economy are ship repair and shipbuilding, agriculture, small crafts units, tourism and the provision of other services such as the freeport facilities. The majority of state-aided manufacturing enterprises operating in Malta are foreign-owned or with foreign interests. The Malta Development Corporation is the Government agency responsible for promoting investment, while the Malta Export Trade Corporation serves as a catalyst to the export of local products.

Labour. The labour supply in Oct. 1998 was 144,583 (females, 39,847), including 37,373 in private direct production (agriculture and fisheries, 2,559; manufacturing, 29,320; oil drilling, construction and quarrying, 5,494), 45,339 in private market services, 49,745 in the public sector (including government departments, armed forces, revenue security corps, airport company, independent statutory bodies and companies with public sector majority shareholding), and 4,838 in temporary employment. There are education centres for children with special needs, but these are taught in ordinary schools if possible.

Secondary schools, trade schools and junior lyceums provide secondary education in the state sector. At the end of their primary education, pupils sit for the 11+ examination to start a secondary education course. Pupils who qualify are admitted in the junior lyceum, while the others attend secondary schools. Education, Ordinary Level. At the end of the third year of secondary education, students may opt for a course with a technology bias in a trade school, where the full course may last 6 years. KEY HISTORICAL EVENTS

A German protectorate was formed in 1886 which was occupied at the beginning of the First World War by Japan. Japan was awarded a mandate by the League of Nations in 1919. During the Second World War the Islands were occupied by Allied forces in 1944, and became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. On 21 Oct. 1986 the islands gained independence and a Compact of Free Association with the USA came into force. The UN recognized the termination of the US Trusteeship on 22 Dec. 1990, and the Islands became a full UN member state on 17 Sept. 1991.

TERRITORY AND POPULATION

The Marshall Islands lie in the North Pacific Ocean north of Kiribati and east of Micronesia, and consist of an archipelago of 31 coral atolls, 5 single islands and 1,152 islets strung out in 2 chains, eastern and western. The land area is 181 sq. km (70 sq. miles). The capital is Majuro Atoll in the eastern chain (population, 1997 estimate, 28,000). The principal atoll in the western chain is Kwajalein containing the only other town, Ebeye (population estimate, 1997, 15,000). The two archipelagic island chains of Bikini and Enewetak are former US nuclear test sites; Kwajalein is now used as a US missile test range. The islands lay claim to the US territory of Wake Island. At the census of 1988 the population was 43,380 (48% urban); 1997 estimate, 60,652; density, 335 per sq. km.

In 2000 the population is projected to be 68,000.

In 1995 some 69% of the population lived in urban areas. About 97% of the population are Marshallese, a Micronesian people.

KEY HISTORICAL EVENTS

Mauritania became a French protectorate in 1903, a colony in 1920 and an autonomous republic within the French Community on 28 Nov. 1958. It achieved full independence on 28 Nov. 1960. Under its first President, Moktar Ould Daddah, Mauritania became a one-party state in 1964.

Following a coup on 10 July 1978, power was placed in the hands of a Military Committee for National Recovery (CMRN); the constitution was suspended and the 70-member National Assembly dissolved. On 6 April 1979 the CMRN was renamed the Military Committee for National Salvation (CMSN). A coup in Jan. 1980 installed Lieut.-Col. Mohammed Haidalla in power, and under his rule slavery was finally abolished in Mauritania. In Feb. 1984 he recognized Polisario's declaration of a Sahrawi Arab Democratic Republic. He was overthrown in Dec. 1984 when his prime minister, Lieut.-Col. Maaouiya Ould Sidi Ahmed Taya, seized power.

The 1980s were characterized by territorial disputes with Morocco and Senegal. In April 1991 Taya announced a new constitution allowing for a multi-party political system, but which also gave extensive powers to the president. The proposed constitution was approved by referendum in July 1991. Taya was re-elected in Jan. 1992 but legislative elections in March were boycotted by opposition parties who accused the government of electoral fraud. Subsequent elections were dominated by President Taya and his Democratic and Socialist Republican Party.

KEY HISTORICAL EVENTS

Mauritius was known to Arab navigators probably not later than the 10th century. Malays almost certainly visited in the 15th century and it was discovered by the Portuguese between 1507 and 1512. But the Dutch were the first settlers in 1598 who named it after their stadtholder, Count Maurice. In 1710 they abandoned the island which was occupied by the French under the name of Ile de France in 1715. The British occupied the island in 1810 and it was formally ceded to Great Britain by the Treaty of Paris, 1814. The majority of the population were descendants of slaves brought by the French from Madagascar and East Africa, and indentured Indian labourers brought by Britain. European settlers unsuccessfully opposed calls for independence, and the elections in August 1967 provided an overwhelming mandate; independence was attained within the Commonwealth on 12 March 1968. Mauritius became a republic on 12 March 1992.

KEY HISTORICAL EVENTS

Mexico's history falls into four epochs: the era of the Indian empires (before 1521), the Spanish colonial phase (1521–1810), the period of national formation (1810–1910), which includes the war of independence (1810–21) and the long presidency of Porfirio Díaz (1876–80, 1884–1911), and the present period which began with the social revolution of 1910–21.

Mexico was conquered for Spain by Cortés in 1521 and became part of the viceroyalty of New Spain. The fight for independence starting in 1810 was eventually achieved in 1821. A substantial part of Mexico's territory (including the present state of California) was lost to the USA by the Mexican War of 1846–48. In the 1860s France, Britain and the USA declared war on Mexico; France invaded the country and declared Maximilian, Archduke of Austria, to be Emperor. When the French withdrew in 1867, Maximilian was executed by the Mexicans. The leader of the opposition to the French, Benito Juárez, again became president. In 1876 began the long presidency of Porfirio Diaz (1876–80, 1884–1911) who established himself as a dictator.

The latest period of Mexican history—regarded as one of social and national consolidation—began with the social revolution of 1910-21 led by Francisco Madero. The constitution of 1917 established a representative, democratic and federal republic, comprising 31 states and a federal district. There is a complete separation of legislative, executive and judicial powers. The president, who is the supreme executive authority, is directly elected for a single 6-year term. Women were enfranchised in 1958.

Despite democratic elections, the PRI (Partido Revolucionario Institucional) has been in power for 60 years; in 1982 the PRI won all 64 seats in the Senate, and in 1985, 289 of the 300 single-member seats in the Chamber of Deputies. The chief opposition party, PAN (Partido de Acción Nacional), has caused civil disturbances, claiming illegalities in the elections.

In recent years Mexico has been beset by financial crises which have taken the shine off an otherwise booming economy. In 1994–95 the government stepped in to save the banking system by buying in bad loans of up to 552bn. pesos. It is estimated that no more than 30% of the debt is ever likely to be recovered.

TERRITORY AND POPULATION

Mexico is bounded in the north by the USA, west and south by the Pacific Ocean, south-east by Guatemala, Belize and the Caribbean Sea, and north-east by the Gulf of Mexico. It comprises 1,967,183 sq. km (759,529 sq. miles), including uninhabited islands (5,073 sq. km) offshore.

Population at recent censuses: 1970, 48,225,288; 1980, 66,846,833; 1990, 81,249,645. Estimate, 1995, 91,158,290; 46,257,791 (females). 1997 est., 95·5m.; density, 49 per sq. km.

CONSTITUTION AND GOVERNMENT

A new Constitution was promulgated on 5 Feb. 1917 and has been amended from time to time. Mexico is a representative, democratic and federal republic, comprising 31 states and a federal district, each state being free and sovereign in all internal affairs, but united in a federation established according to the principles of the Fundamental Law. The head of state and supreme executive authority is the *President*, directly elected for a non-renewable 6-year term.

There is complete separation of legislative, executive and judicial powers (Art. 49). Legislative power is vested in a General Congress of 2 chambers, a *Chamber of Deputies* and a *Senate*. The Chamber of Deputies consists of 500 members directly elected for 3 years, 300 of them from single-member constituencies and 200 chosen under a system of proportional representation. In 1990 Congress voted a new Electoral Code. This establishes a body to organize elections (IFE), an electoral court (TFE) to resolve disputes, new electoral rolls and introduce a voter's registration card. Priests were enfranchised in 1991.

The Senate comprises 128 members, 4 from each state and 4 from the federal district, directly elected for 6 years. Members of both chambers are not immediately re-eligible for election. Congress sits from 1 Sept. to 31 Dec. each year; during the recess there is a permanent committee of 15 deputies and 14 senators appointed by the respective chambers.

Other private farmers may not own more than 100 ha of irrigated land or an equivalent in unirrigated land. There is a theoretical legal minimum of 10 ha for holdings, but some 60% of private farms were less than 5 ha in 1990. Laws abolishing the *ejido* system were passed in 1992.

Trade Unions. The Mexican Labour Congress (CTM) is incorporated into the Institutional Revolutionary Party, and is an umbrella organization numbering some 5m. An agreement, 'Alliance for Economic Recovery', was reached in Nov. 1995 between the government, trade unions and business, providing for an increase in the minimum wage of 10·1%, increased unemployment benefits, tax incentives, the staggering of price increases, and a commitment to reduce public spending. Capital: Palikir
Population estimate, 2000: 122,000
Estimated GDP: $205m.

KEY HISTORICAL EVENTS

Spain acquired sovereignty over the Caroline Islands in 1886, but sold the archipelago to Germany in 1899. Japan occupied the Islands at the beginning of the First World War, and in 1921 they were mandated to Japan by the League of Nations. Captured by Allied Forces in the Second World War in 1944, the Islands became part of the UN Trust Territory of the Pacific Islands created on 18 July 1947 and administered by the USA. The Federated States of Micronesia came into being on 10 May 1979 comprising all of the Caroline Islands except the Belau (Palau) group. Its trusteeship was terminated on 3 Nov. 1986 by the UN Security Council and on the same day it entered into a 15-year Free Association with the USA. The UN recognized the termination of the Trusteeship Agreement on 22 Dec. 1990, and Micronesia became a full UN member state on 17 Sept. 1991.

MOLDOVA

Republica Moldova

Capital: Chişinau
Population estimate, 2000: 4·46m.
GNP per capita: (PPP$) 1,440
HDI/world rank: 0·610/113

KEY HISTORICAL EVENTS

The Moldavian SSR (in 1990 renamed Moldova) was formed by the union of part of the former Moldavian ASSR (organized 12 Oct. 1924), formerly included in the Ukrainian SSR, and the areas of Bessarabia (ceded by Romania to the USSR, 28 June 1940) with a mainly Moldovan population. As from 2 Aug. 1940 the Moldavian SSR included the following regions of the former Moldavian ASSR: Grigoriopol, Dubasari, Camenca, Rybnitsa, Slobozia and Tiraspol, and the following districts of Bessarabia: Beltsi, Bender (Tighina), Chişinau (*then* Kishinev), Cahul, Orhey and Soroca. In Dec. 1991 Moldova became a member of the CIS, a decision ratified by parliament in April 1994. Fighting took place in 1992 between government forces and separatists in the (largely Russian and Ukrainian) area east of the River Nistru (Transnistria).

An agreement signed by the presidents of Moldova and Russia on 21 July 1992 brought to an end the armed conflict and established a 'security zone' controlled by the 'peace-keeping forces' formed by military from Russia, Moldova and Transnistria. On 21 Oct. 1994, a Moldo-Russian agreement was signed in compliance with which the Russian Federation was obliged to withdraw its troops (former 14th Soviet army) from the territory of Moldova over 3 years but the agreement was not ratified by the State Russian Duma. On 8 May 1997, an agreement between Transnistria and the Moldovan government to end the separatist conflict was signed in Moscow, brokered by the presidents of Russia and Ukraine, and stipulated that Transnistria would remain part of Moldova as it was territorially constituted in Jan. 1990. In 1997 some 7,000 Russian troops were stationed in Transnistria.

TERRITORY AND POPULATION

Moldova is bounded in the east and south by Ukraine and on the west by Romania. The area is 33,700 sq. km (13,000 sq. miles). In Jan. 1994 the population was 4,353,000 (52·3% female).

The UN gives a projected population for 2000 of 4·46m.

In 1995 an estimated 51·6% of the population lived in urban areas. The 1989 census population was 4,335,360, of whom Moldovans accounted for 64·5%, Ukrainians 13·9%, Russians 13%, Gagauzi 3·5%, Bulgarians 2% and Jews 1·5%.

Apart from Chişinau, the capital (0·7m. population in 1994), larger towns are Tiraspol (186,000), Beltsy (161,000) and Bender (133,000). The official Moldovan language (i.e. Romanian) was written in Cyrillic prior to the restoration of the Roman alphabet in 1989. It is spoken by 75% of the population; the use of other languages (Russian, Gagauz) is safeguarded by the Constitution.

KEY HISTORICAL EVENTS

Temujin became khan of Hamag Mongolia in 1190. Having united by conquest various Tatar and Mongolian tribes he was confirmed as 'Universal' ('Genghis', 'Chingiz') khan in 1206. The expansionist impulse of his nomadic empire (Beijing captured in 1215; Samarkand in 1220) continued after his death in 1227, although the empire was by then administratively divided among his sons. Tamurlaine (died 1405) was the last of the conquering khans. In 1368 the Chinese drove the Mongols from Beijing, and for the next 2 centuries Sino-Mongolian relations alternated between war and trade. Lamaism spread from Tibet in the 16th century. The last Mongol khan, Ligden (1604-34), failed to stem the tide of Manchu expansion; southern (Inner) Mongolia was conquered in 1636 and Beijing in 1644. In 1691 Outer Mongolia accepted Manchu rule. The head of the Lamaist faith became the symbol of national identity, and his seat ('Urga', now Ulan Bator) was made the Mongolian capital.

When the Manchu dynasty was overthrown in 1911 Outer Mongolia declared its independence under its spiritual ruler and turned to Russia for support against China. 'Autonomy' (not independence) was agreed by the Sino-Russo-Mongolian agreement of May 1915. In 1919 China re-established central rule, but Soviet and Mongolian revolutionary forces set up a provisional government in March 1921. On the death of the spiritual ruler (the 'Urga Living Buddha') a people's republic and new constitution were proclaimed in May 1924.

With Soviet help Japanese invaders were fended off during the Second World War. The Mongols then took part in the successful Soviet campaign against Inner Mongolia and Manchuria. On 5 Jan. 1946 China recognized the independence of Outer Mongolia after a plebiscite in Mongolia (20 Oct. 1945) had resulted in an overwhelming vote for independence. A Sino-Soviet treaty of 14 Feb. 1950 guaranteed this independence. In Aug. 1986 a consular agreement, in June 1987 a boundary agreement, and in Nov. 1988 a border treaty, were signed with China.

Until 1990 sole power was in the hands of the Mongolian People's Revolutionary (Communist) Party (MPRP), but an opposition Mongolian Democratic Party, founded in Dec. 1989, achieved tacit recognition and held its first congress in Feb. 1990. Following demonstrations and hunger-strikes, on 12 March the entire MPRP Politburo resigned and political opposition was legalized. On 24 July 1998 parliament voted to oust the three-month-old government of Tsakhiagiin Elbegdorj in a row over bank privatization.

KEY HISTORICAL EVENTS

The native people of Morocco are the Berbers, an ancient race who have seen their country invaded by a succession of foreign powers. In the 12th century BC the first of these invaders were the Phoenicians who established trading posts at several points along the North African coast. The Carthaginians later took over these Phoenician colonies and expanded them as part of the mighty Carthaginian Empire. When the city of Carthage fell to Rome in the second century BC, the African Mediterranean coast was under Roman dominance for almost six hundred years. When the Roman Empire in turn fell into decline, the area was invaded first by the Vandals in AD 429 and later by Byzantium in AD 533. An Arab invasion of Morocco in AD 682 marked the end of Byzantium dominance and the first Arab rulers, the Idrisid dynasty, ruled for 150 years.

Arab and Berber dynasties succeeded the Idrisids; notably the Almoravids (1062–1147) and the Almohads (1147–1258). The Almohad Empire declined after the defeat of the Moroccans by the Spanish at the Battle of Las Navas de Tolosa in 1212. By 1250 its power had completely collapsed and the country was plunged into bitter civil war between Arab and Berber factions. The reign of Ahmed I al-Man-sur in the first Sharifian dynasty stabilized and unified the country between 1579 and 1603. Moors and Jews expelled from Spain settled in Morocco during this time and the country flourished and prospered. It became a centre for the arts and this period was known as Morocco's golden age.

Portuguese and Spanish power had been growing in the Mediterranean region since the beginning of the 15th century and in 1415 the Moroccan port of Ceuta was captured by Portugal. Moroccan forces defeated the Portuguese in 1578 and by 1700 had regained control of many coastal towns which had previously been in Portuguese hands. During the 18th and early 19th centuries the Barbary Coast became the scene of widespread piracy. Ships which traded in the Mediterranean were plundered and protection money was extorted from several sea-going nations.

Morocco shared possession of the Straits of Gibraltar with Spain, resulting in a focus of attention from the maritime powers in Europe, particularly France and Britain. By the beginning of the 20th century Britain had recognized Morocco as a French sphere of influence and in 1904 Morocco was divided between France and Spain, with the former receiving the larger area. These arrangements were regarded as spurious by Imperial Germany and, despite the Act of Algeciras (an agreement signed by the major powers in 1906, which guaranteed equal economic rights in Morocco), Germany was still dissatisfied.

In 1911, a German gunboat was dispatched to the Moroccan port of Agadir, in an attempt to excite further nationalist unrest against the French. From 1912 to 1956 Morocco was divided into three areas: a French protectorate, established by the Treaty of Fez of 1912 concluded between France and the Sultan; a Spanish protectorate, established by the Franco-Spanish Convention of 1912; and the international zone of Tangier which was established by France, Great Britain and Spain in 1923. Gen. Lyautey, the first French resident-general, was responsible for much modernization and by 1934 had pacified the country. However, as tribesmen were defeated so nationalism in various forms developed. On 2 March 1956 France and the Sultan terminated the Treaty of Fez and on 7 April 1956 Spain relinquished her protectorate. On 29 Oct. 1956 the international status of the Tangier Zone was abolished by common consent and Morocco became a kingdom on 18 Aug. 1957, with the Sultan taking the title Mohammed V. The country became territorially complete when the northern strip of Spanish Sahara was ceded by Spain on 10 April 1958 and the former Spanish province of Ifni was returned to Morocco on 30 June 1969.

Crown Prince Moulay Hassan succeeded his father on 3 March 1961 as Hassan II. King Hassan tried to combine the various parties in government and established an elected House of Representatives but political unrest led him to discard any attempt at a parliamentary government and to rule autocratically from 1965 to 1977. In 1977 a new Chamber of Representatives was elected and under the constitution Morocco became a constitutional monarchy with a single elected chamber.

In 1974 Morocco embarked on a campaign aimed at forcing Spain to withdraw from the Western region of the Sahara, an area rich in phosphates. The International Court of Justice, meeting in The Hague in 1975, rejected Morocco's claim for full sovereignty over the region. Morocco ignored this decision and resolved to continue the fight alone, organizing a massive demonstration known as the Green March. Spain entered into secret negotiations and a deal was struck, whereby the region was divided into three and administered by Morocco, Spain and Mauritania. The Polisaro front, a Saharan nationalist movement, hotly disputed Morocco's right to the territory and guerrilla fighting ensued. In 1978 the Polisaro Front succeeded in forcing Mauritania to relinquish its Saharan interests, but was unable to do the same with Morocco. The United Nations has continued to mediate in this dispute but the proposed referendum on independence has been repeatedly delayed. Currently the dispute is over voting rights.

Morocco is bounded by Algeria to the east and south-east, Mauritania to the south, the Atlantic Ocean to the north-west and the Mediterranean to the north. Excluding the Western Saharan territory claimed and retrieved since 1976 by Morocco, the area is 458,730 sq. km and population at the 1982 census was 20,255,687. Western Sahara had an area of 252,120 sq. km and 163,868 population. The Moroccan superficie is 710,850 sq. km. Population estimate, 1995, 28·3m (51·9% urban); density, 61·7 per sq. km.

WESTERN SAHARA

The Western Sahara was designated by The United Nations in 1975, its borders having been marked as a result of agreements made between France, Spain and Morocco in 1900, 1904 and 1912. Sovereignty of the territory is in dispute between Morocco and the Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which formally proclaimed a government-in-exile of the Sahrawi Arab Democratic Republic (SADR) in Feb. 1976.

Area 266,769 sq. km (102,680 sq. miles). Around 230,000 inhabitants (estimate July1997) are within Moroccan jurisdiction. Another estimated 196,000 Saharawis live in refugee camps around Tindouf in south-west Algeria. The main towns (1982 census) are El-Aaiún, the capital (96,784), Dakhla (17,822) and Es-Semara (17,753).

Life expectancy at birth (1997 est.) male, 46·7 years; female, 50·0 years. Birth rate (1997 est.) per 1,000 population: 46·1; death rate: 17·5. The projected population for 2000 is 245,000.

The population is Arabic-speaking, and almost entirely Sunni Moslem.

President: Mohammed Abdelaziz.
Prime Minister: Mahfoud Ali Larous Beiba.

Rich phosphate deposits were discovered in 1963 at Bu Craa. Morocco holds 65% of the shares of the former Spanish state-controlled company. Production reached 5·6m. tonnes in 1975, but exploitation has been severely reduced by guerrilla activity. After a nearly complete collapse, production and transportation of phosphate resumed in 1978, ceased again, and then resumed in 1982. Installed electrical capacity was 56,000 kW in 1995, with production of 85m. kWh in 1995. There are about 6,100 km of motorable tracks, but only about 500 km of paved roads. There are airports at El-Aaiún and Dakhla. As most of the land is desert, less than 19% is in agricultural use, with about 2,000 tonnes of grain produced annually. In 1989 there were 27 primary schools with 14,794 pupils and 18 secondary schools with 9,218 pupils.

The treaty provided for all weapons to be handed over to the UN and all armed groups to be disbanded within 6 months. KEY HISTORICAL EVENTS

In 1785 the Alaugpaya dynasty of Burma conquered Arakan in the south-west. Arakanese refugees fled into India in large numbers and turned Chittagong into a base for guerrilla raids on Burma, thus provoking reprisal raids into India by Burmese forces.

This was followed by Burma's invasions of the kingdom of Assam. The British East India Company then took action in defence of its Indian interests and in 1826 finally drove the Burmese out of India and annexed territory in south Burma. The kingdom of Upper Burma, ruled from Mandalay in the north, remained independent. A second war with Britain in 1852 ended with the British annexation of the Irrawaddy Delta.

In 1862 and 1867 trade treaties were concluded with Upper Burma. However, in 1885 the British invaded, deposed the king and occupied Upper Burma. In 1886 all Burma became a province of the Indian empire. The Chin tribes of the Burmese-Indian borderlands were subdued in 1889-90. The Indian system of administration was not suitable for the country and exacerbated resentment at imperial economic policies and Britain's refusal to support Buddhism as the state religion. There were violent uprisings in the 1930s and in 1937 Burma was separated from India and some degree of self-government was introduced.

Following the Japanese invasion and occupation of 1942-45, Britain and Burma began to negotiate the establishment of independence, which was achieved in 1948 with the creation of the Union of Burma, an independent republic outside the Commonwealth. The president was Sao Shwe Thaike.

In 1958 there was an army *coup*, and another in 1962 led by Gen. Ne Win, who installed a Revolutionary Council and dissolved parliament. The Council lasted until March 1974 when the country become a one-party socialist republic, a new constitution having been approved by referendum in Dec. 1973. The name was changed to Socialist Republic of the Union of Burma. U Ne Win became president, serving until 1982, when he was succeeded by U San Yu. On 18 Sept. 1988, the Armed Forces seized power and set up the State Law and Order Restoration Council (SLORC). On 19 June 1989 the government changed the official name of the country in English to the Union of Myanmar.

The military junta did not accept the outcome of the 1990 general election, and the leader of the party which won the elections, Aung San Suu Kyi, was under house arrest from July 1989 to July 1995. She is still under restraint, and many of her followers, friends and relations have been arrested. She was awarded the Nobel Peace Prize in 1991.

In Aug. 1998 the National League for Democracy under Aung San Suu Kyi's leadership declared that it would convene a 'people's parliament' of all representatives who were elected at the 1990 election. The opposition maintains a high profile with mainly student-led anti-government demonstrations.

CONSTITUTION AND GOVERNMENT

Following elections in May 1990, the ruling State Law and Order Restoration Council (SLORC) said it would hand over power after the People's Assembly had agreed on a new constitution, but in July 1990 it stipulated that any such constitution must conform to guidelines which it would itself prescribe.

In May 1991, 48 members of the National League for Democracy (NLD) were given prison sentences on charges of treason. In July 1991 opposition members of the People's Assembly were unseated for alleged offences ranging from treason to illicit foreign exchange dealing. Such members, and unsuccessful candidates in the May 1990 elections, are forbidden to stand in future elections.

On 28 Nov. 1995 the government re-opened a 706-member Constitutional Convention in which the NLD was given 107 places. The NLD withdrew on 29 Nov.

In Nov. 1997 the country's ruling generals changed the name of the government to the State Peace and Development Council (SPDC), and reshuffled the cabinet. In Dec. 1997, following a period when the national currency fell to a record low, there were further changes to the cabinet, while corruption investigations were begun against some former ministers.

KEY HISTORICAL EVENTS

Namibia's first inhabitants were the Bushmen (Sands). Around 1300 the Namas and the Damaras came from the north pushing the Bushmen towards the Kalahari Desert. Around 1500 the Owambos settled on the high plateau and in the Okavongo delta. Around 1600 Herero herdsmen arrived from the north.

German migration accelerated from 1850 onwards. In 1884 South West Africa was declared a German protectorate. Germany then introduced racial segregation and the exploitation of the diamond mines began. In 1915 the Union of South Africa occupied German South West Africa at the request of the Allied powers. On 17 Dec. 1920 the League of Nations entrusted South West Africa as a Mandate to the Union of South Africa, to be administered under the laws of the mandatory power. After World War II South Africa refused to place the territory under the UN Trusteeship system, and formally applied for its annexation to the Union. In Oct. 1966 the General Assembly of the UN terminated South Africa's mandate and established a UN Council for South West Africa in May 1967. However, South Africa continued to administer the territory in defiance of various UN resolutions. In June 1968 the UN changed the name of the territory to Namibia. In 1971 the International Court of Justice ruled in an advisory opinion that South Africa's presence in Namibia was illegal. In Dec. 1973 the UN appointed a UN Commissioner for Namibia.

After negotiations between South Africa and the UN, a multi-racial Advisory Council was appointed in 1973. Representatives of all the population groups assembled in Windhoek for the Constitutional Conference which in Aug. 1976 resolved that a multi-racial interim government be formed by early 1977 and that the country should become independent by 31 Dec. 1978. This resolution was rejected by the UK, the USA, the Federal Republic of Germany, France and Canada, after which South Africa agreed to universal suffrage elections. The Administrator-General appointed in Sept. 1977 to govern the territory until independence, moved to abolish all laws based on racial discrimination—a precondition for elections. In April 1978 South Africa accepted a plan for UN-supervised elections leading to independence which was endorsed in UN Security Council Resolution 435 of 27 July 1978. After the final plans for the UN-supervised elections were published, South Africa announced on 20 Sept. 1978 that it was going ahead with internally sponsored elections for a Constituent Assembly. In the elections held on 4–8 Dec. 1978 the Democratic Turnhalle Alliance (DTA) gained 41 of the 50 seats in a percentage poll of 82%, in spite of the fact that the South West Africa People's Organization (SWAPO) instructed its members not to take part in the elections.

A 12-member Ministers' Council was instituted and in Sept. 1981 it was enlarged to 15 members and given executive authority on all matters except constitutional issues, security and foreign affairs. On 11-13 Nov. 1980 elections were held for the second-tier Representative Authorities, each controlling certain administrative functions for a specific ethnic group but not for any particular geographical area. In Jan. 1983 the Ministers' Council and the National Assembly were dissolved and executive and legislative powers reverted to the Administrator-General.

In Sept. 1983 the Multi-Party Conference (MPC) of internal parties was formed. In May 1984 talks were held in Lusaka between the MPC and SWAPO. SWAPO refused to take part in further constitutional talks with the MPC. The MPC then petitioned South Africa for a form of self-government for Namibia, and on 17 June 1985 the Transitional Government of National Unit was installed. Negotiations began again in May and July 1988 between Angola, Cuba and South Africa. A peaceful settlement was agreed and the Geneva Protocol was signed on 5 Aug. 1988. In Dec. it was agreed that Cuban troops should withdraw from Angola and South African troops from Namibia by 1 April 1989. The Transitional Government of

National Unity resigned on 28 Feb. 1988 to make provision for the implementation of UN Security Council Resolution 435. The UN Transition Assistance Group (UNTAG) supervised elections for the constituent assembly in Nov. 1989. Independence was achieved on 21 March 1990. In 1998, around a quarter of the Namibian army was sent to support the beleaguered government of the Democratic Republic of Congo. A secessionist plot in Caprivi was uncovered in 1998 and, as a result, over 700 people fled into neighbouring Botswana.

TERRITORY AND POPULATION

Namibia is bounded in the north by Angola and Zambia, west by the Atlantic Ocean, south and south-east by South Africa and east by Botswana. The Caprivi Strip (Caprivi Region), about 300 km long, extends eastwards up to the Zambezi river, projecting into Zambia and Botswana and touching Zimbabwe. The area, including the Caprivi Strip and Walvis Bay, is 824,269 sq. km. South Africa transferred Walvis Bay to Namibian jurisdiction on 1 March 1994. Census population, 1991, 1,401,711 (720,784 females; urban, 32·76%). Estimate, 1996, 1,677,200; density, 2 per sq. km.

INTERNATIONAL RELATIONS

Namibia is a member of the UN, Commonwealth, SADC and OAU.

ECONOMY

The Namibian economy is heavily dependent on mining and fisheries.

Policy. The National Development Plan aims for annual average growth of 5% up to 2000.

Performance. Real GDP growth was 3% in 1996 and was expected to be around 2% in 1998.

Budget. The financial year runs from 1 April. In 1996-97 revenue was N$4,489m. and expenditure, N$5,073m. Tax revenue totalled N$3,988m.; re-current expenditure was N$4,099m.

Currency. The unit of currency is the *Namibia dollar* (NAD) of 100 *cents*, introduced on 14 Sept. 1993 and pegged to the South African rand. The rand is also legal tender at parity. The average annual inflation rate over the period 1990–96 was 9·6%. In Feb. 1998 foreign exchange reserves were US$285m. Total money supply in Feb. 1998 was N$3,053m.

Banking and Finance. The Bank of Namibia is the central bank. Its *Governor* is Tom Alweendo. Commercial banks include First National Bank of Namibia, Namibia Banking Corporation, Standard Bank Namibia, Commercial Bank of Namibia, Bank Windhoek (the only locally-owned bank) and City Savings and Investment Bank. There is a state-owned Agricultural Bank. Total assets of commercial banks were R2,383·2m. at 31 Dec. 1991.

There are 2 building societies with total assets (31 March 1990) R424·9m. A Post Office Savings Bank was established in 1916. In March 1991 its total assets were R21·8m. A stock exchange (NSE) is in operation.

ENERGY AND NATURAL RESOURCES

Electricity. Namibia imports electricity from South Africa. Consumption per capita in 1995 was 584 kWh.

Water. The 12 most important dams have a total capacity of 589·2m. cu. metres. The Kunene, the Okavango, the Zambezi, the Kwando or Mashi and the Orange River are the only permanently running rivers but water can generally be obtained by sinking shallow wells. Except for a few springs, mostly hot, there is no surface water.

Minerals. There are diamond deposits off the coast, which produce a third of diamond production. Namibia produces 1·3m. carats per year, accounting for around 8% of world diamond production. 1996 output (in tonnes): Uranium oxide, 2,886; copper, 25,000; lead, 67,760; zinc, 64,600; silver, 69,200 kg; gold, 2,205 kg; diamonds, 1,420,000 carats.

Agriculture. Agriculture accounted for 14% of GDP in 1996. Namibia is essentially a stock-raising country, the scarcity of water and poor rainfall rendering crop-farming, except in the northern and north-eastern parts, almost impossible. Generally speaking, the southern half is suited for the raising of small stock, while the central and northern parts are more suited for cattle. In 1994 there were 660,000 ha of arable land, 2,000 ha of permanent cropland and 38m. ha of pasture. Guano is harvested from the coast, converted into fertilizer in South Africa and most of it exported to Europe. In 1995, 45% of the active labour force worked in the agricultural sector, and 45% of the population was dependent on agriculture.

Livestock (1996): 2·2m. cattle, 3·3m. sheep, 2m. goats.

In 1996, 13m. litres of milk were produced. Principal crops (1994 in tonnes): Wheat, 6,400; maize, 38,500; sunflower seed, 845; sorghum (1990), 8,000; vegetables (1990), 32,000.

Forestry. Forests covered 12·37m. ha in 1995, or 15% of the land area, down from 12·58m. ha in 1990.

Fisheries. Pilchards, mackerel and hake are the principal fish caught. Since 1993 there has been a dearth of fish. The catch in 1995 was 285,980 tonnes (330,026 tonnes in 1993), almost entirely from marine waters. Conservation policies are in place. The policy aims at ensuring that the country's fisheries resources are utilized on a sustainable basis and also aims to ensure their lasting contribution to the country's economy.

INDUSTRY

Manufacturing contributed 12% of GDP in 1996. Of the estimated total of 400 undertakings, the most important branches are food production (accounting for 29·3% of total output), metals (12·7%) and wooden products (7%). The supply of specialized equipment to the mining industry, the assembly of goods from predominantly imported materials and the manufacture of metal products and construction material play an important part. Small industries, including home industries, textile mills, leather and steel goods, have expanded. Products manufactured locally include chocolates, beer, cement, leather shoes and delicatessen meats and game meat products.

Labour. In 1996 the labour force totalled 650,000 (59% males). Nearly half the economically active population in 1991 were engaged in agriculture, fisheries and forestry. Around 20% of the workforce was unemployed in 1991. The main employers were government services, agriculture and mining.

INTERNATIONAL TRADE

Total foreign debt was US$140m. in 1996. Export Processing Zones were established in 1995 to grant companies with EPZ status some tax exemptions and other incentives. The Offshore Development Company (ODC) is the flagship of the Export Processing Zone regime. The EPZ regime does not restrict; any investor (local or foreign) enjoys the same or equal advantages in engaging themselves in any choice of business (allowed by law).

Imports and Exports. KEY HISTORICAL EVENTS

Nepal is an independent Himalayan Kingdom located between India and the Tibetan region of China. For centuries, the history of Nepal was the struggle of rival chiefs for the consolidation of the surrounding area into a unified kingdom and its role as an asylum for refugees from the plains of India. Buddhism was introduced in about 639 AD.

From the 8th to the 11th centuries, many Buddhists fled to Nepal from India, which had been invaded by Muslims. In the 18th century Nepal was a collection of small principalities (many of Rajput origin) and the three kingdoms of the Malla dynasty: Káthmandu, Pátan and Bhádgaon. In central Nepal lay the principality of Gurkha (or Gorkha); its ruler after 1742 was Prithvi Náráyan Sháh, who conquered the small states which were his neighbours. Fearing his ambitions, in 1767 the Mallas brought in forces lent by the British East India Company to keep him in check. In 1769, these forces were withdrawn and Gurkha was then able to conquer the Malla kingdoms and unite Nepal as one state with its capital at Káthmandu. Prithvi Náráyan also enlarged Nepal by annexing Sikkim and the Tarai, Kumáon, Garhwál and Simla areas of India. He died in 1775 and his successors were beset by internal rivalry. Most of the Indian annexations were lost to the British.

In 1846, the Ráná family became the effective rulers of Nepal, establishing the office of prime minister as hereditary. In 1860, Nepal reached agreement with the British in India whereby Nepali independence was preserved and the recruitment of Gurkhas to the British army was sanctioned.

In 1950, the Sháh royal family allied itself with Nepalis abroad to end the power of the Ránás. The last Ráná prime minister resigned in Nov. 1951, the king having proclaimed a constitutional monarchy in Feb. 1951. A new constitution, approved in 1959, led to confrontation between the king and his ministers; it was replaced by one less liberal in 1962. King Mahendra died in Jan. 1972 and was succeeded by his son Birendra Bir Bikram Sháh Dev. Following pro-democracy demonstrations, on 16 April 1990 when 45 people died, King Birendra dismissed the government and proclaimed the abolition of the *panchayat* system of nominated councils but continuing pressure from pro-democracy activists persuaded the King to concede a new constitution. In Nov. 1990 he relinquished his absolute power. A general election held the following year was won by the Nepali Congress Party. The present government is a coalition led by the United Marxist-Leninist Party. Nepal remains one of the poorest countries but a five-year plan encompasses economic reform with the hope of ending illiteracy among the young by 2005.

TERRITORY AND POPULATION

Nepal is bounded in the north by China (Tibet) and the east, south and west by India. Area 140,800 sq. km; population (estimate, July 1997), 23,107,000, giving a density of 164 per sq. km; (census, 1991) 18,462,081 (9,241,167 females; 9·6% urban). By 1995 the urban population had risen to 10·3%.

INTERNATIONAL RELATIONS

ECONOMY

Policy. Since May 1991 the government has been moving forward with economic reforms, particularly those that encourage trade and foreign investment, e.g., by eliminating business licenses and registration requirements in order to simplify investment procedures. The government has also been cutting public expenditures by reducing subsidies, privatizing state industries, and laying off civil servants. Prospects for foreign trade and investment, particularly in areas other than power development and tourism, are limited by the small size of the economy, its remoteness and its susceptibility to natural disaster. The international community provides funding for 62% of Nepal's developmental budget and for 34% of total budgetary expenditures. Industrial activity is limited, mainly involving the processing of agricultural produce (jute, sugarcane, tobacco, and grain). Production of textiles and carpets has expanded recently and accounts for 85% of foreign exchange earnings. Apart from agricultural land and forests, exploitable natural resources are mica, hydropower and tourism. Agricultural production in the late 1980s grew by about 5%, compared to annual population growth of 2·6%.

Performance. Real GDP growth was 5·8% in 1995 (7·1% in 1994).

KEY HISTORICAL EVENTS

As the German Count of Nassau, William of Orange (1533–84) inherited vast possessions in the Netherlands and the Princedom of Orange in France. He was the initiator of the struggle for independence from Spain. The Revolt of the Netherlands began in 1568, and by the Union of Utrecht the more easily defensible seven provinces of the North—Holland, Zeeland, Utrecht, Overijssel, Groningen, Drenthe and Friesland—declared themselves independent. At the end of the Thirty Years War , by the Treaty of Westphalia (1648), Spain recognized the Republic of the United Netherlands. Members of the Orange-Nassau family became in succession the 'first servant of the Republic' with the title of 'Stadhouder' (governor). In 1689 Willem III acceded to the throne of England, becoming joint sovereign with his wife Mary. Willem III died in 1702 without issue, and there was no stadhouder until a member of the Frisian branch of Orange–Nassau was nominated hereditary stadhouder in 1747. However, his successor, Willem V, had to take refuge in England in 1795 when the French Army invaded. The country was freed from French domination in Nov. 1813.

The Congress of Vienna (1815) joined the Belgian provinces, called the 'Spanish' or the 'Austrian Netherlands' before the French Revolution, to the Northern Netherlands. The son of the former stadhouder, Willem V, was proclaimed King of the Netherlands as King Willem I on 16 March 1815. The union was dissolved by the Belgian revolution of 1830, and in 1839 Belgium and the Netherlands were recognized as two separate independent kingdoms.

In 1840 Willem I abdicated in favour of his son, Willem II, who was liberal in his outlook and who moved the Netherlands towards a constitutional monarchy, developing ministerial responsibility and electoral equality among direct tax payers. Willem II was succeeded by Willem III in 1849 under whom the liberal development continued. In 1890 Wilhelmina, the first of three successive queens, ascended the throne (the Netherlands is a hereditary monarchy with the succession in the direct male or female line in the order of primogeniture).

The Netherlands followed a policy of non-participation in the European conflicts of the early 20th century and during the First World War remained neutral. In the Second World War, however, the Netherlands was occupied by Germany from 1940 until 1945. After liberation in 1945, the country abandoned its traditional policy of neutrality. In 1948 the Netherlands joined with Belgium and Luxembourg to form the Benelux economic union; in 1957 it was a founder member of the EEC, and in 1949 joined NATO.

Since the Second World War the Netherlands has granted independence to her overseas possessions of Indonesia (in 1949 after much fighting) and Suriname (in 1975), leaving the Netherlands Antilles and Aruba as the only remaining Dutch dependencies.

In April 1980 Queen Juliana, who had reigned since 1948, abdicated in favour of her daughter Beatrix.

TERRITORY AND POPULATION

The Netherlands is bounded in the north and west by the North Sea, south by Belgium and east by Germany. The area (1997) is 41,526 sq. km, of which 33,889 sq. km is land. Projects of sea-flood control and land reclamation (polders) by the construction of dams and drainage schemes have continued since 1920.

The population was 13,060,115 at the census of 1971 and estimated to be 15·6m. in 1997. Population growth in 1996, 0·45%.

The UN gives a projected population for 2000 of 15·87m.

On-going 'rolling' censuses have replaced the former decennial counts.

CONSTITUTION AND GOVERNMENT

According to the Constitution (promulgated 1814; last revision, 1983), the Kingdom consists of the Netherlands, Aruba and the Netherlands Antilles. Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec. 1954. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The Netherlands is a constitutional and hereditary monarchy.

The reigning Queen is **Beatrix Wilhelmina Armgard,** born 31 Jan. 1938, daughter of Queen Juliana and Prince Bernhard; married to Claus von Amsberg on 10 March 1966; succeeded to the crown on 1 May 1980, on the abdication of her mother. *Offspring:* Prince Willem-Alexander, born 27 April 1967; Prince Johan Friso, born 25 Sept. 1968; Prince Constantijn, born 11 Oct. 1969.

The Queen receives an allowance from the civil list. This was 6·3m. guilders in 1992; that of Prince Claus was 1·2m. guilders and that of Crown Prince Willem Alexander, 1·5m. guilders.

Mother of the Queen: Queen Juliana Louise Emma Marie Wilhelmina, born 30 April 1909, daughter of Queen Wilhelmina (born 31 Aug. 1880, died 28 Nov. 1962) and Prince Henry of Mecklenburg-Schwerin (born 19 April 1876, died 3 July 1934); married to Prince Bernhard Leopold Frederik Everhard Julius Coert Karel Godfried Pieter of Lippe-Biesterfeld (born 29 June 1911) on 7 Jan. 1937. Abdicated in favour of her daughter, the Reigning Queen, on 30 April 1980.

Sisters of the Queen: Princess Irene Emma Elisabeth, born 5 Aug. 1939, married to Prince Charles Hugues de Bourbon-Parma on 29 April 1964, divorced 1981 (*sons:* Prince Carlos Javier Bernardo, born 27 Jan. 1970; Prince Jaime Bernardo, born 13 Oct. 1972; *daughters:* Princess Margarita Maria Beatriz, born 13 Oct. 1972; Princess Maria Carolina Christina, born 23 June 1974); Princess Margriet Francisca, born in Ottawa, 19 Jan. 1943, married to Pieter van Vollenhoven on 10 Jan. 1967 (*sons:* Prince Maurits, born 17 April 1968; Prince Bernhard, born 25 Dec. 1969; Prince Pieter-Christiaan, born 22 March 1972; Prince Floris, born 10 April 1975); Princess Maria Christina, born 18 Feb. 1947, married to Jorge Guillermo on 28 June 1975 (*sons:* Bernardo, born 17 June 1977; Nicolas, born 6 July 1979; *daughter:* Juliana, born 8 Oct. 1981).

The royal succession is in the direct female or male line in order of birth.

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament (the *States-General*), consisting of 2 Chambers. The upper *First Chamber* is composed of 75 members, elected by the members of the Provincial States (*see* Local Government, *below*). The 150-member *Second Chamber* is directly elected by proportional representation for 4-year terms. Members of the States-General must be Netherlands subjects of 18 years of age or over.

The *Council of State*, appointed by the Crown, is composed of a vice-president and not more than 28 members. The monarch is president, but the day-to-day

running of the Council is in the hands of the vice-president. The Council has to be consulted on all legislative matters.

The Hague is the seat of the Court, Government and Parliament; Amsterdam is the capital.

The Sovereign has the power to dissolve either Chambers, subject to the condition that new elections take place within 40 days, and the new Chamber be convoked within 3 months.

Both the Government and the Second Chamber may propose Bills; the First Chamber can only approve or reject them without inserting amendments. The meetings of both Chambers are public, though each of them may by a majority vote decide on a secret session. A Minister or Secretary of State cannot be a member of Parliament at the same time.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the overseas part of the kingdom, Aruba and the Netherlands Antilles.

Local Government. The kingdom is divided into 12 provinces and 636 municipalities.

Each province has its own representative body, the Provincial States. The members must be 21 years of age or over; they are directly elected for 4 years. The electoral

register is the same as for the Second Chamber. Membership varies according to the population of the province. The Provincial States are entitled to issue ordinances concerning the welfare of the province, and to raise taxes pursuant to legal provisions. The provincial budgets and the provincial ordinances and resolutions relating to provincial property, loans, taxes, etc., must be approved by the Crown. The members of the Provincial States elect the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputy States', is charged with the executive power and, if required, with the enforcement of the law in the province. Deputy as well as Provincial States are presided over by a Commissioner of the Queen, appointed by the Crown, who in the former assembly has a deciding vote, but attends the latter in only a deliberative capacity. He is the chief magistrate in the province. Elections to the Provincial States were held in March 1995; turn-out was 50%. VVD gained 27·2% of all votes cast; CDA, 22·9%; PvdA, 17%; D66, 9·2%.

Each municipality is governed by a Municipal Council, directly elected by residents who are 18 years of age or over, for 4 years. All Netherlands inhabitants and non-Netherlands inhabitants aged 21 or over who meet certain requirements are eligible to stand, the number of members varying according to the population. The Municipal Council may issue by-laws and levy taxes pursuant to legal provisions; these must be approved by the Crown. The Municipal Budget and resolutions to alienate municipal property require the approbation of the Deputy States of the province. The Council meets in public as often as may be necessary, and is presided over by a Burgomaster, appointed by the Crown. The day-to-day administration is carried out by the Burgomaster and Aldermen, elected by and from the Council; this body is also charged with the enforcement of the law. In maintaining public order, the Burgomaster acts as the chief of police. Municipal Council elections were held on 2 March 1994; turn-out was 64%. CDA gained 21·6% of all votes cast; PvdA, 16·9%; local independent parties, 16·4%; VVD, 15·5%.
